The contract for the building was let in June and now the walls are well up, and it is expected the building will be completed and ready for use by November. There will be two shop-rooms, one for wood and the other for metals, a mechanical labor-atory, a lecture room for classes in mechanics, about forty feet square, a room for drawing and driughting and two offices. The sum of \$41,760 remains available after this year's expenditure of \$9,558 on the harbor of Grand Haven, Mich. The permanent completion of this harbor depends upon the extension of the present piers so that vessels can enter during any weather. It is estimated to cost \$210,000, of which sum \$150,000 could be profitably expended during the next fiscal year. Eleven thousand nine hundred and forty-one dollars was expended on Black lake harbor, Mich., during the past fiscal year. An appropriation of \$20,000 is asked for, which it is expected will complete the projected improvement. On St. Joseph harbor, Mich., only \$858 was expended, leaving an available balance of \$20,015. The estimate says \$51,015 will be required to complete the work and recommends an anorportation. His father was an Englishman and his mother a Russian countess. He entered the Russian army on attaining manhood, but that was too dull for him, and he secured a commission in the English army through his father. Dis-satisfied again he ran away and came to America. He was a young man then and he was not long in this country, but nevertheless he had married fourteen different women. The last one was a daughter of Charles J. Whitney, a wealthy resident of Detroit, with whom he eloped to Toledo. His usual plan was to persuade a minister to marry him in some illegal manner, and in this last case he urged that as a defense, but the court would not al-low it. He won the affections of Miss Whit-ner while employed as her father's coachman. He had been sick for about two weeks with in-termittent fever, and a few days ago told the warden that his real name was Charles Edward Neville Consivieski, his Russian title being Count. The Political System of Chili.

By reason of the military successes which have made Chili the strongest Power on the West Coast of America, the Congressional elections in that Republic a few weeks ago deserve unusual attention. They are the first since peace, and foreign publicists will look to them with curiosity for signs of the effects of a five years war upon the spirit of the people. The political acrimony which has grown to great proportions between the Government and the church invests them also with another and peculiar interest.

The Chilean President serves for five years and is not eligible for the next term. A Presidential election will come next year. The Congress consists of two houses. The Senators serve for six years and the Deputies for three. Those were elections for both Senators and Deputies which have just occurred. They are reviewed in a letter from Santiago that we print to-day, and no change in the old system of the control of the electors by the Executive is indicated, unless it be one for the worse. The Executive seems more potent than ever to crush opposition and elect its
