through long continued overwork became affected in his mind, and was therefore wholly
irresponsible for the fact and suspicious circumstances of his departure. The case is a very
sad one, and he and his family are receiving

the sympathies and aid to which they are entitled.

A few days ago, a little girl whose parents live on the Bay City State Road, was taken to Saginaw to a doctor's office that the doctor might examine a wound in her face near her mouth, and a swelling on her neck under the ear. The explanation then given of the injury was that she was out on the Ice some time ago and fell, and apparently strack her face on some sharp stick. The doctor thought the stick must have broken off and part of it remained in the wound, causing the swelling in the neck. He told the parents to bring the little girl the next day, when he would remove the foreign matter. The child was brought, when the operation was performed. To the doctor's surprise, a built nearly as large as an ordinary rifle ball was discovered. The true explanation was then ferreted out. A brother of the little child had a pistol and shot her, but being frightened at the consequences, had kept it a secret. The integril who is only a little more than 3 years old, could not tell what was the matter. This may be added to the list of circumstances that go to show that pistols are poor toys for little significance.

In a recent lecture, President E. L. Brown of the Humane Society, presented data concerning cruelty to animals in this Christian land which could not, he justly maintained, be paralleled in so-called Heathendom. A prominent person had told him that "of the 10,000 men about the stockyards of Chicago 4,000 seemed in their barbarity no better than murderers." A similar state of things exists on the railroad lines. Cattle and swine packed in cars are tor-tured with "prods," often having eyes torn from sockets by the brutal drovers. They are in some cases, if not generally, kept from water twenty-four to thirtysupplied with salt, and at last allowed to drink their fill to increase weight, 100 to drink their fill to increase weight, 100 pounds being often thus added to the avoirdupois of a single steer. The consequence of all this is that a large proportion, sometimes amounting to ninetenths, of the beef consumed in the great cities is "not meat but fever." These shameful facts have long been familiar, and frequently referred to. Knowledge of them is naturally provocative of vegetarianism, and points to the necessity of humane education, which would "pay" in a financial sense, mendments to the charter of Jackson. A NEW POSTAL ROUTE.

A NEW POSTAL ROUTE. Second Assistant Postmaster-General Elmer has ordered the establishment of a postal route in the Territory of Alaska, to extend from Haines to Janeau, a distance of 105 miles, the service to be monthly. The contract was awarded to Sheldon Jackson, of the New York Presbyterian Missionary Society. This is the first mail route established between points within the Territory of Alaska.

A MONEY STATEMENT.

A statement has been prepared by the Commissioner of Internal Revenue which shows that the receipts of the office the last fiscal year were \$146.400,000. The receipts from July I, 1882, to March 2, 1883, exceeded the receipts for the corresponding period of last year by \$2,000,000. It is estimated that the receipts of the current fiscal year, if there had been no reduction in taxation, would have amounted to \$145,625,000. Deduct on account of changes in the revenue laws, \$5,000,000; total estimated receipts of the current fiscal year, \$143,625,000. The estimated increases or decreases of the revenue for the remainder of the current year, as compared with last year, are as follows: Increase on spirits, \$1,500,000; decrease from banks and bankers, \$2,400,000; decrease from special taxes, \$1,600,000; decrease from special taxes, \$1,600,000; decrease from tobaccco, \$3,000,000; total increase, \$1,500,000; total decrease, \$3,500,000: net estimated decrease, \$5,000,000. A MONEY STATEMENT.

THE NEW STAMP.

The new two-cent postage stamps for first-class matter will contain a vignette of Washington, with a neat border. They will supersede the local or drop letter stamp, but all of those issued will be good for use. Owing to the number of three cent stamps in circulation and on hand there will be a perceptible decreuse in the revenues of the department during the next fiscal year. This, Gen. Hazen explains, will be caused by the holders of the three cent stamps putting them out before the 1st of October, 1883, when the new stamps would go into effect. This will not affect the local rate in cities where there is not a free delivery system, the postage on local matter being one cent in-

Owners of bonded whisky on which the tax is coming due from menth to month, are finding some difficulty in arranging a programme for exporting it. They would like to export most of this whisky to Canada and warehouse it there for a time before bringing it back. Commissioner Raum tells them that of course he has no objection to this scheme because the law permits distilled spirits to be exported without payment of the internal tax. The general freight agent of the Grand Trunk railroad has inquired of the treasury department whether the government would interfere with the proposed export of these whiskies to Canada. It is reported that some of the whisky people have gone so far as to request the state department to negotiate with the Canadian authorities to secure proper facilities and protection for the whisky exported to Canada, to be warehoused, but it is not thought probable that the government will in any way meddle with the matter. The chief obstacle in the way of the export of whisky to Canada is that the Canadian haw will not permit the entry of packages containing less than 100 gallons.

An attorney is in Washington, and has made an informal argument in their behalf to the effect that the increase of salaries may be paid out of the regular appropriation for salaries for the fiscal year. Officials of the department, however, assert that this cannot be done, as such a step would cause a large deficiency.

WIGGINS' PROPHECY FULFILLED.

John Webster, a former contractor of Ottawa, now of Moose Jaw, forty-three miles from Regina, Northwest Territory, writing to a friend at Ottawa under date of the 12th inst., speaks as follows of Wiggins' storm: "The storm commenced on the 8th at noon and continued with terrible force till 2 a. m. on the 0th, when it reached its greatest hight, the wind blowing seventy-five miles an hour. The air was one mass of snow. If you were ten feet from your door you could not find it again, and you could neither stand nor breathe in it without shelter. This is the greatest storm in a century. In the middle of the storm a gun was fired asnouncing that a person was lost in the center of the town. None, however, would venture to the rescue, as they were afraid of getting lost themselves. After two hours of hard fighting with the storm the party got safely in. A large store 500 by 100 feet and two stories high was blown over. Many small sbantles and houses collapsed. His death is of course a surprise to his friends in that city. He is highly spoken of by those vho were acquainted with him. The scene at the mine was terrible to witness, and at the morgue where the bodies were taken for identification the grief of the stricken once was fearful. A man came in, and hastily scanning the faces of the dead, at last stopped beside one, claiming it as his brother. At the same moment a woman who had been engaged in the sad task of looking at the bodies, in fearful hores of seging the face of the lest one tearful hopes of seeing the face of the lost one, exclaimed that the same corpse was that of the husband. A dispute arose over this, when the woman said that she could tell if she when the woman said that she could tell if she was right when the boots were removed, for the reason that her husband upon the fatal morning when he got up, finding one of his own socks wet, had taken one of hers. Accordingly, the boots of the dead man were taken off and disclosed one man's sock and one woman's stocking. By such means only were the bodies identified, as the length of time which has ensued since the accident happened has been such that the remains are horribly disfigured.

Dr. Wm. H. Van Buren died in New York a few days since. He had an appoletic attack in May last, but rallied during the summer months. Recently his symptoms assumed an unfavorable character, and for the past few weeks he grew weaker constantly. He was attended during his last filness by his brother-inlaw Dr. Alexander Mott, of New York. It is said that there is no living surgeon in this country fitted to fill the position which Dr. Van Buren held in his profession. He leaves a widow and two married daughters. He was born in New York, April 5, 1819. The establishment of the United States sanitary commission during the late war was due largely to the labors of Dr. Van Buren.

AN UGLY MOLLY MAGUIRE.

John Kane, leader of the Molly Maguires of Fayette county, Pa., was pierced with four belis from a pistol in the hands of F. C. Keighley, of the Youngstown Coke Works, four miles from Uniontown. Kane had lately been discharged for organizing a force of striking miners and driving new men out of the pits. He was also ordered to leave the house he occupied, which belonged to the company. This so enraged him that he threatened Keighley's life, and went to Uniontown and got drunk. He entered the court and threatened Congressman Boyle, who had prosecuted him for the murder of Maurice Healy, but was ejected from the court by an officer. He then returned to the works and entered the store, where he renewed the old trouble with Keighley. London and Windsor are greatly excited over the condition of Queen Victoria. While her majesty was descending the stairs to take her carriage for a ride, she slipped. Nothing was thought of the accident at the time but when the Queen returned the limb was so badly swollen as to render it necessary to carry her to her room. The physicians were summoned, who announced that there was no immediate danger, though the Queen will be confined to her room for some time. Business was almost entirely suspended in London, owing to the anxiety felt by all, and many day laborers abandoned their work.

> IRON SHOT. -A company has been formed in Iowa for the purpose of man-ufacturing sporting shot from iron. It states that the trials which have been made of the shot have proved it to be fully equal and in some respects superior to lead shot. Ovens are now being put up to anneal the shot. The invention is protected by letters patent both in the United States and in Canada. No tower is required as the shot is made by the process with less than three feet The company are nearly ready to put the new manufacture into the market, and, as it can be sold at a lower price than lead shot, the demand will probably soon assume large propertions. It is stated that the iron shot looks well, shot by inspection.

THE FARM.

To Get Rid of Lice. W. H. White, in a recent number of the Country Gentleman, speaks as follows concerning lice on stock, and the desire for an unfailing remedy may be used by any one without danger. He says: "Such a remedy we have in the bee-larkspur of our flower gardens. A strong tea made from the seeds or foliage of the plant can be used as a wash with perfect safety. Any part of the plant may be used in making the wash, green or dried. The plant should be gathered before it is frosted, and cured and preserved as other herbs are. In the use of kerosine, mercurial ointment, tobacco, etc., great care must be used or injury results from absorption. Even if no other injury results, it enters the limbs or other parts of the animal and is often a permanent injury. No such danger need be apprehended in the

All the parts where the vermin lodge should be well scrubbed with the wash, and if thoroughly well done in a pleasant, mild day, one application is sufficient. In former days when school children were troubled, I have heard old people tell their experience in using his remedy to their complete satisfac tion. Another equally harmless remedy s aloes in fine powder, which may be used dry by filling a common pepperbox with the powder and sprinkling it freely into the hair, on the neck, back, sides and rump of the infested animal. Rub it thoroughly through the hair and on the skin with the fingers. Leave the animal undisturbed a week, then card thoroughly, and apply as before. Usually two applications, if thoroughly made, will suffice.

THE HOUSEHOLD. Clear the Door-Yard!

There is nothing that makes a house look more forlorn than litter in the yard, and about the barns and out houses. iweller in towns notices particularly such clutter, because there are no waste spaces about city houses, and every-thing is kept neat. Look at some outlying farm houses, and you will find a general untidiness. Old sleds are piled up in the spring beside the fence, and there left to be spoiled by the heat of ummer, and in the autumn the farm implements for having and harvesting —carts, wheels, plows, barrows, mow ers, reapers, tedders—remain out-ofdoors to their great injury. When driving about the country, I always observe the back yards of farm houses, and I have counted seven sleds, four sleighs, ten cider or vinegar barrels, eight old broken down carts, sundry wheels, three horse rakes, dozens of old packng boxes and baskets, and bushels of pattered fruit cans and tin pans, in a space of three miles. A great part of this litter was in full sight of the house, but the occupants had become used to

Now, women are really quite as much to blame for such untidy surroundings s the men, who are so much occupied of little else. Women's eyes are better educated, and they should insist upon a pring and fall clearing—out-of-doors swell as in-doors—and persist in their afforts to keep the yard neat and clean, with piles of stakes and wood and poles. Yet there are many housewives who do their share in making their homes untidy and unwholesome-for disease will always follow in the wake of uncleau-

When women throw corncobs, cucumber and tomato skins, and even potato parings, out-of-doors, and let their sink uts flood their yards with soapsuds id dish-water, and permit their girls sweep out the kitchen dirt upon back walks, and throw broken dishes, old boots and shoes and rubbers beside the fences, how can they complain of the litter connected with the farm work?

Why should so much litter be thrown out-of-doors, to lie about and disfigure the place, when the kitchen stove will burn it up quickly? Why should old scouring rags be thrown away, when water will cleanse them, and the rag bag will hold them, and in return give you bright tins? Old broken crockery is difficult to dispose of, yet if you keep hens, and have small children who will delight to smash the pieces into tiny bits, and you can find an excellent return for them in eggs.

It has been said "the trail of the

white man across the continent can be marked by the empty tin can," and one fully realizes this statement when travel ing in the Far West. But even the despised tin can, can be made of use; if they are unsoldered at the top, they can be made into glue pots, or paint pots, or will hold garden seeds. If they are opened at the top and bottom, and un-soldered at the side, a good soap dish can be made, or the tin can cut up, and used to nail over rat and mouse holes. And in the early spring they are excellent to start tomato and other plants;

to disfigure the dooryard.

If a young man of tidy habits is in pursuit of a wife, I would caution him not to look for her in a farm house where the chickens are fed slops thrown out at the back door, and old rags, bones Well, you'd a dide to see how quick his thoughts turned from his financial troubles to his physical misfortunes. your door-yards; strive to observe them with a stranger's eye. Look at them as you would if you were desiring to pur-chase a farm, and see how the litter and untidiness appears to you. A purchaser notices the cluttered door yard at once, and it tells him that a general unthrifti-ness pervades the whole place. A farm-er that will daily pass such piles of good-for-nothing articles, or of good im-plements spoiling from neglect, will al-so let weeds starve out his crops, and grass and bushes spoil his fences and shade his fields. When he heard the footsteps ascend the spirs and approach his door, he opened 4 and stepped out into the hall, shutting and locking the door behind him. Instantthe sound in the hall ceased, but began immediately in the room he had left. He knew there could be no doubt about it, for there was a loose board in the floor, and every time the spook trod on that it gave a familiar squeak which it was accustomed to emit whenever a human being walked over it. This was a very interesting performance, and the excitement it caused aroused the spooks to fresh exertion. They began to prance about the house with lights.
