A Muskegon boy got drunk recently and was so conscience-stricken when he came to himself that he tried to commit suicide by jumping into the lake. The saloonist who sold him the liquor paid \$300 costs for his violation of law.

Bradford Smith of Detroit, well known throughout the state for his interest in "youthful sinners," thinks that he is doing good by the parents for their inability to get their incorrigible children into the schools, the law should take the children themselves, by regular procedure in the probate court.

The Senate has passed the House bill appropriating \$15,000 for the agricultural college, under the name of the Michigan Agricultural College, to be located on the site of the old college appropriation is reduced to \$5,000, the disposition to be given for the full \$5,000 asked for having been after a long struggle. The bill, to regulate trial of actions for damages arising from negligence, got through the House committee of the whole by one majority.

April 26 John G. Hustin, of Elba, skinned a dead dog which had been poisoned. There was a score on Hustin's right side, finger and thumb, and a score on his left side, index and middle. A doctor being called, decided that poison from the dog had been imbibed by the man. Hustin was cured, and the dog died May 5. He left a wife and five children.

The people of the state of Michigan have enacted that whoever procures or places in any county any quantity of real estate for the purpose of conveying the same to a grantor mentioned in such conveyance, and upon conviction be punished by imprisonment in the state prison for not less than three years, or by a fine not exceeding \$5,000, or both, in the discretion of the court.

After 20 years or more a remittance of \$14.35 has got around to Adrian from the Michigan State Lottery. The money was scrip issued by Remington & Bennett, which redeemed the same. The \$14 was on Erie & Salomazo and Adrian Insurance company bonds.

Muskegon is reminded of the blood plague that troubled one Pharaoh of Egypt, when the water of the Nile turned to blood. The wells in that city is clear and apparently A 1 in being pumped, but turns red when the city pumps are run. It is also reported that the water in the city is turning red. The water in the city is turning red. The water in the city is turning red.

The Baptists are building a church, 31 1/2 feet, at Cadillac, in the city of Cadillac. The building is to be a two-story structure, and will be completed in the summer.

Owing to the low price of coal, Jack-sonville, Mich., has been digging for coal, probably to about three cents per pit car of 100 tons. The miners are considering the matter.

James A. Torpey committed suicide by jumping into the Potomac river from the Washington Monument. The cause of his suicide is physical and financial. He was a member of the Washington Monument Association, and was interested in his well-being.

The principal part of the thriving little village of Newaygo, which was destroyed by fire on the 10th inst., was a mill. In the end of the village will be constructed by the buildings are being constructed by a subscription of about three cents per pit car of 100 tons. The miners are considering the matter.

Mrs. Catherine Jewitt, wife of the late Judge Charles Jewitt, died of heart disease at her residence in Detroit, Mich. She was about 65 years of age and had resided in that city over 40 years. She was a devoted wife and mother, and was highly respected by her friends.

An accident occurred on the F. & P. Railroad near the station at Vassar. A passenger train was derailed, and several persons were injured. The cause of the accident is not yet known.

Acknowledgments are due to Hon. O. D. Conger for some valuable seeds of some new products from the Department of Agriculture. Also to Hon. John K. Boies, a member of the board of Indian Commissioners for the annual report of the Board.

Some of our citizens who seem so deeply interested in water works, are spending a good deal of their time in telling people that Rice A. Beal opposes water works because he is supplied with water. In answer, I will say that the St. James Hotel, my private residence, and other property that I own will be as much benefited as any, if it is a benefit. In short, if it is for the interest of the city to run in debt a hundred thousand dollars or more, there is no one who will be benefited more than myself, or that will grumble less at paying his taxes. The debts of some of our sister cities that have been bankrupted by extravagance should be a warning to the people of this city. It is our private opinion that the city is not suffering for water works. Even if it were, it should be by private enterprise, for there is no justice or equity in making three-fourths of the homes in the city pay their share of an endless debt when it is of no earthly benefit to them. What is said above is the individual opinion of the proprietor of the COURIER, and the paper will take no further interest in the matter save that its columns will be open to short, well-written articles on either side, until the contest is over, for a contest it will be, and a desperate one.

**MACLEAN'S DEFEAT.**  
The proprietor of the Register does not feel happy over the result of the meeting of the State Medical Society, and takes three columns of his paper, including a made up letter in the Free Press, to let his readers know how glad he is that he failed in his attempts to elect Dr. Maclean its president. It seems to have been one of those remarkable victories where those whose plans were defeated were better pleased than if they had succeeded. A few plain statements of facts which, believe, cannot be denied, will enable the reader to understand the situation, including "those tears" and why the Register thinks the grapes sour. The society is composed of reputable practitioners of the State, graduates of more than a score of different medical colleges in this country, Canada, and Europe. Its members, therefore, naturally oppose any attempt to manage it for or against the interest of any college or individual. The best men in the society, including many personal friends of Dr. Maclean, believed it in bad taste for any man's private or public quarrels for any suits to be brought before it. They did not know anything of the facts in Dr. Maclean's libel suit, which they considered still pending in the courts, and they did not want to vote on his candidacy because it involved his case.

They would have equally opposed his proposition to commit the society against his case. They wanted nothing to do with it one way or another, and were incensed at the methods resorted to, to get a professional verdict. It is a fact, somewhat not stated in the Register, that its proprietor was formerly a member of the society but that he kicked himself out some years ago, in a fit of anger at not being able to bulldoze it then, leaving on record a denunciatory letter, since which time of course he has contributed nothing but opposition to its maintenance. Now that it has prospered and has influence he had the assurance to go into its sessions and constituting him of its only lobby member, attempt to influence and to negative the opinions and wishes of its members, and for personal ends use its machinery which had been kept in operation by their efforts and money, despite his withdrawal and opposition.

His interest in its real work was shown by his taking the next train for home after the failure of his scheme. His help, added to the active and personal seeing an office in a scientific body by a candidate, when the office should seek the man, together with the abuse of railroad passes, would have defeated Dr. Maclean's chances had the society desired to elect him.

It is a fact that a large number of men who rarely attend the society and some who are not known as practitioners where they live, went and returned on passes. They were understood to be issued in the interest of Dr. Maclean, and those using them worked for his election. One gentleman declined to accept a pass because of the implied obligation accompanying it. The conductor of one train stated that he had about twenty-five.

Of the sixty-five new applicants for membership the Secretary stated that twenty-two failed to complete their membership by payment of dues. Of twelve applicants from Ann Arbor, seven failed to become members after being elected. This shows the insincerity of such applications.

Friends of Maclean, including his family, colleagues, stated that they had urged him to withdraw from the candidacy, but he declined to take their advice. Dr. Wieland, the president-elect, was the candidate of the Southern Michigan Medical Society, and had received the support of its members regardless of office. He had been the candidate of Dr. Maclean's friends for two or three years, and they could not elect him. This was asked and repeatedly urged to withdraw in favor of Dr. Maclean.

It was very generally understood that the faculty and their friends, who no rejoice that "it is just as they wanted it," did their best to have it result in some other way, and would have succeeded in disappointing themselves dreadfully but for the sagacity and determined effort of their "enemies" (?), who knew so much better what the faculty men wanted than they themselves did!

The pretense that "enemies" of the University or friends of a particular college were favored in the selection of officers, is shown in the fact, that the three delegates to the American Medical Association from Ann Arbor, two of them were taken from the medical faculty. While the president with whom they seem so well pleased, and who was also an examiner for the University, owes his election not to their help, but to the fact that they discovered that they could not defeat him.

And now our friends of the faculty would learn if one lesson and not forget it, they would save themselves a deal of unnecessary anxiety, and foolish exhibition of patent right monopoly of friendship for the University; if they would cease the assumption so frequently and variously implied that they are the University—that it can have no friends but their friends—that any one who criticizes their management "attacks the University."

It might be worth while for them to consider that the people of the state who make Regents and Faculties out of the University in common with all other state institutions, and while they pay taxes for its support, any citizen who wishes will exercise the undoubted right—not privilege or favor—to doubt and express any opinion he pleases on his own responsibility, concerning any public institution or the official conduct of any employee of the state without asking permission of any paid servant of the state.

The people will take care of the University, and it will endure and prosper when men who selfishly seek to use it for personal ends are forgotten.

**Water Works.**  
EDITOR COURIER: Who brought parties here from Ohio to draw plans and make maps of the city, to get the people of the city how they can get water and that it is an absolute necessity that they should have it. By what right was a committee packed in a certain interest. Is not the city well supplied with water for drinking and fire purposes? If it is, a few more engines are all that is needed, and they would not cost from five to ten thousand dollars a year to keep them in order for a fire. Jackson and other cities about us that are almost crushed by debt for water works have three fires to one. Will it reduce the rate of insurance? We answer not a cent, the second, third, fifth and most of the fourth and sixth wards do not need it. Scattered is the population of this city it is an outrage to bond the city for \$100,000, or more for what is not needed. The common people, whom this movement will oppress the most should rise in their might and put a stop to it.

**Tax Payer.**  
The first of the June Magazines to come to hand is Harper's of its ever bright and varied table of contents. Abey give the frontispiece, an illustration of Faustus. The papers of Col. Higginson on the history of America are contained in "The Hundred Years' War," and the paper on Russia tells of the "Romanoffs." This, as well as the other important articles is finely illustrated.

**A Specific for Change of Life.**  
We are in receipt of a letter from J. T. Hamby, Esq., of Florissant, Ark., in which the writer says: "Floralin, Merriam's female tonic, and during the change of life it is a specific." Suggestive facts, truly. \$1.50.

"A young man to a great coquette," said a young man to a Madison avenue young lady. "I plead guilty," was her response. —Harlem Times.

It acts directly upon the blood and the mucous surfaces of the system. Price 75 cents. For sale by Eberbach & Son.

In learning the flute every man can be his own tutor.

at \$4.25 per ton. That would produce a revenue of \$4,500,000. Allowing 40 per cent for working expenses, a dividend of 6% per cent could be paid on \$4,000,000. He had given some consideration to the question of defensive measures. What he suggested was, that by an arrangement which he described, it should be possible to throw up a mass of shingle inside the tunnel, and thus prevent its use. He suggested also that there should be means of blowing up the tunnel, if necessary. He should certainly not rely upon one mode of defence.

**COUNTY ITEMS.**

**MANCHESTER.**  
Some of our farmers are selling their wool, most of it is last year's clip. They will begin at once to construct the telephone line from here to Ann Arbor which has been planned.

Not more than one-tenth of the people of Manchester attend church regularly, and only about one-twentieth occasionally.

To show what a Methodist hen can do, Rev. C. H. G. Legard, of this city, used to be drawn down from painful kidney diseases. Kidney-Wort cured him. —Jas. M. Richardson, Allegheny City, Pa., Aug. 28, 1902.

**KIDNEY-WORT**  
IS A SURE CURE  
for all diseases of the kidneys and LIVER

It is the most important organ in the body, and its proper action is essential to the health and vitality of the system. It is the source of the blood, and its impurities are the cause of all diseases. It is the source of the urine, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. It is the source of the intestinal juice, and its impurities are the cause of all diseases. It is the source of the gastric juice, and its impurities are the cause of all diseases. It is the source of the salivary juice, and its impurities are the cause of all diseases. It is the source of the lacrimal juice, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. It is the source of the intestinal juice, and its impurities are the cause of all diseases. It is the source of the gastric juice, and its impurities are the cause of all diseases. It is the source of the salivary juice, and its impurities are the cause of all diseases. It is the source of the lacrimal juice, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. It is the source of the intestinal juice, and its impurities are the cause of all diseases. It is the source of the gastric juice, and its impurities are the cause of all diseases. It is the source of the salivary juice, and its impurities are the cause of all diseases. It is the source of the lacrimal juice, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. It is the source of the intestinal juice, and its impurities are the cause of all diseases. It is the source of the gastric juice, and its impurities are the cause of all diseases. It is the source of the salivary juice, and its impurities are the cause of all diseases. It is the source of the lacrimal juice, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. It is the source of the intestinal juice, and its impurities are the cause of all diseases. It is the source of the gastric juice, and its impurities are the cause of all diseases. It is the source of the salivary juice, and its impurities are the cause of all diseases. It is the source of the lacrimal juice, and its impurities are the cause of all diseases. It is the source of the sweat, and its impurities are the cause of all diseases. It is the source of the tears, and its impurities are the cause of all diseases. It is the source of the saliva, and its impurities are the cause of all diseases. It is the source of the mucus, and its impurities are the cause of all diseases. It is the source of the bile, and its impurities are the cause of all diseases. It is the source of the pancreatic juice, and its impurities are the cause of all diseases. Fraternity Lodge No. 262 F. & A. M. Regular communications held in Masonic Hall on Wednesday evenings or before the full moon.

Friends of the Courier, who have business at the Probate Court, will please request Judge Hariman to send their printing to this office.

LOCAL.

Iolante, Grand Opera House, Friday evening, May 25th.

Joe T. Jacobs sold over \$5,000 worth of goods last week.

An alarm of fire was made Friday evening by a slight blaze in the lower town.

The O'Hara will case has been continued over until the September term of court.

Six more veterans were mustered in to Welch Post, G. A. R. at the meeting Friday evening.

The Hook and Ladder boys will have their annual pilgrimage to Whitmore Lake the 23d of June.

The memorial service to the late Dr. Coker will be held Sunday evening before Commencement.

Johnson, the man shot at the jail a week ago last Friday night, is getting worse and is hardly expected to live.

Rev. Wm. George, of Dexter, gave some excellent practical thoughts on temperance in Crosey's hall Sunday afternoon.

The board of Trustees of the Methodist church Monday night elected Joe T. Jacobs treasurer, vice the late William Noble.

Company A, as usual, will turn out on Decoration Day. They have also accepted an invitation to go to Toledo on the 14th of July.

The sewer pipe from the COURIER building which carries off the waste water to the creek has just been enlarged to a six inch one.

In March the highest temperature at the observatory was 57°, the lowest 4° below, with an average of 28°. There was 1 inch of rain fall and 10 inches of snow.

In last week's issue of the Brown County Sentinel, published at Columbia, D. T., is a notice that Carril M. Coe is a settler on a quarter section of Dakota soil.

While engaged in coupling cars on the Toledo road last week Thursday, a workman named Collins was caught between two cars and had a shoulder broken.

The sheriff has in jail Alben Vandenberg who was caught near Detroit Saturday with 70 sheep. He was taken on the charge of having stolen them from farmers in Superior.

The High School Christian Association is represented this week in the international Y. M. C. A. convention at Milwaukee, by Henry H. Cushing, a member of the Junior class.

On the program of the Detroit conservatory of music concert to be given this evening, we notice the name of Miss J. C. Mahon of this city who is to render a cavatina for the violin.

The city has purchased a new street scraper which in making and working roads will do the work of a gang of men in better shape and much quicker. \$150 was the amount paid for it.

The price of admission to Iolante next Friday evening will be: Gallery 50 cents; general admission, 75 cents; reserved seats in parquet and first row of dress circle, 25 cents extra. On sale Monday.

If the Methodist folks want to know all about themselves, they ought to buy "The Mayflower," a paper which is on sale at the Paper Festival this evening. It will be an elegant souvenir of the entertainment.

The communication from Mr. Wynkup in the COURIER of May 14th, in regard to the "Equalization of Taxes" has attracted considerable attention, and he has received quite a number of letters from Supervisors in commendation of it.

The old Methodist parsonage has been sold for \$3,000, and a committee consisting of Messrs. Jacobs, Breakey and Nichols was appointed by the trustees and stewards Monday evening to arrange for purchasing a lot and building a new one.

The court adjourned last Friday morning to go to Delhi to obtain the testimony of some witnesses in the Goodell case who could not come to court. The judge, the four attorneys, the stenographer and the parties interested went up and back in buggies.

The Goodell divorce case was on all last week but being unfinished it was shut off by the regular term of court. Both parties evidently desire the divorce, and the fight is for the care of the children and the alimony. It is uncertain when or how it will be concluded.

The topic of conversation around the court house is on the great baseball game which is soon to come off between the county and city officials. It is proposed to have it on a Saturday so that school children can have a benefit.

The juncture of Spring street and Miller Ave. has been greatly improved by a wide, paved gutter in lieu of the rotten old box that has so long been an eyesore to the passers-by. Fountain street and Miller Ave. will soon be treated likewise. So much for the enterprising aldermen of the 3d ward.

In 1881 Mr. Brearley of the Detroit Evening News gave 100 Michigan editors a free ride down the St. Lawrence to Montreal, Portland, White Mountain and back. Last year the Ohio editors caught it; this year it is for Indiana journalists and next year Illinois is to be served the same way. No wonder the excursions are popular.

Frank Leslie's Illustrated Newspaper of May 5th. has an unusually good picture of the late Dr. B. F. Coker. It is accompanied by a sketch of his life. The Christian Herald of this week will also have a fine large cut of him with similar views of the various incidents of his life. The sketch in this paper as well as in Leslie's was furnished by Rev. Wm. George of Dexter.

An enjoyable time is sure to be had this evening by those who attend the Paper Festival at the M. E. church. The young ladies will be dressed in paper costumes of different styles and colors and many pretty and attractive articles made of paper are to be on sale. A large silk autograph crayon cut, and spiky literary paper called the "Mayflower" will be sold. Refreshments will be served.

Compared with the average for the month of April in the preceding six years measles was considerably more prevalent, and intermittent fever, remittent fever, and diphtheria were less prevalent during the month of April, 1883. For the month of April, 1883, compared with the average of corresponding months in the five years 1878-1883, the temperature was slightly higher, the absolute and relative humidity the same, and the day and night ozone less.

Mrs. Coker asked Dr. Breakey just before she left for Adrian, what he charged for the months of hard work he had done to help her husband. His answer was worthy of the man, and was as follows: "Mrs. Coker, if your husband had lived I should not have presented any bill, and I certainly would not do it now. I have made no charge, and my services, such as they have been are free." Mrs. Coker fully appreciating the Doctor's services, sent him last week by express, a very fine gold hunting-case watch and chain.

The other day one of our merchants received a bundle wrapped up in an old copy of the Peninsula Courier of the date, October 22, 1863. It gives the inaugural address of Rev. E. O. Haven, President of the University, and an account of the exercises at the opening of the new Law-Building on the same day, when the dedicatory address was by Prof. T. M. Cooley and the poem by D. Bethune Duffield. The evening addresses were given in the Presbyterian church by Rev. L. D. Chapin, Professor of Moral and Mental Philosophy, and Dr. S. G. Armor, Professor of Institutes of Medicine and Materia Medica.

There have been rumors circulated around town to the effect that the Opera House management was treating the Iolante company very unfairly in charging them 50 per cent. of the gross receipts. The manager informs us that no company with the exception of the Emma Abbott has been played this season at less than 20 per cent. Not only is "Iolante" played for 20 per cent. but they are allowed the use of the house for ten days for rehearsals, where no other company has ever had for more than one night. Further, he bound himself not to allow any other attraction to play in the city during that period, and under that agreement he has already refused to play the Catherine Lewis Opera company the 23d. In addition to this, we are informed Mr. Wm. White, the owner of the Opera House, has made the company a present of fifty dollars.

One of those queer, mysterious little matters which usually remain deep below the surface hidden by the blackness of night is just bubbling to the surface of town gossip. It seems that a certain well known student came in on the Pacific express at half-past eleven the other evening. That in itself would not be very strange, but when the depot men saw that he was accompanied by a girl living in Ypsilanti, they at once scented a good sized money. The couple hired a carriage and drove to the house of one of the clergymen of the city, where they remained until the hack called for them and took them back to the depot in time for the 2:15 Express east. When the train came along they boarded it and started East. They did not get off at Ypsilanti, but continued on with the train. As the student has not been seen on our streets since he is probably taking his bridal trip on the Continent, in Canada or perchance in some of the Provinces.

EDITOR COURIER: I am profoundly and sorrowfully impressed with the thought that the venerable and thoroughly educated (especially in history) editor of the Ypsilanti Sentinel, is gradually passing into that state of forgetfulness and mental decay which old age and severe mental labor oftentimes bring to the most profane and learned of men. Witness the following from the Sentinel of last week: "Wendell Phillips says, 'the best education in the world is that got by struggling to get a living.'"

Then, of course, the harder the struggle, the poorer the living the better the education. Phillips, himself, never struggled, and with all his eloquence and learning, was an inexperienced fool in most things that he talked about. Pity that Brooks broke the case instead of his head. The clamor over the outrage would have been no greater, and Phillips' power for farther mischief, would have been stopped."

History tells me that it was Mr. Charles Sumner, and not Wendell Phillips, who was murderously assaulted by Bully Brooks. It occurred in the Senate chamber, May 22, 1856. Mr. Sumner fell, his floor 25 lbs.

PERSONALS.

Dr. P. B. Rose was home last Sunday. Mr. James, the Saline dentist was in town over Sunday.

Edwin Packard, of Brooklyn, N. Y., is visiting in the city. Mrs. Geddes and daughter, Nellie, spent Sunday in Plymouth.

Rev. R. B. Pope was at Petoskey a couple of days this week. Mrs. A. T. Hill of Detroit has been at the home of Calvin Bliss.

Miss Susie W. Valentine of Kalamazoo is at W. F. Stimson's, on a visit. Mrs. Holland of Saginaw, was here on a few days visit with relatives last week.

Miss Zilpha Andrews, who has been spending the winter out of town has returned to Ann Arbor. Rev. J. Alabaster and wife, of Detroit, will be present at the Paper Festival at the M. E. Church this evening.

UNIVERSITY ITEMS.

Chronicle election to-morrow. There will be another Field-day in June. The University Musical society is to give another concert June 15.

Tim Collins and Ben Brodie of '82 were on the Fair grounds on Field-day. Rev. Joseph Cook's lecture in University Hall will be Tuesday evening, May 29th.

The double program of Alpha Nu Friday night filled the room with visitors and was well rendered. The University base-ball club will play the Mutuals of Jackson, at the Fair grounds to-morrow afternoon at 3:30.

Henry Wade Rogers has accepted the position in the Law school recently tendered him by the Regents and will soon move here. Wm. Coker, Professor Coker's son, has paid Prof. Winchell one hundred and twenty-eight dollars for labor performed in the Doctor's department in the University.

William G. Doty, the Probate Register, will occupy the time of a two week's vacation by taking a trip to Colorado. He starts next Monday.

The freshman class supper comes off this evening. Their officers say they are not afraid of being kidnapped this year. The banquet is at the St. James, and about 33 couple will be present.

The college papers are discussing the advisability of asking the faculty to let the work they do on their journals continue their college work. It would not be a bad idea to have it so arranged.

At the recent Harris book sale in New York the University was fortunate enough to obtain a rare volume entitled, "The Bibliography of Shakespeare" by Justin Winsor. It has heliotype engravings of the title pages of the early folios. Probably there are not over a hundred copies of this volume in the country, and it was only obtained after sharp competition in bidding against other libraries and individuals.

Chas. F. Dight, an assistant in the medical school, has been called to the university at Bairenth, Syria, to take the assistant professorship of anatomy, physiology and microscopy. He will go in July.

This is a good illustration of two points— one of which we are proud, the other— one of which we are not. It shows the widespread fame of our University which draws the eyes of the men of letters of all the world towards the work and the workers of the institution. On the other hand it is an excellent proof of the statement made in our editorial on "Salaries" in our issue a few weeks ago, that the University is, to some extent, a training school for more liberal colleges where better salaries are paid. This is one of many former incidents to prove the truth of it.

FIELD-DAY.

It is generally considered that the most successful Field-day of the students of the U. of M. has had occurred last Saturday. Mirabile dictu it did not rain, and in the afternoon over 1,000 were present to witness the contests which were in the main carried on with spirit. The event of the forenoon was the Rugby game of football between the Universities and a picked eleven from Detroit. Chase and Hull could not come, so the eleven, which had been gotten together without practice, consisted of Hutcheson, Buchoz, Mahon, Hunt, Whelan, Campbell, Brodie, Page, Burnside, Bennett and Palmer. At the end of the two innings the score was: Universities, 4 goals; touch downs; Detroit, 1 goal, 4 safety touch downs.

The contests, with victors, time, distance, etc. are as follows: Ten mile walk—Hyde, 1 hour 52 minutes. Wrestling—catch-as-catch-can—Couch. Hop, skip and jump—Blackburne, 41 feet 2 1/2 inches.

Base-ball throw—McGuire, 274 feet. Heavy weight boxing—Montgomery. Standing broad jump—Stalker, 1 ft. 8 1/2 in. (longest recorded jump at the University).

Drop kick—Almendinger, 102 feet 7 inches. One mile run—Hare, 6 minutes 22 seconds. Horizontal bar—Price. One hundred yards dash—Moore, 12 seconds. Lawn tennis—Dodd and Abbott.

Light weight boxing—Moore. Throwing a log, (300)—Pretymann, 59 feet 7 inches. Three-legged race—More and Bishop. Tag of war—Freshman with 16 men. Stick and broad-sword—Campbell.

Fencing—Miller. Bicycle exhibition—Lee. Quarter-mile run—Moore, 43 1/2 seconds. Potato race—Moore. D. L. Parker. Clay pigeon shoot—D. L. Parker. Three-mile walk—Hartman, 30 min. 15 sec.

One of the prettiest exhibitions of the afternoon was with the bicycle by G. W. Lee and G. S. Hatch. Many difficult and graceful evolutions were performed by both, and it was difficult to decide which should be the victor. The broad-sword and the fencing also excited considerable interest. A feature novel in Field-day exercises was a skipping-rope exhibition by Mr. Niles. With a small rope, at first he jumped 107 times in 3 1/2 seconds; the day was a day of complete success in point of attendance, in satisfaction of contests and in a monetary point of view as well. The association has paid all its debts, paid for the ball suits, and is over a hundred dollars ahead.

Decoration Day.

The committee of Welch Post, G. A. R., consisting of J. B. Saunders, Prof. C. E. Greene, W. W. Nichols, Robert Campbell and P. Irwin, who were appointed last Friday evening for the purpose of making arrangements and presenting a program for the proceedings of the above-mentioned day, had a meeting Monday evening last, and the following plan was adopted and will be presented to the Post, at their meeting this evening:

1st. That the ladies, children, and citizens generally, be invited to collect all the flowers (both wild and cultivated) that can be obtained, and send or leave them at Agricultural Room (in basement of the Court House) or Fireman's Hall, fifth

BACH & ABEL'S COLUMN.

We will offer this week the following special bargains. It will be money in your purse to pay some attention to what we say.

10 pieces of Summer Silks at 49 cents per yard, former prices 60 and 65 cents.

25 pieces elegant Black Silks at \$1.10, \$1.25, \$1.20, \$1.50 and \$1.75, former prices \$1.25, \$1.40, \$1.50, \$1.65 and \$1.90.

20 pieces handsome Broadcloth Ottoman Silk at \$1.25, which we consider very cheap.

12 pieces Black Ottoman Silks (warranted all silk) at \$1.50, \$1.75 and \$2.00, former prices \$1.75, \$2.00 and \$2.50.

The greatest bargain the ladies of Ann Arbor ever had offered them will be our very heavy colored dress silks for two (2) WEEKS ONLY, at \$1.25, former price \$1.40. The same goods are retailed in this city to day at \$1.50.

15 pieces colored Cashmere (in all the desirable shades) at 42 cents. We want it distinctly understood that these goods will be sold at this price only two (2) weeks.

The celebrated Pearl Shirt (acknowledged by every man, woman and child competent to judge) to be the best shirt in America, we will sell laundered at \$1.10, former price \$1.40.

One case bleached cottons for a short time at 7 cents per yard, former price 9 cents. This cottons at 7 cents is very cheap, it ought to be in we have sold case after case at 9 cents.

10 pieces real Turkey Red Damask at 45 cents, never been sold before less than 65 cents. If you are in want of anything in this line it is a very good time to buy it we think. What do you think?

We have a few bleached Table Linens which we want to close, and in order to accomplish it will sell them at 75 cents, former price \$1.00.

By examination of prices given this week you will notice that we have put the knife to a good many articles, cutting the prices away down from former quotations.

We are bound to keep everything moving and not to have anything on shelves or counters but what is fresh and lively, not allowing the dust of ages to accumulate on a single article.

1883 GOLDEN STAR! We also sell the GOLDEN STAR GASOLINE STOVE, which has several valuable improvements this year. Send for circular with prices.

COULSON & MORHOUS, 115 Woodward Ave. - Detroit. We are the only exclusive House-furnishing Store in the state. Send us your address and we will mail you an illustrated Catalogue, Gratis. 1128-1129

Rev. Father Wilds' EXPERIENCE.

The Rev. J. P. Wilds, well-known city missionary in New York, and brother of the late eminent Judge Wilds, of the Massachusetts Supreme Court, writes as follows: "I was E. 24th St., New York, Nov. 16, 1882. Messrs. J. C. Ayer & Co., Gentlemen: Last winter I was troubled with a most unusual and distressing humor affecting more especially my limbs, which itched so intolerably at night, and burned so intensely, that I could scarcely bear any clothing over them. I was also a sufferer from a severe catarrh and catarrhal cough; my appetite was poor, and my system a most diseased one. Knowing the value of AYER'S SARSAPARILLA, by observation in many other cases, and from personal use in former years, I began taking it for the above-named disorders. My appetite improved almost from the first dose. After a short time the fever and itching were almost, and all signs of irritation of the skin disappeared. My catarrh and cough were also cured by the same means, and my general health greatly improved, such it is now excellent. I feel a hundred per cent stronger, and I attribute these results to the perfect adaptability of AYER'S SARSAPARILLA to all such conditions as the best blood medicine ever devised. I took it in small doses three times a day, and used, in all, less than two bottles. I place these facts at your service, hoping their publication may do good. Yours respectfully, J. P. Wilds."

The above instance is but one of the many constantly coming to our notice, which prove the perfect adaptability of AYER'S SARSAPARILLA to the cure of all diseases arising from impure or impoverished blood, and a weakened vitality.

Ayer's Sarsaparilla cleanses, enriches, and strengthens the blood, stimulates the action of the stomach and bowels, and thereby enables the system to resist and overcome all diseases arising from the impure, impoverished, and diseased condition of the blood, and all ailments resulting from poor or corrupted blood and a low state of the system. PREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists; price \$1, six bottles for \$5.

THE TRANSIT OF VENUS

BY OLIVER WENDELL HOLMES.

Dimly the transit morning broke: The sun seemed dozing to do, As one who questions and is new, And waits between the old and new, Please Heaven he wear his suit of blue, Or don, at least, his ragged coat of brown, With rims that show the azure through!

I go, the patient crowd to join That round the tube my eyes discern The last new comer of the file, And wait and wait, and wait, and smile (For each his place must fairly earn, Hindmost and foremost, in his turn), Till kneeling onward, pace by pace, I gain at last the envied place, And pay the white exaction due;

The sun and I are face to face; He glances at me, I glare at him; And lo! my straining eye has found A little spot that, big and round, Lies near the crimsoned fire-orb's rim.

O blessed, beauteous evening star! We'll name for her whom earth adores— The Lady of the dome-drawn curtain, I know thee in thy white attire; But veiled in black a ruyless spot, Black as a carbonic and a white, Devoid of thy robe of silver flame, The stolen robe that Nix restores When day has shrouded in its gloom— I see thee, yet I know thee not; And canst thou call thyself the same!

And art thou, then, a world like ours, Flung from the orb that whirled around A million pebbles from its zone? How many burning sands absorb The fire and the light of the blue orb? Thy chain so short, thy path so near, Thy flame-defying crests so high, Thy halo of light so brilliant here! And is thy bosom decked with flowers That steal their bloom from scalding showers? And hast thou cities, domes and towers, And life, and death that makes it dear, And love that fills thy tribes with fear?

Lost in my wandering spirit soars Through paths the wandering angels know; My all-prevailing thought explores The azure ocean's lustral shores; I leave my mortal self behind, As up the starry ladder I ascend, And still the widening view reveals In endless rounds the circling wheels That build the homelike universe; New spheres, new suns, new systems gleam; The voice no earth-born echo hears; My soul so softly on my soul descends, I hear them "singing as they shine"— A mortal voice dissolves my dream; My patient neighbor, next in line, Hints gently there are those who wait, O guardian of the starry gate, What coin shall pay this debt of mine? Too slight thy claim, too small the fee That bids thee turn the potent key; The Tuscans laugh at those in line; Forgive my own the smallest affront, The insult of the proffered dinar; Take it, O friend, since this thy want, But still shall labor memory be; A bankrupt debtful unto thee, And pay thee with a grateful rhyme.

—Atlantic.

"IN PAIN."

A WEBSTER WHITNEY.

"Go, child, go. I must have drink. I must! I must!" "But, father, there is nothing left to brew; everything is gone." "No, child, no; not everything. The picture, Go. I must have drink. I must! I must!" Bessie threw herself before her father in an agony of grief, crying: "Not that, father; no, no, not that. It is all that I have, it belongs to my mother, and—oh! I would rather die than part with it."

"Stuff and nonsense, child. It's worth money, and money will buy drink. Don't let it go too cheap; it's worth money, I say. Yes," he laughed, "it's worth money. I had it taken and set in the gold when I didn't know the good of drink. Go," he said, sternly, "and no more of this foolishness!" "I cannot pawn the locket," she said, decidedly, as she rose and turned away. "Then steal the money, but bring me the drink. I must have it, I say. I'd pawn myself if I could, or I'll dash my brains out."

"Bessie stood still a moment, and then, turning to him with the tears in her eyes, said: "Will you kiss me before I go, father?" "No, no; wait till you bring the drink. Go and he motioned her away with his hand." A few moments later Bessie was standing by the counter of the pawnbroker's shop, her eyes dry, but her little face showing traces of terrible suffering.

David Downs was listening unmoved to a story of wretchedness and misery, but though he was pronounced by all who knew him harsh and cruel, there was, as there is with all of God's creatures, a soft spot in his heart, and that soft spot had more than once been unconsciously touched by Bessie; and yet it was still the harsh voice that turned to her when they were alone and said: "Well, what now?" She handed him the locket and asked: "How much would you give on this?" He examined it carefully, looked hard at the likeness, and then said: "I might—yes, I think I could—lend you ten dollars on this. You'd better keep him in drink some time; and he chuckled and turned away with the locket.

"Please, Mr. Downs," said Bessie, "I don't want you to keep it." "No, no, no; I want more than that?" he asked, sharply. "No," said the child, looking up at him, "but I want to know if you won't give it to me. I could take care of things, you know, and I try not to eat much. Oh! please do, Mr. Downs." It was curious to notice the expression on the man's face. For a moment he looked steadily at the child as though he were turned to stone, and then he took out his colored handkerchief and blew his nose very hard. "If I understand aright," he said, "you wish to put yourself in pawn." "Yes, please, Mr. Downs." "H'm! I never heard of such a thing, but if you wish it very much, I will rather do that than have me keep this—" "Yes, yes," she said, holding out her hand for the locket. "I can't give that up. It's my mother's."

THE HAIR AFTER DEATH.

Instances in Which It Has Grown To Great Length.

N. Y. Herald. The extraordinary fact noted in the subjoined narrative is now for the first time published: In the year 1863 the bodies in the vaults of the church which then stood on the north side of Carmine streets, were removed. In some of the vaults the coffins had been ranged in rows, as many as ten being placed on the top of the other. Up to the time that the removal of the bodies was begun there had not been a burial—if the placing of a body in the vaults was so termed—underneath the church for seventeen years. It was not surprising, therefore, that when the men went to work most of the coffins were found decayed, and the bodies therein had originally been a mass of rotten wood, remnants of bones and now and then fragments of bodies that had held together, but had only the bare resemblance to skeletons of the human body.

There were, however, a few coffins which were found to be in a fair state of preservation, but even the majority of these fell to pieces at the slightest touch. The wood had lasted nearly a week when one day a vault was reached in which every coffin but one had crumbled. Their contents lay in scattered heaps on the top of the casket which had been the first to be placed in the vault. Strangely enough, although the wood was crumpled up with the shovels, their coffin remained intact, and when the last shovelful of "rubbish" was men called it—had been scraped off the lid there was no indication that the casket was not as strong as the others. It was, in fact, as sound as the others, and was, in fact, as sound as the others, and was, in fact, as sound as the others.

One of the laborers with a broom swept off the mould and dust of years that covered portions of the lid, and a faint glimmering near the center of it found this to proceed from the plating of the coffin. Bending down and scraping it with a crowl the workman described the name and age of the person who had been buried in the casket. It showed that the body was that of a boy of twelve years which had lain there upwards of sixteen years, and was intended to lift the coffin lid came off, the worm and rusted screws falling to the ground.

The sight that met the eyes of the lookers-on they probably never forget. One of them knelt down on the floor and devoutly made the sign of the cross. The interior of the coffin—the satin lining and the delicate fringe that bordered it—was yellow and mouldy, but the body of the boy—a handsome boy he must have been—lay in its white shroud, with a broad white sash ribbon about the waist; looked as though it had but recently been laid in the coffin. The face was marble white, the lips were half parted, as if in a smile, and beneath the partly closed eyes could be seen by the lantern's rays the eyes themselves. The little hands were folded across the breast, and most wonderful of all, perhaps, was the hair. It was neatly parted at the sides, and appeared as if it had just been combed for the occasion. The curls were upon it, and this dampness made the hair like the trace of a wetted brush. The hair fell in long tresses on either side, and had curled and stretched down and along over the body to the waist, curling it here and there like a thin veil.

All this was seen at a glance. The wonderful appearance of the body remained unchanged for a much less time than it takes to tell; for, as the men stood as if transfixed to the spot, gazing upon the child, an almost imperceptible motion was discerned about the face. The eyes commenced slowly to sink, the shroud to crumble, and in an instant almost the air had done its work, and the frail shell that had once doubtless been the pet of a household faded into nothingness. When those present (and the writer of this sketch was one of them) had regained their composure, they stood before an almost perfect man of straw, whose body had fallen to fragments when touched, there lay at the bottom of the casket nothing but the glossy curls that had once adorned the lad's head in life, but had continued to grow probably for years after the day when the grave first claimed its own.

Most people understand that hair does sometimes grow after death, but there are perhaps few who know that there is a very considerable growth in at least one of the cases where bodies have intervened in the usual manner. A story was told by Oscar Wilde at a dinner party in New York which illustrates this fact. When Gabriel Dante Rossetti was very young—scarcely more than a boy—said Mr. Wilde, he was left in charge with a young girl, and having a poet's gift, he sang a poet's love in numerous sonnets and verses to her. She died young, and by her wish the manuscripts of the poems were placed in a casket and laid under her head, so that even in the last sleep they should be, as they always had been, kept beneath her pillow. Years passed by, and Rossetti's fame grew until every line of his composition became precious, and some of those who prized his writings most asked him for copies of the songs that had been buried. He had kept no copies, or they had been lost. At all events he could furnish none, and when they asked him to rewrite the verses he declared that he was utterly unable to do so.

At last his friends importuned him for permission to have the original manuscripts examined. He consented after some hesitation, and all the necessary preliminaries having been complied with the grave, which had been sealed for many years, was opened. Then a strange thing was found. The casket containing the poems had proved to be of perishable material and its cover had crumpled away. The long tresses of the girl had grown after death, and had intertwined among the leaves of the poet's paper, coiling around the written words of love in a loving embrace long after death had sealed the lips and dimmed the eye that had made response to that love.

There is nothing improbable in the story so far as it relates to the physical phenomenon. That the hair grows after death is too well established a fact to be doubted, and it is really enough to be understood by any one who will give even a little study to its formation, it being an appendage to the human form, and not strictly speaking, a part of it. It might indeed be almost called a friendly parasite.

His Consciences Scruples. James Carey, the most infamous of the most infamous that poor Ireland has yet produced—a man who, after organizing assassination and inducing men of inferior intelligence, who leaned upon his judgment, to do the work, once denoted something unusual, but his name was intimate to the young man. As he walked to his desk however, he came upon a dog, the pet of the establishment, and hereafter an especial favorite with him. Giving the dog a kick, he explained the whole situation, and was removed to the two Irishmen convicted of murder and called for

Dr. CLARK JOHNSON'S INDIAN BLOOD SYRUP

Cures all diseases of the Stomach, Liver, Bowels, Kidneys, Skin and Blood, MILIONS testify to its efficacy in healing the above named diseases, and pronounce it to be the BEST REMEDY KNOWN TO MAN. Guaranteed to cure Dyspepsia. AGENTS WANTED. Laboratory 77 West 3d St., New York City. Duggists sell it. Would Not Be Without It. ELISE, CLINTON CO., MICH.

Dr. CLARK JOHNSON'S RHEUMATIC SYRUP. The Greatest Blood Purifier Known! A positive cure for RHEUMATISM, in all its various forms, viz: CHRONIC, ACUTE, INFLAMMATORY, SCIATICA, and MUSCULAR RHEUMATISM, NEURALGIA and GOUT. An infallible remedy for all diseases of the SKIN and BLOOD, such as TETTER, HINGWORM, ERYSIPELAS, SALT RHEUM, SCROFULA, PIMPLES, BLOTCHES, &c. It restores the diseased LIVER and KIDNEYS to healthy action, which is the sole cause of all RHEUMATIC and NEURALGIC PAINS. Manufactured by RHEUMATIC SYRUP CO., ROCHESTER N. Y. For sale everywhere. Send for circular.

Canvassers Wanted. The Great Schaff-Herzog Encyclopaedia of Religious Knowledge. By PHILIP SCHAFF. Assisted by over 300 of the most accomplished Bible scholars in America and Europe. The work is to be completed in three super-royal octavo volumes of about 900 pages each. Volume I is now ready. Volume II will be completed in a few months. It is fresh, reliable, and in every respect the best work of the kind now published. No religious family can afford to be without it. Exclusive territory given. Agents wanted. Address, HORACE STACY, 177 W. 4th St., CINCINNATI, O.

Spring Goods, 1883. Spring Styles. Boots & Shoes. Slippers & Rubbers. For the Best Goods when you come to Detroit, where you can get all the widths, sizes and kinds for the LOWEST PRICES. JOHNSON'S SHOE HOUSE, 203 WOODWARD AVENUE. French Glove Kid for Tender Feet. Serge Congress Hand Sewed. Side Lace Boots, Goat and Kid. Old Man's Solid Comfort, Widest Shoes Made.
