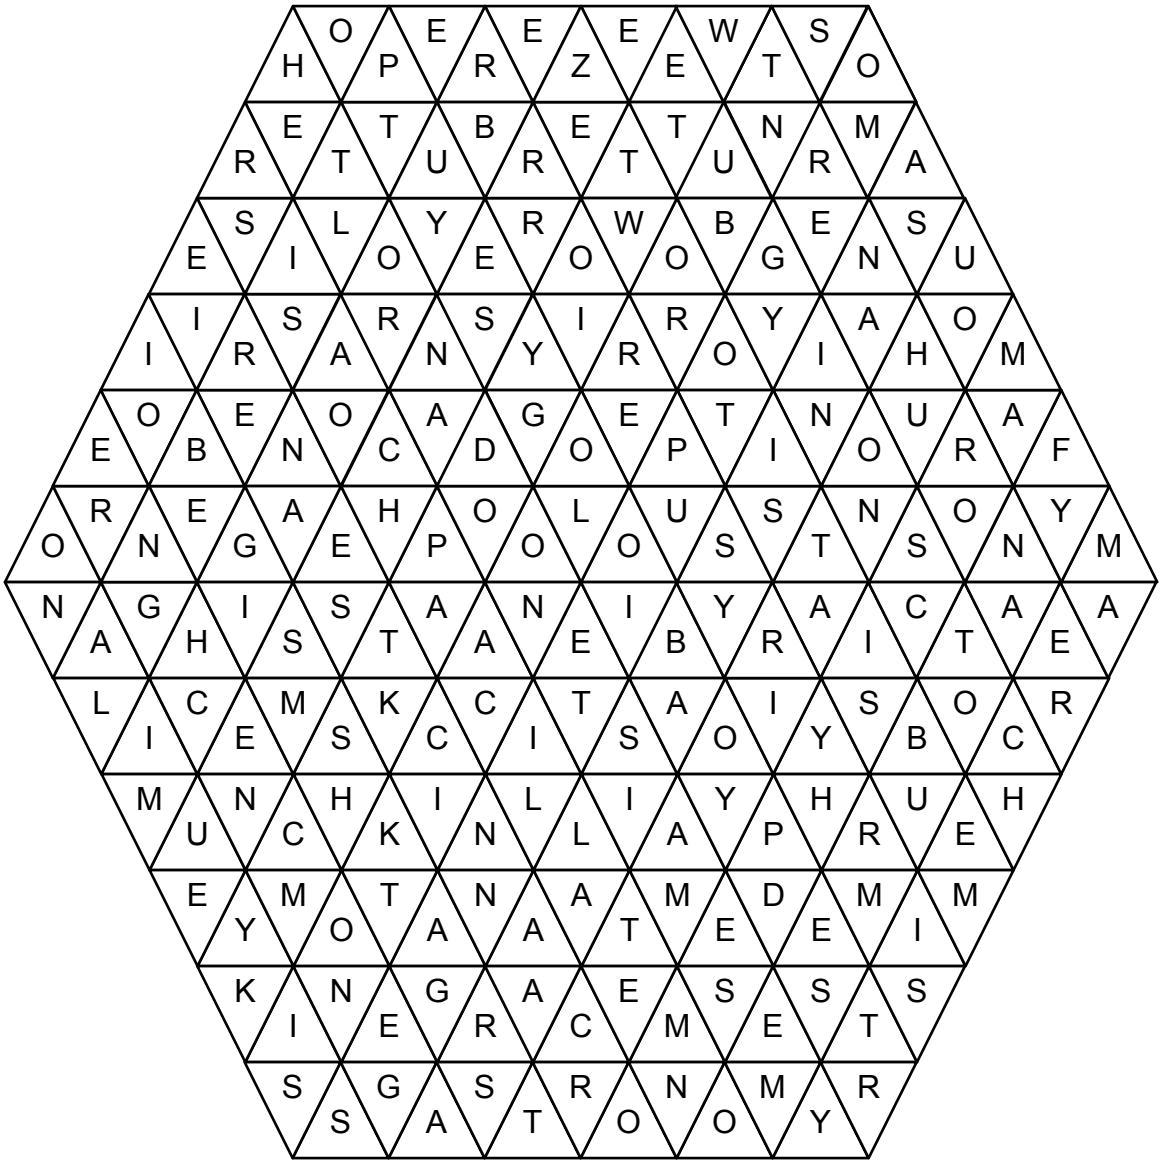
SUPER SEARCH FIVE!

Imagine a word-search, but you've got to figure out the words, too! Meet the SUPER SEARCH!

In this hexagonal grid, there are 36 hidden words (forwards, backwards, or diagonally) that fall under SIX categories. Circle the answers as you find them -- like with a traditional word-search, letters can be used in multiple words.

When you are finished, there will be 7 letters that aren't used in any words, which, when written in order, will give you your final code.

Your SIX word categories (with six words each): Well-Known Bands with One-Word Names, Lakes with an **area** of 2500 Square Miles or larger, Science Classes, Cat Breeds, Store-Bought Cookie Names, and First Names that are also Verbs (any tense)


All words have at least 3-letters, are not plural (UNLESS the brand or band name is plural), and do not use abbreviations. No words are entirely contained within other words. Wondering whether or not a band is well-known? They definitely need to have their own Wikipedia Page!
