IN HONOR OF GRANT.

THE COUNTRY REMEMBERS ITS GREAT SOLDIER.

Celebrations in Honor of the Hero of Appomattox Are Held in Many Citles

-Galena, Ill., Remembers the Day in

Fitting Manner. Galena, Ill., April 28.-The old home of General Grant, and where as a humble tanner he earned his liblihood

for many years before the war, today paid appropriate tribute to the anni- Iowa. versary of the birth of the "hero of the Appomattox." In previous years the anniversary has been marked by spontaneous enthusiasm and tokens of respect, and the celebration today was no exception to the rule. Business was | Wis. generally suspended, the city in holiday garb and hundreds of visitors from other parts of the state, as well as from across the Iowa border, joined wits Galena citizens in the celebration. A large delegation from Chicago arrived about 12 o'clock. The events of the day were ushered in with a parade of citizens, municipal departments Grand Army and secret and patriotic

Following this was a reunion of the survivors of the Twelfth Regiment of was offered the captaincy of a company, but declined it, and General A. L. Chetlain, now of Chicago, who was present, was chosen in his place. Jerry Simpson, of Kansas, is also one of the survivors of the Twelfth. The chief feature of the day's programme was the massmeeting in the afternoon in Turner Hall, at which, after patriotic selections by the orchestra and audience, ex-Congressman John C. Black, now United States district attorney for the northern district of Illinois, delivered the oration.

MASTERLY REPLY TO SECRE- UITLANDER LEADERS CON-TARY CHAMBERLAIN.

Efforts of British Diplomacy Parried cent Battle with the Matabeles-Italy May End Abyssinian War.

Pretoria, April 28.-President Kruare understood to be as follows:

"The Transvaal government objects | treason. to the discussion of reforms on the ground that Great Britain admittedly cannot interfere with international affairs, at the same time private suggestions from the British government will always receive consideration. If the revision of the London convention and the superseding of it by a treaty of Charles Leonard-had been condemned amity and commerce containing a most favored nation clause cannot be dissussed unless the alleged grievances of Jameson raid."

ters should not be pressed now. Great that this is your honor's intention." Britain can, however, he says, still mits that his administration is improvable and that the government is not No. 2 East Washington St. always in the right, but he takes objection to the offer of a guarantee against foreign attack. This was never convention was unnecessary for that purpose. He emphasizes the view that with patience and forbearance both tides to the difficulty may yet be overcome. He expresses the hope that wounded feelings will be healed and friendly relations restored

NATIONAL FISCAL MATTERS.

Business of the Year - Deficit May Amount to \$25,000,000. Washington, April 28 .-- The treasury deficit for the fiscal year ending June 0, 1896, will be, approximately, \$25, 00,000. This is the opinion of officials and others best qualified to make an intelligent estimate of the result of the fiscal operations of the year. In his annual estimates sent to congress at the beginning of the present sersion the secretary of the treasury estimated the receipts from customs during the fiscal year at \$172,000,000. So far, with nearly ten months of the year gone the customs receipts have reached about \$137,000,000, with a fair prospec

receipts from internal revenue source nected that the figures for the compiete year will be about \$146,000,000. The actual expenditures, it is now thought, will aggregate about \$352,000, 000, or \$10,000,000 less than Mr. Carlisle's estimate in December last, so that the deficit at the close of the year, it is believed, will not show any very material change from Saturday's figures, \$25,162,423. This makes the total

of increasing to \$165,000,000 by the

close of the year. The estimate of th?

deficit for the three fiscal years ending June 30, 1896, \$136,861,812.

THE JACKSON TRIAL.

Witnesses to Be Examined in the Famous Case This Week. Cincinnati, Ohio, April 28.-The trial

of Scott Jackson, at Newport, Ky., has consumed five days. Fifty-five witnesses have been examined. The prosecution has about twelve more to examne. The week promises to abound in the most startling testimony of the At its past rate, the prosecution should complete its testimony Tuesday night. With direct testimony offered by the defense, and cross-examination. together with debates on legal points. t is not likely that the case will go to the jury this week. The court has already shown its anticipation of a proracted trial by changing the time for hearing the case of Alonzo Waling ?" May 5 to May 12.

EIGHT PERSONS ARE KILLED IN KANSAS.

Twenty More or Less Injured - Heart the Victims Lay All Night Pinned to the Ground-The Death List.

Passengers on the Rock Island train from the north brought partial details of the cyclone. It started about six miles south of Clinton and went in northeasterly direction for twelve o fifteen miles, then lost its force by spreading. It passed about half way between Clinton and Morgansville. Its mons this morningthat the five leaders | track varied from 150 yards to a quarter of a mile in width. It tore through a farming community and left nothing standing. Houses and barns were wrecked, trees torn up or broken, fences leveled and haystacks blown in every direction. The cyclone was followed by a terrific rainstorm, which lasted district.

The cyclone took the people unawares. There had been indications of a heavy rain all day, with local showers but nobody expected a storm. So far as learned the victims were in their houses and most of them had retired. The storm struck Peter Anderson's house at 9:30 o'clock. This was about a mile from the starting point. The house was demolished in an instant. Every member of the Anderson family was injured. When they extricated themselves from the debris they disers of the Johannesburg reform com- missing. The dead body of the child the confiscation of their property in away. It evidently had been carried and free silver. there by the wind.

Heart-rending tales of suffering are told by persons who have visited the scenes of the storm. Many of the injured lay all night pinned down by the wreckage or paralyzed in the mud, while others crawled or hobbled across the country to a neighbor's house. In several instances people were lifted into the air by the cyclone and carried for a distance and then suddenly dropped. Buildings were lifted up and then hurled to the ground with force enough to demolish them. The wife and daughter of John Morris were reading when the shock came. The house was divided The women managed to get out, when the wind picked them up, carried them which filtered through from Buluwayo 200 feet and let them safely down on a pile of straw just away from the storm's

SPOTTED CIGARS.

An Effect on Wrappers Which Is Secured by Artificial Means.

For some years the taste-or, rather, the fancy-of cigar-smokers has run to light brands and spotted wrappers. This fancy has caused the price of light-colored Sumatra tobacco to go away above dark colors in the same grades and of dark-brown and black hair denote brands, says the Hartford Courant. At strong feeling. They are also more first the fad was peculiarly American faithful than light-haired women and, and then there was not so much dif- dear me, they bubble over with sentiference in the prices of light and dark | ment.' Sumatra, for the dark colors could be disposed of to advantage in other countries. But now manufacturers everywhere want the lightest colors that can be obtained. To meet this demand the growers of Sumatra have secured a lighter average color by cutting their tobacco earlier. Thus they obtain an advantage in color, but the quality of the tobacco suffers. But it has been

anything to get light colors. Until recently, however, all attempts to give tobacco the much-admired spots artificially have failed. The knowledge of smokers that the spots have occurred naturally in the tobacco leaf without the aid of man has added to the value in which they are held. Various acids and other chemicals have been tried, but these, if they had any effect upon the tobacco, simply burned holes in it instead of producing the deorder amid an incessant rifle fire. The from the jail and hanged them to a sired spots. It seems now, however, that these spots can be made artifically. A composition fluid has been discovered count of its handsome spots.

> Emperor William's Rose. A pretty story is told of the first meet ng of the German Imperial pair. The German emperor, then a young man of 20, was shooting at Prinkemau. One day he lost his way in the park and democrats in this section look at the came upon a rustic, rose-covered sumconvention held Saturday in the state mer house where a pretty girl of his for silver in the state convention. He did not disturb her, but went on his way thinking of a little German poem home of Mr. Boies, the convention split egain," he introduced himself and fell in love off-hand. They were married on his twenty-second birthday. Since hat time she has set herself to realize he German ideal of a devoted hausfran.

The present year being the fiftieth ince the foundation of the Smithsonan institution the occasion will be commemorated by the erection of pronze tablets to the memory of the founder, James Smithson, upon his omb in the English cemetery in Genoa, and also in the English church in the

Blondes and prunettes. It is said that the health of the orunette type of eye is, as a rule, superior to that of a blonde type. Black yes usually indicate good powers of hysical endurance. Dark blue eyes are more common in persons of deliate, refined or effeminate natures, and generally show weak health.

TOLD BY THE HAIR. Human Character, It Is Sald, May Be Judged by That Means.

"You can tell a great deal about a person by the hair," said a pretty little meeting yesterday morning to con- hairdresser to a customer that she was sider the terms of the reply of Presi- waiting on the other day. "It's asdent Krueger to the invitation of the tonishing what a revelation the hair is, secretary of state for the colonies, Mr. I've been in the business a long time Joseph Chamberlain, to visit England. and my experience is that women with As a result of the discussion which fol- fine red hair-light red, I mean-are lowed Mr. Chamberlain made a state- very smart. They can do anything well ment in the house of commons in the that they attempt. They are invariably well-mannered and know how to charm, but they make things lively in Krueger's reply to the question must their own families, for at home they be considered in connection with the are quarrelsome, selfish and irritable. Those with rich, dark-red hair are The most important point was that the more amiable. Nearly all red-headed president says that it appears to him people are smart, whether the hair is wiser not to press the question of his coarse or fine, but when you do run across one that isn't he is the stupidest person under the sun. The women with pale blonde hair, of the colorless, ashy you. On the contray, those with darkbrown hair are very loyal. They are full of sentiment and easily affected. portion.

"When it comes to coarse hair a great deal is to be said. One day a conspicuous physician came to me. He being black by the tinge of red that man ras a big name, but he is concelted until it is painful to talk of him; erats of Calhoun county held their coun- jealous until it would be unsafe for convention Monday, and selected man, woman or child to arouse him; delegates to the state convention and and he tells lies and is deceitful with

at the head of the establishment overheard me and said: 'If you make such remarks about a customer again you will lose your place.' The man came back once a week for nearly a year, and always asked for me. He tipped me generously, but I had a perfect ansued for a large amount for saying that another doctor stole some money. was so insanely jealous of his wife that she got a divorce and, although he was very smart, nobody believed him and nobody trusted him. A man with coarse, curly hair will bear watching, and so will a woman. They are not amiable husbands and wives. Coarse-haired people have vulgarity in their natures. Some may go through life and keep it hidden, but it's there. They are nearly always treacherous, too.

conceited, and if they do not marry until late in life are apt to grow cross and selfish. If a girl wishes to selecta husband she should examine his hair very closely before accepting him, because it is a fine indication of what his disposition is Men with fine brown hair, light or dark, are thoughtful, and less apt to be selfish than their very light or very dark brothers. Those whose hair turns prematurely are nearlittle nervous, but are brainy, sympathetic and very honorable. The hair turns white from being overscrupulous in money matters and friendships oftener than it does from grieving over

"Man with fine light hair are smart

one's shortcomings. "Women with fine black hair are high strung and those with coarse black hair, if they are smart, are nearly always mean. All women with dark hair are more tempestuous than those with light hair. The dark eyes and complexions that go with the different shades

The American Girl.

Shall I dare to express my whole American girl receives agrees especially with those who afterward choose celibacy. The single woman in the lately from his tomato farm near White United States is infinitely superior to Haven and tells a thrilling story of a her European sister; free from the fet- battle with alligators, says the Florida ters that often make the French old Times-Union. Dalton's partner, J. B. maid so pitiable and ridiculous, she Lovering, drove a wagon, to which two does not, like the latter, expect to gain horses were attached, into Lake Winliberty by marriage on the contrary, by marriage she would lose that perfect independence which allows her to cultivate herself more and more, to rise into a larger sphere than that of the family, and even of the ordinary social circle, by consecrating herself to works of universal interest. Her intercourse with men, freed from the childishness of flirtation, bears a stamp of quietness serious intimacies that no criticism could assail. One sees no bitterness, no regrets. Her lot is too beautiful, there be, however, no misunderstandforty-five ton locomotive and then ing. If it seems indispensable to me find some sphere for her activity, I severely blame the sympathetic scorn of marriage that comes to many young Americans who are ambitious to do something, to distinguish themselves in a career, and to escape from the common ways. With these pretended vocations there is often mixed a childish vanity, a morbid idea of creating a sensation, of singling one's self out, and obstacles are most useful in proving their real value.-The Forum.

Men and Their Hats.

"Well, well," remarked a leading hatter the other day; "everybody has smiled at the vanity of women as they take long and fond glances at their reflections in the store windows, but woman is not a marker for the ordinary man. The uglier a man is the longer it takes him to suit himself with a hat and the oftener does he look into the glass while buying one. I have an unusually unprepossessing customer, who would exhaust the patience of Job. He came into the store the day after the spring styles arrived and consumed two hours and ten minutes in getting a hat that pleased him. The next day he returned the hat and had one made to order. The man is so ugly that nothing could improve his looks but a mask." Philadelphia Record.

A FIGHT WITH ALLIGATORS. dea? The severe education that the They Attacked a Watering Team and

J. A. Dalton, of Barton, returned

terset to fill some barrels with water. While Lovering was at work the horses began to scream in mortal agony and he realized that they were being attacked by alligiators. The horses plunged violently, but soon fell down, their legs having been broken. When the horses fell the 'gators rose and began to tear the bodies of the animals. Lovering had a Winchester and began firing at The shots, however, increased the anger of the saurians, and they made a rush for the wagon and overturned it. Lovering, holding the rifle, fell into the water near a big 'gator, which immediately made for the man. As the 'gator came Lovering thrust the rifle into his mouth and fired, the bullet inflicting a mortal wound. In its death agony the saurian swung its tail and knocked Lovering out of the water and onto the beach, twenty feet away. At this puncture Dalton arrived and dragged Lovering away. Assistance was procured and the horses and wagon pulled out. The horses were dead, having been horribly mangled by the 'gators. It is thought Lovering drove his team into ? den of 'gators, judging from the number that was seen.

Victims of a Tragedy Buried. Rockville, Ind., April 29.—The funeral of Sheriff Mull yesterday afternoon was attended by people from all parts of the county, the Grand Army of the Republic, with the Rockville Light Artillery and the Knights of Pythias participating. Deputy William Sweens was buried in the forenoon. Egbert, who killed them and also the three Hasckes, was buried Sunday. The three members of the Hascke family were buried

marked in the cities that have voted. These are relatively small places, where | While the walk is built high enough to the full effects of the Raines law have be dry, few people would care to pass not yet been felt. But they are sure indications that after six months' experence of this odious law the voters of angry about this nuisance, and Our the larger cities will simply swamp the | Man thinks they have reason for their party responsible for it.

In Ohio, Michigan and Wisconsin the Democrats have cut down the Republican majorities largely, and in several able drainage for it instances carried towns and cities that have for two years past gone Repub-

These results, so far as they have a political bearing, no doubt signify the this do-nothing, buncombe Congress, and the public apprehension at the revival of McKinleyism. - New York

Regents' Meetings.

The University regents met here Wednesday. The first question they considered was whether to accept the legacy of Dr. Annie Eastman March, of Greeley, Col. The regents hesitated about this matter because by accepting the legacy they must agree to support a sister of Dr. Eastman's in case she should need it. No decision was reached Wednesday and the matter will be further investigated. A man from New York wrote a letter to Pres. Angell, making the offer that if the regents would loan him \$40,000 cash on the security of his property which he claims to be worth \$1,000,000, he would give the University \$25,000 yearly. Of course the letter shows that the man must be insane. No notice will be taken of the offer. A new grandstand, dressing rooms etc. were ordered to be built immediately, at the athletic field, at a cost of \$2000. Baseball playing is prohibited on the campus from now on, as the regents decided that the grounds were too small to allow batting the ball. They have had to pay for over 25 broken windows and other damage. A rule was passed that pupils from the Lansing School for the Blind having their will be charged \$5 per week after the end of this year. These patients have been treated for half-price, heretofore. Prof. Calvin Thomas' resignation from accepted. Prof. Hench is new filling Prof. Thomas' place. It was decided to graduates of the engineering department or of other engineering schools who have completed a year of work at the U. of M. William Parker Winning was granted the degree of doctor of dental surgury. No faculty appointments were made.

Woman's Gymnasium Notes. The fund has been increased by these additions:-Proceeds of Passion Play, \$62.10; Dr. and Mrs. Lillie, \$25 .-00; Hypatia Club of Detroit, 86.00; Century Club of Charlotte, \$5.00; small sums amounting to \$2.00. The amount cleared by the entertainment Saturday evening is about \$175. On May 9th there will be an excursion to Toledo over the A. A. road. One train will leave Ann Arbor in the morning, and there will be two trains-one late in afternoon and another after the theatre in the evening. The tickets be given at the Valentine Theatre that evening, are one dollar. The exact times of the trains will appear early next week. The proceeds will go toward the gymnasium fund.

He Sees About Everything matter up, and either provide a sprinkand Talks About Everything He Sees.

Our Man is glad to see that the little green letter boxes on most of our street corners have been replaced by much larger ones. These new ones are painted a bright red and can be seen much more easily from a distance than could the green ones. They are also large enough to accommodate letters and papers which had before to be left on top of the box for lack of room within it.

Our Man wonders what became of the movement on foot some months that all the seats will be sold at all the ago to open the street from Division to State st., through the Maynard property. This improvement would certainty be welcomed by not only those property holders in that neighborhood whose land would rise in value from the change, but by all of the residents of the city, who are annoyed by being obliged to walk around that block instead of through it.

Our Man is glad to see that the mater of building additions to the Third and Sixth ward schools is now fairly under way. Plans and specifications are being drafted by Charles A. Sauer, the architect. The residents of the The Democrats of Michigan met Third and Sixth wards have waited Wednesday in Detroit and held one of patiently for these improvements and the liveliest and most enthusiastic con- they are naturally glad to have them ventions in the party's history. The made. It is but a question of time all divided was the currency question, school house of its own, and Our Man but before adjournment this was thinks that the sooner this building is built, the better. The children who dent Cleveland's administration was live on Hill st. and in that vicinity, thoroughly indorsed. The notion that have a long walk to reach either the Michigan Democrats held to free coin- First, Second or Sixth ward schools. age doctrine cannot now be held. The The Seventh ward has been built up convention declared for sound money more in the past few years than any and left no doubt as to the position of other part of the city, and these residents the party. The leaders of the party are entitled to the same school privileges as are others. Our Man would call the attention of

the board of health to the pool of frank and sensible stand taken by the stagnant water on S. State st., just Michigan Democrats deserves the north of the Athletic field. Our Man hearty support of the voters and should walked by that place this week and nearly fainted from the sickly stench which entered his nostrils. There used to be a swamp there but when the The local elections in this State, like | Hamilton, Rose & Sheehan addition to the city was made, the standing water cratic party is still very much alive. was drained off and the land was left There are gains almost everywhere, as dry except for the water which collected there from rains. There is now In this State the gains have been most a pond of considerable size which extends on each side of the board walk. that way unless obliged to do so. The residents in that neighborhood are wrath. The Board of Health should order the owners of that property to either fill in the pond or provide suit-

Our Man witnessed an amusing incident Sunday afternoon. He was strolling over the Detroit st. bridge cil be asked to instruct the City At when he noticed quite a crowd of men, popular disgust and disappointment at women and children, gazing toward the strip of land near the Henning apple house. Following their example, Our Man looked in that direction and their poles and wires from Miller saw a poor old horse, lying motionless on the ground. "How long has this streets in the Third and Second Wards, carcass been allowed to lie there?" one more advantageous to them. of the bystanders indignantly asked. At this, so many complaints and disparaging remarks were made about the carelessness of the board of health, the humane officer, and the owners of the animal, that Our Man felt profoundly grateful that he was in the shoes of none of these much maligned people. Just as several of the bystanders were about to go after the board of health, the horse stretched out his legs, got on his feet and calmly walked around the barn-much to the surprise and chagrin of the crowd.

Our Man noticed this editorial in the U. of M. Daily Wednesday:-This matter of prohibiting the use of the campus walks by bicyclists is one in which it will hardly be necessary to resort to severe measures. It is only since town boys have begun to use the walks for 'scorching" that there has been any cause for complaint. This can easily be stopped by requesting the town policemen to arrest any would-be racing wheelmen who insist on training on the University walks. The induleyes treated at the university hospital gence of a reasonable use of the campus sidewalks to wheelmen has become a custom which should hardly be withdrawn because of the ill-manners of a few bicyclists when a much easier the chair of German was formally remedy is at hand. Our Man thinks that this position of the Daily's is all right but he objects to that paper's to grant the degree of master of science claim that all of the "scorch n;" is done by "town boys," as it is pleased to call those residents of Ann Arbor who do not happen to be non-resident students at the University. The "town boys" have just as much right to ride on the campus walks as have the students and from Our Man's observation the students "scorch" along the walks fully as often if not more often than do other people. Fast riding in the campus should be stopped and the sooner the better. Our Man has often called attention to this nuisance and hopes that some action will be taken

Before summer is here and our streets get filled with dust, Our Mun Blood Purifier. It gives good health thinks that some action should be taken to guarantee that our streets will be systematically sprinkled. An effort was made last year to secure including admittance Julius Caesar, to then circulated among our citizens to this convenience, and petitions were hire a sprinkling wagon to wet down the dust every day. These petitions were circulated, however, after the university closed, and when many of those who were asked to sign were about to leave the city, for the vacation. These people refused to sign, saying that they could get no benefit from the sprinkling, when out of town. Those who remained here, were naturally unwill- forks of the Kentucky River unite. ing to pay for other folks' sprinkling, and hence the effort failed. Our Man thinks that petitions should be circu- the other. Two dwelling houses in the lated now, and that as soon as dust be-

OUR MAN ABOUT TOWN, citizens cannot be found to contribute for this improvement, Our Man thinks that the city fathers should take the ling wagon, or force citizens to keep the roads sprinkled. Such an ordinance should be as rigidly enforced as the sidewalk ordinances or any others on the books. Ann Arbor is a beautiful city and she may well be proud of her trees and lawns, but her dusty streets in summer are a great discomfort to the residents and the students in the summer schools. Our citizens should not let this matter drop until it is settled in a satisfactory way.

> Our Man hopes that University hall will not be so overcrowded at the coming May Festival as it was last year. The managers are adopting special means to regulate the attendance so concerts, and all of the available aisle room used but not overcrowded. Last year the patrons of the festival were highly indignant at the way the hall was filled. Every inch of room in the hall was occupied and hundreds of ticket holders were forced to leave after vainly trying to secure standing room and hear a few notes of music. A party of two hundred people came here from Cincinnati but were unable to secure seats. The hall will seat about three thousand people and the managers have taken great care this year to sell just the right number of tickets, and to reserve them by a system which should give fair play to all. It is to be hoped that this year's festival will not be disgraced by the speculating in tickets or the crowding past the ticket takers which was done last year. All prospects point to this festival being a great success both from an artistic and financial point of view, and Our Man hopes that the untiring efforts of the managers will be rewarded. What Ann Arbor really needs is a great music hall which would seat from six to eight thousand people. Our city would then undoubtedly take rank as the greatest music centre west of New York and Boston. The problem for the festival managers has not been how to sell the tickets, but how to keep from selling too many. Our Man has no doubt that such a hall would prove one of the best investments which our business men could make.

DEATHS.

Mrs. Tryphena A. Badger died at the nome of her son, Prof. Kelsey, on Tappan ave., Saturday night. She was 78 years of age. Rev. J. M. Gelston officiated at the funeral services which were held Monday afternoon from the house. The remains were placed in the vault in Forest Hill cemetery.

New York Fashion Notes.

Fancy waists are again very popular for Spring and Summer wear. They are more often made in the style of Louis XIV and Louis XVI. Such coats are very elegant, made of brocrade or satin with lace jabot or ruffles and with handsome waistcoats. Other fancy waists have an added cross skirt in godet to imitate the style of the coat. Some of the fancies of the summer season are entire waists of embroidered batiste and open work linon, mousseine de soie, novelties in chiffon, etc. Many of these waists are made with flowered taffeta sleeves. The new sleeves are smaller, drooping or trimmed with ruffles and puffs. A fancy of the season is to wear a handsome bodice of black satin with a light skirt. Very elaborate evening waists are seen made of the new jetted nets, draped ver handsome pompadour taffetas. The favorite colors of the Spring are ones of green, heliotrope, light brown and gray. The McDowell Fashion Magazines at hand contain many new ideas of great value to both professional and amateur dressmakers. 'La Mode de Paris" and "Paris Album of Fashions" cost \$3.50 per year's subscription, or 35 cents a copy. The 'French Dressmaker" is \$3.00 per

annum or 30 cents a copy; and "La Mode" \$1.50 a year or 15 cents a copy. do not take any substitute, but apply by mail to Messrs. A. McDowell & Co., West 14th Street, New York.

Alexander Salvini.

Alexander Salvini is a born Italian. He therefore has the Latin mind, one would say. True enough, but he has more than that, if to act well the part of Hamlet is evidence of a mentality that is not limited to Italy. He has appeared in that character fourteen times in his lifetime. Nobody who saw the performance can doubt the superiority of Mr. Salvini's Hamlet when compared to the average representation of that character. A general word of satisfaction with the acting of the company is well deserved. The principal supporting honors went to Norman Conniers as Claudius, F. M. Paget as Polonius and the Gravedigger, Bruning as Laertes, Edmund Day as Horatio, Miss Florence Gerald as the Queen, and Miss Adelaide Fitz Allen as Ophelia. Mr Salvini appears at the Grand Opera house, May 9.

Extreme tired feeling afflicts nearly everybody at this season. The hustlers cease to push, the tireless grow weary, the energetic become enervated. You know just what we mean. Some men and women

nervous system, which will not long stand such strain. Too many people "work on their nerves," and the result is seen in unfortunate wrecks marked "nervous prostration," in every direction. That tired

pure blood; for, if the blood is rich, red vitalized and vigorous, it imparts life and energy to every nerve, organ and tissue of the body. The necessity of taking Hood's Sarsaparilla for that tired feeling is, therefore, apparent to every one, and

The twelfth annual convention of the Michigan Equal Suffrage Association will be held at Pontiac, May 20, 21 and 22, 1896. The question of woman in government is forcing itself more and more upon public attention. Already three States have given women full citizenship, and several more are this year taking steps in that direction The education of public senti nent is the most important factor in removing opposition. The annual convention of his association affords an excellent opportunity for friends of woman's nfranchisement to gather information egarding the progress of the movement, and for honest opposers to neasure the reasoning of its advocates. The former are urged to give the concention the encouragement and trength of their attendance, and the atter are earnestly invited and assured of every courtesy. The Convention is composed of the officers and past officers of the association, the Presi- 2 New Steel Passenger Steamers ocieties, and individual members. Hood's Sarsaparilla has achieved great success in warding off sickness w. 'ch if allowed to progress, would have undermined the whole system and given disease a strong foothold to cause much suffering and even threaten death. Hood's Sarsaparilla has done all this and even more. It has been taken in thousands of cases which were thought to be incurable, and after a fair trial has effected wonderful cures bringing health, strength and joy to 52 S. State-st., Cor. William-st. the afflicted. Another important point about Hood's Sarsaparilla is that its cures are permanent, because they start from the solid foundation of purified, vitalized and eariched blood. But it is not what any but what Hood's Sarsaparil. anes that tells the st vy.

COUNCIL PROCEEDINGS. (OFFICIAL).

Continued from April 9th, 1896. Communications from the Board of Public Works.

Office of the Board of Public Works Ann Arbor, January 1, 1896.

To the President and Common Council: GENTLEMEN:-In compliance with

the requirements of the city charter we herewith present to your honorable body the annual report of the Board of Public Works for the year ending Dec. 31, 1895. The report covers fully, and in detail, the expenditure of public monies for the purpose of maintaining streets, bridges, culverts, crosswalks, sidewalks and gutters, the construction and maintainance of sewers, and such other matters as have, from time to time, been referred to us for execution. For the first time since the organization of this Board in 1889, a record making such a report possible was kept during the year just closed, and this report will show the exact cost of hand and team labor, material and supplies used upon each particular public improvement.

We have also compiled much data which will be of value to the Council and to succeeding Boards, and we have a few suggestions to offer and recommendations to make to your honorable body concerning the public work of this city, present and prospective.

It has always been customary for the Board to clean the streets, clear the sidewalks of snow and purchase gravel from cellars when the same could be obtained cheaply, without an express order of the Council in each particular case. This Board has followed that custom in those matters, although in expenditures have been made at your specific direction.

GRAVELLING STREETS

We have spent during the year \$888.41 in dressing streets with gravel. Of this amount \$416.80 was paid for needed upon the streets. In this connection we desire to call your attention of gravel from which it can draw supplies as it needs them.

We have spent some time prospecting for a suitable deposit and we would recommend that the effort be continueither by a long time lease or purchase. BRICK CROSSWALKS.

In conformity with the instructions of your body we have built ten crosswalks of vitrified paving brick and have three more in process of construction, the completion of which was delayed by inclement weather. Great care was exercised in the selection of these brick to secure suitable material at a minimum cost. Out of some 15 or 20 samples and bids submitted the "Athens Paving Block," manufactured at Athens, Ohio, was selected. This brick was not only the cheapest per square yard cffered but was the only brick we could secure under a guarantee of not more than one per cent absorption of moisture in 24 hours, and not more than 12 per cent abrasion. The cost of these brick was \$17.75 per M, delivered in Ann Arbor, or 77 cents for damages resulting from accident per square yard of surface laid. For curb ing the sides of the walks granite field boulders, dressed to a four inch face. were used. These cost from \$1.50 to \$2.00 per lineal rod dressed and delivered. The brick were laid on a concrete foundation five inches thickmade of broken stone, gravel and cement-covered with a layer of fine sand one inch thick. For this concrete foundation under the walk across Ashley at Huron street and across And street at Fourth avenue, Portland cement was used. Louisville cement being afterwards considered sufficient! strong for the purpose, and costing only one fourth as much, was substituted to the Portland in the other walks. Fo filling the interstices between the Supplies brick, the asphalt paving cement man- Moving and resetting founufactured by the Columbus Gas Co. was used. For a detailed statement of the cost of these walks referrence is made to the table on another page. We believe that experience will prove these walks to be the most durable and

efficient yet constructed in Ann Arbor. PAVING. We would recommend that steps be taken to lay some paving of this or some other acceptable material on the main business streets at an early date: We have reason to believe that the Cost of Roller \$ 2,950.00 majority of the property owners on Main | Cost of Crusher.......... 650.00 street from Catherine to Williams and Cost of Stone..... on the cross streets from Ashley to Cost of Labor..... Fifth, would welcome an improvement | Cost of Coal..... of this kind. The improved appearance and cleanliness of the streets and the abatement of the nuisances of dust in summer and mud in winter would, we believe, enhance the value of abutting property for business purposes, far beyond the assessment necessary to do the work. The Board has spent some time investigating the subject of From Bridge, Culvert and Crosswalk paving and paving materials and it would recommend the selection of For Crosswalks. either vitrified brick or asphalt for Cement-

The brick can be laid on a concrete Team labor..... foundation in this city for from \$1.60 to Material..... \$1.75 per square yard, exclusive of curbing. The cost of the curbing will depend upon the size of the blocks used. The maximum cost per front foot of all | Plank. complete cannot much exceed \$6.00. Labor...... \$ 46.20 The iron bridges belonging to the city The average cost of asphalt in contracts let in various cities of the United States last year was about one third more than brick. We have good reason to believe that a first class asphalt pavement can be laid in this city | Hand labor..... for \$2.00 per square yard. There are features of both kinds of

such work.

paving to recommend them. The concensus of opinion seems to favor brick for heavy traffic, and asphalt where lighter vehicles are in use, wearing qualities are not so essential and smooth noiseless traction is desired.

MACADAM.

One half of Huron street in front of the engine house, approximately 100 square yards, was macadamized at the cost of \$87.50 for the purpose of testing the road making capacities of the road Building roller. The macadam at that point is Repairing about twelve inches in thickness. This Material..... 110.00 being an isolated case is no basis upon which to form an estimate of the cost

of such work. The northeast half of Packard street from Monroe to Hill, ap: | Michigan Central Viaduct. with a layer of broken stone four inches | Material thick. The labor expended upon this improvement cost \$94.27. Two hundred and eighty yards of broken stone were requi.ed. The estimated cost of this material is \$0.90 per yard or \$252 for the lot, making the total cost of the mprovement \$346.27 or about 35 cents per square yard. Time will be required For hardware..... to demonstrate the utility of work of For fiag stone..... this character.

In view of the fact that the Council has ordered the purchase of 3000 yards For sand..... of stone for road building purposes, the Board would recommend that steps be For hand labor..... taken to secure a suitable tract of land For team labor..... for a stone yard. It should if possible have a slope or declivity thereon where Paving pitch..... the stone crusher can be permanently placed and the cost of operating that machine be reduced to a minimum.

If extensive road building is contemplated proper facilities for handling the rock is of the highest importance. Experience teaches us that the getting of the rock to and from the crusher and the reloading and transfer to the street where it is needed is a large item of expense. A proper arrangement of the crushing plant upon a side hill and the erection of bins for the reception of the crushed rock will render the work so far automatic that the rock will not need to be touched by hand from the time that it is delivered at the crusher until it is deposited upon the street. The saving effected by such a system would soon pay for its erection.

Extensive road making operations will also require the purchase of a stationary engine and boiler for the purpose of running the rock breaker.

The City yards so recommended should be equipped with permanent so doing we have since eiscovered that buildings for housing the road roller we exceeded our authority. All other and other machinery belonging to the city and for the proper storage and pratection of material used in the prosecution of public work.

SIDEWALKS.

A larger number of sidewalks have been reported than ever before in the gravel excavated near where it was history of this city. The whole number repaired, relaid or built new is 367. In the majority of cases the order has to the fact that the city has no deposit | been complied with to the satisfaction of the Board. In some instances the building of walks has been deferred until next year upon the presentment of good reasons for such action. Generally such action has been taken upon ed until a suitable tract is secured the promise of the petitioner to construct the walk of cement next year, believing it to be good policy to secure walks of that material whenever practicable. It has been necessary for the Board to build and charge to the property 11 new walks. Care has been taken to keep all walks in such a condition as to save the city from all liability for damages.

Specifications governing the constructions of both plank and cement walks have been prepared and adopted and all walks constructed during the year were required to conform to these specifications. In this connection we wish to call the attention of the Council to the fact that the present sidewalk ordinance is not calculated to secure the rebuilding of sidewalks with the efficiency and dispatch which is necesary to insure the city against liability

NORTHERNMOST ESKIMOS.

A Primitive People Just Emerging from

the Stone Age

The characteristics of the northern

nost Eskimos have provided Henry G

Bryant with material for a strikingly

interesting lecture, which was deliver

ed before the Archaeological society

in the university museum, says the

Philadelphia Telegraph. The Eskimos,

Mr. Bryant sald, have attracted more

attention from scientific men than any

visited them three times-in 1891,

when he went to the Grand falls of

Labrador, and in 1892 and 1894 in north

and south Greenland, when on the

Peary expeditions. The Labrador Es-

kimos he regarded as a somewhat de-

generate race. They have been in con-

tact with the Danish missionaries for

175 years and afford evidence of the

admixture of European blood. The

women alone retain their dress. This

which showed among other peculiarities

the method of wearing the hair. The

color of the hair ribbon distinguishes

the condition of the woman, whether

maid, wife orwidow. "The use of tea

and coffee and the changed mode of

life," he observed, "have unfitted the

men for the fatigues of seal-hunting

and pulmonary diseases are frequent.

great injustice has been done to the

Eskimos in the past, their racial pecu-

liarities cannot be preserved through

any intervention of civilized people.

The northernmost Eskimos were first

encountered in 1818, when the members

of Sir John Ross' expedition spent sev-

eral days in the neighborhood of Cape

York. They are a primitive tribe, just

emerging from the stone age. As the

vessel approached Cape York the ex-

plorers saw crowds of skin-clad men

and women, with hair streaming down

their backs. They showed no signs of

alien blood or physical decay. The men

average 5 feet 5 inches and some are

even 5 feet 10 inches, while the women

conform more nearly to the popular

idea of Eskimo stature. The northern-

most Eskimos meet the Eskimo inhabi-

tants of the west coast of Baffin's bay.

whom they call the 'tattooed men,' and

flerce fights occur between them. Few

living members of the tribe had seen

a white man up to the time of Lieut.

Peary's visit in 1891. In 1818 Sir John

Ross noted ther were not yet familiar

with bows and arrows nor did they

know the kyack. Lieut. Peary found

among them, and it would appear they

had acquired a knowledge of these ob-

jects since they were first visited. They

are very reticent about their religious

beliefs. They have notions of a future

state and a spirit of good and an evil

spirit of the ice and waters. There are

no rulers or chiefs among them and

no formal government. Family life is

very happy and they are distinguished

Paid contractor.....\$20,429 67 Pepairing streets..... Connecting flush tanks..... 10.31 recommend that the ordinance relating to sidewalks be so amended as to give full power and authority to the side walk inspector to order, by the service of proper notice, the immediate re pair, reconstruction or building of any walk that in his judgment is dangerous or defective, and that his action be made final upon the part of the city, saving an appeal to the Board of Pub

a new walk is unreasonable. Dispatch must be an essential feature in any regulation for the repair of defective sidewalk. If the defect is such as to give an opportunity for accident, each hour that it remains uncared for is a menace to the city treasury.

In the case of new walks, in addition

to the loss of valuable time by the

lic Works, by property owners who feel

that an order requiring them to build

seven members of the sidewalk commit tee of the council, and unnecessary work by the sidewalk inspector, the city clerk and the police force, it takes Dr. Napsen, wh several months under the present or dinance, to effect the building of a favorable account of the Eskimos of walk. In many instances during the the west coast of Greenland. While past season, after the sidewalk inspec tor had reported a walk, the sidewalk committee had gone ever the ground and approved that report, the council had ordered the walk built, the police had served the notices, the sidewalk

inspector had made his second inspection to see if the order had been complied with, bids had been asked for and contract let for the work, the council has rescinded its order to build and this labor has been wasted.

Since September, 1894, twenty-five miles of sewer have been built under the directions of the Board. The con-186.14 tract price of this work aggregates \$40,340,30.

None of this work has yet been ac cepted by the Board on behalf of the city. The reasons for the work in the first and second district not being accepted are well known to the council and as the matters relating thereto have not yet been adjudicated it would not be proper to discuss them, at this time. The sewers in the third and fourth districts are not yet fully completed. The engineers force has been thoroughly organized during the past season and we have reason to believe that the work of construction has been uniformly good. The prosecution of this work of sewer building has added much to the burdens and responsibili-

ties of the Board. As there are some instances in which individuals have encreached upon lands belonging to the city we recommend that you take the necessary steps to enforce, in a systematic and efficient

manner, the recovery of such lands. We call your attention to the fact that the plank placed on the viaduct over the Michigan Central tracks on Broadway, for the purpose of temporarily repairing the same will soon be worn out and are now so worn in fact as to be of use for no other purpose and consequently are charged to the Bridge, Culvert and Crosswalk fund. The plank on the Broadway bridge over the river is also becoming badly worn and will soon need to be replaced.

"Do you know how much it costs our father to maintain himself and his family? Have you any idea of the expense of educating and dressing three boys and three girls, paying their way in society, providing them and their mother with a country home and city home, with servants and carriages and everything they desire?"

"I am afraid I have no idea, father. "Well, it is simply frightful. It is, in act, twenty per cent of the entire sales of the house. Add twenty per cent. Never mind fractions." "Four thirty-six."

"There. You have arrived by a prowhere near the pole, has given a most the use of simple business rules at a cost of those curtains billed at \$3. Now add seven and a half per cent profit." "Four sixty-nine."

"That's what I'm going to advertise hem at; and you will see a great run on them to-morrow, for the public has earned that all my announcements are absolutely reliable."-Kansas City

The End Not Yet. The Madrid newspapers gave the cost o Spain of the rebellion in Cuba as \$50,000,000 so far, and estimate the cost for the present year at \$75,000,000. The Spanish loss in soldiers is given as 406 killed and 3,472 died of disease; the number of wounded is not given. There have been 118,000 men already sent to Cuba, and 26,000 more are on the way there. It is the purpose of the Spanish government, if possible, to crush the nsurrection before the United States an intervene to help the insurgents.

panies in Boston that send goods to all parts of the world, pretty much in the same way that we would expect to have things sent to any part of this country by express and at Christmas time the foreign express business from Boston is greatly increased, says the Boston Globe. It is really quite surprising how many things are sent from this city by express to foreign lands. Of course, the majority of these Christmas packages go to Great Britain and Ireland, but France and Germany and Scandinavia come in for a large share and the West Indies get quite a large number of Beston and Massachusett. Christmas presents. In addition to sending Christmas presents to foreign countries from Boston the foreign expresses handle a great many Christmas presents that come from the foreign countries to Boston people, although it is said that the number of presents received from foreign countries in Boson is hardly more than half the number of those sent out. Much that is will rarely fail, when endeavoring to novel comes in from the lands far away escape, to jump in the direction of the and it is interesting to know that among the various kinds of Christmas presents that come through the express years in preparatory states of existence | companies from Great Britain the genuine Engish plum pudding holds an important part. Usually all the companies receive several plum puddings and ants, are, in proportion to the size and one man in particular, says he receives weight of the builders, the greatest a great many of them for Boston people every Christmas.

> EAGER TO SPREAD THE NEWS. An Oregonian Was Not Disconcerted When His House Fell Down,

What could startle a man more than o awake from a sound sleep to find his house whirling through the air, his and fro in the sky for half a day at a pans, pots, kettles and dishes dancing time, rising and descending without a whirlwind polka, sticks of wood once flapping a wing. There is a mys- chasing the cat from corner to corner. tery about their method of motion the earth rumbling, the doors of his louse falling from their hinges and the Bonnet, the French naturalist, has shouts of the people ringing in his imputated the limbs of tritons and ears? asks the Seattle Post-Intelligencer. Gus Stoddard, who lived in a small house that stood on a piling close to the track of the Columbia & Puget Sound railroad, had such an experience recently and went through it unharmed. He did not even get rattled, as many men would have done, but jumped from his bed, and, running to the door just as

in diameter by fully thirty-two feet in length, and up the track he heard a clashing of cars and could see in the darkness dim images of giant columns. some rolling around as if intoxicated while others were plowing up the earth as if mad with rage. Then he heard the people yelling about him and suddenly realized that there had been some kind of a wreck on the Columbia & French at the siege of Arras in 1414, Puget Sound railroad. He never come to losing his life, but went flying up the track to a saloon where his partners, Ed McKay and Ford Youman, has lately decided that the authorities | were enjoying a "grand opening," and

> A Government Monopoly. Salt is a government monopoly in

Italy and its cost is greater than that of sugar. Every one uses it very carefully, therefore. It is only for sale in distinctly, for when alarmed it will althe tobacco shops, and the privilege of keeping these is greatly coveted, being a sort of sinecure awarded to men who in other countries would receive a pension for government service. quantity contained in one of our 10cent bags of fine table salt would cost in Italy 80 cents. In consequence of this only very coarse rock salt is used in cooking. The waters of the Mediterranean being the source of the supply, the government guards them most ealousy and the whole coast is patrolled by soldiers. With the water of the blue sea at the foot of your garden terrace you may not dip from them so much as pint. You may bathe in the surf, but you may not fill an ounce phial from which to bathe your tired eyes in your room. The American tourist finds these restrictions particularly irksome. There can be no villas on the shores of the Mediterranean provided with salt water in their bath rooms as are some of our

uxurious Newport homes.-Exchange.

Could Recommend His Mother. On the files of the postoffice departnent there is a letter from a man named Hill testifying to the ability, industry and good character of a Mrs. Brown, who turns out to be his own mother, and stating that her appointment to a clerkship would be a great gratification to a large circle of influential political friends. He writes that she belongs to an excellent family and occupies a high social position; that he has known her ntimately for several years, is familiar with her qualifications and can recommend her without reserve. It was only by accident that the relationship was discovered, as the writer was the son of her husband, and after whose death she married again.-Chicago

Spiritual Photography.

The human soul is the tablet on which the image of Jesus is to be photographed, as the sensitive plate must be developed in the chemical baths before the image appears, so our hearts must be made clean-cleansed by His blood and annointed by the grace of God. Light is essential in the physical process. So in the spiritual portrait there must be plenty of light .-Rev. M. A. Head.

There was a considerable increase in the output of railway locomotives and freight cars in the United States during 1895 over 1894. Last year 1,109 locomotives were built, as against 695 in 1894, and 31,803 freight cars were built, as against 17.029 in 1894.
