CITY GOVERNMENT.

COMMUNICATION FROM A LEAD-ING LAWYER.

Criticism of J. Sloat Fassett's Article in the North American Review-A Restricted Suffrage Advocated.

Hon. J. Sloat Fassett, in the North American Review for May, 1890, says: "With due reservation, it may be safely asserted, in a broad way, that up to this time in this country, our municipal governments have been, and are, failures." "But all these things (speaking of city governmental affairs), are accomplished at such an enormous expense and are accompanied with so much of waste and extravagance, of robbery and scandal; it costs so much to secure so little; the results are so entirely incommensurate with the force expended, especially in our larger cities, and in comparison with other divisional administrations-that it is not unfair to say, bluntly, that our city governments are failures."

Senator Fassett has not overstated the evils in our city governments. They are undoubtedly the worst municipal governments among the civilized nations. There is hardly an honest public work in any of our larger cities. I do not now recall a single instance where serious defects have not been found, upon investigation of sewers and other public works. There is hardly an honest foot of pavement or sewerage in any of these cities, and the cost of conany of these cities, and the cost of construction is more than the perfectly constructed works of a similar nature in the cities of other nations. Senator Fassett suggests that these evils are in a great measure produced: First, by the fact that the people in cities allow national politics to swallow up local politics. Secondly, there is no minority representation in our present city governments. Thirdly, that the methods of administering the finances in the cities are so complicated, that the people cannot understand them, and therefore cannot understand them, and therefore take no interest in them.

The first objection is not true in fact.

The first objection is not true in fact. Property owners in cities are intensely interested in the conduct of their respective governments. Secondly, a minority representation is not what the property owners and good citizens need, but a controlling majority. Thirdly, the best system of book-keeping ever invented has not, and will not, prevent the plundering of the public treasury by a corrupt government. All of these aids are valuable, but they are not strong enough to force an irresponsible and corrupt municipal body within the lines of honest and faithful government, and keep it there. The chief difficulty does not lie within the lines indicated by Senator Fassett. The chief difficulty lies in the fact that the governing bodies in our cities are chosen by an ignorant and irresponsible minority. In most of the cities of the country are collected a large body of foreigners. Many of these cannot speak our language, and in the nature of things cannot, and do not, comprehend our institutions and government. There is also not, and do not, comprehend our institu-tions and government. There is also in our cities a large number of electors who pay no taxes. Both of these classes are irresponsible electors. They are easily influenced by corrupt men, because they lack intelligence and because municipal corruption does not cost them anything. They are a body of voters numerous enough to constitute a minority that does and will hold

the balance of power in our municipal elections and control them.

We say that these evils, or defects are not due to our system of government. It is useless for us to deceive ourselves in these matters. These defects are the direct ourselves of our form. fects are the direct outcome of our form of government. Our form of govern-ment grants almost unrestricted suf-rage, and tends directly to allow all foreigners to come here and vote almost as soon as they touch our shores. For-eigners concentrate in our large cities They so far control state and national elections that members of congress dare not restrict foreign immigration. We have thus become a dumping ground for the nations of Europe, and they have, with unwonted liberality, shipped to us their lame, halt, blind, feeblc-minded and pauper classes. These, with a similar contingent already in the cities, form a non-ta -paying, irresponsible and corrupt minority, that holds the balance of power in all elecholds the balance of power in all elections. Corrupt men are nominated for office and buy their way into office. To pay their election expenses and provide for a rainy day, they sell the minor offices at fixed prices, as appeared in the late investigation in the city of Detroit. They bargain for a share in all the contracts for public works. They appoint inspectors of public works who are informed, in a way that they cannot mistake, that they will hold their positions just so long as they fail to discover any defects in the work of the contractors, and no longer. A more perfect system defects in the work of the contractors, and no longer. A more perfect system for a corrupt and debased government could not be devised, and more perfect machinery for the production of sham and defective public works could not be invented. The intelligent people in our cities understand this very well, but their love for the system of universal suffrage has not thus far allowed them to cry out against it, or take any effective measures to correct these evils. We will certainly be obliged to adopt some form of restricted suffrage, at least until we can absorb and civilize this mass of ignorance and stupidity that foreign we can absorb and civilize this mass of ignorance and stupidity that foreign nations have imposed upon us. It is universally conceded that this irresponsible minority controls the elections in our cities. Ignorant and corrupt men only can control this class of people. Of course ignorant and corrupt men officials will be elected by such a constituency under such control. It has been suggested, with much reason, that the liquor saloons and liquor interests in our cities control this minority, and if

the saloons could be removed it would tend to improve the governments of our cities. This would undoubtedly be the result, but still, so long as you have an ignorant and irresponsible body of voters in the cities large enough to had the balance of power and control the elections, there will always be found a power in some form to control it for selfish and corrupt purposes. Under the peculiar conditions of our country, universal suffrage is responsible for most of the evils in our city govern-ments. There is a very much better condition of things in our township condition of things in our township governments, because nearly every inhabitant of the township is a property-owner and a tax-payer. It is conceded that the governments of our townships are the most careful and economical possible. This is because they are controlled wholly by tax-payers, while the governments of our cities are the worst possible, because they are controlled by those who are not tax-payers. It has been suggested that if the better class of citizens and those financially responsible would abandon party polities and unite in municipal elections, they might remedy all evils. It is very doubtful, especially in the larger cities, if they could there obtain enough votes to control the municipal elections. These other the services of the services and those in the services of t larger cities, if they could there obtain enough votes to control the municipal elections. Those who are obliged to pay the taxes in those cities sould certainly adopt all measures that gave any promise of success, to obtain control of the city governments and stop the flood of excessive taxation that now oppresses them. They have indeed often tried these measures, and have almost universally failed. Then, too, party ties are strong, and local municipal elections often have great effect upon the general elections, and consequently men cling to party. It is, however, hardly worth while to discuss probabilities, when we have found, after about a hundred years of actual experience, that our people will not abandon party in local politics. The only effectual remedy is to remove from the hands of this ignorant non-tax-paying and irresponsible minority the weapons that they now use to perpetuate these great evils. There should be amendments to our state constitutions that would give restricted suffrage in all more approach to the suffrage in all more desirable and the suffrage and the suffrage in al great evils. There should be amendments to our state constitutions that would give restricted suffrage in all municipal elections. The right to vote at municipal elections should be restricted at least to those who are tax-payers. It has also been suggested that foreigners should not be allowed to vote at any elections until they have been inhabitants of this country twenty one years. As natives have to reside here twenty-one years before they can vote, this would not seem to be an unreasonable requirement in the case of foreigners. The experiment of restricted suffrage in municipalities is not new. They have municipalities is not new. They have tried it in Glasgow, Scotland, and the universal report is that its government is the most economical and the nearest perfect in every respect of any city in the world.

We also believe it would be found to be a great aid to good government to grant municipal suffrage to women who are tax payers.

TWO BROTHERS

Of Webster Township, who Have, for Many Years, Worked in Partnership. No residents of Webster township are

more universally respected than are the Backus brothers. Since 1867 they have worked together as partners and have won great success, thus illustrating the oft quoted proverb: "In union there is strength." Both are natives of Livingston county. Johnson, the elder brother, was born in 1840, the year after his father's removal to Michigan. Ira is four years younger. Each spent his early life on the farm. In summer they worked for their father, while in winter they trudged daily to the little schoolhouse, where slab benches served for desks. Here the boys gained a very good common school education. At the age of twenty-one, Johnson began working by the month. Two years later, in 1863, he married Miss Laura Dunn, of Ann Arbor, and took land to work on shares. Ira, being four years younger, did not reach his majority till 1865, in which year he began working the homestead on shares. In 1867 the brothers bought a farm of 160 acres, where Johnson is now living, and began to do business in partnership. The farm was much "run down" at the time, and it was said by certain knowing ones that no man could make a living upon it. The Backus brothers, however, immediately proceeded to demonstrate the falhouse, where slab benches served for ately proceeded to demonstrate the fal-lacy of this assertion. Their special line of farming has been raising and droving of farming has been raising and droving sheep, although they have also devoted considerable attention to mixed farming. Ira was married in 1874 to Miss Angeline Hadley, of Lyndon. Their children are two in number, a son, ten years old, and a daughter, fifteen. Mr. and Mrs. Johnson Backus have one married daughter, whose husband is a young and prosperous farmer. As soon as their prosperous farmer. As soon as their first purchase of land was paid for, the Backus brothers increased their busifirst purchase of land was paid for, the Backus brothers increased their business by buying more land as opportunities presented. At present their united farms consist of 455 acres, though they have at times previous to this owned considerably more. Their partnership has extended over a period of twenty-three years, and during all that time perfect harmony has existed between them. Like other farmers, they may have made mistakes, from a financial point of view, but a thought of complaint against the other, because of any mistakes that may have been made, has never entered the mind of either. They attribute their success in life largely to the principle of co-operation which they have followed, and though they have recently divided the property held in common they expect to continue doing a large share of their business in partnership. In their political views, both were formerly democrats. Johnson however is at present a prohibitionist and Ira styles himself an independent, though a prohibitionist in principle.

STILL HARPING

ON THE STREET RAILWAY, ORDI-

Another Change in the Route of the City Railway by the Council-Minor Matters.

Every member of the city council was in his seat last Monday night. No lawyers ventured to speat, and the greatest harmony consequently prevailed. Considerable business of importance was transacted. It need not be said that the street railway ordinance came up again for consideration. Mayor Manly's veto, previously mentioned in these columns, was read and placed on file. Petitions were presented, from the residents on South-State st and Packardst respectively. The former, signed by Secretary Wade for the university, the Alpha Delta Phi society, Henry Wade Rogers, Judge Cooley and other influential parties, asserted that a large majority of the property-owners on South State and Huron sts were opposed to running the street railway on those streets. They did not believe that the business interests of either the city or the company demanded it. They requested that the time for building that portion of the line be extended. They also recommended that a council committee confer with the street railway company in order to ascertain whether some other route could be agreed upon, which would be more satisfactory to all concerned. Twenty-eight residents on Packard-st and the adjoining streets (mirabile dictu!) asked that the route of the street railway be so changed as to extend from Main to Packard-st and down Packard st to the city limits. They also asked that this portion of the line he completed in one year. In order line be completed in one year. In order to act upon the mayor's veto and the petitions, it became necessary to reconsider the vote by which the amended ordinance was passed at the last meeting. Ald. Hall read another amendment incorporation the state of the state o ing. Ald. Hall read another amendment, incorporating the changes asked by the petitioners. The line, according to his suggestion, is to run from the intersection of Hill-stand Washtenaw-ave, westerly about 500 feet to a street soon to be dedicated to the city by Mrs. O. B. Hall, known as Lincoln-ave. Thence it will follow Lincoln-ave in a southerly direction to Well-st, and will run on Well-st to the main entrance of the fair grounds. It may be remarked parenthetically that this portion of the line is already built. The South State-st road is not to be constructed at all, but the Packard-st line is provided for, in answer to the request of the petitioners. All of the line mentioned in the ordinance is to be built before October 1, 1890, except the portion running from nance is to be built before October 1, 1890, except the portion running from Washtenaw-ave to the city limits and the proposed Packard-st line. The latter portion is to be constructed as soon as the Ann Arbor and Ypsilanti road is built,—or, if that project fails to materialize—before October 1,1891. The amendment to the ordinance did not elicit much debate. Mr. Corliss explained the object of the changes, which met with general approval. All the aldermen voted ave. except Snow the aldermen voted aye, except Snow and Taylor, who voted no, and President Howlett, who did not vote at all.

MINOR MATTERS.

The Mayor's communication, recommending David Collins and Clarence Tice as extra policemen, raised a little flurry of excitement. Some of the aldermen wanted Collins, some Tice, while others wanted both. The result was that the whole matter was tabled and no one was satisfied. The liquor and no one was satisfied. The liquor bond of Kemper & Damm, with Adolph Kemper, sr., and O. O. Sorg, as sureties, was unanimously approved. On motion of Ald. Miller, the clerk was authorized to advertise for bids for the construction of election booths. Ald. Mann moved that \$150 be appropriated to lower the grade and build crosswalks at the corner of Fourth-ave and Williams st. The matter was referred to the street com-mittee. On motion of Ald. Martin, the city clerk was authorized to inform the Thomson-Heuston Co. that the electric light contract with the city expires January 1, 1891. The street commissioner was instructed to remove trees in front of the premises of Mrs. Maroney, in the fith ward, and of Mrs. John Shumacher, on North-st. The council ordered the construction of sidewalks on both sides of Bakkerst from Mainon both sides of Beakes-st, from Mainst to Depot-st; on the west side of Thayer-st, in front of the high school building, and both sides of north Fifthave, from Catherine-st to Depot-st.

The corrected census returns for this county give the total population as 41,-883, just thirty-five more than in 1880. Manchester has 2,173, a loss of 9.23 per cent., while Dexter has exactly as many people now as it did ten years ago, the number being 873. Leaving the two cities out of consideration, York and Augusta are the only towns which have increased in population.

The Dexter Leader advocates the establishment of a lecture course in Dexter and thinks it strange, that "in a vil-lage like Dexter, environed by morality and intelligence, the seat of a first-class union school, a village in which the spires of six Christian churches point toward heaven, the demands for entertainments of a high intellectual order should be completely ignored."

The next meeting of the Saline farmers' club will be held at H. D. Platt's, the second Friday in October. The question for discussion will be, "What Shall We Raise on Our Farms to Compete With the West," and S. R. C'ittenden will open the subject with a paper. Mrs. E. C. Warner, of Ypsilanti, will read a paper, and Miss Florence Ruckman will give a recitation.

Joe. Feathers, says the Saline Ob-server, realizes the fact that in order to grow good crops land must be fed, and he now has piled up in compost heaps, over 600 loads of stable manure, largely purchased here in town and hauled to his farm. He never plows manure under bu: lets it become thoroughly composted and then uses it as top-dressing, which is, without doubt, the proper way to secure best results.

A sensation occurred on Huron street, one day last week, when in the midst of a heavy rain a horse came leisurely down the sidewalk, led by a woman who de-clared she'd not go in the muddy road, no matter what the sidewalk law might be, there now. MICHIGAN STATE NEWS.

DEATH OF SUMNER HOWARD.

The Michigan Politician Expires from Grief at the Loss of an Only Child. Sumner Howard, one of the best known politicians in Michigan, died the other day from grief at the loss of his only child, Mrs. May Howard Foote, Mr. Howard was so devoted to bis daughter that he never recovered from the shock caused by her death, and really mourned himself into the grave. Mr. Howard was 55 years old. He was known throughout the State as a politician, but more especially as a criminal lawyer of great ability. In 1876 he was appointed by President Grant District Attorney of Utah, and secured the con-viction and execution of John D. Lee. the noted leader in the Mountain Meadow massacre. In 1882 he was a member of the Michigan Legislature and chosen speaker of the House. Subsequently he was appointed by President Arthur Chief Justice of Arizona, which position he resigned in 1886. He had repre-sented Arizona and Michigan in National conventions.

MICHIGAN SOLDIERS.

Two Associations Meet at Lansing and

Elect Officers. At the business session of the Michigan artillery association the other afternoon it was decided to hold the next reunion at Detroit, at the time of the National G. A. R. convention. The officers elected for the ensuing year are: President, Captain M. D. Elliott, Holly; Vice-President, J. Redson, Vernon; Secretary, Charles A. Lee. Leesville; Treasurer, W. Faulkner, Duck Lake. The same day the 12th Michigan infantry elected the following officers: President, Captain M. E. Stuart, of South Haven; Vice-President, John Wardwell, Lansing; Secretary, John Pennington, Pewamo; Treasurer, George A. Waldron, Devereau. There were about fifty of the members present. It was decided to hold the next annual reunion at Detroit at the time of the National G. A. R. convention.

WAS IT SUICIDE?

Mysterious Death of Frank Moran at Detroit.

Patrolman Newberry found a man lying insensible in front of the Fremont House, in Detroit, at an early hour the other morning. Supposing it was a case of drunk, the man was taken to the Woodbridge street station, where it was discovered that it was something more serious. City Physican Story was called, and decided to remove him to St. Mary's Hospital, but before reaching there the man was dead and the body was taken to Blake's morgue. He was identified as Frank Moran, who worked as fireman and had been on the lake boats. He was a resident of Detroit.

BROKE HIS NECK.

A Tramp Falls Backward from a Porch by the Breaking of a Rall.

The other evening a man having the appearance of a tramp, and supposed to be J. S. Mathus, of Dunkirk, N. stopped at the house of Charles Marshall, half a mile west of Potterville, and asked for food. While Mrs. Marshall was preparing a lunch the man leaned against the porch railing, which suddenly gave way, precipitating him to the ground, about seven feet below, and breaking his neck.

Health in Michigan.

Reports to the State Board of Health by seventy-five observers in different parts of the State for the week ended September 6 indicated that measles, influenza, pleuritis, diphtheria and whooping cough increased, and puerperal fever. branous croup and cerebro-spinal meningitis decreased in area of prevalence. Diphtheria was reported at thirty places, scarlet fever at twenty-five, typhoid fever at twenty-five and measles at ten places.

Michigan Railway Statistics.

The whole number of stations on the Michigan system of railroads is 3,053; whole number in Michigan, 1,435; total number of employes, 60,531; total number in Michigan, 24, 105. The total number of employes is divided as follows: Baggagemen, 733; brakemen, 3,938; conductors, 1,992; engineers, 2,815; firemen, 8,195; laborers, 15,895; shopmen, b, 333; yardmen, 3, 274; all others, 19,536.

Michigan Lumber-Mill Burned.

The Michigan Shingle & Lumber Company's mill at Muskegon, the largest on the lake, burned the other morning. A million and a half feet of fine lumber and 22,000,000 shingles also burned, with the docks and slips. mill was valued at \$40,000 and the loss on lumber and shingles is \$55,000, making the total loss \$100,000; insurance,

Short but Newsy Items. Charles Hinckley, of Dunondale, was

stricken with apoplexy the other night, and died about 10 a.m. the next day. He was 72 years of age and had lived in that township fifty-one years last spring.

John W. Twiss, John Cole and Frank Whipple, of Port Huron, were to apply Whipple, of Port Huron, were to apply whipple. The route is a comprehensive one, including all of the principal streets not already occupied by street railways and will extend from the Upton works, in the south, to the beaches north of the city. It is proposed, providing the council grants the franchise, to complete at least one mile of the road during the

present year. W. E. Thorne, of Jackson, has been left \$30,000 by a Texas man with whom he formed a close friendship while both were passengers on a railroad train

some years ago.

An abandoned baby was found recently at the side of an unoccupied farm-house near Lansing. The child's clothing was fine and newly purchased, but there was absolutely no clew to its identity.

Michigan produced 405,656 barrels of standard salt during August. By counties this was the yield: Saginaw, 103,-386; Manistee, 98,303; Ba7, 90,574; Iosco, 38,643; Mason, 37,009; St. Clair, 27,-\$26; Huron, 5,938; Midland, 3,927.

Does it pay to raise sheep? judging from the following, we should most emphatically say that it does. Last fall, S. B. Mallery had a flock of 206 sheep. Last April he sold \$205 worth from the flock; his wool clip brought him \$347; a few days ago he sold 315 sheep for \$1,099, a buck for \$20, making a total of \$1,671 from the said sheep, and still has \$75 worth of the original flock left.—Reading Tele-

A pair of shoes is one of most typical products of modern industry. To make them the Animal Kingdom contributes from the herds of the Western Plains the Vegetable, from groves of oak and hemlock or from the great forests still left to us; great factories supply cloth and thread; mines, furnaces and forges combine to furnish nails or wire. Through scores of processes, the fortytwo pieces of a pair of snoes require to bring them together, the co-operation of fifty men and women, whose division of labor is so thoroughly systematized that everything goes with the same regularity attributed to the works of a clock, until as a result, you, well shod reader, who wear the W. L. Douglas' Shoe, can buy a pair from three to five dollars that would have cost your fore-father from six to twelve.—Ex 10

Cheap Lands in the West.

Along the lines of the BURLINGTON ROUTE in Nebraska, Colorado, Wyoming and northwestern Karkas, particularly on its new extension in that territory, there is still some Government Land awaiting settlement, as well as other cheap lands held by individuals. These lands are among the best to be had anywhere in the country for agricultural and grazing purposes. In the comparatively new districts are many improved farms which can be purchased at a very low rate of that class of restless pioneer-settlers who are ready at all times to move "further west." In the territory embraced by the BURLINGTON'S lines west of the Missouri River, there are in the vicinity of two hundred new towns which offer to manufacturers and business men an excellent opportunity to locate with profit. Send to the undersiened for descriptive pamphlets and other matter giving location and full particulars concerning these lands.

AT HIGH WATER MARK.

PITTSBURGH, Pa., Sept. 15.-Advices from all sources up the Allegheny and in the northern districts show the high waters to be subsiding, though not without considerable damage having first been inflicted. The water-spout in Akron, O., gullied the hill streets, while streets on the flats have been badly washed, and the loss on property there will be so large that a special meeting of the city council has been called to devise means of repairing the extraordinary damage.

Near Akron, O., whole farms have been washed out; plowing must be done over again, and fields of crops must be entirely resown. At New Castle the Shenango river is nearly as high as during the disastrous flood of 1881, though the waters in both this stream and the rapid Neshannock are rapidly decreasing. Many head of stock on bordering farms are reported drowned by high rivers, while county fairs as a rule have proven failures.

WATERTOWN, N. Y., Sept. 15.—The rain, which has fallen in torrents almost continually for five days past, has swollen every stream in this section to spring-freshet height, and to-day the effects are seriously felt hereabouts by the almost complete tying-up of the Rome, Watertown & Ogdensburg railroad and its branches, the obstruction of mills and other damage to farm and manufacturing property.

At Copenhagen, Lewis County, Campbell's machine shop was tipped over by the flood during the night, and Lampher & Keys' saw-mill and cheese-box factory and Ward's saw-mill were carried away. At New Boston, Lewis County, the New Boston saw-mill and cheese-box factory were carried away. Many acres of good farm land are under water in this vicinity. The cause of the washing away of the Centerville bridge was the breaking of a dam above. At 7 a. m. there was ten inches of water over the tracks at the latter point, and all the houses and stores are flooded to the depth of three feet. In Carthage many houses on the flats are flooded, and the residents on the Tannery island are moving to the main land, fearing the

break water will give way.
Oswego, N. Y., Sept. 15. - The unprecedented rains in this vicinity have transferred Oswego County creeks into roaring rivers. Salmon river is higher than ever before and is doing great damage. Part of the village of Pulaski is under water. More than fifty important bridges are gone and the water is still rising.

ZANESVILLE, O., Sept. 15 .- The high waters in the Muskingum valley have done incalculable damage to the corn in the lowlands. Hundreds of acres are submerged and the crop is ruined. The damage to the Government works has been heavy.

In the matter of the Estate of William P. Brown, deceased.

On reading and filing the petition, duly verified, of William P. Brown, praying that a certain instrument now on file in this court, purporting to be the last will and testament of said deceased, may be admitted to probate, and that administration of said estate may be granted to himself and Foster Brown, the executors in said will named, or some other suitable person.

Therefore it is Ordered, That Monday, the sixth day of October, next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the devisees, legatees, and heirs at law of said deceased, and all other persons interested in said estate, are required to appearant a ression of said Court, then to be holden at the Probate Office in the City of Ann Arbor, and show cause, if any there be, why the prayer of the petitioner should not be granted: And it is further Ordered, that said petitioner give notice to the persons interested in said estate, of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the Ann Arbor Resister, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing.

J. WILLARD BABBITT,

Judge of Probate. COLUMBUS, O., Sept. 15.-The Scioto river has reached a stage which is the cause of more than ordinary damage. THE TWIN CITIES CENSUS.

Result of the Recount in Minneapolis and

St. PAUL, Minn., Sept. 15.-Special Supervisor Wardle, of the Census Department, on Saturday gave out the figures of the recount in St. Paul as 133,-301. The original census of St. Paul, made under the supervision of Theophilus F. Smith, footed up 142,541 names, which is just 2,240 greater than that made by the Government under a special agent. It is not charged by the Census Department or by the citizens of St. Paul that Mr. Smith had any thing to do with adding names fraudulently. The census of 1880 gave St. Paul 41,000.

The population of Minneapolis is given at 164,738, an increase over the census of 1880 of 117,841. The returns before the recount made the population 191,800. It is estimated that the recount resulting from this quarrel between the twins has cost the Government nearly \$30,000.

BROKE THE FAST RECORD. Mrs. Adam Wuchter Lives for 161 Days Without Food,

CARBONDALE, Pa., Sept. 13 .- No case of fasting on record, either voluntary or involuntary, has ever compared in any way with that of Mrs. Adam Wuchter, of the village of White Hall, who has not tasted a morsel of solid food for 161 days and not a drop of liquid food for 152 days. Since the beginning of her fast Mrs. Wuchter has been critically ill and she has suffered intense pain. Up to nine years ago Mrs. Wuchter, who is 39 years of age, was in good health. About that time she began to fail, the first evidences of declining health being a spasmodic cough. Eighteen months ago the cough became very severe, and her voice sank at times to a whisper. Ten months ago swallowing became difficult, and in a short time she was unable to get any thing down her throat except liquids. Her condition grew worse until she was able to partake of liquid food only at rare intervals, and then not more than a spoonful at a

Republican County Convention.

The republicans of the county of Washtenaw will meet in convention at the court house in the city of Ann Arbor on Tuesday, the 3cth of September, at 11 o'clock a. M., for the purpose of placing in nomination candidates for the several county offices and for such other business as may properly come before the convention. Each township and ward will be entitled to the following number of delegates:

Ann Arbor City—
First Ward
Second Ward
Third Ward
Fourth Ward
Fifth Ward
Sixth Ward
Ann Arbor Town

on from each precinct.

By ORDER OF THE COMMITTEE.

THE saloons are open on Sunday, Mayor Manly. Do you not know it?,

At the congressional convention, held yesterday, the democrats selected L. H Salsbury as the standard bearer, but he refused to be sacrificed on the democratic altar, and James S. Gorman, of this county, was named in his place. This ensures the re-election of Capt. E. P. Allen.

A KEEN sense of duty led Mayor Manly to decline the proffered nomination for congress. He evidently believes it far more important that the saloons of this western Athens should be properly regulated, than that free trade should receive a new and valiant champion.

THE present city council seems to be addicted to the practice of false economy. When the mayor recently recommended the appointment of two additional policemen, he had the support of many of our heaviest tax-payers, who do not wish to see the city almost entirely unprotected during the nights-One man can hardly be expected to watch the whole city. If he is called to the depot, on account of any disturbance, the rest of the town is practically at the mercy of the disorderly and criminal classes. One man, in fact, is scarcely better than none at all. Three would not be too many. The people desire the additional men; why should the council hesitate?

RECIPROCITY with the South American republics will open up a new market for our manufacturing experts, without in any way destroying or crippling an American industry. It is wholly compatible with the proper application of the protective principle. Reciprocity with England, which our democratic friends desire more strongly, would subject our manufacturers to a merciless competition, which would inevitably result, at least temporarily, in the complete prostration of every line of business pursued by the American people. Reciprocity with South America is republican doctrine; reciprocity with England is democratic doctrine. Which do our intelligent voters accept?

THE southern aristocrats (falsely called democrats) who are determined upon maintaining white supremacy at any cost-whether by force, fraud or bribery-justify their course on the ground that negro rule would be a rule of ignorance and incapacity. Add to this dishonesty, and you have the rule of Tammany Hall in New York. It is infinitely worse than negro rule would ever be. If southern tactics were used, it would very soon be abolished at the point of the bayonet. Why is this not done? Simply because the northern people are patient and law-abiding. They hope to rid themselves of evils by means of agitation and peaceful legislation. The southern people should do likewise. They should, for one thing, strive to educate the negro. They should teach him, by example, that the constitution of this nation is a sacred thing, but instead of trampling upon the fundamental law, as they have been doing for the past twenty years, thus teaching the negro a lesson in anarchy which unfortunately he will very read-

Will Lead the Democratic Hosts in this District - A very Chaotic Con-

The democratic congressional convention, held yesterday, at Adrian, was a very peculiar convention. Those candidates who wanted the nomination were very kindly shelved, while those who did not want it were unanimously elected. At 9:30 in the morning the Washtenaw delegation met in caucus and cert sleven votes for liesemer, out and east eleven votes for Liesemer, out of a total of nineteen. Another ballot was taken in which Liesemer received 11, Manly 8 and Salsbury 1. A motion that the unanimous vote of the delegathat the unanimous vote of the delega-tion be cast for Liesemer was vigorously opposed and finally defeated. In the district convention proper, the roll of counties was called, but no nomina-tions whatever were made. The first ballot was then taken—Hillsdale voting solidly for one of its own citizens and Lenawee for Seth Bean, while Monroe and Washtenaw were both divided. On the second ballot, Hillsdale voted for Mayor Manly, of this city. The third bal-lot was indicisive. Both Bean and Manly lot was indicisive. Both Bean and Manly then withdrew in favor of Salsbury, but nevertheless Manly, it seems, was nominated on the fourth ballot by a vote of 42 out of 74. This however is not certain. He again withdrew, and Salsbury thereupon received the unanimous vote of the convention. Many of the delegates then left the hall, thinking that all the business had been done, but they were mistaken, for Mr. Salsbury very soon entered the hall and absolutely refused the nomination. Conlutely refused the nomination. Confusion reigned supreme. A short recess was taken hurried consultations were was taken nurried constitutions whe held, and finally the delegates were in-duced to unite on Jas. S. Gorman, of this county, who consequently received the unanimous vote of the convention.

Br. Gibb s' Latest Contribution.

Dr. Heneage Gibbes, of this city, has been contributing quite largely to the American Journal of the Medical Sci-American Journal of the Medical Sciences. One of the latest and most notable of his productions is a series of six articles entitled, "An Investigation into the Etiology of Phthisis," written with the aid of Dr. E. L. Shurley, professor of larynchology and clinical medicine in the Detroit college of medicine. This investigation is undertaken with the object of working out the morbid changes in the lungs which result in the formation of cavities, and of endeavoring to prove the causal relation of the bacillus tuberculosis thereto. Experiments have been made by inoculating animals to find out whether oculating animals to find out whether all forms of phthisis reproduce them-selves in the same manner; the ape, as being the animal most nearly allied to man, being token for the purpose. At the same time the clinical histories, physical signs and symptoms of the cases from which material is taken are fully and carefully investigated to find fully and carefully investigated to find out if different lesions in the lungs can be diagnosed thereby. The points made by the learned physicians are extremely plausible and they will doubtless meet with the approval of many members of the medical profession. In conclusion they say: "As to heredity and contagion our work is still in progress, and it will take a much longer time than we have yet devoted to these questions before we get reliable data to work on. In the mean time we would say that the results we have laid before the profession are those of honest work, and all we ask is fair and honest work, and all we ask is fair and open criticism of this work by those competent to do so."

The Beautiful Guild.

ANN ARBOR, June 7th, 1890.

MR.WILSEY, DEAR SIR:-I enclose the testimonial for which you asked. It gives me pleasure to send it to you, as I like my piano so much. When you can make it convenient, come out and see how it has stood the wear and tear of nine years. Yours Truly, LILLIE BAESSLER.

* * With regard to the Guild purchased of you nine years ago. * * * Its tone is as mellow and sweet as ever, and in standing in tune I have never seen its equal. Any one contemplating the purchase of a piano, will find it to their interest to examine the Guild.

Respectfully, LILLIE BAESSLER.

The Guild has stood "wear and tear" better, and held its own better than any piano I have ever sold. Over 25,000 have been manufactured, and sold very largely in Boston and vicinity. The great music publishing house of Ditson & Co has sold over 800 of them in the City of Boston. The simple (patent) tuning device is the greatest improvement of the day, and will save expense to the owner besides the satisfaction of having a piano constantly in tune.

The swinging music desk running the entire length of the piano is perfection They please, they sell. Why? See them, and you will learn. Manufactured in Boston for nearly thirty years.

THURSDAY, SEPTEMBER 18, 1890.

FIFTY-FIRST CONGRESS.

Summary of the Daily Work in

Senate and House. The Tariff Bill Passes the Senate by a

Strict Party Vote-Proceedings in the House-News of General interest.

WASHINGTON, Sept. 10 .- In the Senate yesterday the tariff bill was ordered engrossed and two important amendments were adopted—one providing for partial reciprocity, and the other providing for a tariff commission, with headquarters in Washington, to collect data as to the effect of tariff laws on commercial and industrial conditions.

WASHINGTON, Sept. 11.-In the Senate yesterday, after disposing of routine business, the tariff bill was taken up for discussion and passed by a strict party vote-40 to 29. Senator Aldrich moved that the Senate insist on its amendments to the House bill and ask for a committee of conference, the conference to consist of seven on each side. The motion was agreed to, and Senators Aldrich, Sherman, Allison, Hiscock, McPherson, Vance and Carlisle were appointed conferrees on the part of the Senate.

Washington, Sept. 13.—In the Senate yesterday a petition from citizens of Missouri was presented asking for the passage of the Federal election bill, and many petitions were presented against the passage of the compound-lard bill. The calendar was then taken up and a number of bills of no great importance were passed. The land forfeiture bill was further discussed.

WASHINGTON, Sept. 15.—Saturday's session of the Senate was devoted to the Randall eulogies. Senator Quay, as soon as the journal was read, offered the usual resolution of sorrow and condolence at the death of Samuel J. Randall and made the opening address. Brief but eloquent addresses were also made by Senators Daniel, Plumb, Blackburn, Cullom, Morgan, Hiscock and others, and then as a further mark of respect the Senate adjourned until Monday.

WASHINGTON, Sept. 16.—In the Senate yesterday sixteen bridge bills were passed, also bills to create an auditor of railway accounts and for the relief of certain officers and enlisted men of the First Kansas Colored Volunteers. The railroad land-forfeiture bill was further

WASHINGTON, Sept. 10.—In the House yesterday the Virginia election case of Langston vs. Venable was called, but it could not be acted on for want of a quorum. Bills were introduced to create a woman's international labor congress to be held at Chicago in 1893, and to increase the pensions of persons who have lost an arm or leg in the service at \$30 per month.

WASHINGTON, Sept. 11.-In the House yesterday the entire day was spent in filibustering against the consideration of the Langston-Venable election con-test. Representative Dunnell, of Minnesota, introduced a reapportionment bill. It provides for a House of 855 members on a basis of one Representative for 180,000 population.

WASHINGTON, Sept. 12.—As Speaker Reed entered the chamber yesterday at a few minutes before noon he received a round of applause from the Republican side of the House and from the spectators in the galleries, but no other demonstration was made. Lack of a quorum prevented business.

WASHINGTON, Sept. 13.—In the House yesterday the tariff bill with amendments was received and referred to the committee on ways and means. A bill was introduced by Mr. Burton (O.) to regulate the division of the States of the Union into Congressional districts. The bill provides as follows:

The bill provides as follows:

Within twelve months after the passage of an apportionment act the States shall be divided into Congressional districts by a districting board in each State, composed of four resident members, two of each political party, to be appointed by the Governors. Districts are to consist of contiguous territory, and no district is not have more than one member. A district is not to be divided unless its population exceeds by one-tenth the number necessary to entitle it to a Representative except in States electing Representative except in States electing Representative. a Representative except in States electing Representatives by towns, and no district is to contain more than oue-twentieth more or less inhabitants than the number necessary to entitle it to a Representative. Districts are to be com-posed of compact territory, bounded as nearly as it may be by civil subdivisions or natural

Doundaries.

There is to be a National board of five members, four politically divided and the other a Judge of the Supreme, District, or Circuit United States Court, appointed by the President and confirmed by the Senate to act in case of failure to act or disagreement of the State boards. The districts made by these boards are to remain intact until the next census ap-portionment.

Washington, Sept. 15.—The House approved the journal of Tuesday's proceedings by a vote of yeas, 157; nays, 0. The clerk then proceeded to read the journal of Wednesday, which Mr. O'Ferrall (Va.) demanded should be read in full, although the Speaker suggested that this would tend only to consume the time which had been assigned to the Beck eulogies. The journals of Wednesday, Thursday and Friday were finally read and approved without objection, and then the House proceeded to pay its last tribute of respect to the memory of the late Senator Beck, of Kentucky.

Washington, Sept. 16.—In the House yesterday Mr. McKinley reported the tariff bill with Senate amendments, with the recommendation that the amendments be non-concurred in. The measure was discussed, but no action was taken. Mr. Enloe (Tenn.) introduced a resolution denouncing the recent attack of Mr. Kennedy (O.) on the Senate in general and Senator Quay in particular.

Drowned.

GARNETT, Kan., Sept. 16.-Mrs. Dr. G. W. Cooper and Mrs. G. F. Rose and her 9-year-old son were drowned in South Pottawatomie river Sunday. It is supposed their buggy was overturned while fording the river. The bodies were recovered.

TEMPERANCE NOTES.

WHAT HE MIGHT HAVE WRITTEN.

I was thinking, some years ago, of the Temperance lynes which the great poet of Scotland might have written had he put his name to a pledge of abstinence, a thing unhappily unknown in his day. The result was the following poem imitative of his dialect and manner:

The Toper to His Bottle. (After the Pledge.) Ye auld black thief of purse an' brain! How dare ye show ye'r face again
Wi'a' the loss, the shame, an' pain
That wad unman me?
Wae's me, that e'er my lips hae ta'en
Your kiss uncanny.

Be off, at ance, wi' your ainsel', An' carry back that drink o' hell, Your water fetched frae Satan's well, The de'll's aln breath O' fire is in its vera smell; Its taste is death.

Ye thievin', cheatin', auld Cheap Jack, Ye thievin', cheatin', auld Cheap Jack Peddiin' your poison brose, I'il brack Your banes against my chimney-back Wi' muckle pleasure, De'il mend ye i' his workshop black E'en at his leisure.

Nae mair, auld knave, without a shillin'
To keep a starvin' fool frae stealin'

THE DRINK BILL.

What Become of the Annual Earnings of Two Millions of Men.

As repeatedly shown in the columns of the Union Signal, the saloon is the rottenest form of commerce. It takes more and gives less than any other method of buying and selling. It collects an enormous tax every year, so large that it is almost impossible to bring it to the realization of the reader. If we assume that the total drink bill amounts to one thousand millions of dollars a year, an estimate considerably within the truth, we have in this tax voluntarily contributed by individuals a gross amount greater than all the expenses of the State, municipal and general governments, including our vast expenditure for pensions. According to the American Almanac for the present year, the railroads of this country operated last year 136,986 miles of track; their indebtedness, or capitalization, amounted to \$8,278,505,145, an aggregate probably double the actual expense of duplicating the roads in their right of way, tracks, rolling stocks, etc., in per-fect running order. Hence, the drink bill of this country, upon this estimate, would replace all these miles of track, and this mighty accumulation of capital in five years; or, taking the roads at their own valuation, in eight years. The lower estimate, however, is far within the truth.

The total gross earnings of all the railroads amounted last year to \$931,385,954. This included the wage accounts of a million and a half of men, and the dividends upon the vast capitalization already specified. The drink bill of the country was greater by the total earnings of 2,000 men. The exports of the country were \$695,954,639; the imports, \$72,829,-The drink bill was half as large again as either, and nearly as large as both. It may be possible for an economist like Mr. Edward Atkinson to suggest that the frying-pan is a greater evil in the United States, impairing more lives and wasting more money than the still and the mash-tub. But the facts above do not support such an absurd suggestion. Whether or not we can put our hands upon the individuals ruined by drink, it is certain that the annual earnings of two millions of men are poured down this great sluice-way every year .- Union Signal.

MASSACHUSETTS RUM.

It Is Sent in Large Quantities to the Natives of Africa.

"I have directly learned," says Dr. Dorchester, in the Congregationalist, "from the best authority, that a distillery firm within three miles of the Massachusetts State-House has a contract to furnish 3,000 gallons of rum daily to the African trade for the next seven years. This would be equivalent to almost one million gallons annually.

"It will be a surprise to many to learn that almost all the rum manufactured in the United States is made within five miles of the Massachusetts State-House. During the last six years the total quantity manufactured and deposited in the distillery warehouses of the country was 11,133,704 gallons, an average of 1,855,617 gallons yearly, of which total the distilleries around Boston made 10,460,120 gallons, or ninetyfour per cent. of all made in this coun-

"Almost all the liquor sent from the United States to Africa is sent from Boston. No other liquor than that most accursed of all liquors, Boston's rum, is sent from America to the 'Dark Continent.

Thus the name of God is blasphemed among the heathen. And while men are boasting of the progress of civilization, and predicting the speedy conversion of the world, the so-called "Christian nations" are deluging poor, benighted Africa with strong drink, as England has for a generation been flood. ing China with opium, and so destroy. ing ten souls where missionaries are converting one.

Is it not time to lift up the voice like a trumpet and warn men of the evil of such ways that they may repent of their wickedness and escape the damnation of hell?-Boston Safeguard.

A Chance to Make Money. MR. EDITOR:-I bought one of Griffith's machines for plating with gold, silver or nickel and it works to perfection. No sooner did the people hear of it than I had more spoons, knives, forks and jewelry than I could plate in a month. The first week I cleared \$31.30, the first month week I cleared \$31.30, the first month \$167.85, and I think by July 1st I will have \$1,000 cash and give my farmconsiderable attention, too. My daughter made \$27.40 in four days. Any person can get one of these machines by sending \$3 to W. H. Griffith & Co., Zanesville, O., or can obtain circulars by addressing them. You can learn to use the machine in one hour. As this is my first lucky streak, I give my experience, hoping others may be benefited as much as I have been.

HAMILTON, ROSE & SHEEHAN'S ADDITION

To the City of Ann Arbor.

We believe Ann Arbor is the Best City in Michigan IN WHICH TO LIVE.

The Educational Advantages here are unsurpassed! The Streets are broad and well kept! Ann Arbor has a low rate of taxation!

It has the best system of Water Works in the West.

Our Addition is just five Blocks from the University of Michigan; it has a ront of One Hundred Rods on State Street, the best residence street in the city. Its location is unsurpassed for health and convenience. The levels taken by our Engineer, Geo. W. Sanborn, show the lowest point to be higher than Main Street in front of the Savings Bank. The slope of the ground is such that the drainage is perfect, having a fall of rom six to ten feet. We have laid drain pipe through our land.

We have filed our Plat and have given

8 1-2 Acres for a Park.

We have paid Fifty Dollars for a handsome and attractive plan for a Park.

Work has commenced on the streets and Park. Seven new houses are already contracted for to be built upon our Addition this year. New sidewalks have been laid, 1,100 shade trees have been planted upon the streets and Park. Two professors in the University have already purchased Lots in this addition, and will soon build good houses on thei lots. Hutzel & Co. have donated a handsome Fountain for the Park.

All the Lots have an Alley 16 feet Wide,

in the rear. We have made the price of the lots very low. If you buy a Lot we believe you will double your money in three years time

as a Savings Bank, and the gain much more rapid. Ten new houses on South State Street will be built this year.

We will sell Lots for Cash.

We will sell lots on time Payments.

We will sell Lots to parties who wish to build houses at once, and will help them to furnish money to build.

Buy a Lot, Money Made!

Payments may be made by the week, by the month, or by the year as suits purchaser.

Call at Sheehan's Store, or at Hamilton Block to see the Plat. We have the Park Plans. We desire those intending to purchase lots to examine them. Call and see them.

The new buildings on State Street this year will amount to Sixty Thousand Dollars. Investigate what we have, then judge for yourselves. This is better than a Loan and Investment Association. Your money is kept at home. Persons intending to purchase Lots should look over our Addition and Investigate for themselves.

A Jilted Lover Causes a Double Tragedy in Iowa.

Mollie Sm'th Langdon Shot Dead by J. W. Bevan, an Ex-Lover-The Husband Slays the Murderer of His Young Wife.

AN AWFUL CRIME.

GRAND MOUND, Ia., Sept. 16 .- John W. Beyan, of Chicago, shot Mrs. W. M. Langston dead here Monday and was immediately killed by her husband, who surrendered to the local officers and is now in the custody of the sheriff. Three years ago young Bevan and Miss Mollie Smith were attending school at Valparaiso, Ind. There they fell in love with each other and became engaged. Soon after they separated, Mollie going to her home at Madison, Wis., and Bevan to his home in Chicago. Mollie soon after transferred her affections to William Langdon, a man in her own city, and not long ago they were married and came this county. Bevans appeared here Monday and went to the house of a family named Twogood, where Langdon and his wife boarded. He rang the bell, and when Langdon appeared asked to speak to his wife. His sucessful rival knew of the former love affair and of threats made by Bevan since he was jilted and at first refused. He finally consented, however, and went upstairs and told his wife that Bevan wanted to speak to her, at the same time going for his revolver, fearing trouble. As he was about to descend the stairs he heard three shots, and rushed down to see his wife lying with a bullet hole in her head and another in her neck. The third shot Bevan had directed against himself. Langdon rushed up to Bevan and emptied his revolver in his face and Bevan fell dead beside the body of his fair young victim. Langdon, almost crazed with grief over the death of his wife, to whom he was devotedly attached, carried her remains into the house, where vain efforts were made to revive her. Mr. Langdon then gave himself up to the local officers, and was subsequently taken in charge by Sheriff

Desmond. Mr. Langdon is a member of the firm of Langdon & Co., contractors, has a contract for building double track of the Chicago & Northwestern railway from Dewitt west to Cedar Rapids. Little is known of him except that he came here from St. Paul and that his parents in Chicago are said to be wealthy. Mrs. Langdon was a beautiful and accomplished young woman, aged 22 years, and her death is deeply deplored.

Bevan was also about 22 years of age, and was a book-keeper for A. F. Bullen, malster, in Chicago.

THE WORLD'S FAIR.

Second Session in Chicago of the Na-

tional Commissioners. CHICAGO, Sept. 16.-The National Columbian Exposition Commission met Monday at Andrews' Hall, 215 Wabash avenue. President Palmer made a brief speech and the commission entered into the hearing of a number of committee reports. The most important was the judiciary committee, which was charged with the duty of defining the rights, duties and powers of the commission under the act of Congress creating The report claims that the National commission has the exclusive power to allot space, classify exhibits, determine the plan and scope of the exosition make all awards of premi ums, and generally to have charge of all intercourse with the exhibitors and representatives of foreign nations. The commission claims the power to appoint necessary officers and committees. This doubtless means the director-general. While the commission says it is not charged with any duty in regard to the selection of a site or grounds or the plans and specifications of buildings, its approval of the action of the local board does not necessarily exhaust its power over these subjects. The action of the local board may be reconsidered by the commission. The power of general supervision and control is claimed by the commission because the exposition is to be National and international, not local.

A FIVE YEARS' CRUISE. Arrival of the Whaling Bark Petrel at

New Bedford-A Peculiar Disease. NEW BEDFORD, Mass., Sept. 15 .- The whaling bark Petrel, Captain Edwin J. Reed, of this city, has arrived here after a voyage of five years, mostly in the Atlantic ocean. Captain Reed says that while off Patagonia several months ago a gale came up from off shore, during which large quantities of fine white powder came on the ship, choking those who inhaled it. Nextday one of the crew was taken sick and his feet began to swell. The swelling con-sinued until his whole body was affected. One after another of the crew was taken down until thirty-four had the disease. This left only three men to work the ship. Each person afflicted swelled to almost twice his usual size and the fiesh assumed a yellowish color. Although the disease was attended with little pain a burning sensation in the stomach was felt. The bark was headed for Dominica, West India. The vessel was not allowed to touch at any port. The disease had never been heard of by any one on the vessel and no one knew what to do for it. Captain Reed ordered the flesh rubbed with coarse brushes and a simple diet and light doses of epsom salts, with carbonate of soda. Some of the men began to improve, but nine continually grew worse and died, mortification setting in. Physicians at this port pronounced the epidemic to be beri-beri, a disease prevalent in some parts of the globe, but this is said to be the first case on record of its having come on board a ship in a gale of wind. On May 4 a sea struck the ship and swept two men overboard and they were drowned.

SHOT IN SELF-DEFENSE.

Particulars of the Affair on the United

States Steamer Acapulco. CITY OF MEXICO, Sept. 12, via Galveston.—According to advices received here of the shooting of General Barrundia on board the American steamship Acapulco at San Jose de Guatemala, Captain Pitts, of the Acapulco, has made a declaration which the Guatemalan authorities claim completely justifies their action. Mr. Mizner. the American Minister, the authorities say, was consulted as an act of courtesy only. The dispatches above mentioned further say that when Captain Toriello and Captain Pitts read to Barrundia the order for his delivery to the Guatemalan authorities Barrundia asked permission to change his clothes, which was granted. Turning away Barrundia suddenly grasped two revolvers and fired on Toriello. Pitts and the policeman, who in return fired on Barrundia, killing him. Captain Pitts had taken the precaution of ordering the passengers to withdraw, otherwise some of them would have undoubtedly been hit by the bullets from Barrundia's pistols.
