The law was passed in 1889 in New York state, creating an expert commission of three members to consider the subject and advise states. Masachusetts, New Jersey, Georgia, Michigan, Delaware and Mississippi fell in line with the idea. The statutes creating these commissions have largely the same wording in the several states, and the men serve without pay. The subjects that have invited the attention of the commissioners were marriage and divorce, the execution of wills and deeds, notarial certificates, bills and notes, and commercial notes generally.

WHY MEN STAND. Complex Mechanism Renders It Possible

but the Attitude Is Not Normal. From the Scottish American: We are so accustomed to standing upright as a natural attitude that few of us think what a special complex mechanism is required for this purpose. A moment's consideration will show that the ordinary explanation of the erect position (the center of gravity to be directly above the feet) is insufficient. When a man is suddenly shot, whether from the front or behind, he drops on his face, for the truth is that there is much more weight in the front of the spinal column than behind it. The fact is that when we are standing a large number of powerful muscles (both front and back) are simultaneously at work, the effects of their action being to neutralize each other. Thus, the legs would fall forward were it not that they are kept vertical on the feet by the strong tendon (the "Achilles") at the back of the heel. At the same time the muscles of the thigh are tightened so as to prevent us taking a sitting position, and the muscles of the back are pulled tense The dome of the capitol building at so that the trunk does not stoop for-Washington is the largest iron dome in ward. OFFICIAL PAPER OF THE CITY. Chicago carried off the prize yester day in the contest for the Democratic national convention. New York, St. Louis and Cincinnati were close rivals, but Chicago's central location and facilities for a convention city finally decided the delegates in her favor by the vote of 26 to 24. The convention will meet July 7, to nominate the next president of the United States.

Prof. Kirchner, of Detroit, in his lecture to the senior law class of the university last Moaday referred to the Venezuelan question as follows:-"If after this commission has done its work, after the most thorough research and careful inquiry, leaving no opportunity for a misunderstanding of the true condition of affairs, Great Britian is found to be in the wrong but still refuses to arbitrate the matter, we will most certainly fight her. This doctrine of non-interference of foreign powers with the affairs of the American continent is recognized and applied among the nations of the old world in their international relations, and should be enforced by the United States."

The deep waterways commission to which President Angell of the University has been appointed, has in view the consideration of one of the most important subjects in which Americans important canals in the lake system, are the Welland and Sault St. Marie canals. The Welland canal runs across Canada just opposite Buffalo, at Port a quarter miles long, and has twenty- of taste. feet fall. A greater tonnage passes the world. OUR NEW REGENT.

Hon. George A. Farr, of Grand Haven, who was appointed by Gov Rich last Saturday, to fill Regent lev's resigned place on the Boar of Regents of the University, was thus spoken of by the Grand Haven Tribune, his home paper, when his name was first mentioned for appointment:-"He is surely a Western Michigan man; brilliant, bright, able and brainy, being a graduate of a Michigan college and thus being thoroughly posted in the wants of our colleges and university. He would indeed be a valuable man on the board." As was anticipated Gov. Rich has selected one of the strongest, partisan Republicans in the state to fill this vacancy. Mr. Farr, is however, a man of high ideas, and, we believe, is not unduly influenced by party policy when a question of right and wrong is involved. He was the temperance leader in the legislature when state senator, and was the means of having the liquor license raised. Mr. Farr's appointment was a recognition of the western Michigan people, the second district being already represented by Regent Henry S. Dean of Ann Arbor.

Now that the court house clock has been provided with Welsbach gas burners, and the time can be read at night, many residents near the campus are asking why the dials of the campus clock, which were illuminated during the vacation, are not lighted now. The very time when few persons who cared to read the time were here, the time could be read every night, while now, at the busiest time of the year, the lights are not burning.

The sale of seats for the May Festival concerts has been something unprecedented. Those who desired to reserve seats could get them only by lining up" for hours in front of the School of Music on one of the two mornings when the boards were opened. Some of the eager buyers stayed Arbor. in line from seven o'clock the previous evening, to get good choice, and it is indoubtedly the object of many of these people to speculate in the seats, selling them at exhorbitant rates at Festival time. Such a practice as this should be discouraged and condemned, but Our Man sees no practicable way to avoid it and it has certainly been a wise step to sell seats sufficiently in advance of the Festival to allow the managers to calculate on the audiences, and to avoid such a rush as would follow if the sale occurred but a few taining Miss Belle Gregg, of Columbus, days before the Festival. Our Man's eye falls on this paragraph

n Monday's U. of M., Daily:-The attention of the superitendent of grounds is called to the fact that the small boy is entirely too much in evidence on the campus on days which afforded opportunity for snowballing. Knocking off the hats of the law and medical students is perhaps a laudable enterprise for town boys, but the sport is carried rather too far when it is directed against the women who are obliged to use the campus walks. This practice is of frequent occurrence and should be stopped.

Our Man endorses the above very sensible remarks about one of Ann Arbor's nuisances. The campus walks where this annoyance is experienced. Snowballing is good fun and should not be discouraged at proper times and places, but when boys have the impudence to pelt ladies and strangers with snow and ice, on our city streets, it is time that they be made to feel that they are committing a misdemeanor. These boys are too small for a man to box their ears, and a lady does not feel ike doing so. Our Man saw one gentlenan, however, who was followed for several blocks on State st, and was so annoved by the snowballing of the boys that he ventured to remonstrate, whereat, the young hoodlums poured out a volley of oaths and saucy talk at him and told him to "tackle someone of Sarsaparilla his size." They evidently took advan they were safe from the man's fists.

Of a new year, when the winter season of close confinement is only half gone many find that their health begins to break down, that the least exposur threatens sickness. It is then as well as at other times, and with people even in good health, that the following facts hould be remembered, namely: that Hood's Sa saparilla leads everything in the way of medicines; that it accompishes the greatest cures in the world; has the largest sale in the world, and requires the largest building in the world devoted exclusively to the pre paration of the proprietary medicine Does not this conclusively prove, if you are sick, that Hood's Sarsaparılla is the medicine for you to take?

Clement, the music dealer was consolidated with it. Since that time the business of the company has grown to such an extent that it now amounts to apwards of \$150,000 per year. At present the company has over fifty pianos rented out. The inventory shows that there are about \$20,000 worth of pianos in stock and at rent at this time. The organs in stock and in the dealers hands will approximate \$12,000. The pay roll amounts to over \$20,000 per year. The lumber bills amount to \$12,000 per year, most of which is bought in the mmediate vicinity of Ann Arbor. The number of workmen employed is about 50. ANOTHER CRAZE.

Weight Reducing Systems and Anti-Fat Dishes. (London Correspondence Philadelphia

Ledger.) Banting, or whatever other word may be used describing an artificial thinning down process, is another craze of the moment. Both men and women devote much time and thought to the subject, and those physicians who make a specialty of reducing weights have reaped a golden harvest. Of the various "systems" in vogue the most efficacious seems to be that pursued and recommended by French doctors-the fish regimen. The patient lives entirely on the eggs remained undisturbed. One of the greatest combinations of natural and artificial curiosities on the coast of California is called the devil's pump. The pholas, or shell miners, species of mollusk which excavate immense caverns in the very hardest stone, have tunneled the entire coast in the vicinity of the pump. Water rushes into these caverns with each successive tide flow, and, in this particular case finds vent through a cylindrical opening some distance from the water's edge. It is estimated that this hole, which connects with the seal cavern, is seventy-five to 100 feet in False Teeth Supplied Where Natural depth. Every time the tide rushes into the cavern beneath the "pump" throws water to the height of a full 100 feet above the mouth of the opening. The Indians formerly called it by a name which signified "fairy water gun," but the irreverent white men have given it the title of the "devil's pump," and by that name it will probably be known to future generations.

In a recent interview with a San Francisco Call reporter he says: "Personally Mr. Kipling, the father, is a man of ordinary stature, with a massive and remarkable head. It is well balanced and at once striking to look at. His hair is getting very white, but there is a youth about his face that is quite unusual in a man of his age. He is very proud of Rudyard and carefully reviews everything that young man writes. I recollect very well the first literary work Rudyard produced. He came to Lahore from London to work on the Civil and Military Gazette and in a short time he was so familiar with all the people of the locality that he issued a little book called 'Department Ditties.' The resolution provided that the Sandwich islands be erected into a new state to be called the state of Hawaii, with a republican form of government, to be adopted by the ecopie, through deputies in convention, with he consent of the existing government. The bill proposes an appropriation of \$100.000 for naking the treatles. The resolution was read by unanimous consent and referred to the committee on foreign affairs.

SENATE—Twenty-seventh day.—The debate bine against her. Emperor William threw down the gauntlet, it was promptly picked up and energetic steps were immediately taken by the british government to back up this ection by a most imposing display of sea power. The activity in the admiralty, war office and other offices called upon to take part in the war preparations is really remarkable and London is overrun with officers on the retired list or otherwise, who are lesirous of drawing sword in defense of the empire. The free coinage substitute was called up at the conclusion of Mr. Stewart's speech, and now has the right of way so that the debate upon it can be postponed no longer. Mr. Stewart's speech predicted the failure of the popular loan proposition of the administration, must be made that the loan had already been underwritten by the gold syndicate, reiterated fleet reserve which could be made ready for active service at short notice. dispatch from Johannesburg says that the crisis in the Transvaal is not over. President Kruger and Sir Hercules Robinson, the governor of Cape Colony, have failed to agree upon a settlement of the matters in dispute. It is understood that the president insists on the annulling of the convention of 1884 and that Amatongaland, lately added to the territory of the colony of Natal, be annexed to the Boer republic as an indemnity for Dr. Jameson's raid into the Transvaal. If these reports are true, the gravity of the situation has increased, and the reason for the assembling of Great Britain's fleets may be found in that. There are also signs that the Orange Free State and the Transvaal government will make common cause against Great Britain should there be further trouble, and the report of a secret unlerstanding between Germany and the Transvaal continues undenied in official circles. It looks, indeed, like a grand combination of Dutch and Gernans against the England. Earthquakes in Persia Kill Many Hundreds of People-Reported That British Are About to Invade Venezuela-News of the Cuban War.

To Arbitrate the Venezuelan Dispute. Henry Norman, the special commisoner of the London Daily Chronicle n Washington, cables his paper the result of interviews with the leading members of the United States congress on the subject of arbitration, every one being most heartily in favor of a permanent court or tribunal of arbitration to which all questions at issue between the two governments, not involving the national antonomy or honor should be submitted for decision when diplomatic negotiations fall. Norman then says: "It is impossible to believe that British sentiment will not be moved to respond to such remarkable unanimity and such enlightened communities. The world will in the most striking characteristics of a civilized people." In regard to the reports that Great Britain had sent armed forces into the disputed Venezuela territory Norman says the United States has been able to 'prevent the Venezuelan government from commiting a hostile situation. Therefore it imperatively necessary that the British government instantly deny and repudiate such a monstrous and fatal act as the armed occupation of the territory wh , the question of arbitration is pen. o.

Fighting Near . avana-Cubans Defeated. Dispatches from Spanish official sources give details of a fight near Guanajay between Gen. Navarro and an insurgent band under Zavas. Dur-ing the three hours' fighting which ollowed the Spanish artillery was called into play and the insurgents were routed with a loss of 23 killed and 43 wounded. Gen. Navarro pursued the insurgents, killed four and side, it is announced, only four officers and 30 soldiers were wounded in both enagagements. After the engagement the column of troops commanded by Gen. Suarez Valdez overtook the insurgents, who were in retreat, and opening fire upon them with small arms and artillery, inflicted heavy loss in killed and wounded. The insurgents lost 263 men. Gen. Campos to be Fired by Spain.

Madrid: Persistent rumors are in circulation that Capt.-Gen. Martinez de Campos will be succeeded by Gen. Polavieja or by Gen. Weyler, in command of the Spanish forces in Cuba.

Killed Himself, Wife and Five Children Peter Hougaard, who is thought by himself, wife and five children at Chi-Hougaard was a Dane living at 731 Sixty-first street. He wrote to a friend, telling him what he was going to do, saying he was despondent. The letter was received by Hongaard's friend the next day and he imme-diately informed the police. Capt. Gibbons, of the Englewood station with two officers, went to the house. They forced the door open and were almost overcome by the fumes of illuminating gas. When they made their way to the upper floor of the house they entered the front bed-room. his wife, with their two-year-old daughter, Tella. In another room were the other four children, and all

were dead. Many Hundred Killed by Earthquakes. Teheran, Persia: Two earthquakes have occurred in the district of khal. The large village of Janjabad was destroyed, several others were partially destroyed and 300 persons were killed. The second earthquake area of 100 miles. The town of Gol was destroyed and 1,000 houses were demolished. In addition great damage was done to many villages. The loss of life was very great. Eight hundred persons were killed in Goi alone, and large numbers of cattle and sheep

He thought people would be better off if the air was sterilized. Thereupon he destroyed all the microbes in a certain quantity of air and fed it to a number of small animals. But the pure air did not seem to agree with the little beasts, it seemed, for they all

Boers Making Strong Demands

London: A special dispatch from Pretoria, capital of the Transvaal, says that the Boers demand the sur-render of all British rights and suzerainty over the Transvaal and the preemption of Delagoa bay, and the can-celing of the charter of the British South Africa Co. These demands, if the dispatch is based on fact, coupled with previously reported demands of \$2,500,000 indemnity and the expulsion of Cecil Rhodes from Africa, are not likely to be granted by the British government without a severe struggle. In the meantime there is little abatement in the anti-German feeling here. At a meeting of the London Radical federation, after many fiery speeches, a resolution was passed, demanding the immediate removal of the name of Emperor William from the British army and navy lists. A meeting of German and Dutch socialists, held in Hyde park to congratulate President Kruger, was attacked by a crowd of Londoners. The platform was demolished, and a free fight ensued, in the midst of which the foreigners fled.

Danger of More Bloodshed.

Pretoria, Transvaal: The government is showing discontent at the reluctance displayed by the Rand me (Uitlanders) to disarm. It is estimated that 20,000 of the latter have been armed and only 2,000 have yielded up their arms. The armed Boers in the field are also impatient. The position at Johannesberg is critical and the Boer leaders have the utmost difficulty in restraining their men. A proclama-tion has been issued calling on all the Rand men to disarm at once, under the penalty of arrest. Should they refuse and resist bloodshed will follow. Russia and France will Help Germany.

Berlin: Russia's co-operation with dermany in Transvaal matter has been assured, and that France will act with assured, and that France will act with Russia. This apparently, tends to confirm the report of an anti-British alliance and that the action of Em-peror William towards the Boer republic was a thoroughly weighed step. London: A dispatch received from Cape Town, says it is reported at Pretoria that the Transvaal government demands the banishment of Cecil Rhodes, ex-premier of Cape Colony, and Dr. Jameson from Africa, and that an enormous fine is also demanded from the British South Africa Co. It is supposed that refers to the \$2,500,000 indemnity which, according to a dispatch from Berlin, the Transvaal government will demand of Great Britain. Pretoria, Transvaal: The authorities here hold documentary evidence showing that the whole affair of the Jameson raid and the uprising in Johannes-burg has been a plot to annex the Transvaal to British South Africa.
