University Income.

(From the U. of M. Daily.) It may be of interest to readers of the Daily to know something of the sources from which their alma mater gains her support.

The first named source was created by an act of the legislature which set apart section 16 of every township as university lands, the proceeds from the sale of which are turned into the University fund.

Since the passing of the one-sixth mill tax, attempts have been repeatedly made by friends of the institution to get special appropriations, but of no avail until the last session.

The students fees for last year amounted to \$164,127.53. This amount with miscellaneous receipts of hospitals, etc., together with that above named, with the exception of the electric lighting plant, made the general receipts of the University \$418,932.98.

A number of donations were received during the year, but such money received is expended according to the wishes of the donor.
