No reasonable expense is spared, and yet these splenmore homely and dowdry hostelries. The reason of this is not far to seek Most of these hotels are intolerably noisy. They are run up lightly, the walls are thin, the floors are neither fire nor sound-proof, so that to dwell in them is rather like living under a sounding-board or being compressed into a box with voices all around you. The waiter whispers in hoarse tones of the chambermaid outside, while she pertly rattles cans and baths as a flirtation accompaniment in response. To the weary invalid in search of rest and sleep these things are unspeakably annoying. What is a palace in which you cannot close your eyes in comparison to the humble cot where gentle slumber courts the weary eyelids? Insomnia is the growing malady of the age. Thomas Carlisle began the agonized mean of rebellious nature and it has gone on forever since Sleep is the one boon, the one comforter, for which we of these latter days crave, and when we go faint and weary to the seashore or to the glowing southern land of oranges it is pertinaciously

By order of the committee ARTHUR BROWN, Chairman. JOHN L. DUFFY, Secretary,

There has been criticism by either misinformed or malicious citizens concerning the \$100 paid to City Clerk Mills by the council. It has been claimed that Mr. Mills was at no extra expense or trouble which would warrant such payment and that the money was given him as the result of wirepulling and chicanery. Mr. Mills states to us that he has been obliged to pay for extra typewriting and shorthand work, which if figured at the rate of five cents per folio would amount to nearly \$200. By engaging the work by the week he secured it at a reduction.

Henry Watterson's famous paper, the Louisville Courier Journal recently published an interesting editorial on pointed truths it contained the following:-The term "trust" donates a combination to attain legal ends by illegal means or illegal ends by legal means In the haste to be suddenly rich men meet with competition. Unwilling to be balked, they have adopted various devices to obstruct the operation of the divine law. Among these was one te get all the persons interested in the production of a particular article to select trustees, who should regulate the production and distribution of the article with a view to robbing the consumers. Trusts, however, have been largely abandoned and corporations have been introduced, taking the producers, to effect the same object. Now a trust is a perfectly innocent thing if its purpose is righteous, and so is a corporation. The iniquity is in the combination to do a conscienceless thing. The word "trust" denotes a combination to take advantage of everybody outside the combine

There is no greate inducement here in lands for settle ment, or as great a one, for that matte as there has been. There is a growing feeling in this country that some restriction should be put on the wholesale immigration which we now allow. There was a time when we were glad to welcome settlers to develop the unsettled parts of our land, and the very nature of our government is designed to welcome the oppressed to "the land of the free and the home of the brave.' But no country cares to harbor criminals and anarchists, or to allow foreigners to crowd its own citizens out of employment. The free immigration acts have served their purpose, and largely outlived their usefulness. It is time for a change to be made which will meet our present require-

just across the Detroit st., bridge, on the land near E. B. Hall's coal yard on Third ward school, and in many other places in our city limits. The ordinance prohibiting such Sabbath-breaking should be strictly enforced. One probably never been equaled by any city, on Sunday afternoons, without being annoyed by the sight of these crowds of men and boys playing ball. Their language is often profane and indecent, and their talk is generally so loud as to be heard a block or two

Speaking of Sunday ball playing reminds Our Man of an incident which came to his notice a couple of years ago. Several members of the Students' Christian Associations of the Univerwill appear for duty Tuesday, May 5th, sity and High School were conducting a Sunday school in the Third ward school house on Miller ave. The meetings were held in the afternoon, and it was noticed that a number of the very boys whom the teachers desired to draw to the school, took that hour for playing ball on the pasture land just in the rear of the school house. The loud talk from the players was annoying to those in the Sunday school, and some plan had to be devised to stop the nuisance and persuade the boys to attend the school. Accordingly all of the male teachers went over to the ball players and arranged to play them a game of ball on a week day. The boys agreed and the game was played, much to the enjoyment of both sides. The boys were won over and for some time the classes were not annoyed by the Sunday games.

> Our Man hears of an occurrence Sunday afternoon which would have been a good case for the Society for the Prevention of Animals to investigate. Several cruel boys had caught six or eight garter snakes and tied their tails together. Then they hung them on the railing of the Ann Arbor Ry's depot and added to their suffering by striking them with sticks and stones. One heartless boy took a piece of paper and lighting it with a match, proceeded to burn the suffering animals, and seemed to find it rare sport. Our Man is not particularly fond of snakes but they are animals and are sensitive to pain. Of course the poisonous ones should be killed, but even then they should be made to die as quick and painless a death as possible. The ittle garter snakes, however, are harmless and there is no excuse for killing them-certainly none for torturing them as done by these boys.

Sunderland and his work in India appeared in the Calcutta Indian Messenger, Feb. 2: "It has been a very busy week for our friend from the West who besides delivering the lectures referred to above, has visited many of our institutions. Mr. Sunderland is a speaker of real power, and during the short time that he has been in our midst, those who have contact with him have been greatly impressed with his earnestness and simplicity. It is a matter of deep regret to us that Mr. Sunderland's stay here is to be so brief, for he leaves this city tomorrow. His visit has certainly helped to draw closer the bonds of the Brahmo Samaj and the

Atlantic." The Alpha Nu literary society will present an amateur theatrical after vacation, William Dean Howells' amusing society farce, "The Register." This play was given here by students a few years. It proved a great success and several professors have urged the society to repeat it. The plot of this farce is laid in a boarding house at Melanchton Place, Boston, and the trouble arises owing to a regis er between a bachelor's apartments and the rooms of two young ladies. Hood's Sarsaparilla has achieved great success in warding off sickness which, if allowed to progress, would have undermined the whole system and given disease a strong foothold to cause much suffering and even threaten death. Hood's Sarsaparilla has done all this and even more. It has been taken in thousands of cases which were thought to be incurable, and after a fair trial has effected wonderful cures, bringing health, strength and joy to the afflicted. Another important point about Hood's Sarsaparilla is that its cures are permanent, because they start from the solid foundation of purified, vitalized and enriched blood. But it is not what say but what Hood's Sarsaparil.a unes that tells the st 'y.

SENATE—Ninety-eighth day—After being in retirement for some weeks the tarin-silver bill was brought forward as a text for a speech by Mr. Mantel. of Montana, one of the five Republican Senators who voted against considering the tariff bill. A sharp tariff colloquy followed between Senators Mills, Hoar, Hawiey and Mitchell, as to the effect of the Wilson bill on wool. Some progress was made on the Indian appropriation bill, but the sectarian school question went over. The calendar was cleared of all private pension bills. Mr. Gallinger, of New Hampshire, introduced a bill for the creation of a United States commission to treat with commissions from other Christian nations "for the correction of the intolerable compulsory pilotage on sailing vessels engaged in the coastwise trade was defeated. The district of Columbia appropriations bill, which was recommitted early in March after a protracted fight against appropriations for private and sectarian charitable institutions. was again reported with the specific appropriations stricken out and containing in fieu thereof an appropriation of a lump sum for charities, to be expended under the direction of the district commissioners, with the proviso that no part of the appropriation should go the institutions in ecclesiastical or sectarian control. The feature of the debate was a vigorous attack on the A. P. A. by Mr. Fitzgerald, of Massuchusetts, Mr. Huli reported the joint resolution to revive the grade of lieutenant-general of the army for the purpose of Soufierring that grade upon Maj.-Gen. Miles.

SENATE—Ninety-ninth day—The Senate took up the question of sectarian Indian schools. SENATE-Ninety-eighth day-After being in Arthur Brown (long term). 143 119 James B. The debate was very temperate. A but was passed providing for a trans-Mississippi and international exposition at Omaha in 18-8. House—The House spent the entire day in general debate on the filled cheese bill. The principal objection seems to be raised to the tax features of the bill, \$400 on the manufacturer and \$40 on the retailer, while there appears general unanimity in favor of a bill to compel the branding or filled cheese. At the night session an attack was made on the pension committee for recommending larger pensions than the law allowed to the widows of officers.

The political outlook in northern Louisiana discloses an alarming condition of affairs and serious trouble, with a strong probability of much bloodshed at the approaching election, which occurs April 21, is predicted. Should the negroes take the advice of their leaders and go the polls armed to protect themselves, there will certainly be trouble on election day, which, if once started, is bound to result in great bloodshed.

The Cripple Creek district has been visited by the severest and most destructive blizzard ever known there. An immense amount of damage was done, and in all probability some ives have been lost in the hills. A score or more of buildings in Cripple reek were blown down.

John Brooks killed his daughter, Mollie and her sweetheart, A. C. Worrels at Millican Tex, because they wanted to marry. Then, taking a stick of dynamite he sat down upon died a match and was blown to not enough fragments being up to till a eigar box.

What Helmholtz Did.

To appreciate his many-sidedness we and genius of the metropolis, are to be have but to follow the development of found in a very small section of this big bis life. While his first work was nainly mathematical his second was in propagation of sensation by the nerves.

His labors in the line of psychological optics show that he was also a master of psychology. But perhaps it is by his achieve-

ments in the realms of music that he is best known and most celebrated. In nis book, "The Sensations of Tone," he solved completely the riddle of nature which had puzzled the world since the time of Pythagoras. Thus, to give a rational numerical explanation of the intricacies of harmony and their effect on the ear, there was need not only of a mathematician, an anatomist, a physicist but also a musician, all united in one man. Helmholtz was all this and even more.—Scribner's Magazine.
