SILK AND WHEAT.

TWO INSTRUCTIVE PAPERS READ BEFORE THE INLAND LEAGUE.

"The Queen of Fabrics" and "Speculative Dealing in Grain-Greater than Caesar - China First, Europe Next, America Last-Protection and the Silk Industry-The Board of Trade-How to Speculate-The Hatch Bill - "Old Hutch" Pardridge -Where the Money Goes-The Most Ingerious System of Gambling in the World.

The Queen of Fabrics.

At the Inland League last Monday evening two very interesting and instructive papers were read by two of Ann Arbor's prominent business men. These papers in a condensed form that contains the facts though unfortunately omits the vigorous and agreeable style of expression of the originals, are repeated below. The first is by Mr. E. F. Mills on the subject of the Queen of of Fabrics.

The history of Centuries prior to our own is a record of military achievment the arts of peace being so obscure that it is impossible to trace accurately the early history of any fabric. Now great inventors are sure of a place in the

annals of their country. There are four men who conferred unto d benefits upon mankind for whom no monuments are reared or poets sing, they are epoch makers. These are; 1st the man who saw that cloth could be made from Cotton blows, and made it; second he who taught the savage races to use the woven fleece of a sheep instead of the rough skin; third he who discovered how linen came from flax; and fourth that surpassing genius who from years of patient study discovered silk; however crude at first. the finest fabric of them all. Beside the benefits to the race conferred by these men how mean and poor are the

these men how mean and poor are the triumphs of an Alexander or a Caesar. Of the four fabrics Cotton is king, being most largely used, Wool is prime minister, but Silk is Queen, most beau-tiful, most costly of the textiles. What is silk? It is a fine soft thread chiefly produced by the larvae of the Brombyx Moth, generally called the silkworm. The thread is composed of several fine threads drawn from glands several fine threads drawn from glands which secret a viscid substance, by means of organs called spinnerets. 4,000 yards of silk, the worm winds about itself to make the cocoon, in about there days; The cocon being from 1 to 1½ inches long by ½ to 1 in diameter and weighs from 15 to 50 grains. These are soaked in hot water, then the ends of the threads of several are fastened to the same reel and wound are fastened to the same reel and wound off. This is raw silk, quoted in the markets of the world at widely varying prices as demand for it or its quality varies. Last year \$3.75 per lb; this year \$5.50 to \$6. The product is from 20 to 25 million pounds each year. In making fabrics, raw silk is first converted into "Singles," "Tram" or, "Organzines," Singles are made by twisting one raw silk thread to increase its strength Tram is two or more

its strength, Tram is two or more threads twisted together. Organzines are made from two singles by twisting m in the oppositeway from their firs

facturing countries. Ten years more have gone and we produce \$80,000,000 worth and are crowding France for first

Patterson, N. J., is the center of silk manufacturing in the U.S. Some fig-ures from the census about that city are suggestive. In 1880 there were 340 are suggestive. In 1880 there were 340 manufacturing establishments and in 1890 -597. Persons employed-in 1880, -18752; in 1890, -24135. Wages paid-in 1880 -\$6,700,000; in 1890 -\$11,500,000. The average of wages in 1880 was \$350; in 1890 nearly \$500. A great many women and children are employed, which lowers the average of wages; the operatives are paid nearly double French wages. One Patterson ribbon weaver, not an exceptional one was paid on four fortnightly pay days as follows: Sept. 14-\$43.75; Sept. 28-\$750 Oct. 12-\$56.20; and Oct. 26-\$91,00 total \$278.45 from which \$8. was deducted for twisting leaving a net earning of

for twisting leaving a net earning of \$270.45 for eight weeks, or an average 62.10.45 for eight weeks, or an average of \$33.80 per week. At the World's Fair France will give 10,000 sq. ft. to her silk exhibit, partly in piece goods and partly in costumes. No lady will miss it. The American skill and enterprise which has given such a mendeful do.

which has given such a wonderful de-velopment to the silk industry in this country may soon transfer the throne of the Queen of Fabrics from Lyons France, to Patterson N. J.

The Board of Trade.

Mr. G. F. Allmendinger's paper on "Speculative Dealing in Grain" be-

gan with a vivid description of the Chicago Board of Trade building, an architectural triumph, with its 300 foot tower, its immense assembly hall,gorgeous with emblematic designs on the walls and ceiling and stained windows, with its little sample tables on one side, telegraph stalls on another for from 150 to 200 operators, the pits, the pandemonium of yells, the call bell, the sentry box, blackboards and "old Hutch"

In effect he read as follows:

The Chicago Board was organized in 1848. In '51 it had 38 members and a deficit. In '59 a rental of \$1,200 seemed extravagant. Today the membership is 2000. Their building cost \$2,000,000, and the amount of their transactions expressed in money make Monto expressed in money make Monte Cristo's horde seem insignificant, and expressed in bushels of wheat it would seem that Joseph's accumulations would not last out a day. In New York the transactions are larger. Speculative purchases and sales are to the actual transactions as 50 to 1.

Webster defined speculation as buy-ing an article in expectation of a rise in price. Since that was written there is a new phase,—selling an article for future delivery in the expectation of buying it in the meantime at a lower price. Speculation in the oil regions is in petroleum, in the South in cotton, in

in petroleum, in the South in cotton, in the north-west in grain and provisions. Real transactions on these boards are large, but those entirely on paper im-mensly larger. "A broker needs no of-fice but his hat" says Pillsbury. The method of conducting a specula-tion is this: You order in January a commission merchant to buy for you 5000 bu. May wheat at 90c. At the same time you send him \$250 which is called a margin,-5c per bu. being the usual figure. If wheat advances to 93c anytime you may order the mer-chant to sell it and withdraw the margin and profit, less commissions.

a miller, but if futures in wheat were forbidden trading would be blocked at that point. A perfect bill would per-mit trade founded only on actual pos-session of the articles. UNIVERSITY OF MICHIGAN. The Board of Trade has fought the

The Board of Trade has fought the bills at every point and a subsidized press has aided them. The N. Y. Sun suggests that a farmer who held his crop for a rise or mortgaged his farm gambled in futures. It declared the best way to abolish futures was to abolish the future and added "What has posteri y done for us?" Gambling in futures embodies four features: 1st The sale of that which the sellerdoes not own;2nd future delivery; 3rd The cumulative plan of using mon-

3rd The cumulative plan of using mon-

es; 4th the option. The friends of the Board of Trade claims that their operations help busi-ness In N. Y. City in one month 3,000,-000 bu. actual wheat was sold and 83, 000,000 bu. speculative wheat. Would it help the sale of horses in A. A. to 000,000 bu. speculative wheat. Would it help the sale of horses in A. A. to have 83 imaginary horses offered for every 3 real horses? The tendency would be to lower prices. Future de-livery is to enable the seller to purchase to advantage. The cumulative feature enables 20 bu. to be carried for every dollar invested. D. A. Sibley carried 6,000 000 bu. on \$90,000. The option enables the seller to deliver not the grain, but the difference in value in cash.

As a whole this method of gambling is the subtlest that the human intellect

has yet devised. Grain dealers have a method of protecting themselves from artificial fluctuations by using futures. Should they buy at 20 small places to-day they may sell July wheat to same number of bu. Should the price fall they will lose on their twenty purchases and gain on their one sale to the same amount: Such things would be unnecessary if artificial movements in price could be stonged

stopped. To speculate knowingly a wonderful array of facts must be known about

array of facts must be known about past crop, rate of consumption, the coming crop at home and abroad, and the weather. The factors are all inde-terminate. Mr. Dodge after most care-ful work has missed by 500,000,000 bu. the correct amount of grain in the country. How shall the next crop be estimated. A man is sent to Europe to hurry over their grain fields; wheat plants from many fields are tested in forcing houses. Manipulation affects price. A firm not rated in Dun, recent-ly invited the Michigan millers to aid them to buy up a few million bushels of wheat. Another house proposed to take up 20,000,000 bu. A preconcerted attack of a few such concerns would shear the lambs most beautifully. False shear the lambs most beautifully. False reports are frequent; the newspapers are handled in the interests of the

The corner has until recently been a The corner has until recently been a great institution; buying up a great quantily of wheat and then trying to iorce up prices. In 1867, \$2.85 per bu, was reached; in 1887, Mr. Harper of Cin-ncinnati failed to create a corner and he now resides in the Ohio penitentiary. His bank and 15 great firms went under together. "Old Hutch" reached \$2, per bu, in 1888, butjin 1890 he was retired by Pardridge, a new man with new tac-tics. He is a "bear" always and wheat is down to 65c. He downed a combi-

nation against him of St. Lonis millers who suffered through the constant de-preciation of wheat. His operations affect wheat the world around. Every miller has felt his power; every wheat raiser has received lower prices

University. - A Column Especially Devoted to University News. - Personals, Gossip, Etc.

Prof. Stanley has recently resigned his position as director of the Detroit musical society.

Prof. Simon N. Patten of the University of Pennyslvania lectured to the political economy class Wednesday afternoon.

Chicago has been reaching out for Dr. F. G. Novy, but although the offer s flattering, it is hoped that he will be able to resist.

Mr. H. L. Webber, law '94, received a letter yesterday mailed in Brooklyn from which all address was lacking af-ter the name except "University-ave."

"When doctors disagree, who shall decide?" asks the poet. The answer of the New York courts is "Prof. Vaughan, of Michigan University."-Detroit Free Press.

It cost Louis C. Miller, medic'94, \$3.75 to ride his bicycle on the sidewalk one day this week. He paid it very cheer-fully, remarking that he was willing to obey the ordinance if every one was made to.

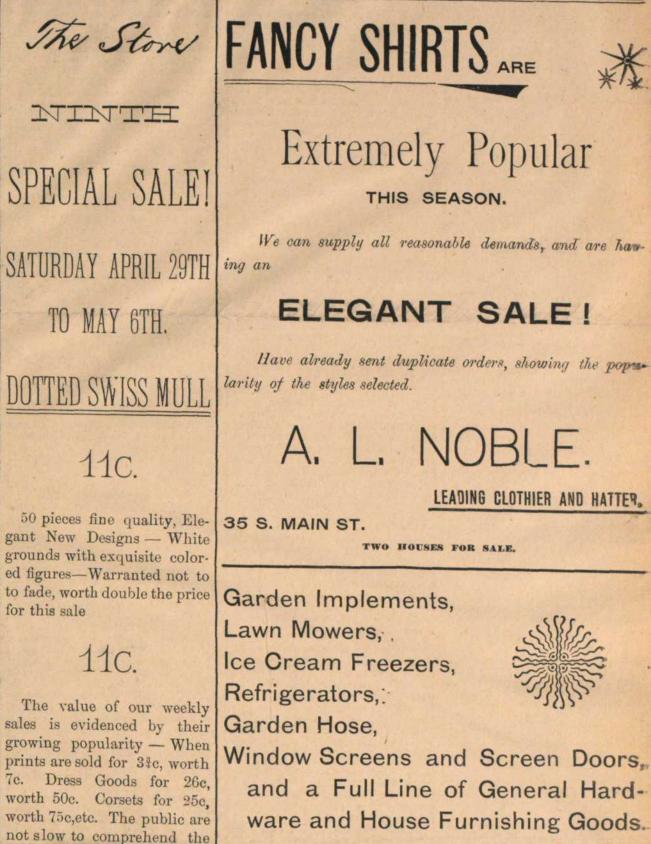

The base ball nine has been victori-ous every time it had a chance at any body during its southern trip. Bad body during its southern trip. Bad weather prevented what would have been the finest game of the season, the one at St. Louis, Mo., and also prevented two other games.

Some students have been swindled by an alleged company anxious to em-ploy guides to the World's Fair. They answered an "ad" in a Chicago paper and were instructed to forward two dollars for guide book, which they sent. This ended the transaction.

The Glee and Banjo Clubs have re The Glee and Banjo Chubs have re-turned from their very successful 2000 mile trip having made a record of ten concerts in ten days. They sang at De-troit, Lansing, Grand Rapids, Chicago, Des Moines, Lincoln, Beatrice, Kansas City, St. Louis, and Springfield. They put Beatrice in place of Omaha because Paderewski was to be in that city at the same date. same date.

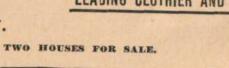

According to the newspaper report of the action of Columbia College it would seem that that institution be came so wildly enthusiastic over Dr. Vaughan's connection with the Buchanan trial that the officers rushed franti-cally over and offered him the professorship of Chemistry instantly. One would suppose that these townsman of the late lamented Barnum could not see a lion in town with trying to secure him for an attraction. However Dr. Vaugh-an says that he never heard of the offer elsewhere than in the newspapers.

At Delaware College, O., a number of stadents broke in upon a society hold-ing an initation and with lunar caustic burned the letters D. O. A. upon each advantage derived from these sales. As a matter of fact the cheek and on the chin, and sketched horns upon the foreheads of the initi-ates. Several young men were thus marked for life. It seems that a similar Market Value is not considered. It has not been in this performance took place among higirls of that institution, and several girls Sale. were marked for life, not on their 'aces, but so that low neck dresses will be im-possible. The civil authorities have

The Largest Line of Furnaces in the State at

twist. From these primary forms, great varieties of commercial silks are woven. Silks lose 25 per cent, in scouring and the manufacturer sometimes makes up this loss by "loading" the goods with metallic dye. When dyed in the yarn silk will absorb its own weight of metallic dye. In 1857 it was found that tin salts could be used to great advan-tage, different kinds of silk weaves taking up from 40 to 150 ounces of dye to the pound of silk. And how these goods did not wear, the metallic substance cutting out the silk.

The American silks of to-day have but little weighting and have a soft cloth like finish; They have extraordinary wearing qualities. Do not judge a black silk by the color of the edge, the maker will put on any color desired. In buying a silk, choose an American silk, for they are the best, and get a well known warranted brand with a cloth finish

While we do not know the man who discovered silk, we know his country. The wife of a Chinese emperor who reigned 2640 years before Christ is down in the records as a patron of silk makers. How long before this time the art was born is unknown, but it was 3,000 years before the secret was learned in Japan and India. A pretty story of feminine ingenuity accounts for the beginning of the industry in India. A Chinese princess on being married to an Indian prince, stole some mulhery seeds and erges of the silk mulberry seeds, and eggs of the silk worm across the borders, a crime punishable with death, concealed in her hair, From India the industry spread to Rome. Justinian, 540 A. D., had looms set up in the palace. Monks who had been in China smuggled out the preci-ous eggs in a hollow cane and thus brought silk culture to Europe. The growth of the art under the encouragement of different races and princes very interesting. The Saracens, Ital-ians, French and English each made great strides in its production. Cortes in 1525 made a futile attempt to start the trade in Mexico, the first ef-fort in America La 1690 and 1610 James

fort in America. In 1609 and 1619 James I. tried to intoduce the culture of silk worms in Virginia; the second effort resulting in a partial success. But it was not until 1838-9 the era of speculation that silk received much attention in America. Those years mulberry trees were planted everywhere; but the business dwindled rapidly; to day scarcely anything is known of home grown silk.

Up to war times very little silk was manufactured here; but the tariffs of that period gave an incentive to Ameri-an capital and skill in this direction. lation. Suppose a mercil Arbor who knows that has quire a certain amount September purchases the then. The baker must-b Very soon American silk, if branded as French, secured public approval. Twen-ty years later we made 35,000,000 dollars worth 1/2 of the world's production and stood third in the list of the silk manu-

margin and profit, less commissions. In May the wheat will be transferred to the commission merchant on the first contract and from him to the next buyer on the second contract.

Again you may in January order your broker to sell 5000 bu, at 90c for delivery in May and deposit \$250. If wheat advances to 94c, four of the five cents deposited have been used up and you will need to send more more to you will need to send more more to maintain the margin at a safe figure or else order the broker to buy. Those who have sold for future delivery are the "shorts" or "bears," while those who buy are called "longs" or "bulls." The Board of Trade sends out the most explicit instructions how to expected explicit instructions how to operate on "change" and pamphlets containing much-statistical matter about all poa-es of the grain supply and demand, and also attractive accounts of how to manipulate the market, are industriously cir-

culated Few commission houses are long ved. Very few in Detroit and Toledo lived. have not failed. In Chicago they drop by the score. One head of a Detroit house formerly known all over Mich-igan, speculated and now runs a laun-dry in Chicago. Men enter the business for the excitement, and for the prospect of large gains.

The income from regular commis-sions on sales is large. The amount of futures sold in Chicago may some days amount to 100,000,000 bushels of wheat and the commission is $\frac{1}{2}$ c. per bu. But the atmoshere of speculation in-fects them all. The messenger boys pool their earnings to buy futures. The circulars sent into the country cause many to be fleeced, while the procession of defaulters who have stolen to have a throw in the wheat pit moves regu-larly on to prison and to Canada. It is said that Jackson sent \$100,000, in one year to Chicago: \$1,000,000 went that year from Indianapolis. A miller who accumulated \$750,000 here in Ann Ar-bor is generally believed to have of-fered it all up in the wheat pit. \$300, 000 probably has left here in that way. Bucket shops were introduced into 1,500 of the smaller cities and did an enormous business. Actual grain was never handled. The courts have pro-neunced them unlawful. The one in Ania Arbor was daily visited by farmers. And APPer was daily visited by farmers. The investigations of grain specula-tions by Mr. Hatch's house committee fills a good sized pamphlet. Mr. Wash-burn's bill attempted to do away with the illegitimate features of the busi-ness by taxing options and futures out of existence. The bill fulled through opposition of one man at a critical time. There are difficulties to be met in legis-lation. Suppose a memory in American

than he otherwise would. Great Britian, Australia, India, Russia, all have felt the same crushing force. What code Ethics per-mits this. An immense wheat fight is on in An infinence wheat light is on in Chicago now. Four times since Jan, the market has been raised or lowered 10c, per bu, at will in a few hours. Pardridge has been re-ported skinned, loss \$750,000. But the principal operators are still unknown. These things show the real character of the business. Mr. Washburn says: 'There' is no change of the property, no

legitimate transaction. Wheat and cot-ton have become as much gambling tools as chips on the faro-bank table. Between the grain producer and the loaf eater has stepped in a parasite saying at what price the one shall sell and the other buy, a parasite robbing them both." The people feel this. The farm-ers of the west are asking for all man-ner of novel legislation. The workmen of the cities are not content. Eight

years ago 40,000 men were on a strike the night the Board of Trade was de-dicated, within a week was the Hay-market tragedy, and the mob started to destroy the Board of Trade; which it took 500 police to guard that night. Can men suffering for the neces-aries of life look with favor at an institution where a million dollars in a day is made by manipulating the price of food, by men who toil not.

Something will be done; may that something be done in time by law to anticipate its doing by force.

They Can't Catch I's.

The English have cause to be proud of their magnificent unarmored cruiser Blake, which, though of only 9 000 tons displacement, has, the strongest engines ever put in the hull of a war-ship of Great Britain. The Blake cost England just \$2,202,355. Her indicated England just \$2,202,355. Her indicated horse-power, with natural draught, is 14,450, and her speed 19.12 knots. Her estimated horse-power, with forced draught, is 20,000, and her speed 22 knots. At 10-knot speed she can steam a distance of 15,000 knots. Our own pride of the navy, the New York, is smaller than the Blake by 850 tons dis-placement, but her indicated horse-power is 16,500, with a speed of 20 knots. She cost \$2,985,000, and at 10 knot speed can steam 13,500 knots. But, just wait till the "commerce de-stroyer,"cruiser No. 12, is completed. The navies of the world will then have a of the busi-d futures out inded through icritical time, met in legis-int in Ann for delivery in his flour of the world will then have a chance to see a vessel of only 7, 4 tons displacement with an indicated norse-power of 21,000, and a speed of 22 knots! England has the biggest navy in the world, and Italy has the biggest ships, but the United States cruiser can slip away from them all when it comes to a race.—New York Tribune.

aken the matter in hand, and the hazers are beginning to think that their es-capade was not all a joke. Of course the boys have been expelled.

A committee of five ladies, Mrs. A committee of five ladies, Mrs. Walker, Miss Crane, Miss Meiritt, Miss Soule and Miss Cook, all well known in cuy and University circles were in Lansing last week in the interests of the ladies' gymnssium. Each one of them in turn addressed the University committee and altorather they made committee and altogether they made out a very strong case, obviously im-pressing the committee most favorably toward their petition. Secretary Wade explained to the committee the relation of the woman's annex to the Waterman gymnasium, and told of the past efforts of the ladies to secure subscriptions Several representatives, among them the two from Washtenaw, also appeared before the committee later in the week.

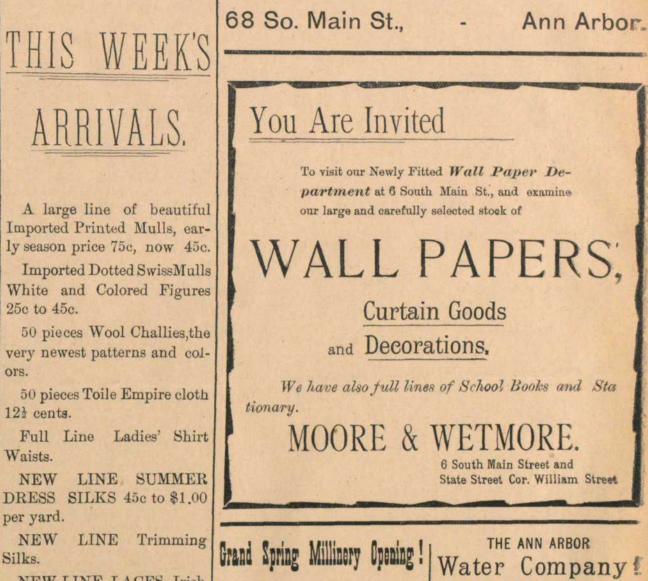

Laurence Gronlund.

The most eminent American apostle of socialism addressed the Political Science Association of the University last Monday evening on his favorite theme. He especially dealt with the labor problem and its solution. He held that labor must either be controled by organized capital or by government very soon. The former would be irresponsible while the latter would proceed from the people. Socialism will wrong no one. It will give securwill wrong no one. It will give s-cur-ity to labor, abundance of want satisfy-ing things, and freedom. The solution of the labor problem involves obliga-tory trades unions and obliga-tory arbitration. Eventually Capital will become public property under gov-ernment control. Judge Ricks decision tends towards socialism. Farmer's alliances are valuable movements but alliances are valuable movements, but must have other leaders than green-backers and other political cranks. Nationalized industries under civil service rules, with a tenure in office and regular promotions, depending on efficiency, are desirable. Mr. Gronlund is a medium sized man with dark hair and beard worn errat-

ically. He says he is looking for some two or three hundred loyal followers to work systematically for socialism.

I. O. G. T.

The I. O. G. T. elected the following officers this week, and will install them next Tuesday evening: Chief Templar, G. G. Ciozier; Vice Templar, Miss May Vincent; Sec'y, J. Greer; Treas, F. E. Legg; Financial Sec'y, S. R. Cook; Chap-lain, Miss S. Vaughn; Marshall, Geo. Servis; Guard, Miss Cook; Sentinel, J. C. Wilson; Past Chief Templar, H. R. Crozier.

NEIGHBORHOOD NOTES.

Owosso has given the Fox Farniture Co., a \$3,000 bonus. Monroe duck hunters have bought 65 acres of marsh lands there.

Mayor Gould, of Owosso, a Republican, has filled half the appointive offices with Democrats.

Eight pound pickerel is the size the Dundee angler pulls out of the River Raisin at that place.

John Clark of Clinton, has a creamery with a capacity of 600 pounds daily. The churn will hold 3,000 pounds of cream.

Hudson's wooden ware factory has on hand 110,000 feet of logs to be used in the manufacture of tubs, firkins, pails,

Word has been received by Ypsilanti sportsman that 30 dozen quail have been shipped to them from Kansas. The quail will be used to stock the hunting grounds in the county.

Farmers should look out for the \$450 piano men, who just wants to leave an instrument as a sample. The little agreement in the hands of agent num-ber two, proves to be and order for the piano.

A fire at Plymouth last week destroy ed an entire block of business houses, entailing a loss of between fifty and six-ty thousand dollars. Assistance from Detroit helped to check the flames and eurtail loss.

The Chelsea house, Chelsea, has been sold to Detroit parties. This, together with a fight between two citizens over some egg crates, were the only real es-tate movements over there last week.-Adrian Press.

Hillsdale boasts that in a population of 30.0 she has over 50 widows. Clinton with a population of 1000 has 50 widows. There was a time with 900 in habitants we had 64 widows. This rural burg is great for lone widows .-- Clinton

L. Stevens, of Fowlerville, has been keeping books on his flock of hens and finds that each common, everyday hen netted him \$1.70 for the past year. On an investment of forty cents, which is about the figure at which hens can be bought, this is a pretty fair margin.

The supervisors of Ypsilanti town for some reason have the fates against them When W. I. Yeckley held the office, a law suit was precipitated upon him, which is as bad as a cyclone; and while A. R. Graves was occupying the place his barn was struck by lightning and one of his horses killed and another paralyzed, and at another time he bare-ly escaped with his life from the barn of Edward Gorton that was struck by lightning and burned. Now to comwood and kills his horses and cows; yet, with all these calamities a matter of record, there are still those who have a terrible hankering for the office.-Epsilantian

A party of young ladies of this village ed a young man from what might have been a watery grave on Sunday last. Two or three young men had walked out on the plank at the brink of the falls at the central water power, when a plank was withdrawn by two of the boys, leaving their companion out there. They then withdrew to frighten him into the belief that he would have to take a plunge a la Sam Patch or waste his life on a desert is land, when three young ladies appeared in view. Taking in the situation, they at once grasped a plank and shoved into the water when the modern Robison Crusoe grasped an end and in moment he was safe on terrafirma. The

Big Companies Fall. The Lansing Lumber company and the Lansing iron and engine works, the former with a capital of 200,000 and the latter capitalized at \$100,000, and both under the managenent of Orlando F. Barnes, executed | rad N. Jordan, the assistant treasurer, mortgages covering all their property. Mr. Barnes was also president of the Central Michigan savings bank and the loors of that institution were closed.

Mr. Barnes says creditors will be paid in full and that the business will be resumed

Marquette's New Mayor.

The sixteen members of the comme council of Marquette will attend the opening of the world's fair in a body, raveling in a private car, as the guests of Nathan W. Kaufman, the new mayor of that city. Mayor Kaufman was elected during his absence from the city and without his knowledge. He returned from the south, and at a reception to the members of the council gave the invitation, which was accepted on the spot.

Health in Michigan.

During the week ended April 15 reports sent by sixty-two observers in various portions of the state to the state board of health indicated that measles and diarrhea increased, and inflammation of the kidneys, pleuritis and pneumonia decreased in area of prevalence. Typhoid fever was reported at eleven places, diphtheria at twentysix, measles at thirty-four and scarlet

fever at forty-nine places.

Margaret's New Mother.

John Finlayson, father of Margaret Mather-Pabst, was married in Detroit to his third wife. His career began three years ago, when, three weeks after the death of Margaret's mother, he took a second wife. A week ago he secured a divorce from that one on the ground of cruelty, and now he has married Bella Urquhart, who is 48 years old and venturing for the first time on the sea of matrimony.

Intended to Free Wright.

In an interview an officer at the prison in Jackson said concerning the escape and recapture of Latimer: have no doubt that Latimer tells the truth when he says he intended to take a friend with him when he made his escape. Who was his friend? Well, I of course don't know, but I feel positive that it was Wright, the wealthy lumberman from Benzonia."

Traveling Man Steals \$132.

Miller Bros.' safe at Negaunee was robbed of \$132 in silver. They were suspicious of a traveling man from Chicago named Ulm, and he was shadowed. He was seen changing silver into bills in several places and was arrested by Detective Dolf. At first he denied his guilt, but later confessed and restored the money.

Lumber Burned.

The West Michigan Lumber company's yards at Diamond Lake were destroyed by fire. Seven million feet of lumber, 500,000 bundles each of shingles and lath and ten freight cars were burned. The loss will reach \$100,000. The fire was caused by a spark from an engine.

A NEW PLAN. The President Makes a Proposition to

Bankers in New York. NEW YORK, April 25.—Secretary Car-lisle, acting under the personal direc-

tion of the president, communicated to the bankers of New York on Monday a proposition in writing for a gold loan to the government of \$50,000,000. Conwho spent Saturday and Sunday in Washington, brought back the propowith him Sunday night. sition He had called on a small company of bankers to meet him at a private house up town so soon as he arrived, and to a man they were on hand. The proposition then for the first time was made known. It was discussed informally by all the gentlemen present. The only decision then reached was that the offer should be made known to all the leading bankers at a meeting to be held at the sub-

treasury. The sum proposed to be raised is \$50,-000,000, and the government's scheme is in the nature of a collateral 3 per cent. loan. That is, it offers to issue a form of bond running for twelve years, but

redeemable at the option of the government within one year, paying 3 per cent. interest and redeemable in gold. This sort of bond, of course, would not be salable, or, indeed, in any way serviceable to the banks as a form of investment. It would be nothing better than a security for the money advanced In this form the government's offer

was not acceptable to the bankers. They were practically agreed in requiring that the loan should be made on a

bond which could be put on the market. and they recommended that at least half the sum desired, or \$25,000,000, be obtained from Europe, thus recovering some of the gold that was so freely shipped out during the last few weeks Many suggestions were made, many modifications of the president's plan proposed, and most of them reduced to writing. These were forwarded by Mr. Jordan to Secretary Carlisle and will be made the basis of a conference to-day, at which the secretary himself will be present

PART OF A CREW LOST.

The Steamer Ohio Wrecked and the Captain and Four Sailors Missing. SAULT STE. MARIE, Mich., April 25 .-The steamer Ohio, Buffalo to Chicago with coal, was towed into Detour Mon day nearly a total wreck. Capt. B. F Evans and four sailors are missing and are thought to have been lost. The boat was in command of Mate A. H. Sanghas, who telegraphed C W. Elphicke & Co., of Chicago owners of the steamer, begging that aid at once be dispatched to the stormbeaten crew. The Ohio had been picked up in the Detour passage by the tug River Queen. The steamer left Buffalo last Monday on its first trip of the season. It was well up Lake Huron when struck by the terrible gale of last Wednesday. Friday noon Capt, Evans manned the lifeboat with four sailors aud set out for Cockburn island. The sea was still heavy and it is almost cer tain that they were unable to reach the sland. The Ohio has on board 1,260 tons of coal. It was worth \$50,000 and was insured for \$34,000.

CRUSHED IN A CHURCH. Eight Women and Five Children Trampled

to Death at Naples.

NAPLES, April 25 .- A fatal panie oc curred Sunday evening in the church of forre Annunziata. During the servces which were attended by a very large number of persons, part of the draperies about the altar was blown against a candle. The flames spread with great rapidity and the congregation made a rush for the doors. The wildest excitement prevailed, and women and children were thrown to the floor and trampled upon. The fire was quickly extinguished, and when some semblance of order was restored it was found that eight women and five children had been crushed to death, while

FIBE'S FIERCE FURY.

Destruction of the First Regiment Armory in Chicago.

The Walls Leveled by Numerous Explosions of Powder-Two Attaches of the Place Perish in the Flames-Two Others Imperiled.

A TOTAL LOSS.

CHICAGO, April 25.-The armory of the First regiment, Illinois national guard, Sixteenth street and Michigan avenue, was destroyed by fire at 3 o'clock this morning. Two lives were lost and two men were badly injured. The scenery and stage fixtures of the frocadero, which was to have opened April 29, was also destroyed by the gre The two lives sacrificed were those of colored men employed as porters in the building. They were known only Those who as George and Walter. were injured are: E. W. Lathan and Chris Wiegand. Lathan was foreman for the Edison Electric Light company in the building and Wiegand was his assistant.

The fire was discovered at 2:35 o'clock. in less than an hour afterward only the four walls remained. Everything in the armory, including the arms and accoutrements of the First regiment, was lestroyed. Not a vestige of anything was saved. It was only by circumstances almost miraculous that Wie gand and Lathan escaped with their ives

THE FLAMES DISCOVERED.

Officer Frank Howard, of the Harrison street station, discovered the fire. He was standing on the east side of Michigan avenue opposite the main entrance of the armory at the time. He first saw a puff of smoke ascend from the roof in nearly the center of the building. The smoke disappeared for an instant and he began to doubt that he had seen any smoke. He was soon undeceived. A few seconds later the smoke was succeeded by a tongue of flame. Then, while his eyes were still riveted upon the startling sight, the entire coof of the building seemed to be ifted away and from the whole interior of the building poured forth columns of smoke and then fire that illuminated Michigan avenue for a mile each way.

BEYOND CONTROL. The alarm was turned in and a big orce of firemen was soon on the ground. But the armory and its conents were beyond the control of all he fire departments in the world. Even when Marshal Townsend arrived he realized that to attempt to put out the fire was hopeless. It must be allowed to run its course. All that the fire department could do was to prevent the fire from spreading to adjacent buildings.

MANY EXPLOSIONS. Families on all sides moved out, however, and the sidewalks were strewn with furniture and wearing apparel. Many in their haste did not even

take time to properly dress them selves. Their fears were not without ground. Sparks from the combustible material in the burning building showered upon roofs on all sides and the flames made all as light as day. In the northeast corner was the magazine of the regiment, and the police drove everybody away from the building, as an explosion was momentarily feared. The intense heat caused the walls to rack and fall on all sides, and by dayight but a small portion of the magnificent structure remained. Small quantities of gunpowder were constantly exploding and added to the danger of the firemen. The discharges came in many instances from the rifles stored in the armory The armory cost between \$150,000 and \$200,000.

SPRING TIME

The Best Season of the Year to Treat Chronie Catarrh.

Notwithstanding that a great number of people have been cured of chronic catarrh by taking Pe ru-na during the past cold season, yet it cannot be denied that the cold, wet, stormy winter has retarded many cures, and in some cases actually prevented a cure. But, after unusual delay, spring time has come at ast, and now is the time for all catarrh sufferers to begin a systematic course of treatment for this disease. The greatest difficulty in the way of treating chronic catarih is that the patient is so liable to catch cold during the treatment, and thus delay a cure. This liability at this season of the year is, in a great measure, removed, and no one should neglect the opportunity to begin treatment. Send for free catarrh book.

As a spring medicine Pe-ru-na is a never-failing remedy. It cleanses the blood through digestion, and gives tone to the whole system by increasing the nutritive value of the food. "Spring fever," as it is sometimes called, which produces a tired-out, sleepy feeling, and inability to do much mental or physical work, is the result of a sluggish digestion, and no blood medicine will be of any use whatever unless it is able to rectify the impaired digestion. The great popularity that Pe-ru-na has is due to the fact that in all such cases it

at once corrects dig-suved -rangements and enriches the blood by purifying this very important source of that vital flei . Send for free book on spring medicines and spring diseases. Address, The Perru-na Drug Manufacturing Company, Columbus, Ohio.

At the World's Fair.

Visitors to the World's Fair will have an opportunity to witness the publication of a daily newspaper from the beginning to the end of the work, and in all its branches. The Columbian Expo-sition Bulletin, of which Major Handy will be the editor ard W. C. Gates, who has been connected with the Minneap lis Tribune and the Review of R views, will be business manager, will be published in the Machinery building Besides this, the leading afternoon papers of the city will get out special World's Fair editions from the same ouilding. Five of the leading English morning papers of the city will ea h contribute a page to the bulletin, and the other three pages will be edited on the grounds and contain only World's Fair matter. It is probable, too, that similar arrangements may be with the city papers printed in foreign languages. The pages that are contributed by the morning papers will go to the grounds in the shape of sterotyped plates ready to go the presses. The matter for the other three pages will be collected on the grounds and will be out in the bar to be added and will be out in type by type machines, which will also serve as exhibits. The stero typing process of making roller plate will be shown in another room, and the papers will be rolled off the presses placed in the Machinery building A Noted Divine Says:

"Postmortem" the Time.

In the course of the hearing of a case at the North London police court a witness, who was described as a commercial traveler in the city, was asked, 'Was it night or morning that the affair occurred?" "Postmortem," was the ready reply. "What do you mean?" said the solicitor. "Why, at night. of course." In face of this astounding ignorance, it is somewhat curious to read that at the same court a number of poor people were summoned for not sending their children to school.-Birmingham Post.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castori

IMPLEMENT AND SEED STORE 25 and 27 Detroit-St., Junc. 5th-Ave.,

Ann Arbor, Mich.

Sheriff Vosburg arrested Howard Brown at Kalamazoo charged with a most hideous crime. He was caught in a compromising position with the 12-yearold daughter of his wife by her former husband

W. A. Mower, the absconding Kalamazoo telephone manager who is charged with embezzling \$2,500, was arrested at Red Cloud, Neb., and is now in jail at Kalamazoo. He will try and settle the case.

The city of Monroe gave lodgment to 563 tramps during the past winter.

Salt has dropped in price five cents per barrel up in the salt country. The cause of it is stated to be the few hogs that are being packed.

The lighthouse at East Tawas is now in operation.

The sandstone business of the upper peninsula has been consolidated under the name of the Portage Entry Quarries company.

There are now 822 prisoners in the Jackson state prison.

During a heavy storm lightning struck the large barn of John Morse, a wealthy farmer 1 mile south of Wixom, destroying the buildings and contents. Eugene Mosher, hallmaster at the state prison in Jackson, has accepted an appointment as deputy warden at Marquette prison.

Charles, the 6-year-old son of Aaron Michaelson, of Red Jacket, wandered from home and was found drowned in the Calumet dam. Alfred Woods, of Detroit, has received

official notice that by the death of his father in England the family, consistpoint. ing of himself, three brothers and three sisters, have been left a fortune of \$10,-000,000.

Farmers throughout the state are predicting a big increase in the price of poultry and eggs. They claim that with the opening of the world's fair such a demand will be created that

prices will go booming. The barns belonging to Mrs. Maria Osborn and Alanson Osborn in Pavilion township were set on fire by a 5-year- Sist year of his age. His death was due old son of Mr. Lemon, a tenant, and to a severe cold. both were totally destroyed.

The Milwaukee Horror.

MILWAUKEE, April 22 .- The bodies of ten of the men who were victims of the crib disaster were recovered from the air shaft Friday and now lie in the morgue. The remains of two other victims were picked up on the lake shore and are also at the morgue. Two bodies are still missing. The bodies have all been identified. The bodies not yet recovered are those of Peter Soems, miner, aged 30, single, Chicago, and John McBride, engineer, aged \$5, married, Chicago.

Thousands Will Go Out.

COLUMBUS, O., April 24. - National Secretary P. C. Bryde, of the United Mine Workers, confirms the report that the 20,000 mine workers in Ohio will go out on May 1. J. T. Harris, president of the Ohio Mine Operators' association, makes the same assertion. Mr. Bryde thinks the strike may spread to Pennsylvania as well.

Gold in National Banks.

WASHINGTON, April 22.-Reports made to the comptroller of the currency by the 3,806 national banks doing business in the United States show that in round numbers these banks have \$100,-000,000 in gold coin and gold treasury certificates and gold clearing house certificates approximating \$75,000,000.

Heavy Losses by Fire. BELLINGHAM, Minn., April 25.-The Northwestern elevator and about 100,-000 bushels of wheat burned Saturday evening. This makes over \$200,000 worth of property destroyed by fire within the past six months at this

Found in Texas.

MOBILE, Ala., April 25.-George A. Pearce, who in 1888 was secretary of the Planters' & Merchants' Insurance company of this city, and who decamped with \$102,000 of the company's funds, has been found at Abilene, Tex.

Death of Horace Waters. NEW YORK, April 24.-Horace Waters the pianoforte manufacturer, died at his home in this city yesterday in the

MADISON, Wis., April 24.-Ex-State Treasurer F. C. McFetridge Friday afternoon paid up in full the judgment of the state against him for interest on state funds, amounting with costs to about \$66,000. This amount covers the last two years of the service of Mc Fetridge as state treasurer. Judgments for his first term of three years have not yet been rendered. The case is now pending in the Dane county circuit court and will be settled next week The judgment for the period will be about \$150,000 additional. Two Young Men Drowned.

CLEVELAND, O., April 25.-Three young men, Julius Falk, Martin Arelt and Charles Liptak, on Sunday rowed out to the breakwater, where, in an attempt to make a landing, the boat capsized and Falk and Arelt were drowned. Liptak, who kept hold of the bow of the boat, was almost dead when a tug picked him off. The bodies have been recovered.

Light Sentence in a Noted Case.

Boston, April 24 .- In the United States circuit court, Asa P. Potter, convicted by a jury some weeks ago of false certification of checks drawn upon the failed Maverick national bank, of which he was president, was sentenced by Judge Putnam to sixty days' imprisonment in Cambridge jail and to pay a fine of \$1,000.

Cold-Blooded Murder at St. Louis.

Sr. Louis, April 25.-Mathew Renecker, a German butcher, 25 years old and unmarried, was shot and instantly killed Sunday night by Isaac Dickson (colored) in a saloon at the corner of Chouteau avenue and Manchester road. The killing was unpro-voked and cold-blooded. Dickson was arrested

Discharging All Surplus Workmen.

Sr. Louis, April 25 .- Sixty men have been discharged from the Missouri Pacific car shops and it is reported that an order has been issued all along the line to cut down expenses by releasing all the hands that can possibly be spared.

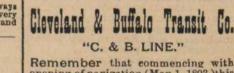

Short Cotton Crop.

JACKSON, Miss., April 25.-From all portions of the state it is reported that cotton has either been killed or greatly injured by the recent cold spell and frost and that there is no seed for replanting.

WORK OF A MOB.

John Peterson, a Negro, Lynched at Denmark, S. C.

He Was Charged with Criminally Assaulting a Little Girl-Strong Evidence That He Was Innocent of the Crime.

RIDDLED WITH SHOT. COLUMBIA, S. C., April 25.-The excitement of the populace at the little 'village of Denmark, this state, over the assault upon Bessie Baxter, a 15-yearold girl, by a negro ten days ago culminated at 10 o'clock Monday night in the lynching of John Peterson by an infuriated mob of 500 persons, who filled his body with bullets while it dangled from a tree. There is every reason to believe that Peterson was innocent and that the mob wreaked its vengeance on the wrong person. Peterson had been suspected of the crime, was hunted by the country people, and came to Columbia last Saturday and delivered himself to the governor, asking his protection. The governor turned him over to a constable to be taken to Denmark and wired a deputy to have present witnesses whom Peterson claimed could establish an alibi for him. Court was held'in Senator Mayfield's office. Only the representatives of the press and

about ten citizens were allowed to attend, two of the number being colored men. Senator Mayfield presided. Peterson was handeuffed. He displayed no trepidation, and appeared like innocent man. He told an straight story and looked fearlessly at his questioners. When carried before Miss Baxter she stated that he was not the man. A colored woman swore that Peterson had been in Denmar on the morning of the assault. The court adjourned without getting any tangible evidence against Peterson, the odds being greatly, in his favor.

But the crowd was so frenzied that it could not be restrained, and Monday night Peterson was hanged to a tree and his body filled with bullets. COST OF A GALE.

Losses by the Storm on Lake Michigan Estimated at \$290,000.

CHICAGO, April 25 .- A dispatch from Cheboygan, Mich., announces the foundering of the schooner N. A. Eddy near Spectacle Reef. The schooner had 81,000 bushels of wheat aboard and a crew of nine men. It is now believed it went down in Hammond's bay. The boat was worth \$70,000 and was insured

for \$65,000. The cargo was also fully insured. The losses to lake shipping in the gale of Wednesday night and Thursday of last week exceed those of any previous storm in April that lake mariners can recall. The last of the wrecks has probably now been reported, as a number of boats, about which there was some anxiety, have all been heard from. The money loss aggregates about \$290,-000, with an insurance of \$235,000. The nine men who composed the crew of the steamer Newell Eddy complete the list of the loss of life. The boats

wrecked number fifteen. FRATERNAL SOCIETIES.

Those in the State of Illinois Effect a Permanent Organization.

CHICAGO, April 24 .- The representatives of a large number of the fraternal societies of the state of Illinois met Saturday for the purpose of perfecting a permanent organization. Twenty-seven fraternal organizations, with a membership of over were presented. The cod of laws adopted for the government of the new organization declares its objects to be the interchange of such reformation and ideas as will tend to improve the workings of and bring about harmonious relations between the several fraternal societies.

STRIKERS FIGHT.

Ship Builders Fight with the Police in Hull, England.

LONDON, April 24.—The police in Hull arrested a drunken docker Saturday evening between 11 and 12 o'clock. A mob of strikers stopped them on their way to the station. The police fought them off and sent for reinforcements. The numbers of the strikers swelled rapidly. When the police reinforcements ar rived more than 2,000 men had gath ered, armed with stones, clubs and a few revolvers. The police drew their batons, and clubbing right and left divided the mob so that the three officers

with their prisoner could proceed to the station. During the progress of the riot a fire was started at the Victoria dock, and soon the ten acres of timber-yard were ablaze. The yard is owned by the Wade company, who employ nonunion men. The loss will be over \$500,000. The rioters tried to storm the steamer Righi. Fifty police defended it for forty minutes and then with the aid of thirty more put the rioters to flight. The fighting lasted well into morning. Only six strikers were arrested.

FAIL FOR A MILLION.

Ohio Coal Exchange and the Crescent Company in the Hands of a Receiver. COLUMBUS, O., April 25.-Receivers were appointed Monday for the Ohio Coal Exchange company and the Crescent Coal company. The assets of both are \$400,000 in bills receivable, open accounts, coal and money in bank. L. R. Doty, Chicago; E. C. McKelvey, Jackson, O., and O. A. Mauck, of Columbus, are the principal men of the two companies failing. They had a paid up capital stock of \$100,000. The Ohio Coal Exchange offices are in Chicago. The company has no mines, but does a brokerage business in coal in the northwest. L. L. Rankin was appointed receiver for the Ohio Coal Exchange company of Chicago, bond \$15,-000, and F. S. Knox receiver of the Crescent Coal company, bond \$10,000. The liabilities of the Ohio Coal Exchange company alone are given at \$900,000. The assets and liabilities of the Crescent Coal company are not dis-closed, but Secretary Mauck says the failure is complete.

GEN. E. F. BEALE DEAD.

Succumbs to a Complication of Diseases at His Washington Home.

WASHINGTON, April 24.-Gen. Ed-ward Fitzgerald Beale died at his residence in this city Saturday from a complication of diseases.

[He served with distinction in the Mexican war and in 1861 was commissioned surveyor general for California by President Lincoln, but declined the position in order that he might actively serve in the federal army during the civil war. In 1876 he was appointed United States minister to Austria by President Grant, but resigned after a year's service and devoted himself to superinending his large sheep and cattle ranch in tending his large sheep and cattle ranch in southern California, and to other interests. He had lived for many years in this city at the house in Lafayette square, where he died. Gen. Beale was one of Gen. Grant's warmest friends, and it was at Gen. Beale's house that Gen. Grant made his home when visiting this city after his trip around the world.]

ALL WERE KILLED. Fate of an Indiana Farmer and His Fam-

ily at a Railway Crossing.

WABASH, Ind., April 24 .- An appalling accident occurred at 11 o'clock Saturday in Jackson township, 9 miles southeast of this city. An east-bound express train on the Nickel Plate railroad, while running at a high rate of speed and rounding a sharp curve, struck a wagon containing the family of John S. Smith, consisting of himself, wife and three small children. All were instantly killed, their bodies

OUT OF SING SING.

Two Condemned Murderers Secure Their Liberty.

They Throw Pepper in a Guard's Eyes and Escape-Carlyle Harris Refuses to Leave the Prison-A

Bold Proceeding.

TOOK FRENCH LEAVE. SING SING, N. Y., April 22.-Murder-ers Thomas Pallister and Frank W. Rohle, both under sentence of death, have escaped from the condemned cells of Sing Sing prison. The discovery was made at 5:40 a. m. Friday when Guard Glinn found the two night watchmen locked in the murderers' cells. When the guards were released they told a remarkable story. Guard Hulse said that at 7 o'clock Thursday night he passed supper in to Pallister.

The condemned man threw a handful of the pepper into his eyes. Hulse was blinded and Pallister rushed on him, took his revolver away from him and under threats of death forced Hulse into the cell, first taking the keys away from him. He then locked Hulse in the cell and unlocked the cell of Murderer Frank Rohle. REFUSED TO LEAVE.

The two murderers then unlocked the cells of Carlyle W. Harris and Murderers Osmond and Geoghen. They invited these two to escape with them. Both Harris and Osmond refused the offer to escape. Pallister and Rohle waited until 9 o'clock, when Guard Murphy came on duty. As Murphy entered the corridor Pallister presented his pistol at Murphy's head and taking his keys away from him locked him in Rohle's cell. Pallister took Guard Hulse's shoes and cap away from him and put them on himself, threatening to kill the guards if they made any outcry.

The two murderers climbed to the top of the cells and knocked off the scuttle in the roof. In this way they got on the roof, climbed down into the yard and made their escape. As soon as the escape was reported Warden Brown sent out his men to scour the country. It is supposed that Pallister had been saving the pepper given him daily with his meals.

HIGHLY COMMENDED.

The action of Harris, Osmond and Geoghen, the condemned murderers who refused to accept the invitation of Pallister and Rohle in their dash for liberty, was highly commended by the prison officers. Harris afterward said that he saw nothing to be gained by escaping, and, as he was an innocent man, he expected to establish this fact fully some day. It is believed that the refusal by Harris to take advantage of the opportunity to escape will have some weight with the governor in de-ciding his case. RESENTENCED.

NEW YORK, April 25 .- John L. Osmonde, the wife murderer, was resentenced by Judge Ingraham Monday to die at Sing Sing the week of June 12 Stephen C. Baldwin, his counsel, notified the court that Osmonde had had a chance to escape from Sing Sing with Pallister and Rohle, but had refused to go.

WILL SAVE HARRIS. NEW YORK, April 25.-It may be stated with semi-official positiveness that Gov. Flower will save Carlisle W. Harris, the convicted wife murderer, from execution. It may also be stated with equal certainty that this information has been conveyed not only to Mrs. Harris, but to young Harris himself.

One reason why Scott's Emulsion of Pure Norwegian Cod Liver Oil and Hypophosphites of Lime and Soda has had such a large sale is because it is "Almost as palatable as milk;" but the best reason is that its curative properties are unequalled. It cures the cough, supplies the waste of tissues, produces flesh and builds up the entire system.

Scott's Emulsion cures Coughs. Colds, Consumption, Scrofula, and all Anaemic and Wasting Diseases. Prevents wasting in children. Almost as palatable as milk. Get only the genuine. Prepared by Scott & Bowne, Chemists, New York. Sold by all Druggists.

Death of a Famous Comedian.

Boston, April 24 .- "Comical" Brown, the famous old comedian, died at the city hospital late Saturday afternoon of apoplexy. He was born at Lancaster, Mass., August 6, 1833, and from a shoemaker he branched out as a violinist and a facial expressionist and soon be-

came known all over the country.

Strike Declared Off. TOPEKA, Kan., April 25.—The Santa Fe mechanics' strike, which has been in force since Saturday, April 8, has been declared off. The company retains the new men employed recently, but will give those strikers for whom there are no places the preference in hiring new men hereafter.

Syndicate Deal Falls Through. Youngsrown, O., April 22 .- It is stated that the New York syndicate's deal for the Mahoning valley iron industries for \$12,000,000 will not go through, as the New York syndicate wants the present owners to retain the bulk of the stock, and this they refuse to do.

The Clearing Houses. NEW YORK, April 22.—The exchanges at the leading clearing houses in the

United States during the week ended yesterday aggregated \$1,242,015,644, against \$1,210,901,192 the previous week. The increase as compared with the cor-responding week of 1892 was 18.6.

Found Guilty. GENESEO, N. Y., April 25.-Father Charles Flaherty, of Mount Morris, N. Y., on trial at Geneseo for criminal intimacy with Mary Sweeney, a parishioner under 16 years of age, was found guilty and sentenced to seven years and six months in prison.

Increased the Duty. WASHINGTON, April 25.-John L. Ab-bott, United States minister to the

United States of Colombia, informs the department of state that the Colombian government has increased the duty on spirituous liquors, ready-made clothing and other articles.

The Grain Supply. NEW YORK, April 25.—The visible sup-ply of grain in the United States yesterday was: Wheat 74,871,000 bushels corn, 12,329,000 bushels; oats, 3,852,000 bushels; rye, 787,000 bushels; barley, 759,000 bushels.

being horribly mutilated. The head of the youngest child a mere babe, was found on the running board of the engine. The horses escaped uninjured. Mr. Smith was a wealthy farmer.

Fatal Accident to Workmen.

CINCINNATI, April 25.-The founda-tion to an interior wall in the Gard company's electric plant, in course of construction at Hunt street and Broadway, caused the falling of the partition wall. Fourteen bricklayers and their helpers, engaged on the fourth story, fell with the debris into the basement. One was killed outright and seven were injured, four fatally.

Disastrous Fire at Montreal. MONTREAL, Can., April 24.-Bower & Co.'s wholesale liquor establishment has been damaged \$100,000 by fire. A falling wall killed Fireman Daganais and severely injured Captain Bishop and Fireman Jeanotte.

MADE HIS ESCAPE.

Peter McCarron, a Wisconsin Lumberman, Gone to Parts Unknown.

ST. PAUL, Minn., April 25 .- Chief of Detectives McGinn has received information that Peter McCarron, wealthy Chippewa Falls (Wis.) lumberman, has sold his logging outfit at Moose Lake and has left for parts unknown. McCarron reported to the police here in February that he had been robbed of \$5,000 while asleep at the Union depot. It now transpires that this money was not McCarron's but belonged to the firm of which he was a member, and was to have been used to pay the employes at the Moose Lake lumber camp.

Heavy Expenditures.

WASHINGTON, April 24 .- The government expenditures so far this month have been heavy, exceeding the receipts by over \$2,000,000. The receipts have been \$22,700,000 and expenditures \$29,-000,000. This has had the effect of reducing the net cash balance in the treasury, which to-day is \$24,905,000, and of this amount \$10,600,000 is in subsidiary coin and \$11,000,000 is in national bank depositories.

Nine Men Suffocated.

BUTTE, Mont., April 22.—By a fire in one of the shafts of the Butte and Boston company Friday morning nine miners were cut off from escape and were either burned to death or suffcated. All hope of rescue has been abandoned. The origin of the fire is not known. It may have been started by a candle stuck in the timbers.

THE REGISTER.

PUBLISHED WEEKLY BY HELEY A. MORAN.

ANN ABBOB, MICH

TERMS:

One Dollar per Year in Advance. SE.50 if not paid until after one year.

Fifteen Cents per Year additional to Sub Fifty Cents Additional to Foreign countries. Intered at the Ann Arbor Postoffice as Second New Matter.

THURSDAY, APRIL 27, 1893. and grade

THE REGISTER requests all of Sts friends, who have business at the Frobate Court, to send their printing to this office. Reasonable retes only are charged.

THE numerous accidents on the T., A. A. & N. M. Ry. suggest that Ashley should apply to Judges Ricks and Taft for an injunction against their new employees to restrain them from being igmorant and inefficient.

Wz extend our thanks to our little contemporary The Times for the adequate manner in which our editorial description of his method of claiming the earth was illustrated in his columns last week. It is especially charming in him to run our Key alongside of his remarks, so that people may not be misfied by them.

Our trivial neighbor was silenced For two whole weeks by the accurate description of the kinks in his policy with the causes thereof given in our issue of three weeks since. He revive d a little last Thursday and the first thing he said as he came to was "I said Thomson first." He is as bad as the woman who would say "scissors." Let him take heed of her untimely end. This Thompson story of his is conducted on the principle that if a man tells the sam e lie often enough he will get some one to believe it at last for he will end by convincing himself.

THE Washtenaw Times says: "THE REGISTER has claimed that Ann Arbor is a very sinkhole of vice, and has made statements which were notorious-Iy untrustworthy and for which it was denounced by all other papers in Ann Arbor as an enemy to the city." Were this one of our contemporaries anything but contemptible we should be most righteously indignant to see published such a scandalous and pernicious falsehood about our attitude towards the city. Our files are open to inspection and we defy any candid minded gentleman to find in them any utterance of ours that could in any degree deserve the denunciation quoted above. We take no second place in our loyalty to Ann Arbor, and know that no paper here in Ann Arbor can show a better record than can we, of determined effort for the best interests of the city. We are not one of those people that bedieve that the way to remedy an evil is to shut our eyes and leave it alone. Nor do we care to be reckoned with those that think that the whole dis-

The real matter of investigation seems to be whether the college is doing all that ought to be expected of it, and whether it is keeping to its legitimate functions. It is for the interests of the public to have these matters determined and it is to be hoped that the result of the investigation will be to assure the public as to what may be expected in the future in these respects. Any action that will strengthen the college rightly will meet with general favor.

A professor of that institution recently unburdened himself to a newpaper reporter that many things were wrong at the college. Much that was said must have been imagined by the reporter. It is absurd to estimate the number of the teaching force of an institution by the number of pupils wholly. He said the college was topheavy because there were only five students to an instructor. The number of teachers depends much more on the number of studies to be taught than upon the number of students in attendance. However, to get such a proportion as quoted above, there must have been counted, in the numerous employees of the national government who are there at the experiment station attend-

ing to the scientific work constantly going on there under the general supervision of the leading college professors These men sometimes are engaged by the college to instruct some class in some special line and thus it appears to outsiders as though there were a lot of teachers doing a very little teaching. These men are not there to teach and teaching is only an occasional incident with them. The actual teaching faculty is no larger than it needs to be to do the work laid out for it. The professor quoted in the newspaper must have

been either strangely ignorant or wilfully malicious. That the college has suffered in the past few years from inefficiency in high places is now an open secret and the proper remedies have been applied already. But this in no way detracts from the possibilities of a glorious fa-ture usefulress for the institution. There is no doubt that the college deserves every reasonable encouragement and support from the state of Michigan.

Harrington Replies, Prof. Mark W. Harrington, of Michi gan, has made answer to all the accusations made against his conduct of the Weather Bureau in a very dignified and comprehensive communication to the Secretary of Agriculture. The professor replies categorically to the official charges, and in repudiating one of the accusations suggests that the only instance of maladministration of which he was aware was the recent appointment by Secretary Morton of a new official to a position that the chief had recommended should be abolished

In addition to specifically denying the charges, he makes some allusions bearing on the efficiency of the admin-istration of the bureau. He says:

"When I took charge of it I proposed for myself four lines of advance; to at once rescue the weather bureau from the public and scientific contempt into which it had fallen in the latter part of its military administration. This contempt had gone so far that not long before the transfer a federal judge in Detroit had seen fit to make merry of it from the bench. This task was soon accomplished and abundant evidence

HIS AFFIDAVIT. It Will Make People Believe His

Wonderful Story. SUBSCRIBED TO BY ONE OF NEW YORK'S MOST PROMINENT JUSTICES.

Here is the Whole Matter Exactly as It Happened.

State of New York, County of Washington. } ss. Lucien Rodd of Whitehall, N. Y.

being by me duly sworn, deposes and says that some years ago he suffered very greatly with insomnia, nervous prostration and his body was covered with sores, causing him great pain and annoyance. That his head was so covered with sores that he was hardly able to comb or even brush his hair, so

great was the pain it occasioned. That he consulted the local physi-cians without successful result; that he took quantities of medicine with no benefit whatever; that phys cians told him his disease was incurable and he had come to the same conclusion him-self and had made up his mind to go to a hospital and await death.

That just about this time he learned about Dr. Greene's Nervura blood and nerve remedy, which he began to use That this remedy entirely relieved and cured him, healed and dried up his sores, enabled him to sleep soundly and c m-fortably, and restored him to his ordinary vigor and vitality, in short, made a sound and well man of him so that he was fully able to work at his occupation, and has done so since that time.

That he attributes his recovery to Dr. Greene's Nervura blood and nerve remedy, as it restored him when everybody

MR. LUCIEN RODD. and everything else had failed and he had been given over to go to the hospi-

tal and die. Mr Rodd makes this statement voluntarily and cheerfully out of sincere gratitude for what the remedy has wrought for him.

Lucien Rodd. Subscribed and sworn before me this 15th day of January, A. D., 1893, and I certify the affiant to be a credible and reliable person whose statements may be accepted with confidence and implicitly relied upon, having known him personally for the last twenty-five years, and that I have no interest, direct or indirect, immediate or remote in this matter.

Hon. William H. Tefft, Notary Public in and for said County and State, re-siding at Whitehall, where this deposition was taken and executed.

Dr. Greene's Nervura blood and nerve remedy is purely vegetable and is sold by druggists for \$1.00. As is pro-yen by the wonderful cure of Mr. Rodd it is the very best spring medicine pos-sible to take for the blood, nerves, liver, kidneys, etc. It is the discovery and prescription of Dr. Greene, of 35 W. 14th

seal

For Circulars and Applications apply to D. F. SCHAIRER, MARTIN G. GOOD, Sec., Ann Arbor, Mich., or 1138 W. Harrison St., Chicago, Ill. John Burg John Burg JOHN BURG, 43 43 SOUTH MAIN STREET SOUTH MAIN STREET CARPET CLOSING OUT DEPARTME LADIES' SHOES - BAR-CARPETS. GAINS. The stock is bright and clean. Emery & Holmes having gone out of

Witthaus and Doremus, getting the color perfect every time, that they had sworn indicated positively the presence of morphine.' He proved that their tests were not conclusive.

The effect of these experiments will be far reaching. They may not save Dr. Buchanan against whom there is other evidence of guilt. They do not prove in the least that Mrs. Buchanan did not die of morphine poisoning, for the morphine may be there even if so far undiscovered. But expert testimony has received a severe blow for one thing; and another thing is, there lies in one of the prisons of New York state a man sentenced to electrocution early in May, for wife murder, whose conviction was mainly secured by the testimony of these same two chemists given on identically the same grounds as in this Buchanan case. This convict awaiting the fatal hour is Harris. What shall be done with him?

Social Doings.

SMITH-BTFFT. Dr. Erwin F. Smith, of the Department of Agriculture, Washington, D. C., who took his degree of Ph. D. here three or four years ago, and has many friends in Ann Arbor, was married in Easton, Md., on the 13th instant, Rev. J. T. Sunderland of this city officiating. He married the daughter of Dr. Buffet, of Easton, formerly of Cleveland, O. Mrs. E. A. Keith spent last week in Detroit.

Prof. and Mrs. D. Campbell visited Detroit friends last week. Dr. V. C. Vaughan returned Saturday evening from New York City.

Rev. C. Roecklin goes to the district meeting beginning May 2 at Detroit.

Mrs. W. L. Parmenter of Lima, O., is visiting Wm. P. Baillie of 18 S. Thayer. Mrs, E. S. Worden was the guest of Mrs. T. H. Olliver of Detroit over Sunday

Miss Grace Knight, of Toledo, will spend a few days with Miss Minnie Wells.

grace of evil doing is in the being found

Our attitude now and always towards the city with whose interests ours are identified, is, that we are prepared to defend her to the best of our ability from attacks from without and from corruption from within. This has been our purpose and motive for years. We do believe that effusive and continuous laudation of the city is worth nothing compared with persistent watchfulness to prevent the recurrence of those serious evils that now and then afflict us. It is because we have not hesitated to speak and act when occasion required That rascals and their sympathizers have given utterance to such denunciations as the above.

THE AGRICULTURAL COLLEGE.

The degislature has been induced to undertake a thorough investigation of the Agricultural College at Lansing and after some frivolous squabbling between the house and senate over representation on the committee, the preparations for the work have been completed. It is to be hoped that the college will receive candid and careful treatment and that no whisper of partisanship shall be theard through the words of the report.

The Agricultural College is not on trial as to whether there needs to be such an institution or not. No one can wisit the place and see what kind of work is being done there without admitting that it has a wide field of activity and that it is one of the very important educational institutions of the state. Its function is one that can be performed adequately in no other way | tatives by the chairman of its approthan by the establishment of a separate agency. Its methods must be so peculiar and its surroundings so expressly adapted to its work that it cannot successfully fulfill its mission when mixed up with other educational institutions. is an appendix to a normal school or an University, an Agricultural College is

of its accomplishment can be found in the commendations of the press. Since the transfer no attack had been made on the efficacy of the bureau by reputable newspapers until the latter part of March certain unfounded and unjust charges began to be circulated in the partisan press. Also to follow the instruction of Congress in extending the benefits to the agricultural classes. That this is being successfully accom-plished is shown in my special report and in many documents on file in the weather bureaus. Also to improve the forecasts and to place them within the reach of every one interested in them. The improvement of forecasts is a scientific problem and I have been 10 fortunate as to employ several of the ablest scientific men in the United States on this subject. Also to make the bureau a thorougly scientific one and rescue it from partisan politics. I was myself appointed as a meteor-ologist and not as a partisan. It is my earnest desire to have all other positions filled under the civil service rules or for places not under these rules in the spirit represented by them. In this I have until lately been successful beyond my expectations. It was by my representations that the Secretary of Agriculture was led to advise the President to place under the civil serv-ice rules the observer of the weather bureau. In addition to these reforms I have introduced many improvements. I may specify as an illustration the work on the great lakes. A wreck chart was issued which has been greatly praised and highly valued, and the sentiment toward this bureau of the masters of vessels on the lakes has been changed from contempt to that of hearty appreciation and active co-operation." In conclusion Prof. Harrington says that he belives the weath-er bureau is the only bureau that in the last two years has received spontaneous commendation for efficiency on the floor of the House of Represen-

priation committee. — Detroit Free Press. At the World's Fair.

Iceland sagas, bearing on the early discoveries of the Norsemen and the stories of their trips to Vinland and possibly North America, will be lent by the Danish government to the Unit-ed States for exhibition at the World's

Street, New York, the most successful specialist in curing nervous and chronic diseases. The doctor can be consulted free, personally or by letter.

A Famous Trial.

Dr. V. C. Vaughan, dean of the medical department of the University, has added not a little to his own reputation as a scientific man in the past two weeks, and also has drawn the most favorable kind of attention towards the institution of whose faculty he is such a distinguished member. The circumstances are these: Dr. Buchanan of New York is being tried for the murder of his wife by morphine poisoning. Several weeks after her burial her body was exhumed and some of the contents of the stomach subjected to chemical tests. A familiar test is to take sugar and sulphuric acid and when these are added to a solution in which there is morphine, a rich wine color will be produced. Professors Witthaus and Doremus two noted expert New York chemists performed six distinct tests for morphine upon material taken from the exhumed body and secured the proper color reaction each time. They swore positively to the presence of morphine in sufficient

quantity to cause death. This would seem to be perfectly irrefutable testimony. Dr. Vaughan was called in by the defense with most startling and sensational results. He took some of the natural products of decomposition that will appear in ever dead body, with not the slightest trace of morphine in the mixture, and in the pres-ence of the jury repeated the tests of special anneuncement.

Miss Hattie Swift leaves this week for Chicago to take a position in the art de-partment of C. D. Arnold.

Rev. A. S. Carman went to Berrien Springs yesterday to spend a day or two with his father at that place.

Rev.L.Allinger, presiding elder of the Mich. district, will preach at the Ger-man M. E. church next Friday evening. Mrs. MacNames and her daughter Mrs. Mattie Calkins, returned Monday from a short visit to South Lyon friends. Rev. Henry Tatlock and Rev. E. M. Duff attended the meeting of the Detroit convocation in Detroit this week. Mrs. E. C. Freer, and Mr. and Mrs. J. Minnis will remove to Detroit this week, that city being their future home. Hon. C. R. Whitman returned from his trip east without any U.S. district attorneyship in his grip. But he says it was all a mistake to suppose that he went east on any such business.

Cards are out announcing the wed-ding of Dr. Gay L. Kiefer of Detroit and Miss Josie Henion, formerly of Ann Arbor. The ceremony will occur May 2, at the residence of the uncle of the bride, Mr. C. C. Jenkin's of Toledo.

Mr. A. L. Colton of Lick Observatory, Mr. A. L. Colton of Lick Observatory, was in the city yesterday on his way west from Washington. He reports the capitol city to be full of office seek-ers; and he deplores the rumpus over the Weather Bureau, the origin of which he ascribes to the personal vanity and ambition of an officer of the U.S.A. U. S. A.

Fun in Websber.

Mr. A. Lincoln Kirk will give his en-tertainment in Webster M. E. church, on May 11. It will begin at 7:30. It is unique, sublime and ludicrous. Further announcement next week on the bills. Come and be merry while you gain wisdom.

LATEST COUNTY NEWS.

Lima. Mr. J. E. Cooley returned to Coldvater last week .- Mr. and Mrs. N. E. Freer, of Ann Arbor, spent the past week with their parents .-- Mrs. H. Van Tassel who has been visiting her daughter, Mrs. E. B. Freer, has returned to her home in Chicago .- An unusual number of acres of wheat has been plowed and sown to oats .- Friday evening, April 28, there will be held at the town hall a ratification dance at which all successful politicians may trip the "light fantastic" and sing "The opponent I left behind me."

Chelsea. Jacob Schweinfurth, the leader of a

strangely deluded religious sect, that has its headquarters at Rockford, Ill. and Wm. Baldwin, one of his loyal followers, are visiting relatives in this neighborhood. Crowds gather around Mr. Schweinfurth and follow him about the streets as though he were a monkey just escaped from a menagerie .- The Jackson Association of Congregational ministers and churches held their annual session here last week Wednesday. The attendance was large, able papers were presented and the interest good throughout the entire session .- Wm. Remnant, a laboring man but one of Chelsea's most worthy and respected citizens, died last Tuesday, aged 54-Additions to our thriving town have already commenced this spring. Wm. P. Schenk is laying the foundation for a large mercantile establishment; and M. Boyd is putting an addition to his grocery and meat market .- Our "city fathers" are putting the streets in order and trimming the shade trees so as to give us a presentable appearance during this great Columbian Exposition year. -Rev. Dr. Holmes preached at Pinckney last Sunday.

Webster.

Last week Friday evening the parsonage was the place of a poverty social About sixteen dollars or more were realized beside a good social time despite the stormy night .- Irving Goodwin, of Ann Arbor, was in town last week .--Rev. G. H. Krikorian, a native Turkish missionary, gave an interesting talk last Sunday morning. He comes from the heart of Galatia, from the city of Yozgat of about 30,000 inhabitants. He is a graduate of the Theological Seminary of Chicago. He spoke of his early life, how he became a believer in the new faith but not till after his father who had been pronounced a heretic. The courteous ways of a religious family, the gospel singing at a church together with his father's Christian belief, all conduced to make him a Christian at ten years of age. It was a great contrast to his former career as a sling boy with a fighting nature. He has succeeded in establishing a Christian Endeavor Society in Yozgat. In his own church nearly all are becoming missionaries. He spoke of schools now established, some with kindergarten departments. Any church C. E. society or Sunday School is invited to subscribe to educate one person in these schools. He was very reasonable in his pleading

and every place ought to respo Salem. The many friends of Mr. and Mrs. G. W. Wilson gave them a house warming several days ago which was a total surprise to them. The greater number of those present were friends of former years when Salem used to be the home of the aged couple. They are comfortably settled in their house purchased from Wm. Scheffield .- Harvy Sheffield spent the greater part of last week visisting in Dexter .- Rev. D. H. Conrad returned on Friday after a pleasant three days sojourn among the friends on his old pastorate at Chelsea.-Mrs. Biddle, of Ann Arbor, is visiting her daughter, Mrs. Dr. Walker. - Levi Rathburn is prostrated with heart dise se and severe hemorrhages of the lungs .- Presiding Elder Hudson of the Detroit District conducted Sacrament services last Sabbath at the north Salem M. E. church.-Albert Groat is building For the National Convention of Republican League Clubs at Louisvilie, Ky., May 9th to 11th the T., A. A. & N, M. A door lock so constructed that when the key is turned it switches on the lights in the room is new.

The highest praise has been won by Hood's Pills for their easy, yet efficient action. Sold by all druggists. Price 25 cents

Mr. Cleveland's check for twelve cents has been received by a Baltimore im-porter in payment of the duty on a pair of foreign gloves recently received from abroad for the president. The impor-ter intends to retain the document as a souvenir instead of cashing it.

Nothing drastic in TUTT'S PILLS. Nathaniel S. Barry, of Bristol, N. H.

Nathaniel S. Barry, of Bristol, N. H., is the oldest living ex-governor of a state in the United States. If he sur-vives until Sept 1, 1896, he will be a centenarian. He was a boy of very humble parentage, became a tanner, as General Grant did, and in 1861 was elected governor of New Hampshire.

Hall's Hair Renewer enjoys the confidence and patronage of people all over the civilized world who use it to restore and keep the hair a natural color.

After one the hardest "knockouts" any Wall street operator ever received James R. Keene is again the acknowledged leader of speculation in the street. For the third time in his history the Californian is again rated as a multimillionaire.

It's sometimes 'said patent medicines are for the ignorant. The doctors foster this idea "The people," we're told, "are mostly ignorant when it comes to med-ical science." Suppose they are! What a sick man needs is not knowledge, but a cure, and the medicine that cures is the medicine for the sick. Dr. Pierce's the medicine for the sick. Dr. Pierce's Golden Medical Discovery cures the "do believes" and the "don't believes." There's no hesitancy about it, no "if" nor "possibly." It says—"I can cure you, only do as I direct." Perhaps it fails occasionly. The makers hear of it when it does, because they never keep the money when the medicine fails to do good. Suppose the doctors went on that principle. (We beg the doctors pardon. It wouldn't do.) Mr. Graham, of Dingwall, Scotland, a

Mr. Graham, of Dingwall, Scotland, a boyish companion of Mr. Gladstone, says the latter's mother used to instruct the future G. O. M. with the household purse when he was but a boy, and used to call him her chancellor of the exche-

Between this and the other side of the broad Atlantic, in the shape of tourists, commercial travelers and mariners, agents "on the road," steamboat cap-tains, ship's surgeons and "all sorts and conditions" of travelers, emigrant and new settlers appreciate and testify to the preventive and remedial properties of Hostetter's Stomach Bitters in sea sickness, nauses, malarial and rheumatic trouble, and all disorders of the stomach, liver and bowels. Against the prejudicial influences of climate, crude-ly cooked or unaccustomed diet and im-pure water, it is a sovereign safeguard,

Birds of Passage

and has been so regarded by the travel-ing public for over a third of a century. No form of malarial fever, from the calentura of the Pacific and the broken bone fever of the Mississippi, to its mild er types, can resist the curative action of this benignant preserver and restorer of health, a veritable boon to persons in feeble health or liable to incur dis-

When they took off their opera cloaks he knew the reason why !!!-Pall Mall Budget.

There is more Catarrh in this section of the country than all other diseases put

together, until the last few years it was supposed to be incurable. For a great years doctors pronounced it a local disease, and prescribed local rem-edies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and, therefore, requires constitutional treat-ment. Hall's Catarrh Cure, manufactur-ed by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous sur-faces of the system. They offer one hundred dollars for any case it fails to Send for circulars and testimon cure. ials. Address.

HILL'S + TABLETS. THE OHIO CHEMICAL CO:

THE OHIO CHEMICAL Co: DEAR SIR:-I have been using your cure for tobacco babit, and found it would do what you claimed for it. I used ten cents worth of the strongest chewing tobacco a day, and from one to five cigarit, or I would smoke from ten to forty pipes of tobacco. Have ciewed and smoked for twenty-five years, and two packages of your Tablets cured me so I have no desire for it. B. M. JAYLORD, Leslie, Mich

DOBES FERRY, N. Y.

THE ORIO CREMICAL Con GENTLEMEN:-Some time ago I sent for \$1.00 worth of your Tablets for Tobacco Habit. I received them all right and, although I was both a heavy smoker and chewer, they did the work in less than three days. I am cured. MATHEW JOHNSON, P. O. Box 45.

PITTSBURGH, PA.

THE OHIO CHEMICAL Co: GENTLEMEN: --It gives me pleasure to speak a word of praise for your Tablets. My son was strongly addicted to the use of liquor, and through a triend, I was led to try your Tablets. He was a beavy and constant drinker, but alter using your Tablets but three days he quit drinking, and will not touch liquor of any kind. I have waited four months before writing you, 'n order to know the cure was permanent. Yours traily.

MRS. HELEN MORRISON.

CINCINNATI, O.

The OHIO CHEMICAL CO: GENTLEMEN:-- Your Tablets have performed a miracle in my case. I have used morphine, hypoder-mically, for seven years, and have been cured by the use of two packages of your Tablets, and without any effort on my part. W. L. LOTEGAY.

THE GOLDBUG By EDGAR ALLAN POE. CONCLUDED

"I presume you expected to find a letter between the stamp and the signature.

"Something of that kind. The fact is, I felt irresistibly impressed with a presentiment of some vast good fortune impending. I can scarcely say why. Perhaps, after all, it was rather a desire than an actual belief, but do you know that Jupiter's silly words about the bug being of solid gold had a remarkable effect upon my fancy? And then the series of accidents and coincidencesthese were so very extraordinary. Do you observe how mere an accident it was that these events should have occurred upon the sole day of all the year in which it has been or may be sufficiently cool for fire, and that without the fire or without the intervention of the dog at the precise moment in which he appeared I should never have become aware of the death's head, and so never the possessor of the treasure?"

"But proceed-I am all impatience." "Well, you have heard, of course, the many stories current, the thousand vague rumors afloat, about money buried somewhere upon the Atlantic coast by Kidd and his associates. These rumors must have had some foundation in fact. And that the rumors have existed so long and so continuous could have resulted, it appeared to me, only from the circumstance of the buried treasure still emaining entombed. Had Kidd concealed his plunder for a time and afterward reclaimed it, the rumors would scarcely have reached us in their present unvarying form. "You will observe that the stories told

are all about money seekers, not about money finders. Had the pirate recovered his money, there the affair would have dropped. It seemed to me that some accident-say the loss of a memorandum indicating its locality-had deprived him of the means of recovering it, and that this accident had become known to his followers, who otherwise might never have heard that treasure had been concealed at all, and who, busying themselves in vain because unguided attempts to regain it, had given first birth and then universal currency

to the reports which are now so common. Have you ever heard of any important treasure being unearthed along the coast? "Never.

"But that Kidd's accumulations were immense is well known. I took it for granted, therefore, that the earth still held them, and you will scarcely be surprised when I tell you that I felt a hope nearly amounting to certainty that the parchment so strangely found involved a lost record of the place of deposit."

"But how did you proceed?" "I held the vellum again to the fire after increasing the heat, but nothing appeared. I now thought it possible that the coating of dirt might have something to do with the failure, so I carefully rinsed the parchment by pouring warm

water over it, and having done this I placed it in a tin pan, with the skull downward, and put the pan upon a furnace of lighted charcoal. In a few minntes, the pan having become thoroughly heated, I removed the slip, and to my inexpressible joy found it spotted it several places with what appeared to be figures arranged in lines. Again I placed it in the pan and suffered it to remain another minute. Upon taking it off the

key, as far as discovered, in a tabular the principles of solution, so far espeform, to avoid confusion. It will stand cially as the more simple ciphers are concerned, depend upon and are varied by thus the genius of the particular idiom. In general there is no alternative but exper-

me still in the dark."

"It left me also in the dark," replied

Legrand, "for a few days, during which

I made diligent inquiry in the neighbor-

hood of Sullivan's island for any build-

ing which went by the name of the

'Bishop's hotel,' for of course I dropped the obsolete word 'hostel.' Gaining no

information on the subject, I was on the

point of extending my sphere of search

and proceeding in a more systematic

manner when one morning it entered

into my head quite suddenly that this

Bishop's hostel' might have some refer-

ence to an old family of the name of

Bessop, which time out of mind had

held possession of an ancient manor

house about four miles to the northward

iment (directed by probabilities) of every tongue known to him who attempts the solution until the true one be obtained but with the cipher now before us all difficulty was removed by the signature. The pun upon the word 'Kidd' is appre ciable in no other language than the English. But for this consideration I should have begun my attempts with the Spanish and French as the tongues in which a secret of this kind would most naturally have been written by a pirate of the Spanish main. As it was, I assumed the cryptograph to be English. "You observe there are no divisions between the words. Had there been divisions, the task would have been comparatively easy. In such case I should have commenced with a collation and an analysis of the shorter words, and had a word of a single letter occurred, as is most likely (a or I, for example), I should have considered the solution as assured; but, there being no division, my first step was to ascertain the predominant letters as well as the least frequent. Counting all, I constructed a table thus:

"Of the character 8 there are 33.

19. 16. 13. 12. 32 *‡*) 32 23 "Of the character +1 there are 8. 92 : 3 "Now, in English, the letter which

most frequently occurs is e. Afterward the succession runs thus: a o i d h n r s t uycfglmwbkpqxz. E predomi-nates so remarkably that an individual sentence of any length is rarely seen in which it is not the prevailing character. "Here, then, we have, in the very beginning the groundwork for something more than a mere guess. The general use which may be made of the table is

obvious, but in this particular cipher we shall only very partially require its aid. As our predominant character is 8, we will commence by assuming it as the e of the natural alphabet. To verify the supposition, let us observe if the 8 be seen often in couples-for e is doubled with great frequency in English-in such words, for example, as 'meet,' 'fleet,'

'speed,' 'seen,' 'been,' 'agree,' etc. In the present instance we see it doubled no less than five times, although the cryptograph is brief. "Let us assume 8, then, as e. Now, of all words in the language 'the' is the mostusual. Let us see, therefore, whether

there are no repetitions of any three characters in the same order of collocation, the last of them being 8. If we discover repetitions of such letters so arranged, they will probably represent the word 'the.' Upon inspection we find no less than seven such arrangements, the characters being ;48. We may therefore

assume that ; represents t, 4 represents h and 8 represents e-the last being now well confirmed. Thus a great step has been taken. "But, having established a single word, we are enabled to establish a vastly important point-that is to say, several commencements and terminations of other words. Let us refer, for example, to the last instance but one, in which the combination ;48 occurs-not far from the end

of the island. of the cipher. We know that the ; immediately ensuing is the commencement tation and reinstituted my inquiries among the older negroes of the place. of a word, and of the six characters sucng this 'the' we are cognizant of no At length one of the most aged of the less than five. Let us set these characters down thus, by the letters we know them to represent, leaving a space for the unknownt eeth. "Here we are enabled at once to discard the 'th,' as forming no portion of the word commencing with the first t, since by experiment of the entire alphabet for a letter adapted to the vacancy we perceive that no word can be formed of which this th can be a part. We are thus narrowed into t ee, and going through the alphabet, if necessary, as before, we get to the word 'tree' as the sole possible reading. We thus gain another letter, r, represented by (, with the words 'the tree' in juxtaposition.

Adjusting the focus of the telescope, . again looked and now made it out to be a human skull.

"Upon this discovery I was so sanguine as to consider the enigma solved, for the phrase 'main branch, seventh limb, east side' could refer only to the position of the skull upon the tree, while 'shoot from the left eye of the death's head' admitted also of but one interpretation in regard to a search for buried treasure. I perceived that the design was to drop a bullet from the left eye of the skull and that "We have therefore no less than 10 a bee line, or, in other words, a straight of the most important letters repreline, drawn from the nearest point of the sented, and it will be unnecessary to protrunk through 'the shot' (or the spot where the bullet fell), and thence extendhave said enough to convince you that ed to a distance of 50 feet, would indicate ziphers of this nature are readily solua definite point, and beneath this point ble and to give you some insight into the rationale of their development. But I thought it at least possible that a deposit of value lay concealed."

be assured that the specimen before us "All this," I said, "is exceedingly clear, and, although ingenious, still simple and explicit. When you left the Bishop's to give you the full translation of the hotel, what then?"

characters upon the parchment as un-"Why, having carefully taken the bearings of the tree, I turned homeward. The instant that I left 'the devil's seat,' how-" 'A good glass in the bishop's hostel in the devil's seat 41 degrees and 13 ever, the circular rift vanished, nor could minutes northeast and by north main I get a glimpse of it afterward, turn as I branch seventh limb east side shoot would. What seems to me the chief infrom the left eye of the death's head a genuity in this whole business is the fact bee line from the tree through the shot (for repeated experiment has convinced me it is a fact) that the circular opening "But," said I, "the enigma seems still in question is visible from no other atin as bad a condition as ever. How is it tainable point of view than that afforded possible to extort a meaning from all by the narrow ledge upon the face of the this jargon about 'devil's seats,' 'death's rock

> "In this expedition to the 'Bishop's hotel' I had been attended by Jupiter, who had no doubt observed for some weeks past the abstraction of my demeanor and took especial care not to leave me alone. But on the next day, getting up very early, I contrived to give him the slip and went into the hills in search of the tree. After much toil I found it. When I came home at night my valet proposed to give me a flogging With the rest of the adventure I believe you are as well acquainted as myself."

> "I suppose," said I, "you missed the spot in the first attempt at digging through Jupiter's stupidity in letting the bug fall through the right instead of through the left eye of the skull."

"Precisely. This mistake made a dif-ference of about 24 inches in the 'shot' -that is to say, in the position of the peg nearest the tree-and had the treasure been beneath the 'shot' the error would have been of little moment but the 'shot,' together with the nearest point of the tree, were merely two points for the establishment of a line of direction. Of course the error, however trival in the beginning, increased as we proceeded with the line, and by the time we had gone 50 feet threw us quite off the scent. But for my deep seated impres-sions that treasure was here somewhere actually buried we might have had all our labor in vain."

conduct in swinging the beetle-how excessively odd! I was sure you were mad. And why did you insist upon letting fall the bug instead of a bullet from the shell?

"Why, to be frank, I felt somewhat annoyed by your evident suspicions touching my sanity, and so resolved to punish you quietly, in my own way, by a little bit of sober mystification. For this reason I swung the beetle, and for this reason I let it fall from the tree. An observation of yours about its great weight suggested the latter idea."

"Yes, I perceive. And now there is only one point which puzzles me. What are we to make of the skeletons found in the hole?

"I accordingly went over to the plan-"That is a question I am no more able to answer than yourself. There seems, however, only one plausible way of acounting for them—and yet it is dread ful to believe in such atrocity as my suggestion would imply. It is clear that Kidd-if Kidd indeed secreted this treas ure, which I doubt not-it is clear that he must have had assistance in the labor. But this labor concluded, he may have Sold by One Salesman, thought it expedient to remove all participants in his secret. Perhaps a couple of blows with a mattock were sufficient while his condjutors were busy in the pit; perhaps it required a dozen. Who shall tell?"

"Mr. Geo. M. Guild, Boston, has received a special silver medal from the Massachusetts Charitable Mechanics Association for the Guild Piano. This is very strong endorsement for the instrument of Mr. Guild's manufacture. The Assoiation is a prominent one and the findings of its judges are highly respected. Mr. Guild's manufactures have won many honors in past years and these distinctions have always been acquired upon the merits of his productions. Inasmuch as there was strong competition in the recent exposition, Mr. Guild must feel elated over walking off with such high honors.'

The above is from "The Presto" of Jan. 19, 1893, a leading musical journa published in Chicago.

Reference is made to "strong competition." The GUILD PIANO won its lurels in competition with Chickering, Miller, Kranich & Bach, Haines, Mehlin & Son, Blassius, Stultz & Bauer, and Pease.

THE GUILD PIANO received a silver medal and a Special Award of a Silver Medal Diploma. The improvements in the Guild were heartily rsed and approved by the judges.

We present a list of purchasers of The Guild Upright Piano in Ann Arbor nd vicinity, and could we have obtained all the pianos we wanted, the list could be extended.

We Have During the Past Year Been Obliged to Reject Cash Orders for the Guild Piano.

ALL of these pianos were sold by ONE salesman. We are now receiving the pianos more freely, as facilities for their manufacture have been greatly increased

by the cryptographist." "You mean to punctuate it?" "Something of that kind." "But how was it possible to effect "I reflected that it had been a point with the writer to run his words together without division so as to increase the difficulty of solution. Now, a not overacute man, in pursuing such an object, would be nearly certain to overdo the matter. When in the course of his composition he arrived at a break in his subject which would naturally require a pause or a point, he would be exceedingly apt to run his characters at this place more than usually close together. If you will observe the MS. in the present instance, you will easily detect five such cases of unusual crowding. Acting upon this hint, I made the division thus: "'A good glass in the Bishop's hostel in the devil's seat-41 degrees and 13

minutes-northeast and by north-main branch seventh limb east side-shoot from the left eye of the death's head-a bee line from the tree through the shot "Even this division," said I, "leaves

whole was just as you see it now. Here Legrand, having reheated the parchment, submitted it to my inspec-The following characters were rudely traced in a red tint between the death's head and the goat:

 $53^{++305})6^{+};4826)4^{+}.)4^{+};806^{+};48^{+}8^{-}60))8$;1‡(;:‡*8†83(88)5*+;46(;88*96*?;8)*‡(;485);5 +12:**t(;4956*2(5*-4)8*[8*:4069285);)6+8)4t ;1(\$9;48081;8:8\$1;48\$85;4)485\$528806*81(\$9 48;(88;4(‡?84;48)4‡;161;:188;‡?;

"But," said I, returning him the slip, "I am as much in the dark as ever. Were all the jewels of Golconda awaiting me upon my solution of this enigma, I am quite sure that I should be unable to earn them."

Legrand, having reheated the parchment, submitted it to my inspection.

"And yet," said Legrand, "the solution is by no means so difficult as you might be led to imagine from the first hasty inspection of the characters. These characters, as any one might readily guess, form a cipher—that is to say, they convey a meaning—but, then, from what is known of Kidd, I could not suppose him capable of constructing any of the more abstruse cryptographs. I made up my mind at once that this was of a

simple species-such, however, as would appear to the crude intellect of the sailor absolutely insoluble without the key." "And you really solved it?" "Readily. I have solved others of an abstruseness 10,000 times greater. Circumstances and a certain bias of mind have led me to take interest in such riddles, and it may well be doubted whether human ingenuity can construct an enig-

ma of the kind which human ingenuity may not, by proper application, resolve. tion In fact, having once established con-nected and legible characters, I scarcely

gave a thought to the mere difficulty of developing their import. "In the present cases-indeed in all cases of secret writing-the first question regards the language of the cipher. for

"Looking beyond these words for a short distance, we again see the combination ;48, and employ it by way of termination to what immediately precedes We have thus this arrangement: the tree ;4(‡?34 the,

or, substituting the natural letters, where known, it reads thus: the tree thr ?? 3h the. "Now, if in place of the unknown char-

acters we leave blank spaces or substitute dots, we read thus: the tree thr...h the, when the word 'through' makes itself evident at once. But this discovery gives us three new letters-o, u and g-

represented by ‡ ? and 3. "Looking now, narrowly, through the cipher for combinations of known characters, we find, not very far from the beginning, this arrangement:

83(88, or egree, which, plainly, is the conclusion of the 'degree,' and gives us another letter, d, represented by t. "Four letters beyond the word 'de

gree' we perceive the combination ;(48;88. "Translating the known characters and representing the unknown by dots,

as before, we read thus: th rtee an arrangement immediately suggestive of the word 'thirteen,' and again furnishing us with two new characters, i

and n, represented by 6 and *. "Referring now to the beginning of the cryptograph, we find the combina-

53tt+. "Translating, as before, we obtain . good, which assures us that the first letter is

A, and that the first two words are 'A good.'

"It is now time that we arrange our

women said that she had heard of such a place as Bessop's castle and thought that she could guide me to it, but that it was not a castle nor a tavern, but a high rock.

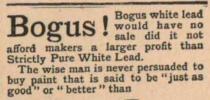

"I offered to pay her well for her trouble, and after some demur she consented to accompany me to the spot. We found it without much difficulty, when, dismissing her, I proceeded to examine the place. The 'castle' consisted of an ir-regular assemblage of cliffs and rocksone of the latter being quite remarkable for its height as well as for its insulated and artificial appearance. I clambered to its apex and then felt much at a loss

as to what should be next done. "While I was busied in reflection my eyes fell upon a narrow ledge in the eastern face of the rock, perhaps a yard be-low the summit upon which I stood. This ledge projected about 18 inches and was not more than a foot wide, while a niche in the cliff just above it gave it a rude resemblance to one of the hollow backed chairs used by our ancestors. I made no doubt that here was the 'devil's seat' alluded to in the MS., and now I seemed to grasp the full secret of the

riddle. "The 'good glass,' I knew, could have reference to nothing but a telescope, for the word 'glass' is rarely employed in any other sense by seamen. Now here, I at once saw, was a telescope to be used, and a definite point of view, ad-mitting no variation, from which to use it. Nor did I hesitate to believe that the phrases, "41 degrees and 13 minutes' and 'northeast and by north,' were intended as directions for the leveling of the glass. Greatly excited by these discoveries, I hurried home, procured a telescope and returned to the rock.

"I let myself down to the ledge and found that it was impossible to retain a seat upon it except in one particular position. This fact confirmed my preconceived idea. I proceeded to use the glass. Of course the '41 degrees and 18 minutes' could allude to nothing but elevation above the visible horizon, since the horizontal direction was clearly indicated by the words 'northeast and by north.' This latter direction I at once established by means of a pocket compass. Then, pointing the glass as nearly at an angle of 41 degrees of elevation as I could do it by guess, 1 moved it cautiously up o. down until my attention was arrested by a circular rift or opening in the foliage of a large tree that overtopped its fellows in the distance. In the center of this rift I perceived a white spot, but could not at first distinguish what it was. . Eren

Strictly Pure White Lead

The market is flooded with spurious white leads. The following analyses, made by eminent chemists, of two of these misleading brands show the exact proportion of genuine white lead they contain. they contain :

Misleading Brand

"Standard Lead Co. Strictly Pure White Lead. St. Louis." Materials Proportions Analyzed by Barytes 59.36 per cent. Regis Chauvenet Oxide of Zinc 34.18 per cent. & Bro., Wkite Lead 6.46 per cent. St. Louis, Analyzed by Less than 7 per cent. white lead.

Misleading Brand

"Pacific Warranted Pure [A] White Lead." Materials Proportions Analyzed by Sulphate of Lead 4.18 per cent. Ledoux & Co., Oxide of Zinc 45.04 per cent. New York. Barytes 50.88 per cent. No white lead in it.

You can avoid bogus lead by pur-chasing any of the following brands. They are manufactured by the "Old Dutch" process, and are the standards:

Rev. J. M. Gelston fills the pulpit of the 1st Presbyterian church of Detroit next Sunday. The Rev. J. W. Bradshaw has bought

the Lewis property on the corner of Division and Packard-sts. Twenty-nine wrecks in twenty-six

days is said to be the record of the Toledo road since the strike. Miss Louise Rothweiter, missionary

from Corea, will speak at the German M. E. church, May 3, in the evening. A lecture on Alexander Hamilton

will be given at Unity Club next Monday evening by Prof. S. F. Peckbam of Ann Arbor. J. R. Bowdish was in Detroit Saturday. Next week he leaves for Macki-

nac Island to locate a summer branch establishment.

Now there is a loud call for a city scavenger to take away the swill and garbage from boarding houses which formerly pig raisers had use for.

Rev. Mr. Sunderland who has been absent the past three Sundays will be in his own pulpit again next Sunday, preaching morning and evening.

Rev. A. Werner, of Edgerton, Ohio, will hold quarterly meeting at the German M. E. church next Sunday. He will preach morning and evening.

The temperance meeting in Good Templars Hall Sunday at 3:15 will be a ldressed by O. R. L. Crozier. Subject, 'The New Municipal Government."

The soaking rain of last week did almost as much damage to property in the exposed business houses of Ypsilanti, as the tornado of the week before.

The Odd Fellows turned out in fu'l force and in full regalia last Sunday morning at the Presbyterian church and heard an excellant and practical discourse.

The Ladies Aid Society of Trinity Lutheran church will give a social Friday eve., April 28, at the residence of D. F. Schairer, 38 E. Liberty Street. All are cordially invited.

The authorities in Washington are respectfully requested to let the Weather Bureau alone long enough so that the clerk for Michigan can sort out centre. our proper spring weather.

The committee appointed by the mayor at the request of the council to attend to the question of extending the limits of the city agreed to take in the reservoir, W. Liberty-st and Grand View addition.

daughters and one sister, Mrs. John Lowry of this city. At the Liberal Ministers Institute held at the Unitarian church last week

there were twenty eight ministers in attendance. The Institute was so successful that a vote was passed to hold a similar meeting next year. A telegram late last evening informs

us that the Ann Arbor bill has passed both houses and become a law. The extension of territory as elsewhere explained as a part of it, and the city is allowed to collect taxes twice a year. Rev. H. S. Willett, who is studying

for his doctor's degree at the University of Chicago will, for the present. fill Rev. C. A. Young's place at the Church of Christ. Rev. Mr. Young will devote his entire time in the interest of the proposed Bible Seminary.

The annual meeting of the Washtenaw Baptist Association will meet with the First Baptist Church of this city beginning at 10 a.m. Wednesday, May 3 and continuing through May 4. On Wednesday evening Rev. D. D. Mac-Laurin, the pastor of the Woodward ave., Baptist Church of Detroit will speak, and interesting features will characterize each session.

Dr. M. A. Bronson of the First Presbyterian church of Detroit will give the concluding lectures of the Tappan association, commencing Saturday evening, at 8 o'clock at MacMillan Hall; subject, "The Members of the Church. Sunday morning in Presbyterian church; subject, "The Mission of the Church." Sunday evening also at the church subject, "The Ministry of the Church."

The officers elected at the meeting last week of the Ladies' Home Missionary Society of the Presbytery of Detroit were as follows: President, Mrs. Augus tus Marsh, Birmingham; vice-presidents Mrs. J. M. Barkley, Detroit, Mrs. W. W. Wetmore, Ann Arbor, Mrs. Wm. S. Jerome, Pontiac; recording secretary, Miss Susie Trowbridge, Birmingham; corresponding secretary, Miss Lydia Hopkine, Detroit; treasurer, Miss Isabella McLaughlin, Detroit.

especially suggestive concerning the question of ghosts, second sight and the visions of the infane. The audience will be instructed in the art of making for themselves the experiments which open up this fascinating field of research.

ment and to those who have given it no

The Common Conneil.

A special council meeting was held Monday evening over the extension of the city limits. M. J. Lehman, Supervisor Braun, Fred Braun, A. H. Hamilton and others were there to object and were given the privileges of the council for that purpose. They said it was a scheme to take taxable property away from the town. City Attorney Norris, Mayor Thompson and Ald. Prettyman participated in the debate showing that the real object was to get the water works reservoir into the jurisdiction of the council on one side of the city, and the month of the sewer on the other.

Ald. Manly introduced a resolution that the mayor appoint a committee of aldermen and citizens of which he should be chairman to meet with the committee of the state senate and agree on the limits of the extension. This was adopted.

Toledo Road Wrecks.

For several days past there was an almost continuous record of disaster on the T., A. A. & N. M. Ry. A train and an engine running wild collided near Whitmore Lake and a fireman was frightfully mangled, tortured to death. That same evening the train north brought a dead fireman from another wreck. Before the week was out another smash-up occurred near Lake George and several people were killed. What a record! More than a dozen engines ruined, more than a hundred cars ruined, a great quantity of freight lost and destroyed and at least a dozen lives sacrificed. Monday morning some of the officers of the road were through trying to make arrangements with the old hands. They offered to take on six at once, a dozen more within two weeks and the remainder within a month. The men held off however determined to be restored in a body. Within a few days they draw a month's pay from the brotherhood.

CALKINS'

Would be glad to do it.

(2nd FLOOR, TAKE ELEVATOR.)

We have always had the credit of doing the Lion's Share of the Carpet Business in Ann Arbor, but this season we have made our preparations on a larger scale than ever and expect to do a correspondingly larger business.

Beautiful designs in Axminsters, Moquettes, Velvets; Body and Tapestry Brussells can be found in our beautiful Carpet Room, and the prices at which we are selling these Elegant Goods will please the expectant buyer.

In the handsome new Agra Carpets we have a most exquisite line of Designs and Colorings, while in Ingrains our Stock is Complete and comprises nearly every idea that may be asked for. Cheaper Carpets in Great Variety tempt those who wish to economize.

We keep an immense variety of Rugs in Moquette, Smyrna. &c., and you will be surprised to see how a few dollars spent in this line will brighten and beautify your home. We have superior facilities for making up Bordered Carpets from our best grades of goods and guarantee work satisfactory in every particular. Mr. E. J. Stil-son, our Carpet layer, has had a large experience with two of the best Detroit houses, and patrons will find his work superior to that with which they have been familiar in Ann Arbor.

In Lace Curtains we carry Irish Point, Swiss and Nottingham Goods of every price from 57c to \$12 a pair, while Silk and Brocade Curtains represent the acme of beauty and cost. Embroidered Mulls for Curtains are now very fashionable and we have new designs at 20c, 25c, 30c, 35c, and 40c a yd., and Muslin Curtains at \$3.00 and \$3.50 a pair.

Mattings are growing in popularity each year, and as we give import orders for the goods we are prepared to offer surprising bar-gains in these Cool, Neat Floor Coverings. Prices are very much lower than last year, a fact which you will appreciate. We are agents for Jos. Wild & Co.'s American Linoleums, the best made, and are offering an unusually fine line of patterns this spring in these durable goods.

Our line of Curtain Poles and Fixtures is large and attractive, prices ranging from 25c up, while in made up Window Shades we offer especial good numbers at 25c, 40c and 50c. We also make up Shades of any size on short notice.

Our entire Second Floor, 22x100 feet is occupied by our Carpet Dept. and the stock carried is the most complete in Ann Arbor.

If you wish the Best Qualities, the Lowest Prices consistent with Good Goods, if you value Artistic and Durable Furnishings, inspect what we have to offer. It will be guite certain to make you a customer
