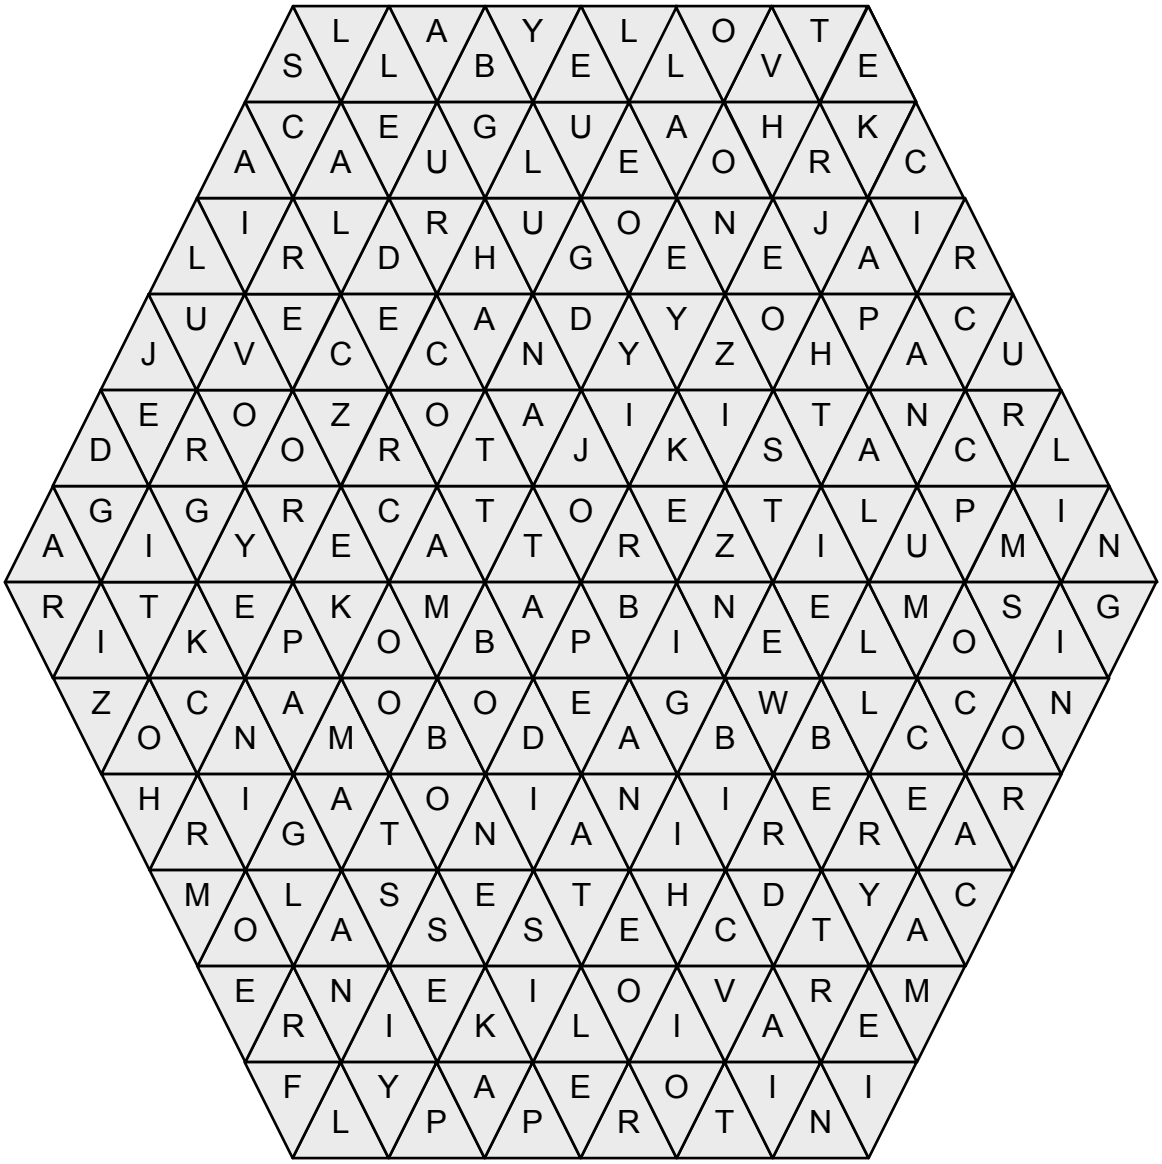
Imagine a word-search, but you've got to figure out the words, too! Meet the SUPER SEARCH!

In this hexagonal grid, there are 36 hidden words (forwards, backwards, or diagonally) that fall under SIX categories. Circle the answers as you find them -- like with a traditional word-search, letters can be used in multiple words.

When you are finished, there will be 14 letters that aren't used in any words, which, when written in order, will give you your final code.

Your SIX word categories (with six words each): Team Sports, Sticky Things, Asian Countries, Pasta Varieties, Sesame Street Muppet Characters, and Major Book Awards


None of the answers are plural.
