Papers have been filed in the Menomi-nee circuit court in a suit involving the title of the famous Chapin mine at Iron Mountain. The mine is valued at \$3,500,-000 and the lease is owned by the Chapin mining company of Milwaukee. The com-plainant is the Kev. John A. Banfield of Tacoma, Washington Territory. He sets forth in his complaint that prior to the year 1864 the complainant resided in Mar-quette, Mich., and had acquired valuable information in respect to mineral lands in the Marquette and Menominee iron ranges. At some time in 1864 the defendant, Hen-ry A. Chapin, entered into an agreement

terests died in California recently. It is predicted that Northern Michigan will receive a boom during the coming summer that will surpass anything that has ever struck it before. Three railroads will probably be built into this region dur-ing the coming y ar. One at Charlevoix, a branch of the Chicago & West Michigan to Elk Rapids and one to Traverse City. They will give an outlet to the products of our forests and also to the pig iron which is manufactured at Trenton and Elk Rapids. There is money for the road which first reaches this region, as it will open up a vast tract of country which is rich in lum-ber, and it is also a good farming region. A premature explosion of a blast occur-A joint resolution has been introduced in the senate proposing an amendment to the constitution providing for the election of senators for a term of four years, and requiring that but sixteen of these be elected at every alternate election of a state legislature. The resolution seems to conflict with section one of article four of the constitution, and has been referred to the judiciary committee.

In executive session the other day the In executive session the other day the senate condirmed the nominations of Dr. Hal C. Wyman of Detroit, to be a member of the state board of charities and correc-tions; Sidney D. Miller, to be member of the board of metropolitan police commis-sioners for the city of Detroit, and Wm. Ball to be member of the board of control of the state reform school.

A bill of considerable importance has been introduced in the house by Repre-sentative Cross of Van Buren county rela-tive to the disposition of state part paid swamp lands. The measure provides that township boards may make compromise settlements and determine thereby the sum which the commissioners of the state land office may receive in extinguishment of the ditch, or drain or other taxes charged against these swamp lands in their several townships, and that this sum, when so determined, shall be received in lieu of all the taxes above described and interest theron. The passage of the meas-ure will be of particular advantage to many of the township school funds.

WASHINGTON, Feb. 2, '87.

WASHINGTON, Feb. 2, '87. The house committee on invalid pension to Walt Whitman and returned with adverses recommendations the senate bills granting pensions to the widows of Gen. Logan and Gen. Blair. These bills were placed on the private calendar and the friends of the bills will spare no efforts to have them passed. The argument used by the mem-bers of the committee opposed to the pas-sage of the bill for Mrs. Logan, is that if congress should pass the bill and establish this precedent it would increase the pen-sion roll \$345,000 annually. The democration members cannot see the justice in grank ing his widow a pension when she is not in want. The republicans of the committee dissent from these views, and urge that the cherished companion of Gen. Frank P; Blair, who 'saved Missouri to the Union,'' and the widow of the brave and gallant Logan be tenderly cared for as long as they live.

of pure salt rock is thus shown to be 116 feet, which is more, we think, than at any other point on the river. The two salt wells at St. Clair, we understand, have but forty feet of saltrock. Gas was found, in boring, at 550, 892 and 1.920 feet, coming up with force enough to throw water and oil out of the mouth of the well. It is thus how that Port Hurze has inexthematable oil out of the mouth of the well. It is thus shown that Port Huron has inexhaustable salt rock beneath it, in thickness surpass-ing that yet developed at any other point, and in purity equal to the best. With these advantages, and unequaled facilities for shipments, it must become and remain one of the great salt producing cities of the world.

> The house has passed a bill to define the qualifications of deputy and under sheriffs. The bill provides that hereafter all deputy and under sheriffs shall be citizens of this state and qualified electors in the county where the obset has provided a check where they shall be appointed or elected.

Petitions numeronsly signed have been sent to both houses, relative to the consti-tutional limitation affecting the terms of office of sheriffs. These petitions indicate that there is a pretty genereal feeling in favor of removing the limitations.

Barely a quorum of either house re-sponded to roll call at the opening session of the present week. The only matter under discussion in the house was the bill to abolish the superior court in the city of Detroit, which came up in committee of the whole, and the passage of which, with-out any material amendment, was finally agreed to by that committee.

The senate opened the week in a little bet-ter manner, and passed bills to make volid collection of taxes and sales of property under assessments made prior to passage of act 153, laws of 1885; to punish drunk and intoxicated persons; and to punish the adulteration of confectionery.

Representative Crocker is preparing a bill to amend the law relating to the can-vass of votes. The bill will make it the duty of the board of county or district canvassers to reject as void all votes for members of the legislature, who hold any office "under the United States or this state, or any county office." The bill will give the persons voted for "a day in court" that is to say, they may appear before the district or county board of canvassers and make the application to throw out as make the application to throw out as void, votes for United States, state or county officers, and a valid defense shall be that at a certain time before the elec-

The bill prohibiting the employment of The bill prohibiting the employment of Pinkerton detectives as deputy sheriffs passed the house without a dissenting vote, but the one asking for the repeal of what is known as the Baker conspiracy law met a snag in the shape of a petition from Mr. F. A. Baker, its author in the session of 1877, that caused the friends of the bill to repeal to lay it over until such time as a complete canvass of the house demonstrated the certainty of its passage. demonstrated the certainty of its passage

The bill for purity of elections was in troduced by a representative from De-troit, and may be so amended as to apply only to that city. The recent re-counts there, have shown that if one thing is needed more than another it is some method whereby the honest desires of duly qualified electors can be expressed with-out fear or fraud. The provisions of the bill now pending calls for a system very similar to that which now prevails in France and Canada.

The legislature will take a recess of 12 days, from February 3 to February 15. On the afternoon of the 3rd the entire body will proceed to Ann Arbor, arriving there at supper time and remaining all night, being entertained at the homes of the leading citizens. Friday they will inspect the different departments of the university, and Friday evening go to Detroit, as guests of ex-Gov. Alger, to attend the re-

The measure is advocated by the woman's suffrage association of the state. The association is now engaged in organ-izing in all the cities and villages of Michi-gan, and some formidable petitions are expected expected.

The house has just passed a bill to pro-vide for the organization of log and tim-ber insurance companies.

The 22d inst is the last bill day of the ses-sion, so that from now until the time ex-pires there will be a deluge of bills every day. Those who have measures which they are anxious'to introduce, will file "blanks," and then fill them out after the time has evalued. expired.

One of the most important measures now pending is the bill to punish murder and rape by hanging. The provision is that the extreme penalty shall be exercised only on the recommendation of the jury, thus providing an adequate safeguard against the abuse of the hanging power. The bill passed the house two years ago and failed only by one vote in the senate. Three of those who favored the bill in the previous house are now in the senate, and are ex-pected to help it there. No close canvass has yet been made.

Tommy, who managed to know most of what happened at the bank, noted the fact and rejoiced.

Within six weeks the shareholders of the Mudford Chemical Company met and resolved to go into liquida-tion; and, though Mr. Hodgson did not think it worth while to thank the junior clerk for the information he had iven, Tommy was perfectly satisfied. He knew that people do not forget things which save their pockets.

It happened that, some months aft-er the incident of the Munford Chemical Company, Messrs. Hodgson had important business to transact in Turin, and it was thought advisable that the senior partner should proceed to that city to look after it. There was some idea, if the prospect seemed favorable, of starting a branch house there. The question then arose, which of the clerks should accompany the head of the firm as his secretary; and Mr. Hodgson, mindful of the service which Mathers had rendered him, consulted the head-cashier on the propriety of the selection. Park-inson, it happened, had a favorite of his own, and Tommy would have lost his opportunity if he had not remembered that at one time, when he was bent on acquiring foreign tongues, he had spent his evenings for a few months over an Italian grammar. He contrived to let this fact be known, and in due time Mr. Parr informed his senior partner that "it seemed that young Mathers knew something

of the language." This decided the point. Tommy received his orders, and in three days more found himself on board the Dover and Calais packet, in charge of a large dispacth box and Mr. Hodgson's bulky portmanteaus. The journey breath. The illustrious doctor's dilemma is cer-tainly an unpleasant one, emphazing, as it does, both his own honesty, and the contemptible prejudice and bigotry of English medical men. The masses, how-ever, having no sympathy with their non-sense, keep on using the remedy he so highly recommends and get well, while the rich and able depend upon the preju-diced doctors and die!
