

THE MINISTERS' OLD COAT.

Minister's sons are very apt to turn out badly," said I to the gentleman who sat next to me in the car. We had met in the train bound for Chicago, and had struck up a conversation. He stopped me with his hand on my arm, and with an earnest look which I shall never forget. I paused at once when I was saying, and it seemed for a moment almost as if the rushing train had stopped to listen to me.

make light of the warning, and did think no credit in his studies. Though he managed to squeeze through the examination at the end of the freshman year, he came out far down to the foot of the class. He was more now contented with himself, and thought he'd try to do better the next year. But during the journey home recovered his usual spirits.

the hand, "it is yourself you have been talking about all this time." You are talking about all this time. "Sam," continued my new friend, nodding and smiling.

"on call." This thin veil having been thrown over the eyes of her expected suitors, she offered the extraordinary habit of eight per cent, a month, or ninety-six per cent, a year, three months' interest, or twenty-five per cent, being paid in advance at the time an account was opened. In other words, out of every \$100 deposited the imbecile depositor was handed back \$24, as an encouraging earnest of what the future held in store for her.

THE HOUSEHOLD. Ways of Cooking Fish. "Taint no use talkin', dar ain't no place in de world like 'Merica for fish," said an old colored cook recently. The truth of her asseveration may be confirmed any day by a visit to one of the great Fulton market fish houses and an inspection of the limitless variety offered to purchasers. But while nature has done so much for the strength and health of a man often brings fish upon the table in an unsatisfactory condition. It is the aim of this article to give a few plain and simple directions for the preparation of fish for family use, without entering into a recital of elaborate recipes and sauces.

There is no doubt but Mr. Beal can have the appointment of collector or of customs.

Supervisor Kraft says Judge Harriman was entitled to \$1,500 per year salary the same that Judges Beakes and Cheever received, and he voted for allowing the \$1,300 because it was right. That the cutting down of the salary of the judge of probate in 1876 was a political move. Every one knew it at the time, and the board of supervisors in voting the judge the remainder of his salary, did what has been done in a number of counties in the state where the republicans are largely in the majority.

A special to the Free Press from Washinton says a gentleman who has had several conversations with the President urging the appointment of Judge Cooley to the supreme bench to succeed Justice Swayne, said to your correspondent that he felt satisfied the president is determined to appoint Stanley Matthews in the event of Swayne's resignation before the 4th of March. One day last week a minister of the gospel went into Cady's grocery to do some trading. He espied on one of the shelves a prize package of coffee, and notified one of the clerks that he must cease selling packages drawing a prize or he would institute proceedings against him. He was not thought worth minding, and here the matter rested for a few days, when the divine called again. Of course he saw the package, or a similar one, and his indignation was aroused. He left the store and hurriedly wrote a letter to an officer of the law. This divine should organize at once "a poke your nose into other people's business committee" and appoint himself chairman.

B. Cheever, and A. W. Hamilton were chosen as a committee to make a plan for its accomplishment. The meeting then adjourned until the second Monday in October next.

tion, of which he was an honored alumnus.

Resolved, That we do hereby record our high appreciation of the remarkable scientific career of Prof. Watson, for many years director of our astronomical observatory, and professor of astronomy. We recognize James C. Watson as one of those rare men who bore the unmistakable stamp of genius. A mathematician of wonderful acuteness, an observer of almost unequalled keenness, an astronomer of profound and comprehensive knowledge, his untimely death is not only a grief to his Alma Mater, but an irreparable loss to the cause of science throughout the world.

Resolved, That the secretary of this board be instructed to furnish a copy of these resolutions to the family of the late Prof. Watson.

A Public Park.

Editor Democrat: Will you have the kindness to state through your paper if any thing has ever been done toward securing the old jail square for a public park? A petition of two hundred names of our most influential and prominent business men was secured at the cost of considerable time, as an expression of the general feeling in its favor. It was presented to the city fathers with a hope that some definite action or against the project would at once be taken. But instead of that it was "referred to the general fund committee," who seemed to have tabooed the subject altogether, so far as can be seen.

Have they the right to refuse to recognize a petition in this way, and suffer the wishes of the people to be totally disregarded without so much as a reply?

If they will do nothing about the park business, it must be secured by private subscription, for a park we must and will have, not the old cemetery grounds either. It will not be helping matters much to get one so far away from the central part of the city, if we have the right to appropriate the ground for that purpose, which is doubtful.

If it is expected to go outside the city limits, no more beautiful place in the world can be found than the point of land already beautifully shaded with evergreens at the top of the hill on West Huron street, owned by Mr. Crossman. That spot can be secured at a very reasonable price, and will be a delightful resort as it is easy of access and commands a view of the whole surrounding country. It is to be hoped that before another year passes away some action in this matter will be taken. Sorn.

The Correspondent and Lecturer.

The "Lornaetia," London: Sitting among the crowd at St. James' hall, listening to the powerful voice and stirring narrative of Mr. Archibald Forbes, it struck me that what we call progress and civilization have not after all much influence upon the primal instincts of humanity. Mr. Forbes said nothing with his lips which we might not have read in his writings. How came it then that in the year of the Christian era, 1879, we had returned to the practices of the dark ages, with their ministrals and harpers and "gestours" travelling from town to town, and from monastery to monastery, singing the gallant deeds of famous knights? Why pay five shillings to hear what we may read for a penny? This surely is not one of the triumphs of the press. It seems to me that the time will never arrive for the press to cope with the charm of the human voice or deaden the sympathy between man and man.

We required to look with our veritable eyes upon the knight of the pen that through all those lonely hours rode in the darkness, carrying news from the battle to the coast. The spoken story of that vast mob of stark-naked Zulus wasting themselves with infatigable valor upon the solid square of British civilization, the heart as with the sound of trumpet more than any written narrative could do. And when Mr. Forbes describes the finding of the body of the Prince Imperial, his hearers feel themselves in the presence of a man who does not tell of the power of human sympathy draws us nearer to the event. We are face to face with an eye-witness of the fabric of history.

Mr. Forbes lectures in university hall to-morrow, Friday evening.

Spinal Curvature.

The cure of spinal curvature which has attained such great prominence within the last few years, through the valuable improvements made on the mechanical appliances of Prof. Sayre, and the cure of these poor unfortunate has added fresh laurels to the reputation and excellence of our state university. Scores of patients have been treated, and relieved of their deformities in the homeopathic clinic and in the private practice of the doctor, and many a family throughout the state have had cause to rejoice Dr. Franklin's advent here. We have been eye-witness to a few of the worst cases of hump-back deformities rendered shapely and useful by his grand achievements. The reputation of the doctor in the west and north wherever he has practiced is a sure guarantee that whatever he undertakes will be well done, and the result of the cases cured is the best evidence of the great skill and judgment displayed in the treatment of these diseases. With this true philanthropy which has marked the doctor's life among us he devotes the larger portion of his time to the treatment of his clinical and hospital patients, and refuses all applications for his professional skill that does not strictly belong to the domain of surgery. He carries the best wishes and earnest prayers

of many anxious parents who have seen their children, from their crooked, sad, and emaciated condition grow up into a little and happy childhood. We know of instances where parents have given up their old residences temporarily in other states, and distast parts of our own state, to have their children brought here to be placed under his charge. We have seen among our exchanges lavish encomiums upon the brilliant success attending his treatment of cases who have visited him; and the cure of the piteous and un-unsightly sufferers that have received the benefit of his new improvement are by no means few.
