ED. DEMOCRAT.—One of the funniest instances of concealed human nature is the idea held by nearly all the "female" department clerks of wedding prodigious influence with the administration.

Queen Victoria has ordered a glass tea set from the Dutch Washington glass works of New Bedford. A Boston tea set would have been more historically fitting for her.

A good word for the Salvationists: Mr. Spurgeon says of the salvation army "If it were wiped out of London 5,000 extra policemen could not fill its place in the repression of crime and disorder."

London should pull down the blinds. No sooner is the disgusting Duke second sprinkled with a libel of lime than another dose of nastiness is uncovered in the persons of Lord and Lady Campbell.

The perfume of the Alpine flower, the edelweiss, which is delicious when fresh, has been compared to the perfume of the tropical banana. The scent rarely lasts over an hour after the flower has been picked.

The typewriter dates from 1744, when the Henry Mill obtained in England a patent for a device to "write in printed characters, one at a time and one after another," but it was not until 1867 that it was improved so that it would work satisfactorily.

Lansing Republican: The convicts in the Detroit House of Correction had a roast turkey and mince pie banquet on Thanksgiving, followed by a magic lantern show. Poor and honest looking men outside of jail didn't. Be a criminal if you want to be happy.

A distinguished physician, in a German scientific journal, advocates the general use of sugar as an article of diet. He affirms that during forty years he has eaten at least a quarter of a pound of sugar daily, not counting sugar-forming substances taken at the same time, with benefit.

The sum of \$2,876 has been turned over to the Charleston earthquake sufferers, as the result of Miss Mary Anderson's performances in Dublin for their benefit. Mary Anderson's father, a confederate soldier, is buried in Magnolia cemetery, in that city. Her gift has, therefore, its meaning.

Secretary Manning in his report gives the advocates of a war tariff in time of peace something to think of. His suggestion that the United States be prosperous and harmonious with unrestricted trade among themselves, while the states of Europe surrounded by tariff barriers, are against every one, is not, it is filled with food for meditation.

As evidence of the truth of the assertion that many young Mormon children are taught the act of perjury from the time they begin to talk, a letter from a gentleman who is familiar with the facts, says that he knows of a little boy scarcely two years old, who, on being asked what he would say if the deities demanded, "I would say my papa died."

The corn crop of this country this year is said to be 1,650,000,000 bushels. The same authority gives the consumption as for working men, namely: 180,000,000 bushels used in human food, 624,000,000 for working animals, 20,000,000 for seed, 100,000,000 for the production of spirits and glucose, 55,000,000 for export and 900,000,000 for the food of most producing animals.

The most important gathering of the age is the general conference of all anti-monopoly and reform parties and organizations to be held in Cincinnati on the 22d day of next February. This conference or convention, will shape the political history of the United States for the next twenty years. It is none too soon to take steps for being well represented there.—Anti-Monopoly.

The millers of Minneapolis are discussing a stupendous scheme to consolidate all the mills under one management. It is a matter that has been talked of for some time. If the combination were formed the company would have a capital of \$10,000,000. All the mills except the Washburn mills—which under the will of the late Governor Washburn cannot become a part to such an organization—would be taken in.—Jackson Tribune.

It is said that the syndicate that recently purchased the Michigan & Ohio, proposes to have an independent line from Dundee to Toledo, so that road now pays a handsome sum to the Ann Arbor road for the use of its track between these two points. This syndicate also intends purchasing the Michigan & Ohio to the Straits, so as to ship grain and other products at Duluth direct over their own continuous line to this city, and thence to the East.—Toledo Bee.

A member of the Geological Survey says that Salt Lake will be of great value in the near future, not only on account of the common salt it will produce, but also for the sodium sulphate it contains. The latter is separated in a flocculent precipitate by the cold weather of mid-winter, and annually thrown up on the shore in enormous quantities. There are many other lakes in the far West which are an inexhaustible supply of commercial alkalis may be obtained at a small cost. No Lake, Cal., alone being estimated to hold over 75,000,000 tons of sodium carbonate.

A child was recently born at the Emergency Hospital, New York City, without a mouth. The physician made an incision, cutting through the floor of the mouth, and a tough membrane which connected the upper and lower jaws. Clumps of pressed cotton were then put between the jaw bones to prevent them from uniting in healing. The child's mouth is now quite natural. There will be but little lip, and the mouth when closed will look like a heavy snarl. It is thought that the palate will develop and develop and be nearly normal by the time the child is full grown, and an effort will be made to turn the flesh so that the lips will appear red.

"Not only the men who wore epaulettes on their shoulders, but the men who marched in the private ranks; every man who fired a shot for liberty, every man who enlisted in the war, red with his belt of sufferer by stores and supplies, keep on the map of earth this homestead of liberty, are your creditors and mine until the end of all the years to come. And when we meet one of these men who may have left a leg at Shiloh; or lost an arm while planting a flag on Lookout Mountain; or whose eyes went out in the flame and smoke of the Wilderness; we ought to stop and think of the debt we owe—a debt that never can be paid in money."—(Speech of Geo. L. Yapple.

Some Michigan papers are advocating the passage of a law by the Legislature to prohibit the use of stoves in railroad cars. They cite the recent case of a car being set on fire on the Chicago & St. Paul road in an accident, roasting several persons alive; and they propose steam pipes to warm the cars supplied with steam from the engine. The Legislature will, no doubt, wisely go slow on such schemes. There is less danger of being burned by steam in case of an accident. Besides, if the cars of the Chicago & St. Paul road had been supplied with axes, saws, crowbars and buckets, so that the passengers could release those held down in the wreck and put water on the fire, nobody need have been roasted.—Lansing Republican.
