Thank you for purchasing this Yamaha product. This product is an exceptionally versatile and compact guitar amplifier designed for use in your home, rehearsal spaces, and other places—virtually anywhere you want it! We recommend that you read this manual carefully so that you can fully take advantage of the advanced and convenient functions of the product. We also recommend that you keep this manual in a safe and handy place for future reference.

Main Features

- Sophisticated guitar amplifier utilizing advanced amp modeling, made possible with Yamaha’s original VCM technology
- Advanced wireless guitar transmitter Relay G10T (made by LINE6) for wireless use (THR30II Wireless and THR10II Wireless only)
- Bluetooth® capability enables playing music and editing sound settings from a smart device and a computer.
- Built-in rechargeable battery enables use without power adaptor.
- Yamaha’s original Extended Stereo technology enables an exceptionally wide stereo image, much wider than the unit’s compact size.
- The audio interface capability enables recording your guitar to computer via USB.
- Incorporates a chromatic auto tuner.

* What is VCM Technology?
  An original physical modeling technology developed by Yamaha, VCM Technology reproduces the characteristics of analog circuitry at a micro level to accurately reproduce the sound of the modeled equipment.

Names and Functions

Control Panel

THR30II Wireless

① [ ] (Power Button) / Power Button LED
This is the unit’s power button. When the power is ON, the Power Button LED, the lamp corresponding to the selected amp type and the Power Lamp in the speaker cabinet light.

② LED Display
Indicates each of the THR-II’s settings and conditions.

③ [TAP/TUNER] button

Tuner Function
Holding the switch for 1 second engages the tuner function and lights the  ▼ ▲ ▼  indicators. The tuner is calibrated to A4=440Hz. Tune the guitar until the desired pitch appears in the LED display. When only the circle ( ) in the center of the ▼ ▲ ▼ display is visible, tuning is accurate.

Press the [TAP/TUNER] button (less than one second) to turn OFF the tuner function.

* When the tuner function is set to ON, the guitar sound to the main speaker, [PHONES] jack, and [USB] jack is muted. The sounds from the [AUX] jack, [USB] jack and Bluetooth are output to the main speaker and [PHONES] jack.

THR10II Wireless

THR10II

① [ ] (Power Button) / Power Button LED
This is the unit’s power button. When the power is ON, the Power Button LED, the lamp corresponding to the selected amp type and the Power Lamp in the speaker cabinet light.

② LED Display
Indicates each of the THR-II’s settings and conditions.

③ [TAP/TUNER] button

Tuner Function
Holding the switch for 1 second engages the tuner function and lights the  ▼ ▲ ▼  indicators. The tuner is calibrated to A4=440Hz. Tune the guitar until the desired pitch appears in the LED display. When only the circle ( ) in the center of the ▼ ▲ ▼ display is visible, tuning is accurate.

Press the [TAP/TUNER] button (less than one second) to turn OFF the tuner function.

* THR10II Wireless only

* When the tuner function is set to ON, the guitar sound to the main speaker, [PHONES] jack, and [USB] jack is muted. The sounds from the [AUX] jack, [USB] jack and Bluetooth are output to the main speaker and [PHONES] jack.
Names and Functions

- **Tap Tempo Function**
  When an ECHO or ECHO/REV effect is selected with the [ECHO/REV] knob control, the tempo of the delay can be set by tapping (more than twice) on the switch.

- **Extended Stereo Setting**
  Hold the switch for more than three seconds to switch the Extended Stereo* function ON/OFF.
  ON: “#” on LED Display is off (default setting).
  OFF: “#” on LED Display is lit.
  * Extended Stereo: The Extended Stereo function produces a much wider stereo field. Extended Stereo affects the sounds from the [AUX] jack, [USB] jack and Bluetooth as well as the guitar sounds with reverb effects applied.
  * The Extended Stereo setting (ON/OFF) is saved when the power is turned OFF.

4 **[AMP] knob**
Selects the amp type. The lamp for the corresponding amp type lights.
  * When the power is turned ON, the most recent amp type is selected.

Tips on Creating Sound
Using the [GAIN] knob and [MASTER] knob in combination gives you broad control over the sound for each amp type, except ACO and FLAT. Setting the [GAIN] knob and [MASTER] knob properly provides the desired amount of distortion on the power amp. Once you have the desired sound, use the [GUITAR] knob to set the overall volume of the guitar sound.

5 **[AMP] switch (THR30II Wireless only)**
Selects the amp mode. Selects the amp modeling by combination of amp mode and amp type. The [AMP] knob lamp lights for the corresponding amp mode color.
For further details of amp modeling settings that can be selected by combining the amp mode and amp type, refer to the Amp Modeling List (page 19)

6 **[GAIN] knob**
Adjusts the amount of guitar distortion. Turn the knob to the right to increase the amount of distortion.
  * When ACO is selected with the [AMP] knob, the modeled sound is a mixture of the front-mic'd sound and pickup sound of an acoustic electric guitar. (Minimum setting produces the direct pickup sound only. Maximum setting produces the mic sound only.)

7 **[MASTER] knob**
Adjusts the volume for the guitar sound. Turn the knob to the right to increase the volume and create power amp distortion and change in the low-range frequency.
  * When BASS, ACO or FLAT is selected with the [AMP] knob, this only adjusts the volume.

8 **[BASS] knob**
Tone adjustment for the guitar's sound. Turn the knob to the right to enhance the low-range frequencies.

9 **[MIDDLE] knob**
Tone adjustment for the guitar's sound. Turn the knob to the right to enhance the mid-range frequencies.

10 **[TREBLE] knob**
Tone adjustment for the guitar's sound. Turn the knob to the right to enhance the high-range frequencies.

11 **[EFFECT] knob**
Selects one of four different effects: CHORUS, FLANGER, PHASER, or TREMOLO. Turn the knob to the right to increase the amount of each effect.
  * Turn the knob fully to the left to set the effect OFF.
12 [ECHO /REV] knob
Selects one of four different effects: ECHO (tape echo), ECHO/REV (tape echo/reverb), SPRING (spring reverb), and HALL (hall reverb).
Turn the knob to the right to increase the amount of each effect.
* Turn the knob fully to the left to set the effect OFF.
* When ECHO or ECHO/REV is selected, the [TAP/TUNER] button ③ can be used to set the delay time.

13 [GUITAR] knob
Adjusts the overall volume of the guitar sound.
* This knob's setting has no effect on the signal sent to the [USB] jack ④.
* The volume output to the [LINE OUT] [L] [R] jack (THR30II Wireless only) is constant regardless of the setting of the [GUITAR] knob.

14 [AUDIO] knob
Adjusts the audio playback volume for audio from the computer connected to the [USB] jack ④, an audio device connected to the [AUX] jack ⑦, or a smart device connected by Bluetooth (page 10).

15 [INPUT] jack
This is a standard phone jack used to connect a guitar to the THR-II.
* Connecting the Relay G10T to the [INPUT] jack starts charging that device automatically. (THR-II Wireless only)
* The optimal channel is set automatically by connecting the Relay G10T to the [INPUT] jack for at least 10 seconds. (THR-II Wireless only)

16 [PHONES] jack
This is a stereo mini phone jack used to connect stereo headphones to the THR-II.
* Speaker sound is muted when a plug is inserted into the [PHONES] jack.

17 [AUX] jack
This is a stereo mini phone jack used to connect an external audio device to the THR-II.
* The signal received at the [AUX] jack is not sent to the [USB] jack ④.

18 [USER MEMORY] [1] [2] [3] [4] [5] button
Saves up to five sets of amp section controller settings (GAIN, MASTER, BASS, MIDDLE, TREBLE, EFFECT, ECHO/REV).
Press and hold the number of the desired [USER MEMORY] button for saving your settings to (about 2 seconds).
The save operation is complete when the memory number for the button being pushed appears in the LED Display ②. Press one of the numbered buttons (less than 2 seconds) to recall the saved settings.

19 [Bluetooth] button (THR30II Wireless only)
Set the Bluetooth. Hold the Bluetooth button (for more than three seconds) to switch the pairing mode (the LED Display ② flashes in green).
For further details of Bluetooth connecting, refer to the Connecting to a smart device. (page 10)
Names and Functions

Rear Panel

2️⃣ [LINE OUT] [L] [R] jack (THR30II Wireless only)
These are standard phone jacks used to output line level audio signals. For connection to external devices with line level signals. These jacks can be connected to phone-type (balanced/unbalanced) plugs.

2️⃣ [USB] jack
This jack is used to connect THR-II to a computer via a USB cable.

2️⃣ [15V] DC IN connector
Connects the supplied power adaptor.

About the Default Settings
To reset all contents stored in the user memory, switch on the power while holding down [USER MEMORY] buttons [1], [3], and [5].

NOTICE
All contents stored in the user memory will return to factory defaults when the unit is initialized.

Hold down switches [1], [3], and [5].

Switch on the power.
The THR-II can be used either with a conventional wired connection with an appropriate cable, or with a wireless connection.

**Connection Example (on THR30II Wireless)**

- Make sure that all devices to be connected to the unit by cable are turned off.
- When connecting the unit to an external device, check the shape of the jack and use an appropriate cable that matches with the jack’s specifications and connect it securely.

**Connection**

- **Playing music/audio**
  - Make sure to adjust the device’s level appropriately to avoid distortion.
- **Wireless tone editing with the iOS/Android app (THR Remote).**
- **Wireless control with a third-party Bluetooth footswitch (via THR Remote).**

**NOTE**
When using both cable and wireless connection simultaneously, the cable connection outputs sounds.

- **Order for turning the power on**
  - THR30II Wireless → Mixer → Amp (or powered speaker)
- **Order for turning the power off**
  - Amp (or powered speaker) → Mixer → THR30II Wireless

**Precautions for using the USB jack**
Make sure to follow the points at next page when connecting a computer to the THR-II USB jack, to avoid loss of data by the computer and prevent the THR-II from freezing or shutting down.
NOTICE

- Use an AB type USB cable of less than 3 meters. USB 3.0 cables cannot be used.
- Be sure to wake the computer from suspended/sleep/standby mode before connecting a computer to the USB jack.
- Always quit all applications that are running on the computer before connecting or disconnecting the USB cable and set the volume output on the computer to its minimum level.
- When connecting or disconnecting the USB cable, be sure to set the OUTPUT controls ([GUITAR] knob and [AUDIO] knob) on the THR-II to their minimum levels.
- Wait at least 6 seconds between connecting or disconnecting the USB cable.

Power

The THR-II Wireless can operate on either DC power (via the power adaptor) or with the built-in rechargeable battery. The THR10II can operate on DC power (via the power adaptor).

* When you use THR-II Wireless with the built-in rechargeable battery, the output sound may become small. (page 16)

** When using the power adaptor
Connect the supplied power cord to the power adapter. Connect the supplied power adaptor to the [15V] DC IN jack located on the rear panel of the THR-II. Connect the AC plug to a power outlet.

* Follow the bundled Safety Instruction Sheet before making connections.

** Turning the power on and off
Press the [ ] power button on the top of THR-II for one second to turn the power on. The LED of the power button lights when turning the power button on. The LED of the THR-II Wireless lights in green while charging. Otherwise, it lights in red.

* Follow the bundled Safety Instruction Sheet before making connections.

** Checking the battery level
Press the [ ] power button on the top of the THR-II for less than one second to check the battery level. The remaining battery capacity is displayed in four levels of 3, 2, 1 and L (Low).
Connection

**Charging to the built-in rechargeable battery (THR-II Wireless only)**
Connect the supplied power adaptor to the DC IN jack located on the rear side of the THR-II Wireless. The LED of the power button lights in green while charging.

* For further details of the Power Button LED state, refer to the THR30II Wireless, THR10II Wireless* Power Button LED status list (page 17).

**NOTE**
- When you use the THR-II Wireless in an environment of extreme temperatures, charging may not be possible.

**Charging the Relay G10T (THR-II Wireless only)**
Connect the Relay G10T to the [INPUT] jack located on the top of the THR-II Wireless. The built-in rechargeable battery starts charging automatically.

* When you resume charging after pulling out the Relay G10T from the INPUT jack of the THR-II Wireless, connect the Relay G10T to the INPUT jack after more than 2 seconds.
* If the supplied power adapter is not connected to the THR-II Wireless, charging of the Relay G10T will not start.
* Refer to the manual of Relay G10T for the meaning of LED display indications on the Relay G10T.

**NOTE**
- After charging, unplug the Relay G10T from the THR-II Wireless.
- When the THR-II Wireless is turned off and the power adapter is connected, the Relay G10T is charged by simply connecting. However, the THR-II Wireless is initially set to turn off the power when the Relay G10T charging is finished. In this state, leaving the Relay G10T connected to the THR-II Wireless may result in discharge of the Relay G10T’s battery.
- You can release the setting that turn off the power of the THR-II Wireless automatically, after the Relay G10T is charged, with the THR Remote.

**Connecting to guitar by wireless (THR-II Wireless only)**
The THR-II Wireless can connect with the Relay G10T wireless guitar transmitter (made by LINE6) by wireless. Moreover, the optimal channel is set automatically by connecting the Relay G10T to the [INPUT] jack located on the top of the THR-II Wireless for at least 10 seconds. For details on wireless connection, refer to the Relay G10T’s manual.
Connecting to a smart device

By connecting a smart device to the THR-II, you can:
• Play audio files on a smart device via Bluetooth.
• Edit effects and tone controls on a smart device.

Playing audio files on a smart device via Bluetooth

To play audio from a smart device via Bluetooth, configure Bluetooth on the smart device while in the pairing mode.

• Setting the THR-II to pairing mode
  1. Check that the ○ at the top of the LED DISPLAY is unlit (disconnected).
  2. Press and hold the [Bluetooth] button* located on the top of the THR-II for three seconds.
  3. Check that the LED DISPLAY flashes in green (pairing mode).

• Configuring Bluetooth on the smart device
  4. Complete the Bluetooth configuration of the smart device within 3 minutes after entering pairing mode.
     * For details on Bluetooth configuration, refer to the manual of your smart device.
  5. Check that the LED DISPLAY is lightning in green (connected).

Confirm sound output from the THR-II by playing music on the smart device.

NOTE
• After turn off the THR-II, and when turn on the power and the Bluetooth connection record remains on both the THR-II and the smart device, reconnect the Bluetooth automatically.
**Editing effects and tone controls on a smart device**
Install the THR Remote app to the smart device to allow editing of effects and tone controls on that device.

- **Installing THR Remote (Android, iOS)**
  1. Access the app distribution service on the smart device.
     - Android devices: Google Play*
     - iOS devices: App Store
  2. Search for the THR Remote app.
  3. Download and install the THR Remote app following the onscreen instructions.

- **Configuring Bluetooth MIDI**
  1. Start the THR Remote.
  2. Touch the Bluetooth icon on the display.
  3. Connect to LE_THRII following the onscreen instructions.

- **Starting the THR Remote app**
  Start the THR Remote app on the smart device.

Press the desired [USER MEMORY] button for 2 seconds to save the settings made with THR Remote to the THR-II’s built-in user memory (page 5).

* For connecting general android devices, refer to the Smart Device Connection Manual for Android.
* For connecting general iOS devices, refer to the iPhone/iPad Connection Manual.

Connecting to a computer

Connecting a computer to the THR-II makes the following possible:

- Outputting audio files played on the computer with the THR-II.
- Record with Cubase AI.
- Edit effects and tone controls on the computer.

**Outputting audio files played on the computer with the THR-II**

**Configuring and Operating**

Select the model name (THR30II WIRELESS, THR10II WIRELESS, THR10II) of the connected THR-II as the computer's audio output setting.

**Windows**

Control Panel → Sound → “Sound” tab

**Macintosh**

System Preferences → Sound → “Output” tab

Connect the computer's USB connector to the USB connector on the THR-II as shown in the diagram below.

**USB Connection diagram**

You can play a guitar along to the audio played on the computer.

Use the [AUDIO] knob to adjust volume of the audio played on a computer.
Connection

Recording with Cubase AI

- Installing Cubase AI
  A download access code for Cubase AI music production software is included in the THR-II. Using Cubase AI enables you to record a guitar connected to the THR-II and edit songs.

Cubase AI System Requirements
For the latest information, refer to the Steinberg website below.
  https://www.steinberg.net/

Installing Cubase AI
To install Cubase AI, an active Internet connection is required. Follow the instructions provided in the “Cubase AI Download Information” sheet to download, install and activate the software.

- Connecting to the THR-II
  Connect the computer's USB connector to the USB connector on the THR-II as shown in the diagram below. (See the USB Connection diagram on page 12.)
  * For more information on operating, refer to the Cubase AI’s Help Menu (see the illustration below).

- Editing effects and tone controls on a computer
  - Installing the THR Remote app (Windows, Mac)
  1. Access the following website and extract the THR Remote file after downloading.
     https://download.yamaha.com/
     * Check the above website for information on system requirements.
     * The THR Remote may be updated without notice. Check the above website for the latest details and updates.
  2. Install the THR Remote app to your computer.

- Configuring and Operating after Installing
  Connect the computer’s USB connector to the [USB] connector on the THR-II as shown in the diagram below. (See the USB Connection diagram on page 12.)
  Press the desired [USER MEMORY] button for 2 seconds to save the settings made with THR Remote to the THR-II’s built-in user memory (page 5).
**Troubleshooting**

**No power**
- Connect the power adaptor properly (see page 8).
- Make sure that the THR-II Wireless been properly charged, when the power adapter is disconnected (see page 8).

**No sound**

**No guitar sound is output (wired connection)**
- Connect the guitar to [INPUT] jack properly (see page 7).
- Make sure that the volume control on the guitar is turned up properly.
- Make sure that the [GAIN] knob, [MASTER] knob and [GUITAR] knob are not set to minimum (see pages 4, 5).
- When the [AMP] knob is set to CLEAN, make sure that all of the [BASS] knob, [MIDDLE] knob and [TREBLE] knobs are not set to minimum (see page 4).
- Don't connect the headphones to [PHONES] jack to outputs from the speaker on THR-II (see page 5).
- Make sure that the COMPRESSOR Level is not set to 0 on the THR Remote app (see pages 11, 13).
- Set the Tuner function OFF (see page 3).
- Make sure that the cable connecting the guitar is not damaged.

**No guitar sound is output (wireless connection)**
- Use the Relay G10T. THR-II Wireless cannot connect to any guitar wireless transmitter other than the Relay G10T.
- Connect the Relay G10T to the INPUT jack located on the top of the THR-II Wireless for at least 10 seconds. The appropriate channel is set automatically.
- Make sure that the volume control on the guitar is turned up.
- Set the Tuner function OFF (see page 3).

**No audio sound is output by Bluetooth**
- Confirm the status of LED display. When the LED is unlit or flashing in green, the devices are not connected via Bluetooth (see page 17).
- When the Bluetooth configuration on the smart device is ON, turn it OFF once and configure "Playing audio files on a smart device via Bluetooth" (see page 10).
- Delete the Bluetooth registration once on the Bluetooth configuration screen on the smart device and configure "Playing audio files on a smart device via Bluetooth" (see page 10).
- Move the smart device and the THR-II closer together.
- Turn off the power of the THR-II. (see page 8)
- Restart the smart device.
  - For details on Bluetooth configuration, refer to the manual of the smart device.
- Disconnect any other Wi-Fi and Bluetooth devices. The connection may be broken due to the influence of other nearby Wi-Fi or Bluetooth devices.

**No audio sound is output from a computer by USB connection**
- Connect the USB cable properly (see page 12).
- Confirm the configuration of the audio output port on the computer (see page 12).
- Confirm the configuration of the computer on the computer or that audio is not muted on the application.
- Make sure the [AUDIO] knob is turned up (see page 5).
- Make sure the USB cable connecting the devices is not damaged.

**No audio sound is output from an external device by AUX connection**
- Connect the cable to the external device properly (see page 7).
- Make sure that the volume control on the external device is turned up.
- Make sure the [AUDIO] knob is turned up (see page 5).
- Make sure the cable connecting the devices is not damaged.
Others

Tap Tempo cannot be set
• Select ECHO or ECHO/REV. The tap tempo cannot be set with SPRING or HALL (see page 4).

A “#” appears in the LED display
• When Extended Stereo is set to OFF, a “#” appears in the LED display (see page 4).

THR-II Wireless cannot be charged
• Keep the THR-II Wireless at room temperature and don’t use it until the built-in rechargeable battery reaches a suitable temperature. If charging cannot be performed after a sufficient time, there may be a problem with the built-in rechargeable battery. If the problem persists, consult your Yamaha dealer (see page 17).

Relay G10T cannot be charged
• When Relay G10T is disconnected from the [INPUT] jack, connect to the [INPUT] jack on THR-II Wireless again after 2 seconds.

Volume is low
• Keep the THR-II Wireless at room temperature and don’t use it until the built-in rechargeable battery reaches a suitable temperature. For safety reasons, the built-in rechargeable battery is designed to limit the volume when the built-in rechargeable battery's temperature rises.

The built-in rechargeable battery charge does not last
• THR-II Wireless's built-in rechargeable battery may have reached the end of its life. If the problem persists, consult your Yamaha dealer.
  • Charge the battery every six months to maintain the battery power function.
  • The built-in rechargeable battery has a limited lifetime. The capacity decreases gradually with the number of times of use and the passage of time.
  • The lifetime of the built-in rechargeable battery depends on the storage method, usage and environment.
Specifications

Technical Specifications

Digital Section

Built-in Amp Simulations
CLEAN, CRUNCH, LEAD, HI GAIN, SPECIAL, BASS, ACO*, FLAT
There is an amp mode MODERN, BOUTIQUE, and CLASSIC for each amp type (THR10II Wireless and THR10II can switch the amp mode by THR Remote)
* Mic simulation

Built-in Effects
• CHORUS, FLANGER, PHASER, TREMOLO
• ECHO, ECHO/REVERB, SPRING REVERB, HALL REVERB
In addition to the above, THR Remote can choose two types of revere Room and Plate.
• COMPRESSOR*
• NOISE GATE*
* Can be choose by THR Remote.

Built-in Chromatic Auto Tuner

Knob/Switch
AMP, GAIN, MASTER, BASS, MIDDLE, TREBLE, EFFECT, ECHO/REV, GUITAR, AUDIO, USER MEMORY button x 5, TAP/TUNER button, Amp switch*, Bluetooth button*
* Only THR30II Wireless

Display
LED x 1

Connections
INPUT (Standard Monaural Phone Jack, Unbalanced), LINE OUT (Standard Jack, Balanced/Unbalanced), PHONES (Stereo Mini Jack), AUX (Stereo Mini Jack), USB TYPE B, DC IN (15V)

A/D Converter
24-bit + 3 Bit Floating

D/A Converter
24-bit

Sampling Frequency
48 kHz

Memory Allocations
User Memory: 5

Input Level
GUITAR IN: -10 dBu
AUX IN: -10 dBu
PHONES Output Level
10 mW

Rated Output
THR30II Wireless: 30 W (15 W + 15 W)
THR10II Wireless, THR10II: 20 W (10 W + 10 W)

Maximum output during built-in rechargeable battery operation
THR30II Wireless, THR10II Wireless: 15 W (7.5W + 7.5W)

Power Source
Power Adaptor or built-in rechargeable battery

Power Adaptor (YNT345-1530)
Built-in rechargeable battery
Continuous driving time*: About 5 hours
* Depends on usage situation

Power Consumption
THR30II Wireless, THR10II Wireless: 22 W
THR10II: 11 W

Dimensions (W x H x D)
THR30II Wireless: 420 x 195 x 155 mm (16.5” × 7.7” × 6.1”)
THR10II Wireless, THR10II: 368 x 183 x 140 mm (14.5” × 7.2” × 5.5”)

Weight
THR30II Wireless: 4.3 kg (9 lbs. 8 oz.)
THR10II Wireless: 3.2 kg (7 lbs)
THR10II: 3.0 kg (6 lbs. 1 oz.)

Accessories
• Power Adaptor (YNT345-1530)
• Quick Guide
• Safety Instructions Sheet
• Service offices list
• Cubase AI Download Information

Bluetooth
Bluetooth Version: Bluetooth Ver. 4.2
Supported Profile: A2DP
Compatible Codec: SBC
RF Outout Power: Bluetooth class 2
Maximum Communication Range: 10m (33ft) (without obstacles)

* The contents of this manual apply to the latest specifications as of the publishing date. To obtain the latest manual, access the Yamaha website then download the manual file. Since specifications, equipment or separately sold accessories may not be the same in every locale, please check with your Yamaha dealer.
Specifications

THR30II Wireless, THR10II Wireless* Power Button LED status list

* Since the THR-10II does not have a built-in rechargeable battery, the power button LED status is only red (ON) and off (OFF).

## Amp Modeling List

<table>
<thead>
<tr>
<th>Mode</th>
<th>Amp Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Classic</td>
<td>Clean</td>
<td>A low-gain preamp for sparkling American-style cleans, with 6L6 tubes in the output stage for brightness and a strong midrange.</td>
</tr>
<tr>
<td></td>
<td>Crunch</td>
<td>EL84 power tubes in a true Class-A configuration with a highly responsive EQ for rich, complex harmonic tones and warm overdrive. Inspired by British chime.</td>
</tr>
<tr>
<td></td>
<td>Lead</td>
<td>A low-gain preamp with an EL34-based power section that breaks into classic British overdrive as the master volume is pushed.</td>
</tr>
<tr>
<td></td>
<td>Hi Gain</td>
<td>Powerful modern distortion that fills out as the high-gain preamp is pushed. Tread carefully after 12 o’clock.</td>
</tr>
<tr>
<td></td>
<td>Special</td>
<td>12AX7 and 6L6 tubes in pursuit of the “Brown” sound. Set the gain around 11 o’clock for classic rock crunch, or crank it for saturated rhythm tones.</td>
</tr>
<tr>
<td></td>
<td>Bass</td>
<td>Woody, vintage tone with late breakup.</td>
</tr>
<tr>
<td></td>
<td>Acoustic</td>
<td>Designed for acoustic-electric guitar, modeling the response of a boutique condenser microphone.</td>
</tr>
<tr>
<td></td>
<td>Flat</td>
<td>A neutral tone with no amp or speaker modeling. Great for connecting other instruments to your THR.</td>
</tr>
<tr>
<td>Boutique</td>
<td>Clean</td>
<td>A low-watt EL34 design. Turning up the preamp gain will thicken up the cleans, then push into bluesy overdrive.</td>
</tr>
<tr>
<td></td>
<td>Crunch</td>
<td>A deceptively simple amp circuit with just a single 12AX7 and EL84. A full, no-frills tone that is highly responsive to picking dynamics.</td>
</tr>
<tr>
<td></td>
<td>Lead</td>
<td>A version of the Classic/Lead circuit, modified for extra gain with a darker tone and scooped mids.</td>
</tr>
<tr>
<td></td>
<td>Hi Gain</td>
<td>ECC83s into 6L6s for high gain with a highly responsive EQ, inspired by German engineering.</td>
</tr>
<tr>
<td></td>
<td>Special</td>
<td>Four 12AX7 preamp tubes into 6L6 output tubes. Tight, fast tracking for crushing high-gain.</td>
</tr>
<tr>
<td></td>
<td>Bass</td>
<td>Full, modern tone that breaks into a fuzz-like overdrive when pushed hard.</td>
</tr>
<tr>
<td></td>
<td>Acoustic</td>
<td>Designed for acoustic-electric guitar, modeling the response of a boutique tube microphone.</td>
</tr>
<tr>
<td></td>
<td>Flat</td>
<td>A neutral tone with no amp or speaker modeling, and a slight bass boost. Great for connecting other instruments to your THR.</td>
</tr>
<tr>
<td>Modern</td>
<td>Clean</td>
<td>A boutique, low-watt EL84 design that adds fullness and sustain as the master volume is turned up. A great match for neck pickups.</td>
</tr>
<tr>
<td></td>
<td>Crunch</td>
<td>A mid-volume boutique design with 6550 power tubes. Listen for tight bass response and a singing sustain.</td>
</tr>
<tr>
<td></td>
<td>Lead</td>
<td>A high-gain design with 12AX7s into EL34s, for the tone that defined 1980s hard rock and heavy metal.</td>
</tr>
<tr>
<td></td>
<td>Hi Gain</td>
<td>A boosted version of the Classic/Special amp, with even more gain for aggressive rhythms or searing leads.</td>
</tr>
<tr>
<td></td>
<td>Special</td>
<td>A classic overdrive circuit before the preamp tightens low-frequency response and provides even more gain. Ideal for extended-range guitars.</td>
</tr>
<tr>
<td></td>
<td>Bass</td>
<td>Vintage voicing with early breakup for overdrive that works well with bass or guitar.</td>
</tr>
<tr>
<td></td>
<td>Acoustic</td>
<td>Designed for acoustic-electric guitar, modeling the response of a boutique dynamic microphone.</td>
</tr>
<tr>
<td></td>
<td>Flat</td>
<td>A neutral tone with no amp or speaker modeling, and a slight mid scoop. Great for connecting other instruments to your THR.</td>
</tr>
