Ex-Judge Comstock of Detroit Cives to the People His Opinion-Satisfied Only with Hood's.

The testimonials in favor of Hood's Sarsaparilla come from people in all ranks of life. Its great power to enrich and purify the blood is recognized by physicians, clergymen, teachers, lawyers and judges, who, owing to sedentary habits and severe nervous strain, often need its vitalizing and nerve-strengthening influence. Ex-Judge Comstock of Detroit says:

"I am a busy man and have little time for recreation, and I find my system sometimes needs toning up. At such times I take two or three bottles of Hood's Sarsaparilla, and then I find I am all right. I have sometimes been persuaded to try other and cheaper kinds, but I have never been satisfied with anything but Hood's Sarsaparilla." EX-JUDGE A. G. COMSTOCK, 573 Cass Ave., Detroit, Michigan.

It is estimated by that truthful editor Carlton of the Grass Lake News, a man who was never known to tell a lie, that from 1,500 to 2,000 pounds of fish have been taken from Grass lake this year. This does not take into account the little three inch fish ordinarily caught.

Charles Hale has a record for sheep shearing that will rank with the best anywhere. He commenced in March, and completed the season's shearing last Saturday, putting in about 60 days at it. He sheared 1,293 sheep in that time; the fleeces are estimated to weigh 8 pounds each, but aggregating 190,344 pounds, and the price will average 17 cents, making the value of this season clip 11,758.48.—Milan Leader.

Many men fool with sickness just as a bear fools around a trap. A man doesn't like to own up that he is ill. He says "O, it amounts to nothing. I shall be all right to-morrow." But lie isn't all right to-morrow; nor the next day. Pretty soon the trap snaps to; and he has some serious disease fastened on him.

The only sensible course is to keep away from the trap, and not allow sickness to get any hold on you. It is a frightful mistake to trifle with indigestion and bilious troubles in the belief that they will cure themselves. On the contrary they drag the whole system down with them.

When the appetite and digestion are irregular it shows that the machinery of the bowels is out of order, and not doing its proper work; the blood-circulation is poorly supplied and is being gradually debased by bilious poisons.

The proper alternative for this condition is Dr. Pierce's Golden Medical Discovery. It acts directly upon the digestive functions and the liver, and enables the blood-making glands to supply an abundance of pure blood, rich with the nutritious vital elements which build up healthy flesh and enduring strength.

In all impoverished and run-down conditions the "Discovery" is far better than malt "extracts" or nauseating emulsions. It creates genuine permanent strength. It does not make flabby fat but solid muscle. It is a perfect tonic for corpulent people.

A full account of its properties and marvelous effects in many so-called "hopeless" cases, verified by the patients' own signatures, is given in one chapter of Doctor Pierce's thousand-page illustrated book, "The People's Common Sense Medical Adviser." This splendid volume will be sent free on receipt of 21 one-cent stamps to pay mailing-cost only. Address, Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y. For a cloth-bound copy send 31 stamps.

Having suffered for several years with indigestion, flatulency, and biliousness, I concluded to try your valuable "Golden Medical Discovery." After taking five bottles I was entirely cured. I also suffered from bladder trouble, which was also cured by the "Discovery." I feel like a new man.

On Monday noon, one Joseph Cokallard broke into the blacksmith shop of Sobnmacher & Son, of Chelsea, and stole one hammer and a pair of nippers. Deputy Sheriff Staffan was soon notified of the theft and it was but a short time afterwards that he found the oiltrif and recovered the tools. The thief was at once taken before Justice TrnnBull who immediately sentenced the prisoner to pay a fine of \$15 or 15 days in the county jail. The fine not being paid he was taken to the county jail to serve his trip.—Chelsea Standard.

Last September Byron Lafler, of Milan township, Monroe county, went to Peteisburg to have some grist ground. While in the village he visited some saloons and became intoxicated. On returning home he did not watch his team when they reached the Lake Shore crossing. The team went down the track and upset a load of grist on Lafler. He was found buried under the grist next morning dead. His wife sued the saloonkeepers for damages and a jury after visiting the scene and hearing hot arguments for three days returned a verdict of \$5,000 damages against Edward L. Fisher, a saloonkeeper, and abis bondsmen.

What came near being a fatal drowning accident occurred at the swimming-hole near the Huron river dam in Dexter last Friday afternoon. The victim was Homer Benton, son of Mr. and Mrs. Geo. Benton, and a member of the graduating class of the high school. He was in company with several other boys who were teaching him to swim. In trying to cross the deep hole he became exhausted and sank. Howard Congdon who was a short distance away swam to him and attempted to get him to shore but Homer frantically clutched his resner. He called to the other boys on the shore for assistance but they, thinking it was only a joke, did not respond. By this time Homer had sunk to the bottom and floated down into about six feet of water. Louis Snay who came to the rescue dove down and clutching him by the hair brought him to the surface and with the assistance of Howard brought him to the shore. His body was rigid and apparently life was extinct. The boys at once commenced to work over him and soon two physicians reached the scene. The prompt measures taken resusitated him and he was then able to be taken home. It was perhaps as close a call as one ever had to death and escaped.—Dexter Leader.

A mysterious find of human bones. Last Friday afternoon, Fred. Van Pelt, while plowing some new land upon the old homestead farm, two miles west of Dundee, unearthed some human bones. He reported the find in the village that evening, and next morning Dr. Haynes and others went thereto and dug about the bones and took them from the earth. There were four skulls two of which were taken out whole and the others were broken, besides the other bones of the body. They appeared to have been buried in a hole about 3x2 feet in size and about 2 feet in depth, and the bodies when buried were doubled together and put therein. Doctors who have examined the bones pronounce them belonging to white people, from appearance of the skulls, they are of two men and two women, and from the manner of burial it is thought that the bones belong to victims of some foul murder. They had been buried for a long term of years, nothing of any sort remaining but the bare bones. The farm has belonged to the Van Pillt family for the past 60 years or more, and during that time no such burials had been known or traces thereof seen. The place until lately had been in the woods, and nearly half a mile back from the road.—Dundee Reporter.

Deafness Cannot be Cured by loal applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and then it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars; free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

The Hour for Dinner. The fashionable folk of Edward IV.'s court rose with the lark, dispatched their dinner at 11 o'clock, and shortly after 8 were wrapped in slumber. In the Northumberland House Book for 1512 it is set forth that the family rose at 6 in the morning, breakfasted at 7, dined at 10, and supped at 4 in the afternoon. The gates were all shut at 9, and no further ingress or egress permitted. In 1570, at the University of Oxford, it was usual to dine at 11 o'clock, and sup at 5 in the afternoon. The dinner hour, which was once as early as 10 o'clock, has gradually gone later and later, until now it would be thought very eccentric in the fashionable world to sit down to table earlier than half past 7 o'clock, while others extend it to 9.

Yellow Jaundice Cured. Suffering humanity should be supplied with every means possible for its relief. It is with pleasure we publish the following: "This is to certify that I was a terrible sufferer from Yellow Jaundice for over six months, and was treated by some of the best physicians in our city and all to no avail. Dr. Bell, our druggist, recommended Electric Bitters; and after taking two bottles, I was entirely cured. I now take great pleasure in recommending them to any person suffering from this terrible malady. I am gratefully yours, M. A. Hogarty, Lexington, Ky." JAIL FOR STUDENTS.

QUEER PHASE OF LIFE AT HEIDELBERG UNIVERSITY.

Some of the Names Which Adorn the Prison Register and the "Crimes" For Which Their Owners Were Incarcerated. The Rules of the Place.

In England the student's body is committed to prison only by the civil authority. In Oxford, it is true, the vice chancellor deals with undergraduate naughtiness, principally in the form of debt and insubordination, for which he may impose a momentary penalty, but does not deprive the defaulter of liberty. There is, or was, a legend that a certain apartment under the old Clarendon building was really the university quod," but for its authenticity it is impossible to vouch.

Cambridge has its spinning house for female offenders—not lady students, but ladies who might prove a delusion and a snare to the mere male undergrad. There, if we except the irksome penalty of "gating" (confinement to college or lodgings after a stated hour), our academic efforts at incarceration may be said to end.

In Germany, however, the academic dungeon is a very stern fact. The Heidelberg "career" is famous. Every reader of Mark Twain will recall his entertaining description of the place and how he contrived to visit it, even unwittingly enlisting as his guide a "Herr Professor." His pretext was to see a young friend who had "got" 24 hours and had conveniently arranged the day to suit Mark—for the German student convict goes to prison on the first suitable day after conviction and sentence. If Thursday is not convenient, he tells the officer sent to hale him to jail that he will come on Friday or Saturday or Sunday, as the case may be. The officer never doubts his word, and it is never broken.

The prison is up three flights of stairs, and is approached by a "zugang" as richly decorated with the art work of convicts as the cell itself. The apartment is not roomy, but bigger than an ordinary prison cell. It has an iron grated window, a small stove, two wooden chairs, two old oak tables and a narrow wooden bedstead.

The furniture is profusely ornamented with carving, the work of languishing captives, who have placed on record their names, armorial bearings, their crimes and the dates of their imprisonment, together with quaint warnings and denunciations. Walls and ceilings are covered with portraits and legends executed in colored chalk and in soot, the prison candle forming a handy pencil. Some of the inscriptions are pathetic. One runs, "E. Glinicke, four days for being too eager a spectator of a row." If four days were meted out to a mere spectator, what, one wonders, had been the sentence of the participators? It must have been a moving spectacle.

Another record (also quoted by Mr. Clemens) has the savor of a great name to it. Of course it is the son that is meant, not the father. The legend is, "F. Graf Bismarck, 27-29. H. '74." This Mark Twain interprets as a record of two days' durance vile for Count Bismarck in 1874. Had 1874 been leap year one might have been inclined to interpret the numeral "H" as February. But the "29" makes this difficult. So perhaps the humorist is right.

A third specimen is too tragic for comment. It simply says, "R. Diergandt—for love—four days." Ungenerous successors to that sad chamber have dealt harshly with their fore-runners' reputations by ingenious substitution of heinous crimes, so that certain prisoners go down to posterity as having been punished for theft and murder.

The prisoner must supply his own bedding and is subject to various charges. On entering he pays about tenpence, and on leaving a similar sum. Every day in prison costs sixpence; fire and light sixpence extra. The jailer supplies coffee for a trifle. Meals may be ordered from outside. Every prisoner leaves his carte de visite, which is fixed with a multitude of others on the door of the cell. This queer album is glazed to protect the photographs.

Academic criminal procedure in Heidelberg is curious. If the city police apprehend a student, the captive shows his matriculation card. He is then asked for his address and set free, but will hear more of the matter, for the civil authority reports him to the university. The Oxford regulation, by the way, is in certain cases almost identical. In Heidelberg the university court try and pass sentence, the civil power taking no further concern with the offense. The trial is very often conducted in the prisoner's absence, and he, poor wight, may have forgotten all about his peccadillo until the university constable appears to conduct him to prison. But thither, seeing he may choose his day, he always repairs cheerfully.—London Sketch.

How We Use Our Lives.

If you are fond of such statistics, read this table, drawn up by Gabriel Peignot: A man of 50 years, of ordinary health, of active life, of regular habit, comfortable in all circumstances of money, should give out of 18,250 days 6,082 days to sleep, 550 to sickness, 1,522 to his meals, 5,532 to work, 671 to exercise, to sports, the hunt, travel 3,803 days, and he should have consumed 27,080 pounds of bread, 6,080 of meat, 4,675 of vegetables, eggs and fruit, 31,180 liters of wine, spirits and water.—Boston Journal.

Cables Catch Wales. Submarine cables are usually imbedded in the slimy body of the ocean, but at certain points they hang like wira bridges over deep submarine valleys, so that whales and other large inhabitants of the deep may become dangerous to the cable. Once in a while it is the cable that becomes dangerous to the whales, as recently shown in an accident to the Western Brazilian line. There was some difficulty with the wire, and after many futile efforts the seat of the trouble was discovered seventy-six miles north of Santa Catharina. The cable ship Viking was sent to repair the damage, and began to take up the wire. After the cable proper had been grappled and was wound to the surface of the large drums provided for the purpose it was found that it floated very much easier and was more buoyant than is usually the case. The reason was discovered when in a loop of the cable the carcass of a whale of more than sixty feet in length came into view. It appears that the whale had become caught under the cable, and, not being able to lift it nor go forward nor back, it became suffocated. By its last spasms or attempts to free itself the whale had damaged the cable so that the insulation was rubbed off and the wire became useless.

Treatise on Coquetry. From the Philadelphia Ledger: The single opera glass was first used in the time of Louis XIV., it became the rage and everybody used one. The double opera glass (Jumelle) was invented in 1825, but did not at first find favor with women. A treatise was written in the early part of this century on l'art de loger, in which it was shown that a woman with fine arms would hold the glass with both hands; if she were blessed with fine hands she would take off her gloves; if her neck were long she would recline back in her chair, and so on. It was quite a treatise on coquetry.

KIDNEY TROUBLES

Cured by Lydia E. Pinkham's Vegetable Compound.

"I have been a great sufferer from Kidney trouble; pains in muscles, joints, back and shoulders; feet would swell. I also had womb troubles and leucorrhoea. After using Lydia E. Pinkham's Vegetable Compound Blood Purifier and Liver Pills, I felt like a new woman. My kidneys are now in perfect condition."—MRS. MAGGIE POTTS, 324 Kauffman St., Philadelphia, Pa.

• My system was entirely run down, and I suffered with terrible backache in the small of my back, and could hardly stand upright. I had no appetite. Since taking Lydia E. Pinkham's Vegetable Compound, I have gained fifteen pounds, and I look better than I ever looked before."—MRS. E. F. MORTON, 1043 Hopkins St., Cincinnati, Ohio.

LILLIAN KIPPEN, BOX 77, St. Andrew's Bay, Fla., says:—"Before taking Lydia E. Pinkham's Vegetable Compound, I had suffered many years with kidney trouble. The pains in my back and shoulders were terrible. My menstruation became irregular, and I was troubled with leucorrhoea. I was growing very weak. I began the use of Mrs. Pinkham's medicine, and the first bottle relieved the pain in my back and regulated the menses. It relieved the pain quickly and cured the disease."

PEOPLE WE KNOW.

They are Ann Arbor People and What They Say is of Local Interest.

When an incident like the following occurs right here at home it is bound to carry weight with our readers. When so many strange occurrences go to the rounds of the press, are published as facts, when the intelligent reader knows that they cannot be true, there is no wonder that people become skeptical. On one subject skepticism is rapidly disappearing. This is due to the actual personal experiences of our citizens, and their public utterances regarding them. The doubter must doubt no more in the face of such evidence as this. The public statement of a reputable citizen living right here at home, one whom you can see every day leaves no ground for the skeptic to stand on.

Mr. Lawrence O'Toole, of 1325 Hill street, says: "During the last two years I suffered terribly with my kidneys. The pains across my back were almost constant and were so severe at times that I was often obliged to get my back up against the wall before I could straighten up. I could hardly rest in any position and was as tired in the morning as the night before. I could not stoop to pick anything off the ground and was, generally speaking, used up. The kidney secretions were in a terrible shape, deposited a heavy sediment and were too frequent, greatly disturbing my rest at night. I was bothered much with headache and spells of dizziness. I wore plasters until I was tired of them and took a lot of medicine but it did me no good. When I saw Doan's Kidney Pills advertised I felt confident they would help me and I got a box at Eberbach & Son's drug store. They did at once and in a short time they thoroughly cured me. I now feel as well as I ever did in my life."

NEWS OF TROOPS

Navy Department Receives
Official Information.

THROUGH THE SIGNAL CORPS

Transports with 16,000 Men Under
General Shatter Now Off
Santiago.

The Voyage from Tampa Made Without Incident—Fourteen Cases of Mild Typhoid Fever and Some Measles Among the Troops—Will Be Use in Cuba for 170,000 Troops—Third Call Soon To Be Issued by the President.

Washington, June 21.—The navy department has received a dispatch from the fleet announcing that the troop transports arrived off Santiago Monday. The news of Shatter's arrival came from Lieutenant Colonel Allen of the signal corps, and was sent to General Greeley. It is also stated that direct cable communication has been established to Guantanamo via the French cable.

Mole St. Nicholas, June 22.—[Copyright, 1898, by The Associated Press.]—The United States army for the invasion of Cuba, commanded by General Shatter, arrived off Santiago de Cuba Monday noon. The troops, numbering about 16,000 men, were on board thirty-seven transports. The time and place for the landing of the soldiers had not been decided upon. There were fourteen mild cases of typhoid fever and some cases of measles on board the transports, but the troops, generally speaking, were in good condition and in excellent spirits. The voyage was without incident.

• Washing-ton June 21.—A third call for 75,000 volunteers will result from the council of war at the White House. The operations in Cuba planned by the president and his advisers will find use for 170,000 men—the number for which General Miles asked. Havana, with its garrison of 65,000 Spanish soldiers behind the fortifications, will require 100,000 American besiegers. For the capture of Cienfuegos, Matanzas, Sagua, Bahia Honda, Cardenas and Mariel the rest of the troops are needed.

Call for Troops Certain. The call may be expected in two weeks, when the work of bringing the troops raised under the second call into the army shall be completed. "I'm going to Cuba" is all General Miles will tell of his own future movements. "I don't care to say what part of the field I'm going."

According to the plans arranged for the debarkation of General Shatter's troops the fleet of transports was to lie in a safe place until Sampson had cleared the way for a landing. The selection of the landing place has been left entirely to the judgment of Admiral Sampson and General Shatter, the military commander, and the first business in order upon the arrival of the transport fleet off Santiago would be a war council between Admiral Sampson and some of his naval captains on the one hand and Major General Shatter and his staff on the other, the purpose being to settle all the details of the debarkation.

Avoid the Torpedo-Boats. Meanwhile the fleet of transports would lie out at sea at least ten miles beyond the blockading squadron, in order to be entirely safe from attack by Spanish torpedo-boats. These craft are dangerous enough to full-fledged warships, but a transport would be absolutely helpless against their attack, so the strictest possible watch must be kept by the convoys until the troops are landed, the present being the most critical moment in the whole operation.

The work of debarking the troops is not to be one of hours, but rather days, according to the opinion of army officers. A great deal depends upon the point selected for the landing. It was thought that Aguadores, to the east of Morro castle, about six or eight miles, would be a likely place, in view of the fact that it has a wharf, the property of an iron ore company, which would be extremely useful for landing the heavy supplies and ordnance of the siege train.

Batteries To Be Silenced. It is reported now, however, that this particular wharf has been commanded by Spanish batteries, which have been placed as to give an enfilading fire upon it. If this be so, then the batteries must be silenced by the fleet, else there would be not only loss of life among the troops, but the wharf itself might be destroyed by the Spanish shells. If the landing is made at this wharf no less than two days, it is estimated, will be consumed in getting the expedition ashore, as only one ship can lie there at a time, and there is an enormous quantity of ammunition and stores to be taken ashore.

ATTEMPTS BLANCO'S LIFE.

Havana Volunteer Wounds the Spanish Captain General.

Washington, June 21.—Mail advices have been received in Washington of a recent attempt in Havana to assassinate Captain General Blanco, which was made by Mariano Salva, a young member of the volunteer army. The volunteers parade the streets, unofficially, crying: "Viva Weyler. Down with Blanco!" The attempted killing of the Spanish captain general took place as he was leaving the palace to accompany some officers of his staff on an inspection of the earthworks on the outskirts of the city.

Salva sent a rifle bullet in the calf of General Blanco's leg. The volunteer is a member of the guard on duty around the palace. His younger brother, also a volunteer, was arrested recently on a charge of conspiring with the enemies of Spain against the established government. The younger Salva was tried by a court-martial and condemned to death. His brother made every effort to save him and appeals were made to General Blanco for clemency, but without avail, and the boy was executed. Salva submitted willingly to arrest, believing he had killed General

Blanco and avenged the death of his brother.

Quiet Off Havana Blockade. Key West, Fla., June 21.—A vessel which arrived here from the blockading fleet off Havana reports that there have been no incidents worth noting excepting occasional shooting from Morro castle and the land batteries. Three searchlights have been mounted on the fortifications—one at Cojimar, one at the Morro, and one at the Reina battery. On Friday last three Spanish gunboats and some larger vessels, apparently merchantmen, left Havana harbor and proceeded eastward, close inshore. The auxiliary gunboat Maple fired upon the Spanish ships, and they returned to port and have not since attempted a sortie.

Bryan To Be with Ueneral I-e. Washington, June 21.—Colonel W. J. Bryan's regiment, now stationed in Ne-zraska, has been assigned to the Ninth army corps under the command, at Jacksonville, of Major General Fitzhugh Lee. The Nebraska soldiers will wait for some time before they will go into active service, as it has been practically decided that General Lee will not go either to Porto Rico or Santiago, but will move with the main Cuban expedition to Havana.

Pacificos Dying by Hundreds. Key West, Fla., June 21.—Messages from Havana say that the condition of the pacificos about Havana is wretched. Hundreds have died of late. The government has sent many to the country. The Cubans have allowed them to raise vegetables and their condition is now much improved.

Hobson and His Men Are Safe. New York, June 21.—In response to a cable inquiry, Mr. Ramsden, the British consul at Santiago, sent the following dispatch to The World: "Nothing happened to Hobson or others during the bombardment."

FIFTY PERSONS DROWNED.

Frightful Accident at the Launching of a British Battleship.

London, June 21.—During the launching of the new first-class battleship Albion, of 12,950 tons, at Blackwell, by the Duchess of York, a ceremony at which the United States ambassador, Colonel John Hay and Mrs. Hay and Lieutenant Colonel Well, the United States naval attaché, assisted, the displacement of water caused an immense mass of water to rise on all sides, completely submerging one of the lower stages of the yard and immersing hundreds of people. It is estimated that fifty persons were drowned.

As this dispatch is sent the bodies of twenty-seven men, women and children have been recovered from the scene of the disaster.

The Duchess of York and Colonel Hay and Mrs. Hay and the remainder of the distinguished guests did not see the accident which occurred at the moment when three cheers were called for the successful launching, and the cries and the screams of the victims were drowned by the outburst of hurrahs and the steamers' sirens.

Flour Mill Destroyed. Beloit, Wis., June 21.—A fire which for a time threatened great destruction broke out at 12:30 o'clock in the flour mill of Blodgett's Milling company. The mill is one of the largest in southern Wisconsin, having a capacity of 200 barrels an hour. It is located in the factory district of the city, and for a time it was feared that a whole section of the town would be wiped out. The fire department did good work, and succeeded in preventing the flames spreading to any of the adjoining buildings. The mill was burned to the ground, and the loss will be over \$50,000, partially covered by insurance.

Dr. Miles' Nervine Restores Health.

YNOLE EZEKIEL OBEAR, assessor and J. tax collector, Beverly, Mass., who has passed the 80th life mile stone, says: "Dr. Miles' Restorative Nervine has done a great deal of good. I suffered for years from sleeplessness and nervous heart trouble. Would feel weary and used up in the morning, had no ambition and my work seemed a burden. A friend recommended Dr. Miles' Nervine, and I purchased a bottle under protest as I had tried so many remedies unsuccessfully. I thought it no use. But it gave me restful sleep, a good appetite, and restored me to energetic health. It is a grand good medicine, and I will gladly write anyone inquiring, full particulars of my satisfactory experience."

Discovered by a Woman.

Another great discovery has been made, and that too, by a lady in this country. "Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly, and could not sleep. She finally discovered a way to recovery, by purchasing of us a bottle of Dr. King's New Discovery for Consumption, and was so much relieved on taking first dose that she slept all night; and with two bottles, has been absolutely cured. Her name is Mrs. Luther Lutz. "Thus write W. C. Hammnick & Co., of Shelby, N. C. Trial bottles free at the Dmg Store of Eberbach Drug and Chemica Co., of Ann Arbor, and Geo. J. THE DEMOCRATIC PLATFORM.

The democrats of Michigan controlled the state in the era of honesty and economy in state affairs which preceded the war. Since that period the democrats were in control in Michigan for but two short years, coming in power in 1891. That short Winans administration was one to be proud of. What the democrats then did is thus told in the Grand Rapids platform:

"We call attention to the fact that • who the democratic party came into power in this state in 1891 for the first time in many years, it promptly inaugurated measures looking to the equal and just taxation of railroad and other corporations. It passed a law compelling railroads to carry passengers at two cents per mile, which has been sustained by the supreme court of the state; it established a franchise fee for corporations, which has produced large revenues; it restricted the right of consolidation of competing railroads; it inaugurated the first Australian ballot law ever enacted in the state, designed to prevent the coercion of the votes of workmen by corporate agents; it enacted the first practical and effective law for the protection of mechanics' liens; it repealed the law which, practically exempted mining companies from taxation, and compelled them to pay their just share of taxes. It introduced business methods in all branches of the state government by which the people were better served at much less expense than any prior or subsequent administration."

So much for past performance. For the future the promises are as good. They can best be told in the words of the platform:

"We promise a continuance of this work. We believe and confidently assert that the record of the republican party in this state precludes its support of any measures not satisfactory to the combinations of capital which have been the chief development of its policy. We demand the passage of state laws which shall keep the control of corporate action at all times in the hands of the people, and place a limit to permissible extortion by fixing a maximum charge for right of right and passenger service, and compel recognition of the public rights by the holder of every franchise. We demand a strict supervision of telegraph, telephone, express and other corporations using similar privileges, that their charges for services shall be held within reasonable limits, and the rights of patrons vigorously protected."

"We condemn the republican party of Michigan for its machine methods and its subservience to corporate wealth by which, in the last legislature, it controlled the state senate and through which it boasted that in the future all attempts to equalize taxes or impose just burdens upon corporations shall be defeated; we appeal to the people of the state to select a democratic legislature in both branches, and thus guarantee reforms on those important questions."

The democratic party may well be proud of their candidate for governor, Justin R. Whiting, of St. Clair. He is a brainy man, an honest man, a man of clear convictions and he is a democrat of long standing in the party who has done excellent service in congress. If electors made it a rule to vote for the best qualified man for the office of governor, Justin R. Whiting would have an overwhelming majority in November.

That the democratic campaign in Michigan this year will not be a mere formal matter is clearly indicated by the selection of Daniel J. Campau as the chairman of the state committee. Mr. Campau is a genius as an organizer and will throw experience and push into the campaign.

The United States has been doing a great business with Europe during the past year. For the eleven months ending May 31, our exports were \$1,135,485,618. This is an increase of \$400,000,000 in four years.

ARMY NOTES.

H. Danforth, Co. I, has been transferred to Co. A.

Mosquito netting is in great demand among the soldier boys at Camp Thomas.

The students from Ann Arbor have received "honsewives" from their lady friends at home.

Capt. Ross Granger is chairman of a committee of officers to arrange for a minstrel show in camp.

The 24 buglers with the 31st have been added to the band and turn out with it in true regular army style.

Capt. Granger in a letter says "the rations at first were a little tough, but such is war; we did not ooine out here for a picnic."

Private Ernest Hinz, of Ann Arbor, now at Chickamauga Park, has been transferred from Co. H to Co. A at his own request.

Shelter, or "pup" tents as they are called, have been issued to the 31st regiment. They will accommodate two men each and each man will carry half of one on the march.

Richard Flynn, Arthur C. Warren, C. F. Jintner, Osar F. Brnkhardt, C. F. Stevens and Ralph V. D. Magoffio, have been promoted to corporals in Co. A, 31st Reigment, U. S. V.

Co. A has a little money saved at Island Lake, which is used to add spice to their government rations by adding to them such extras as oatmeal, syrup, ginger snaps, eggs, cabbage and milk.

Each company at Camp Thomas has as rations fresh beef six days out of ten, bacon three days, salmon steak one day, potatoes one or two meals every day; beans, rice and tomatoes alternating to suit the taste of the men; fresh bread every day; coffee with sugar and hard tack.

Three sentinels from different regiments have been tried for sleeping on their posts. One received six months hard labor under regimental guards and forfeiture of \$10 per month pay during the same time, another got six months and a fine of \$8 per month, and still another three months and \$8 fine per month.

Governor Pingree, accompanied by Inspector General Case, visited Camp Thomas, Monday. He was enthusiastically received by the regiment, both officers and privates. He made them a characteristic speech in the course of which he assured them that he would not inflict any "papa's boys," or as he called them p. b. officers on them. This assurance was received with renewed cheers.

The post office department has opened a money order branch office at Camp Alger as a branch of the Washington office. It is known as Camp Alger Postal station, Washington, D. C. A money order office has also been opened at Chickamauga park as a branch of the Chattanooga office, known as Chickamauga Park Postal station, Chattanooga, Tenn. Persons desiring to send money orders to soldiers in these camps should request that they be drawn on these stations.

The 31st Michigan has the orack ball team in Camp Thomas. Sunday afternoon it defeated the Indiana team by a score of 13 to 1. The battery was C. Whan and G. Gill, who formerly played with the City league at Detroit. The members of the team are: Arthur Rathburn, G. Gill, C. Whan, Co. K; Winthall, Co. E; Monroe and Bethfee, Co. A; Alfred Devail and Frank Chanter, Co. M; C. Falvey, Co. L. Next Sunday the team will meet that of the First Georgia.

Lieut.-Col. Shubel has evolved a plan for giving the majors a chance to learn how to handle a regiment, and the captains a chance to handle a battalion. He divides the drill with the ranking major, then the next day with the second major in rank, and then the third. When a major commands the regiment the senior captain of his battalion will command the battalion. In this way all the officers will become competent to command the regiment, so that in case of injury to the colonel or lieutenant-colonel, or their absence from the regiment their junior in command will know how to do their work.

Capt. Newell, of Co. H, 31st regiment, in writing to the Jackson Patriot, advises friends of the boys who send them boxes of provisions not to send them rich foods, as it makes them sick, but to send brown bread, pickles, olives, ginger snaps, cookies and crackers. On the other hand some of the boys say that he is too previous in his advice that they have not been made sick by a plethora of good things and that they are only too glad to get them to relieve the monotony of camp food. Bower this may be, one piece of the captain's advice is certainly good and it is this. He says: "The men who wear flannel bandages around the waist leave little or no trouble with the stomach or bowels and if the friends of the members would send them each a couple of these bandages it would be the best thing they could do for the boys."

THE BEAUTY.

Hail I. Now she speaks.
The roses ope their ruddy hearts to list.
The breezes cease to coax the lily bells
To sound their voiceless chime.
The nightingale is mute.

And when she smiles
Tis like the break of day
O'er Persian valleys faint with odors sweet
Or like entrancing melody
Conjured by master hand from strings
Aglow with heavenly fire.

And when she laughs—
Ah, then, the rippling music of her mirth
Awakens sleeping joy, deep toned and full
Of love as bells enriched with gold
On Moscow's towers swung

OLD MESA LIFE.

The Pueblo Woman Was Always the Head of the Household.

When the men went down to the fields, the pueblo was really in control of its rightful owners, the women. In these old communities the woman was the important partner in the household. She was the owner of the house and all it contained. She built it and furnished it with its utensils of daily use. The children traced descent through the mother and took her clan name. The man's position, other than mere provider, was that of an honored guest, and if he presumed disagreeably on his position more likely than not he was sent back to his own home. Far from being the general slave and pack animal that is her sister of the plains tribes, the Pueblo woman's duties were purely domestic, and if she ever worked in the field it was for the common good, to save the scanty harvest in time of need.

The grinding of the many colored corn for bread, the weaving and the making of pottery were her principal occupations, and are to this day. The Pueblo Indians are par excellence the potters of the southwest, and it will be confessed that they come fairly by the title, as an examination of some of the old time ware will prove, although in this case, as in some others, the evolution has not been for the better.

In the small house cell or in the white sunlight the potter sat, and, with scarcely any tools at all, fashioned such specimens of the potter's art as to challenge admiration from us with all our appliances. The use of the potter's wheel was unknown, and the "throwing" of a shape by this means out of the question; but with a hollow bit of basket-ware or a piece of broken pot for a support all the forms from a simple food bowl up to the largest and most elaborate water jars were built up by coil on coil of clay, smoothed or modeled in pattern as the vessel grew, and when one examines some of the ancient pieces, notably those excavated by Dr. Fewkes of the Smithsonian institution, one can but marvel.

Then came the decorating, and in every case, from the simplest to the most elaborate and intricate symbolic design, one must confess that the Indian uses the truest incentive and fundamental art principles. There never is any waste of energy in "effect." The design always means a concrete thing, which appeals to the understanding of the Indians for whose use the utensils are. Through these same pottery forms and their decoration runs one of the strongest chains binding the old to the new. Near me are two tinajas, or water jars. One is many generations, perhaps centuries, old, the other perhaps five years, and yet in shape and general decoration they are much alike, and if the newer one was properly "toned" they would pass as of the same period.—Fernand Lungren in Century.

French Ghost Hunters.

Members of our own Society of Psychical Research, which, by the way, has not been much in evidence of late, should be interested in the fate which has befallen the French body with identical aims known as La Societe des Sciences Psychiques. The latter has just been reduced to a state of hopeless disruption by the conduct of a section of its adherents who, presumably weary of confining their psychical researches to the chasing of elusive "spooks," have gone astray after such livelier branches of occult science as the preparation of talismans, the concocting of love philters and the telling of fortunes.

The earnest ghost hunters, disgusted by this descent to the methods of the common or commercial charlatan, have resigned in a body and formed a new society of their own. It is by no means certain, however, that those who remain have not proved themselves wiser in their generation than the seceders, for, while ghosts are unmistakably "off" in these days, the interest in other forms of mystical quackery seems to be as strong and widespread as ever.—London World.

Throneroom of Spain.

The throneroom of Spain is a magnificent apartment of crimson and gold, with colossal mirrors and a chandelier of rock crystal that is considered the finest example of the kind in the world. Under the gorgeous canopy are two large chairs handsomely carved and gilded and upholstered in crimson brocade. These are the thrones of Spain, where the boy king and queen regent sit on occasions of ceremony. Sometimes the daughters stand beside their mother, when it is proper for all the royal family to receive the court.—International Magazine.

Appalling Prospect.

Everett Wrest—Do you know the doctors say the American people is gradually killing themselves off with overwork?

Dismal Dawson—Yes, and it sometimes worries me to think what's to become of us when they ain't nobody left but us.—Indianapolis Journal.

In certain parts of Norway when a person is drowned a cock is put in a boat, which is rowed about the scene of the disaster, the belief being that the bird will crow when the boat passes over the body.

James Armstrong was a pleasant caller at the home of John Coyle Sunday.

Miss Lucas, of Dexter, closed the spring term of sobol in district No. 6 last Friday.

The Ladies' Sooiol Circle, of Webster, met at the parsonage at Whitmore Lake Tuesday of last week. The principal event of the afternoon was a speech, from C. M. Starks, which was enjoyed by all present.

The Sunday school convention to be held in the M. E. church Saturday afternoon and evening bids fair to be one of the pleasantest events of the season. Several speakers from abroad are billed on the program and a profitable time is anticipated.

The Ladies' Sooiol Circle of the M. E. church gave a social Wednesday evening of last week at the residence of Mr. and Mrs. S. S. Wheeler which was largely attended. A fine program was rendered which added much to the pleasant features of the evening; after which ice cream and oake were served to the guests.

The little girls in district No. 5 have organized a social circle among themselves. They meet once in two weeks at the home of one of the members of the club and spend the afternoon socially, partake of the dainty refreshments served them by their mammas, then return to their several homes with a feeling of sweet content that they have done something toward the upbuilding of society in the community in which they live.

If the Baby Is Cutting Teeth.
Be sure and use that old and well-tried remedy, MRS. WINSLOW'S SOOTHING SYRUP, for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Twenty-five cents a bottle.

Automatic Envelopes.

An envelope is on the European market which is closed without either gum or sealing wax, and it is said that it will hold tighter than either. When once it has been closed this new envelope can not be opened without tearing. The outer flap has a tongue, which on the inside has a plait or fold. The tongue is inserted in a slot in the back flap, and, once in the plait catches the edge of the slot and can not be drawn. The harder one pulls the more firmly does the plait hold. In addition to the greater safety of this envelope, there is no trouble with gum. Both the new envelope and the machine for making it have been patented in Europe and America.

Objected to the Draft.

From the Mount Morris, 111, News: It is said on the Skaguay trail recently a dead man was picked up and from papers on his person it was found that he was from Maquoketa, Iowa. Word was sent to his relatives there and they wrote back to have the remains cremated and forwarded as soon as possible. The body was taken to the nearest crematory, and after it had been subjected to 5,000 degrees of heat for a couple of hours the door was opened to see how it was getting along. The heat had just got him well thawed out, and he yelled: "Shut off that cold draft! This is the only comfortable place I've struck since leaving Maquoketa."

HOW are the children this summer? Are they doing well? Do they get all the benefit they should from their food? Are their cheeks and lips of good color? And are they hearty and robust in every way?

Scott's Emulsion

of cod liver oil with hypophosphites.

It never fails to build up delicate boys and girls. It gives them more flesh and better blood.

It is just so with the baby also. A little Scott's Emulsion, three or four times a day, will make the thin baby plump and prosperous. It furnishes the young body with just the material necessary for growing bones and nerves.

We Bought June 1st . . .

450 NEW SUITS

made to sell and actually worth \$8.00, \$12.00 and \$15.00. Every Suit this season's make. To these we have added 275 suits from our stock, making 725 suits which will be divided into Three Lots as follows:

- LOT 1—Consists of 230 men's suits made to sell and actually worth \$8.50 to \$10.00 each, our price this sale \$6.00.
- LOT 2—Consists of 324 suits actually worth \$10.00 and \$12.00 each, our price this sale \$8.00.
- LOT 3—Consists of 171 suits actually worth \$15.00 each, our price this sale \$10.00.

An examination will show what splendid values these are at these very low prices \$6.00, \$8.00 and \$10.00.

No such values have ever been offered before and when these are gone it is not likely that you will ever have another chance to buy a suit at such a ridiculously low price for equal quality. Our sale of Children's Suits last week was a great success, but we still have about 180 of them left which we have decided to continue to sell during this sale same as last week's prices, \$1.35, \$1.85 and \$2.35, which is about one-half their value.

At the council meeting Monday evening City Attorney Butterfield reported that he had secured options on tracts of land that would be embodied in the proposed city park on the banks of the Huron river as follows: On Wall st. northeasterly along the Huron, right of way across the land of George Rhodes for \$500, which included the island in the river; a right of way across the land of George Weeks, \$100; the land between Cedar Bend ave. and the Huron river, containing 15 acres, for \$1,000, on condition that the city maintain the fences and keep order in the park. The city clerk was ordered to place these options on file and further discussion of the matter dropped right there.

Two law students named Gilchrist and Stofflet were tried in Justice Duffy's court Monday on a charge of maliciously destroying some property belonging to Theodore B. Williams of 239 S. Twelfth St., on the night of June 3, by breaking a door and a looking glass. The young men had been very noisy during the evening and went out of the house at 11:45 when Mrs. Williams turned the key on them. At 1:30 a. m. the door was broken into and a looking glass smashed. Gilchrist and Stofflet claimed they entered their room by climbing on the porch and getting in at the window and that another student named Page had broken the door by accidentally running against it not knowing it to be locked. The defendants were discharged.

At a meeting held in St. Thomas' school Sunday evening preliminary arrangements for the patriotic picnic to be held at Whitmore Lake, Monday, July 4, were made. The dinner table will be in charge of Mrs. John Baumgardner and Mrs. George Cropsey. The Sodality will take charge of the ice cream booth, and the refreshment stand will be looked after by Lawrence O'Toole. A special rate of 25 cents for the round trip has been made by the Ann Arbor railroad and the price of dinner tickets is also 25 cents each. With a fine bright day Whitmore Lake will, as is usual on occasions of this kind, be overflowing with people and St. Thomas' church will reap a rich benefit. Rev. L. P. Goldrick, of Northfield, will be toastmaster.

At a Masonic banquet in Ypsilanti last winter Judge Newkirk responded to the toast, "Symbols," and he took occasion to give Fred Lamb and Ed Thompson some pretty hard jabs in his oratorical way. Monday Fred Lamb walked into the probate office, and, pulling out a gun that looked as big as one of Sampson's 13-inch fort silencers, made the judge hold up his hands and he then proceeded to pay him back measure for measure.—Times. The judge says he has no objection to that pistol being written up, but he wants it done properly. The weapon in question is an old U. S. A. cavalry pistol which was used in the Mexican war and has "U. S. 1847" stamped on the lock. It was found in an old house in Ypsilanti which was being torn down by O. E. Thompson, but who its former owner was is not known. It weighs three pounds, is 14 inches long, and has a smooth bore three-quarters of an inch in diameter. It was presented to Judge Newkirk by Ed Thompson.

Encouraging a Yont.

Congressman McClellan of New York, who is remarkably youthful in his appearance, is said by the Washington Times to be in the habit of telling the following story against himself: About two weeks after my first appearance in the house I left my hotel late, I had not had time to read the papers, and picking up a dozen or more, I placed them under my arm and boarded a car. I left it at the entrance to the capitol grounds, and was hastening toward the building, when an elderly man, who it was evident hailed from the rural districts, accosted me. "Air you a-goin' to the capitol," he asked. "Yes," I replied. "So'm I," he said. "That is a privilege every man in this country may enjoy," I answered. "Yes, I guess that's what we fit fer," said my new acquaintance, and then he added, "What air you in such a hurry for?" "I want to get rid of these papers," I answered in a reckless way, pointing to the bundle beneath my arm. "Hum, young man!" said the man, as gravely as an undertaker, "why don't you remember you're a man now, and stop sellin' newspapers, behave yourself and be elected to congress, and become a great man, like Dan'l Webster?"

Foxy Ways of the Japs.

From the Tacoma Ledger: "The first ten days that one spends in Japan impress him with the idea that the people there are the best to be found anywhere. But little by little the conviction dawns that the bowing and scraping is all sham and that the Japanese are as unscrupulous as anyone. They cannot be trusted to keep a contract that is not favorable to them. In all the large establishments, especially in the hotels, one always finds a Chinese as cashier. Seemingly the Japanese are afraid to trust one another. The women are quite different. They are faithful and honest and have a loveable nature. I have met a large number of foreigners who have married Japanese women and they are all enthusiastic in their praise."

Doctors Like Them.

I have prescribed Carter's Cascari Liver Pills and pronounce them the best liver pill for all purposes in use; not only as a cathartic, but as a laxative and preventative of indigestion I have found them equally valuable. The Siamese and Their Ghosts.

The first thing an orthodox Siamese does in the morning is to scare away the family ghosts who may have gathered about the old place in the night. Letting off crackers is an effectual means. At the New Year all the ghosts come trooping to their former dwellings. For three days they have their fun. At the end of the time the priests and their flocks fire guns and use other devices for getting rid of them. A Siamese is confined face downward, so that the ghosts may not sneak back through the dead man's mouth. The coffin is taken out through a hole in the wall, and carried several times round the house, in order that the ghost may be put off the scent, and not venture to vex his family.

Shafter and his Army Off Santiago de Cuba.

CAMP M'CALLA REINFORCED.

No Movement Against Santiago Until the Latter Part of the Week.

Mole St. Nicholas, June 21.—General Shafter's army of 15,700 men, on forty transports, has arrived off Santiago and Camp Guantanamo. The marines were reinforced and Camp McCalla made secure. Shafter, after a conference with Sampson, will begin to land his troops at once. There will be no movement against Santiago until the latter part of the week.

Washington, June 21.—The following dispatch was received from Commodore Watson: "Captain General Blanco states that the Spanish government refuses to exchange prisoners." Hobson and his men are the prisoners in question. The belief is now gaining ground that the devoted young man and his companions have been dead for some time, fallen victims to Spanish treachery. It is the opinion of many that they have never been confined in Morro castle and that the pretense of the Spaniards that they were prisoners there has been merely to prevent Sampson from destroying that stronghold.

Key West, Fla., June 21.—It is learned from naval officers here that Captain General Blanco has notified the American blockading fleet that he will hereafter recognize no flag of truce, adding that every vessel within six miles range will be fired upon whether flying the stars and stripes or a white flag.

Madrid, June 20.—There is considerable comment here over a long conference which has just taken place between the British ambassador to Spain, Sir Henry Drummond-Wolff, and the Spanish minister for war, General Correa. The newspapers of this city publish the text of a manifesto from the inhabitants of Catalonia, of which Barcelona is the capital, in favor of peace between Spain and the United States.

Kingston, Jamaica, June 17.—The brick fort and earthworks at Caimanera, at the end of the railroad leading to the city of Guantanamo, have been demolished by the bombardment of the Texas, Marblehead and Suwanee. The warships opened fire at 2 p. m. and the bombardment lasted one hour and thirty minutes.

Madrid, June 18.—Admiral Camara's fleet, said here to consist of over twenty vessels, is reported to have been divided at sea and to have proceeded to different destinations.

Washington, June 21.—There was a rumor around the Capitol that Manila had fallen and that the Spanish governor or general of the Philippines had surrendered to Admiral Dewey.

Hong Kong, June 21.—A steamer which has just arrived here from Manila says the insurgents now hold 4,000 Spaniards and 1,000 natives prisoners with their arms.

Madrid, June 21.—The belief is expressed in government circles that Captain General Augusti will ask the foreign warships to land detachments to occupy Manila, on the ground that he is no longer able to resist the insurgents.

Kong Kong, June 21.—General Filipino officially proclaimed a provisional government in old Cavite June 12. There were great ceremonies and a declaration of independence was read renouncing Spanish authority. General Aguinaldo was elected president and Daniel Pironde vice president. The insurgents' government will not oppose an American protectorate or occupation. The rebels have captured the Spanish governor and the garrison of 300 men at Bulacan. The governor and garrison at Pampanga are surrounded and the governor and garrison of 450 men have been captured at Batangas.

Kingston, Jamaica, June 21.—[Copyrighted, 1898, by the Associated Press.]—Several attempts to land Spanish troops within a distance of two miles west of Santiago have demonstrated, along with previous inquiries to the eastward, that the shore for fifteen miles is lined with Spaniards. While this will not prevent a landing close to Santiago it may entail considerable delay, as the surrounding country must be thoroughly shelled and cleared before the troops can land in safety.

City Ready for the Torch.—When Rear Admiral Sampson received advices that upward of thirty transports would be here he sent word that they should stand to the south ten miles and lie there until a landing place had been secured. Cuban scouts report that the inhabitants of Caimanera have strewn the streets with straw and oil, with the intention of destroying the city and fleeing to the hills. Caimanera lies four miles up the bay from Camp McCalla, under the guns of the American ships, and the situation is desperate. Starving and famine-stricken, convinced of the ultimate triumph of the American arms, and without faith in the protection of the Spanish soldiery, the people are believed to have determined to leave their houses in ashes behind them and seek safety in the mountains of the north.

A Fearful Situation.—The scouts declare that the story is accurate and say that every building of the town is being rapidly prepared for the torch. The situation of the besieged is a fearful one. The people are eating horses and mules and are scouring the hills for fruits and herbs. Occasionally brief bombardments by the American fleet leave the helpless citizens terror-stricken, no preparation for defense being made. It is also announced that the Spanish gunboat at Caimanera has been loaded with inflammables and will be burned with the city, the commander declaring that it will never become an American prize. The scouts also say that the Spanish soldiers are in almost as complete a state of panic as are the civilians and that they could easily be induced to surrender.

On the Verge of Surrender.

Some of the prisoners taken by the marines say they believe the Spanish troops are on the verge of surrender, owing to the lack of food. Captain McCalla of the cruiser Marblehead and Lieutenant Colonel Huntington, in command of the marines, are not so sure, however, of the reported Spanish rout. They received information that a general attack by a force of 3,500 Spanish soldiers and guerrillas on Camp McCalla is contemplated within a night or two. Every preparation is being made for an assault.

BOMBARDED AGAIN.

Admiral Sampson Shells the Forts at Santiago de Cuba.

Off Santiago, June 18.—Admiral Sampson's fleet shelled the forts at the entrance of Santiago harbor after daylight and silenced every one of the enemy's guns after a lively fusillade lasting about one hour. The order for the engagement was sent about among the ships of his fleet by the admiral at night. At daylight they began to close in toward the entrance to the harbor, and when they were within less than a mile they formed in a crescent, with the battleships in the center, the flag-ship New York at the right, and the Massachusetts at the left. The New York fired the first gun. In a moment all the ships were popping away with their big and little guns. Most of the fire was directed at the batteries on the western side of the harbor. The Spaniards returned the fire furiously, but, as usual, their marksmanship was wretched, and, as far as can be learned up to the present time, the United States ships escaped unhurt and not one of their officers or crews was injured.

While the bombardment was at its height a shell from one of the Texas' big guns struck the Spanish magazine and blew it up with a terrific sound. Gradually the Spanish fire diminished, and in three-quarters of an hour it had become only a desultory popping here and there, now from the guns on the heights and again from the sand batteries beneath them. At 6:30 o'clock, when the flagship displayed the signal "cease firing," the enemy had been completely silenced, and the United States warships withdrew, well content with their early morning hour of target practice. It is believed that the Spanish losses were heavy. Morro castle, in which Lieutenant Hobson and his men are supposed to be confined, was spared in this attack.

TROOPS AT MANILA.

Captain General Augusti, Wife and Family Held as Hostages.

London, June 20.—Special dispatches from Shanghai say the American troops have arrived at Manila. Latest advices from Manila, via Hong Kong, say Captain General Augusti has resigned and has been succeeded by his second in command, General Basilio Davilo. The rebels propose to sign a proclamation of independence on June 20. Special dispatches from Hong Kong confirm the report from Manila that former Captain General Augusti's wife and family are held as hostages at Cavite.

Advices from Madrid agree that this statement, together with the report that the rebels are attacking the walled city, has caused intense depression. A special dispatch from Madrid says that, according to a dispatch just received there from Hong Kong, four warships carrying the flag of the Philippine insurgents have appeared in Manila bay and attacked the city from the sea in combination with the insurgent forces on the island.

By the Grapevine Telegraph.

Madrid, June 21.—Private telegrams received here from Cuba say that during the last attack by the American ships upon Santiago de Cuba a Spanish shell struck upon the deck of one of the attacking ships, sweeping off all the men there. Another shell, according to the same authority, struck the funnel of a cruiser, doing much damage.

Company of Moonshiners.

Atlanta, Ga., June 18.—Judge Newman has modified the sentence of several moonshiners in jail here in order that they may enlist in the army. They will join the company of moonshiners being organized here by Captain Carter, the noted revenue officer, who says they are especially adapted to guerrilla warfare.

General Miles in "Washington."

Washington, June 18.—General Miles, accompanied by Colonel Maus, Dr. Greenleaf, and Major Davis of his staff, returned to Washington at 8:30 a. m. The general shortly afterwards went to the war department and was in conference a good part of the morning with Secretary Alger.

HOUSE FOR ANNEXATION.

Newlands Resolution Passed by a Vote of 309 to 91.

Washington, June 17.—Hawaiian annexation went through the house with flying colors, the Newlands resolution being passed by a vote of 209 to 91—a majority of 118—thus demonstrating the extent to which the influence of the speaker has been preventing consideration of a resolution, the passage of which was demanded by two-thirds of the members of the house.

Washington, June 18.—The senate committee on foreign relations has agreed to report the Newlands resolution for the annexation of Hawaii.

SMOKELESS POWDER.

CORDITE THE MOST POTENT EXPLOSIVE OF MODERN TIMES.

It Is Composed of Nitroglycerin, Gnn Cotton and Vaseline—The Interesting? Process by Which Its Dangerous Elements Are Combined.

Since the advent of the speedy torpedo boat and since rapid firing guns have been placed on battleships and cruisers an explosive that would allow to the officers and gunners an unobstructed view of an enemy under all conditions has been sought, and thousands of dollars have been expended in the effort to obtain a satisfactory substitute for black gunpowder. Cordite, the latest explosive, is said to be the most satisfactory propellant of modern times for naval warfare, and the expert opinion seems to be that in a few years gunpowder as now understood will have vanished.

The earliest records of established powder mills show that there was only one in operation in 1590, this one being in England. During the year 1787 the Waltham Abbey Powder mills were purchased by the English government. They are still conducted by it. The Faversham mills, which up to that date were the largest in the world, passed into the hands of a private corporation in 1815. The manufacture of powder was continued without much improvement, except in the efficiency of the grinding and mixing machinery, until about 35 years ago, the formula for black powder being saltpeter 75 parts, charcoal 15 parts and sulphur 10 parts, the whole forming a mechanical mixture and not a chemical compound.

Smokeless powder, however, became absolutely a necessity, for the reason that smoke producing powders masked the object aimed at, and the torpedo boat, which was becoming a recognized feature of naval warfare, could dash up and discharge one or more deadly missiles under cover of the smoke.

Smokeless powders were first produced in France, and for some time the secret of the manufacture was guarded jealously. As soon as the necessity for this kind of powder became apparent, however, a number of manufacturers devoted attention to it, and as a result various brands of smokeless explosives were placed on the market.

The most satisfactory results eventually made their appearance in cordite, which was produced through experiments made by Professor Dewar and Sir Frederick Abel. Cordite is composed of nitroglycerin 58 per cent, gun cotton 37 per cent and vaseline 5 per cent. Nitroglycerin is an oily, colorless liquid and an active poison. It is produced by mixing a quantity of sulphuric acid with almost double the amount of nitric acid and allowing it to cool. About one-eighth of the total weight of glycerin is then added gradually, the mixture being kept below a temperature of 70 degrees F. by passing air and cold water through it. After the mixture has stood a sufficient time the acids are drawn off, and the residue (nitroglycerin) is washed and filtered.

Nitroglycerin cannot be ignited easily by a flame, and a lighted match or taper plunged into it would be extinguished. It is sensitive to friction or percussion, either of which will detonate it. Another peculiarity is that the higher the temperature the more sensitive it becomes. It will solidify at a temperature of 40 degrees, and its explosive force is estimated to be about twelve times that of gunpowder.

One of the most approved methods used in the manufacture of gnn cotton is this: The raw cotton is torn into shreds, dried and dipped in a mixture of sulphuric and nitric acids. It is then placed in a stream of running water and washed thoroughly. The cotton is then wound out, usually in a centrifugal machine.

It is afterward boiled, dried, cut into pulp and pressed into disks. When the gnn cotton is finished, there should be no trace of the acids remaining. Vaseline, the other component part of cordite, is the well known extract from petroleum, and its usefulness is chiefly to lubricate the bore of the gnn and thus lessen the friction between it and the projectile. It also has a tendency to impart a waterproof nature to cordita.

A colorless liquid prepared from acetate of lime, called acetone, is used as a solvent in the manufacture of cordite. The method of preparing the explosive is: The required proportion of nitroglycerin is poured over the gnn cotton, and the two, with the addition of acetone, are kneaded together into a stiff paste. Vaseline is then added, and the whole compound, after being thoroughly mixed, is put into a machine and the cordite pressed out and cut into lengths, after which it is dried.

To the artillerist the nature of cordite is represented by a fraction whose numerator gives in hundredths of an inch the diameter of the die through which the cordite has been pressed, its denominator being the length of the stick in inches. The cordite known as 80-12, which is the size used for the 6 inch quick firing guns, signifies that its diameter is three-tenths of an inch, and it is 12 inches long.

It is necessary to use a fine grain powder to ignite a charge of cordite, it being secured in such a manner that a flash from the tube firing the gun will cause the explosion of the charge. A full charge of powder for a 12 inch gun is 295 pounds, while the cordite charge, having the same efficiency, is only 167½ pounds.

Cordite is one of the safest explosives known, and is not dangerous unless it is confined. It can be held in the hand and lighted without danger. It burns slowly and with a bright flame. Although comparatively a new discovery, it is used extensively in every navy throughout the world. It was manufactured first in Great Britain and was in general use on her battleships before adopted by other powers.—New York Sen-

The Detroit Journal is Made for and Appeals to the Thinking, Conscientious, and Influential Classes,

He Had a "Pull."

The town of Pullman was not ostensibly named after the late Mr. Pullman himself. The story is that W. W. Beman, the architect of the town, being justly proud of his work, went to the proprietor and asked that it be named "Beman." "Um'm," said the magnate. "Fact is, I had thought of calling the place 'Pullman' from the man who built it and paid for it. However," Mr. Pullman added, as he observed a look of disappointment on the architect's face, "I am not particular. Now what do you say to a compromise? Suppose we take the first syllable of my name, 'Pull,' and the second syllable of your name, 'man.' There we have it, 'Pull,' 'man'—Pullman. You see that combines your idea with mine." Mr. Pullman's suggestion prevailed, and the name, it seems, was a compromise, though it is not reported that Architect Beman was greatly pleased thereby.

Fingers Better Than Eyes.

The manner in which the late Dr. H. O. Cox, librarian of the Bodleian library at Oxford for many years, discovered the falseness of the gospel manuscripts gotten up by Constantine Simonides, which deceived all the German professors, is told in the old gentleman's own words in a recent number of the Spectator. It was his delicate touch that helped him, as he did not look at a page of the manuscript. He told the story as follows: "I never really opened the book, but I held it in my hand and took one page of it between my finger and thumb while I listened to the rascal's account of how he found this most interesting antiquity. At the end of three or four minutes I handed it back to him with the short comment: 'Nineteenth century paper, my dear sir,' and he took it away in a hurry and did not come again. Yes, I was pleased. But I have handled several ancient manuscripts in my time and I know the feel of old paper."

Didn't Realize It.

At a certain town in the central part of "York-state" lives old Uncle Billy Bushnell, and his forte is animal lore. He was telling one evening in the corner grocery about a cat he had at home called "old Abe," because it was a kitten when Lincoln was nominated. "It's alive an' well yet," continued the old man. "Oh, that's all right," said one of the company, with a wink at the others, "but you must remember, Uncle, that you're talking about things that happened long ago. Since then Lincoln was assassinated and Johnson, Hayes, Garfield, etc., etc., have been president—" "I know it," replied the old man, quietly, "but the cat didn't realize, an' lived right on." After which the silence deepened.

STATE OF MICHIGAN, County of Washtenaw, ss. At a session of the Probate Court for the County of Washtenaw, holden at the Probate Office in the city of Ann Arbor, on Friday, the 3rd day of June in the year one thousand eight hundred and ninety-eight.

Present, H. WIRT NEWKIRK, Judge of Probate.

In the matter of the estate of Charles Binder, deceased.

On reading and filing the petition, duly verified, of Charles H. Binder, praying that administration of said estate may be granted to Albert Mann or some other suitable person.

Thereupon it is ordered that Saturday, the 2nd day of July next, at 10 o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate Office in the city of Ann Arbor, and show cause, if any there be, why the prayer of the petitioner should not be granted. And it is further ordered, that the petitioner give notice to the persons interested in said estate, of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the Ann Arbor Argus, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing.

H. WIRT NEWKIRK,
Judge of Probate

SAVING GRACE OF A HOBBY.

It Revives Hope and Enthusiasm and Makes Life Worth Living.

"A priceless thing is a hobby. The daily tasks by which hosts of women support life are favorless, barren, almost hopeless. To such ones a hobby may offer the dearest hopes of ultimate freedom from the-unwelcome daily task. It will at any rate serve to entertain and give point and flavor to an otherwise blank existence," is the position taken by Carrie E. Garrett discussing "Woman's Dreams and Hobbies" in The Woman's Home Companion.

"Hobbies have the power to concentrate and absorb the scattered energies which might otherwise be expended in purposeless flirtations, building superfluous bonnets, reading cheap sensations, gossiping away precious moments, picking out our friends' foibles, dissecting our own emotions and wishing vaguely for everything which is attainable. If the hobby did nothing else but prevnt these frivolities, it would be a boon to humanity.

"Man found out the value of hobbies long ago. Almost every man who is good for anything has a purpose whi'h, he thinks is quite the most magnificent one which a man could pursue. It is no matter whether it is lawmaking, pill-making or shoemaking, he pursues it with absorbing enthusiasm and strives to make the best laws or pills or shoes (as the case may be) to be found anywhere.

"Woman has found that it is not enough to merely look pretty; that love cannot be her 'whole existence' (the poet to the contrary notwithstanding), and that even with the richest plenitude of gowns, jewels and enjoyments life still needs a purpose. If it is at all a respectable purpose and pursued with general zeal, it cannot fail to thrive and increase and bear fruit."
