THE STATE. A TERR BLE TRAGEDY in which the name McDougall appears. in which the name McDougall appears. William Shobelt, living near Norris, heard his little boy crying the other day. Rush-ing out doors he found the lad in the jaws of a ferocious boar, which broke away with the little fellow in his mouth, until inter-cepted by a barbed wire fence against which the boy's fiesh was badly torn. Shobelt killed the boar with an ax, but not before the son was cruelly torn on the legs and breast and had three of his ribs broken. He is in a very critical condition. He was followed by our genial fellow townsman, C. H. Manly who always knows what to say and when to say it, proving himself equal to this occasion, and he left the platform amid a volley of cheers. Then came Hon. C. R. Whitman, who made the speech of the evening. As Mr. Whitman had but just returned as a delegate from the convention, his remarks caused much enthuminsm. He said that although St. Louis was a pretty hot place the convention was composed of the coolest-headed men who had met there for a definite purpose, proposing to do what they had gone there to do, to work for the right men, to nominate the right ticket, and then to use every energy to elect that ticket which, Mr. Whitman said they could and would do. He also said it was the most harmonious convention he had ever attended, which augurs well for the election of the candidates. Mr. Whitman left the platform amid deafening applause. The last speech of the evening was by Mr. J. McEniry, a law student, who made a rousing speech but which was interrupted by a heavy rain which broke up the meeting. Postmaster Stearns, of Adrian, was expected to be present, but he was unfortunate in

Common Council Proceedings. The common council held a special eeting last Monday evening, every member being present. On motion of Ald. Allmendinger the

street committee were authorized to set the fence back, that stands in front of the Gundert property on First street. The subject of the appointment of a board of fence viewers was brought up, and after some discussion, adopted. The following men were then appointed on the board, from the different wards: 1st ward-Conrad Krapf. 2d ward—John C. Schmidt. 3d ward—Will J. Clark. 4th ward—D. J. Loomis. 5th ward-Newton Felch

6th ward-T. J. Keech. A petition was received from Alice M Risdon asking permission to erect a frame dwelling house on the southwest corner of Liberty and Fifth streets. Also per-mission to use the streets during the erection of the same. Both requests were granted. A petition was received from Michael

Gauss stating that he had begun the erection of a frame building, 10 feet by 12 feet, on a lot on the east(?) side of Liberty street, and was not aware that th said lot was within the fire limits until Mayor Beakes prohibited further work on the building. He asked the council's permission to finish the building, but the matter was referred to the fire committee with power to act.

Agreeable to a request made at a pre-vious meeting, the city attorney presented to the council an ordinance relative to public health, making it obligatory upon all physicians and other persons to re-port to the board of health all cases of contagious diseases, and all deaths. The ordinance was adopted by the council and will take effect after due publica-

ROYAL BAKING POWDER.

Free from Lime and Absolutely Pure.

The Royal Baking Powder is made from Cream of Tartar specially refined and prepared for its use by patent processes, by which the Tartrate of Lime is totally eliminated.

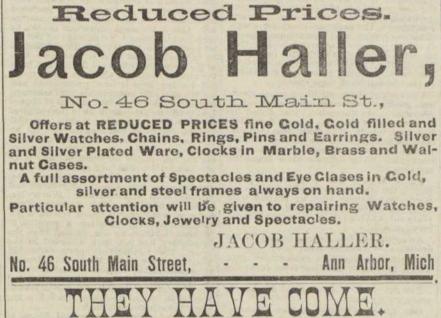

> This highly important result has been attained only with great care, labor and expense. In money alone a quarter of a million dollars has been invested in patents, machinery and appliances by which the crude Cream of Tartar, being procured direct from the wine districts of Europe, and subjected in this country to these exclusive processes, is rendered entirely free, not only from the objectionable Tartrate of Lime, but from other foreign substances.

This adds greatly to the cost of manufacturing Royal Baking Powder; but, as all its other ingredients are selected and prepared with the same precise care and regardless of labor or expense, an article is produced that is entirely free from any extraneous substance and chemically pure in all respects.

» No lime, earth, alum or impurity of any kind can, by inadvertence or by the use of adulterated articles or otherwise, be introduced into the "Royal," and it contains no ingredients except those certified by the most eminent chemists necessary to make a pure, wholesome and perfect baking powder.

It costs more to manufacture the Royal Baking Powder than any other, but it is, as shown by chemical analysis, the only absolutely pure Baking Powder made.

Royal is the only Baking Powder made that is free from both lime and alum.

INVALIDS' HOTEL SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a maryclous degree of accuracy which enables an operator to exactly locate a fracture in a subminite cable nearly three thousand miles long? Our venerable, the weather "has become so thoroughly familiar with the most wayward elements of nature that he can accurately bredict their movements. COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such ases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases, h, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or

literature. By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every malady insident to humanity.

BRIGHT'S DISEASE, DIABETES, and KIDNEY DISEASES. HIGHTY'S DISEASE, DIABETES, and indred maladies, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examina-tion of patients, who can, therefore, generally be practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and world-famed World's Dispensary and Invalid' Hotel. Our specialists have acquired, through a vast and varied experience, and, hence, have been successful in *nicely* adapting their remedies for the eure of each individual case. specialists have acquired, through a great expertness in determining the and, hence, have been successful in mi for the cure of each individual case.

These delicate diseases should be carefully treated **CAUTION.** These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive *injury* in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and success-ful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the dis-ease and condition of our patient.
