THE BIBLE CHAIRS.

THE FIRST THEOLOGICAL SCHOOL ANNOUNCEMENT.

An Attractive Course of Study-The faculty not Numerous but Strong-Work by Correspondence-A Regujar Biblical Seminary in our Midstwill Begin October 1st Next.

The Christian Woman's Board of dissions of the Church of Christ, located at Indianapolis, Ind., has undertaken the establishment and endowment of certain chairs of biblical and religious instruction in Ann Arbor, in connection with the work of the church, inaugurated under the direction of the same board. Provisions will be made for two such chairs for the coming year. The instruction to be offered is intended to meet the needs of such students of the University who desire to pursue studies in Biblical Literature, a amiliarity with which is now more than ever requisite for a liberal education. Young men and women preparing for religious work, to whose equipment not only is knowledge of the Bible essential, but likewise familiarity with religious movements and thought, and methods of Christian work, and also persons interested in the subjects to be considered, Sunday school teachers and students, and Christian workers whether connected with the University or not, will all be profited by these

The departments of study proposed re necessarily outside the lines of instruction which the University offers, et their need has been felt by many tudents, and has been partially met by lectureships and Bible classes under the lirection of the various churches of the city, and by the work carried on through the Students' Christian Association, all of which has been most helpful. It is with the hope of supplementing and assisting the excellent agencies of Christian Instruction that hese Chairs are established.

The coourses of study are: I. History of Israel, II. Prophecy, III. Hebrew Psalmody, IV. The Life of Christ, V The Apostolic Church, VI. Paul and the Epistles, VII. Religious Movements n America, Methods of Christian fully.

In addition to the above courses of instruction, a series of lectures is proosed, covering such subjects as Evidences of Christianity, The Ministry, Missions and Missionaries, Relation of Christianity to Judaism and other regions, the Jurisprudence of the Jews, Applied Christianity, Present-Day Problems, Social Questions, etc. These ectures will be delivered by competent akers of this city and elsewhere.

The instructors selected are. Herert L. Willett, A. D., Bethany College 886; A. M., 1887; graduate student, Yale University, 1890-91; pastor, Dayon, O., 1887-1893; professor of Hebrew and O. T. literature, Bethany College, 1892-93; graduate student, University of Chicago, 1893; and Clinton Lockhart, L. B., Kentucky University, 1888; A M., 1889; graduate student, Yale University, 1889-1891; pastor, Cynthiana, Ky., 1891; president of Columbia Colege, Kentucky, 1892-3; Supt. of Amerian Institute of Sacred Literature for the Disciples of Christ.

The classes will meet in the classcooms of the Church of Christ, South Iniversity Ave., facing the campus. These rooms are excellently adapted to this purpose.

Fees not exceeding five dollars will e charged each person who registers as a student in one or more of the cour-

The courses of study to be given in Ann Arbor may be taken by persons residing in any other place by correspondence. For this purpose outlines of the work to be done, with directions as to method of study and books to be read, and examination questions, will the course advances.

Ministerial Reading Course: Church History, 2. Evidences of Chrislanity, 3. Christian Doctrine, 4. Preacher's Duties, Homiletic and Pastoral, 5. Biblical Interpretation, 6. Christian Ethics, 7. year. These will be held in various places under the auspices of churches, Sunday-schools or societies.

A course of study covering three years, suited to graduates of colleges who propose to enter the ministry, is also announced. The advantages offered by a University foundation like Ann Arbor, are requisite to a Seminary education. By the use of some of the departments of the University of Michigan, in addition to the strictly Seminary work to be done, a strong course of siudy has been arranged to which additions will be made as opportunity offers, and which, it is hoped, may both meet and foster the demand for a more thorough training of young men who enter the ministry of the Disciples of

With this work the above courses are not connected. Outline of the course, terms, etc., may be had upon applica-

The work of the Bible Chairs will begin October 1st and continue through the University year. Half the courses will be given during the first semester, the remainder during the second.

There will be two exercises a week of an hour's length, in each of the courses. Persons who desire to enter any course will register during the first week of the session, at the class-rooms in the Church on S. University Ave. The arrangements for hours will be made to accommodate the majority of those who register.

Last Thursday evening the conference committee of the citizens and common council met in the council chamber with Superintendent Hamilton and Director Titus Hutzel of the Water Company.

President Watts was in the chair, while Aldermen Martin, Manly, Prettyman and Messrs. Dean, Bullis, Shannon and Heinzman were present of the committee.

The recommendations contained in the report of the water committee of the council of a week ago were taken up one by one and discussed quite

It was resolved that the reservoir and catch basins should be thoroughly cleaned, to the satisfaction of the council, and that during the process the people should be forbidden to use garden hose to sprinkle the streets or their lawns. It was said, that it would be impossible to maintain a reasonable pressure for fire protection while the reservoir was empty to be cleaned without this interdiction. About 600, 000 gallons are estimated as the daily expenditure of water for sprinkling

As for the cement bottom asked for by the second recommendation of the report, it was decided unnecessary, and of doubtful value as an improvement. As to the roof, it was decided to put it on the table instead of the reservoir.

Superintendant Hamilton then read the analysis of the city water made recently by Prof. Chute and J. Montgomery, with the comment that that analysis indicated pretty good water.

The proposed new well was discussed and the Water Company's representatives seemed anxious to have the city locate it for them. The well was finally put on the table along with the roof.

In The Police Court.

The course of justice has been somewhat spasmodic this week. Some people were fined for begging. Henry Miller became somewhat confused as to who had the proprietary right in a horse and fruit wagon of L. Gruner's and got as far as Ypsilanti with the rig before the sheriff's deputies McCabe and Brenner got near enough to him to call a halt.

A. Schneider was required to answer esent regularly through the year as to the charge of getting his wife into literal hot water, and was sent to Detroit for 90 days for correction. Herman Luebke was brought up to answer to the charge of doing lofty vaulting with respect to a board bill. Two or three people were drunk, one of whom, Mary Beech created a vast disturbance while in that condition.

The School of Music.

The contract for the construction of the School of Music building was let yesterday afternoon to Mr. W. E. Howe, of 106 W. Huron-st., his bid being \$7,250. The plans are by Geo. Scott.

The first silver dollar was put in circulation in 1794.

"It was a crude design," says a historian. "On the obverse or face of the coin was imprinted the head of a young lady facing to the right. Her hair was flowing to such an extent that she looked as if taken in a gale of wind."

In 1796 Congress stepped in to the aid of the typical damsel and tied her hair up with a bit of ribbon.

The fifteen stars were after this reduced to the original thirteen in recognition of the number of states.

In 1836 the design was again changed, and the silver dollar bore the full figure of a neatly-dressed woman in a flowing garment. The designer forgot, however, to put in the thirteen stars and the coin was soon called in. Any person now in possession of one of these dollars has a valuable souvenir.

The new design had the lady surrounded by the stars. It was improvement on its predecessor, but the air of the female figure was defiant and stiff. The dollar of 1838 was the first artistic piece of silver coined by the United States mint.

On April 22, 1864, the first dollar having the legend, "In God we trust," was

In 1873 the era of the trade dollar of 900 fineness began. That troublesome dollar ran its erratic course in just five vears.

In 1878 the liberty dollar made its appearance. Miss Anna W. Williams, a teacher in the Girls' Normal School at Philadelphia, sat for the portrait, her profile being then considered the most perfect obtainable. Her classic fea tures still decorate the silver dollar,-Detroit Free Press.

Another swindling scheme is being perpetrated on unsuspecting farmers in some parts of the state. A well dressed stranger comes along, who claims to be dealing in stock. He presents a polite-ly worded order to some farmer, which is signed by one of his neighbors. It is the request to pay the bearer a small sum by the way of a loan. PIKEVILLE, Ky., July 22.-Information has been received at this city of a bloody fight in Wise county, Va., last Wednesday. For several months past the Virginia authorities have wanted the Flemons boys very badly. The boys, four in number, are accused of participating in a triple murder some months ago. Doc Taylor, one of the gang, was captured and hanged for the crime, but the Flemons boys have so far evaded arrest. Two weeks or more ago the governor of Virginia sent a company of sixty soldiers to assist the sheriff of Wise county in arresting the outlaws. On Wednesday the militia overtook the outlaws and a battle occurred. Four soldiers were killed and six mortally wounded. Offver Flemons was shot also and is dying.

Portions of Kansas Overrun by Penniless

Workmen from Colorado TOPEKA. Kan., July 25. - Western Kansas is overrun with men who are making their way east from Colorado, where they have been thrown out of employment by closing of the mines and smelters. A. Gluck, mayor of Dodge City has issued a proclamation calling upon citizens to make provisions for the army of idle men that is passing through that town. He asserts that the majority of them are deserving of assistance and willing to work. He appeals to charitable persons to raise a fund to provide for their immediate wants to prevent them from breaking into houses to obtain

INDIANAPOLIS, Ind., July 23 .- Charles W. De Pauw, one of the greatest capitalists in Indiana, with heavy eastern and western interests, assigned at New Albany, Ind., yesterday afternoon. Mr. De Pauw's individual assignment is a sweeping one, and the man who was worth \$1,000,000 three months ago is now practically penniless.

Broke the 25-Mile Record.

DETROIT, Mich., July 24.—In the presence of 25,000 people Saturday afternoon Frank Waller, of Indiana, who had an allowance of thirty sec onds, won the first prize in the Hil-sedegen international road race, 25 miles, in 1 hour 6 minutes and 10 seconds, breaking the world's record of 1 hour 11 minutes and 59 seconds.

Got Away with Thousands.

LIMA, O., July 22.—The flight of E. L. Gunn, the insurance and loan agent, has been the cause of a great sensation It has been found that he has defrauded various people here of not less than \$15,000. The Hartford School Fund Loan company, of which he was the agent, will lose at least \$35,000.

Flames in a Brewery.

MILWAUKEE, July 24.-Fire at the Pabst Brewing company's plant caused a damage of \$75,000 besides destroying the homestead of Jacob Best, the father of Mrs. Pabst and the founder of the Pabst brewery. The damage is covered by insurance

The Jury's Verdict in the Celebrated Newby Case.

The Claimant to William Newby's Pension Is Declared to Be Dan Benton-The Judge's Charge-The Crime and the Penalty Therefor.

A FAMOUS SUIT ENDED. SPRINGFIELD, Ill., July 24.—"We, the jury, find the defendant guilty." Those vere the last significant words pronounced Saturday afternoon in the Benton-Newby case. The crowd that had gathered in anticipation of the result lapsed into almost painful silence as the verdict was announced. The jury retired at 2:07 Saturday afternoon and in nineteen minutes they filed back into the courtroom with their finding. It was plain that an agreement, if reached at all, was not expected so seon.

THE PRISONER IS COOL The defendant was closely watched as to the effect of the announcement made upon him. He did not manifest any nervousness while waiting the fateful moment, and when the verdict was read he showed the coolest indifference, and there was no change in his color or expression. When the news was transmitted to Mrs. Newby, who was waiting in an ante-room, she was strongly affected and gave expression to her feelings in sobs. THE JUDGE'S CHARGE

Judge Allen prefaced his charge with a reference to pension legislation, say-ing it should be carried out to encourage the application for pensions by meritorious old soldiers and to prevent fraud. Unusual interest, he said, had been developed in the case, and that strong feeling had been wrought up was manifested both in the courtroom and on the street. The jury should not let this enter into their decision, but should return a verdict in accordance with a love of justice and a sense of duty as drawn from the evidence. To establish the de fendant's identity in view of the conflicting testimony of the witnesses on either side was an exceedingly difficult and delicate matter and demanded the exercise of the highest intelligence. It involved the judgment as to which class of witnesses was the more reliable intellectually and morally. He then briefly stated the theory of the defense that the defendant was wounded Shiloh, was captured by confederates, and finally found himself in Andersonville prison. This theory should be weighed in the presence of the fact that the evidence did not show that any of the other prisoners were taken there. An important point to be decided was as to whether a man who showed the strength of mind accredited to the defendant during his wanderings through Ohio, Indiana and the south could have entirely forgotten his relatives. The value of the alleged wife's testimony and that of the physician's regarding the defendant's physical ability must be decided alone by the jury. The charge closed with the prefound guilty beyond a reasonable

doubt THE CRIME AND THE PENALTY. The indictments against the defendant were for presenting false affidavits for a pension and for falsely impersonating an old soldier for the purpose of defrauding the government of \$20, 000 or over. Newby, supposed to be dead, never received his discharge from the service, and had he established his claim he would have been entitled to pay all these years. The extreme penaity of the law for his offense is fifteen years in the penitentiary.

One of His Experiences.

For thirty-eight years Capt. Loud followed the sea, most of that time as master of a vessel, and upon retiring from the water was appointed by the Secretary of the United States Treasury to superintend the seal fisheries in Alaska, which position he held five years. He relates one experience as follows:

"For several years I had been troubled with general nervousness and pain in the region of my heart. My greatest affiltetion was sleeple-sness; it was almost impossible at any time to obtain rest and sleep. Having seen Dr. Miles' remedles advertised I began using Nervine. After taking a small quantity the benefit received was so great that I was positively alarmed, thinking the remedy contained optates which would finally be injurious to me; but on being assured by the druggist that It was perfectly barmless, I continued it together with the Heart Cure. Today I can conscientiously say that Dr. Miles' Restorative Nervine and New Heart Cure did more for me than anything I had ever taken. I had been treated by eminent physicians in New York and San Francisco without benfit. I owe my present good health to the judicious use of these most valuable remedies, and heartily recommend them to all afflicted as I was."—Capt. A. P. Loud, Hampden, Me. BEST LINE TO THE WEST

Superb Dining Car Service

As long a time as David reignet, so long hastla Chicago, Rock Island & Pacific Raiiway na trains westward from Chicago.

The Rock Island is foremost in adopting an advantage calculated to improve speed and give that luxury, safety and comfort that popular ple ronage demands. Its equipment is thoroughly complete with vestibuled trains, magnificent die ing care, sleepers and chair coaches, all the mose elegant, and of recently improved patterns.

Faithful and capable management and polle honest service from employes are importent item. They are a double duty—to the Company and it travelers—and it is sometimes a task difficult accomplishment. Passengers on this line with find little cause for complaint on that ground. The importance of this Line can be better in derstood if a short lesson in geography be nown cited.

What is the great Eastern termini of the Roo Island Route?—Chicago. What other sub-Easte termini has it?—Peoria. To what importance points does it run trains to the Northwest—Faul, and Minneapolis, Minnesota; and Waw town and Sioux Falls, Dakora. To what importance of this complete in the company and town and Sioux Falls, Dakora. To what importance of the complete in the control of the Roothills of Rocky Mountains?—Yes; to Deuver, Colons Springs and Pueblo, solid vestibuled from the Rock Island Route?—Yes; its capital of Topeka, and a full hundred others in all directions in the State, and it is the only road rum to and into the new lands opened for settlem in the Cheyenne and Arapahoe Reservation.

It will thus be seen that a line tapping, as Rock Island does, such a waried territory, much in that regard to commend it to trave as all connections are sure on the Rock Island apsengers can rely on a speedy journer, over a bulk of the system through trains are and if has become, and rightly too, the popular train on the Chicago, Rock land & Pacifi

Line.

A very popular train on the Chicago, Rock land & Pacific Railway leaves Chicago, Rock land & Pacific Railway leaves Chicago, daily. 10 p. m. It is called "The Big Five," is only a day out, and passengers arrive at Denver, Pueb or Colorado Springs early the second morning. The Rock Island has become a popular Colorado Line, and the train above referred to is vest buled, and carries the Rock Island's excelled Dining Car Service.

The French Minister Prepares to Leave the Siamese Capital

France Notifies the Powers of Its Intention-Military Plans in Process of Formation-England Displays Considerable Anxiety.

LOWERED THE FLAG.

BANGKOK, July 25 .- M. Pavie, French minister resident, has lowered the flag over his office and has notified the Siamese government that he will leave the city to go aboard the French warship Inconstante on Wednesday. He has requested the government to provide pilots to conduct the Lutin and Comete down the river. French sub-jects in Bangkok will be placed under the protection of the Dutch consul.

WILL BLOCKADE THE COAST. PARIS, July 25 .- The government has notified the powers that it intended to establish a blockade of the Siamese coast, without prejudice to the other measures that may be taken with the object of securing to France the guarantees to which she is entitled.

The French government is making arrangements with another government for the protection of French subjects in Siam during the absence from Bangkok of M. Pavie, the French minister, who has been ordered to leave Bangkok in twenty-four hours.

MILITARY OPERATIONS. Besides the blockade military operations will be opened shortly. The details of these operations are still unde-termined. They will be settled at a cabinet council within a day or two. Steps will be taken in Indo-China toward serious action immediately after the arrival of the battalion of the foreign legion. The second portion of this battalion has sailed from Marseilles. The native militia will be reorganized, and together with the imported companies of the foreign legion will cooperate with the force already in active service in the Khong district.

COMMENT IN FRANCE. PARIS, July 25.—The Liberte says that the French gunboats probably will go down the river, shell and destroy the Paknam forts and then return to their positions before Bangkok and bombard the palace. Some painful measure is necessary, adds this journal, for the preservation of

France's prestige.
The majority of the Paris newspapers devote as much space to denunciation of England as to the matter at issue between France and Siam. England is reproached by them with supporting the Siamese in their opposition to France's just demands, and with planning to give the Siamese secret aid when hostilities begin.

ANXIETY IN LONDON. LONDON, July 25. - The Franco-Siamese complications have been the one absorbing topic in the lobbies of the house of commons. The situation is regarded with apprehension by all parties, and the last news from Bangkok and Paris is read with as much anxiety as eagerness. On all sides regret is expressed that the British warships in Siamese waters were not re-enforced a month ago, as the British interests in Siam outnumbered the French a hundred to one.

IMPRISONED FOR LIFE.

The Four Murderers of Albert Molitor Sentenced at Alpena-ALPENA, Mich., July 24 — Jacobs, Fuhrmann, Vogler and Repke, who were convicted of the murder of Albert Molitor, received their sentence Saturday. When asked by Judge Kelley they had anything to say. all of the prisoners expressed themselves as being not guilty. Repke was the only one of the four who broke down. The judge then sentenced them to imprisonment for life at hard labor at Jackson prison. They will arrive at Jackson on Monday.

King of the Turi. CHICAGO, July 24. - At Washington park on Saturday Morello won the Wheeler handicap in 2:05 equaling the memorable record made by Salvator in his great match with Tenny June 25, 1890. But Salvator' srecord was made as a 4-year old carrying the exact weight allowed him according to the scales, while Moretlo is but a 3-year-old and carried eight pounds above the scales. Salvator's performance, therefore, does not compare with that of Morello, who may justly be considered the racing

Chicago Iron Merchants Fail. Chicago, July 25 .- The firm of Parkhurst & Wilkinson, iron merchants at 148 to 164 Kinzie street, failed on Monday. The firm's assets are estimated at \$1,000,000. Parkhurst & Wilkinson were among the leading merchants in their line in the United States and had been established for more than a decade. Slow collections due at the bank is the cause of their trouble.

BUSINESS OUTLOOK.

The Country Passing Through an Extraordinary Strain.

Trade Has Been Fairly Good, Howeverries Suspending Work-Record of Fallures for a Week.

WEEKLY TRADE REVIEW.

NEW YORK, July 22.-R. G. Dun & Co.'s weekly review of trade says: "This week the country has witnstood sur-prisingly well an extraordinary strain. The failure of many banks and firms have come despite the relaxation in eastern and in some southern and western money markets. Denver banks were overthrown largely by the crazy actions of the people, but in most cities statements show the banks in a healthy condition, and there has since been noticed more readiness to extend since been noticed more readiness to extend accommodation. Under all the conditions it is astonishing that business has been so well maintained with so little evidence of phacound-

ness.

"The stagnation in iron has closed some magnetite mines in this state and New Jersey and most of the mines in Michigan. Coke is moving downward, pig iron is inactive, and though dealings in bar and structural projects are somewhat larger prices are the lowest ever

Wheat has fallen 2 cents, corn 1 cent. Pork products and oil are lower. In place of the ex-pected advance in sugar a decline has come and cotton, after some advance, recedes again. Western receipts of wheat are moderate and exports fairly large, but unprecedented stocks press for sale. The stock market closed last week hopefully, but by Wednesday had reached the lowest average of prices since 1884 London and short seilers then bought and some recovery has followed
"At Philadelphia banks are holding ourrency

and strengthening themselves. An easier feel-ing prevails at Pittsburgh in iron. The Cincin-nati money market is easier and Cleveland reports grocery trade good, but iron wholly inac-tive. Toronto notes better feeling, Indianapo-lis no improvement but banks in strong posi-tion, and Detroit a quiet business with the out-

"At Milwaukee the closing of some manufactures and reduction of wages in others and the failure of the great iron syndicate are noticed. At St. Paul trade is restricted; at Minneapolis lumber sales are reduced and sales of four bloom the output. Our hard trade is restricted. Last week the failures in the United States numbered 374." BIG MILLS TO CLOSE. MILTON MILLS, N. H., July 22 .- The

agent of the Waumbeck company has issued orders for closing the mills here for six months, as soon as the goods now in process of manufacture are finished. The reason assigned for this action is a lack of orders, except at ruinous prices. This is the first time in the history of this company that work has been ordered to cease on account of the condition of markets, and the result of the present action will be a serious blow to many employes who are dependent upon their earnings in these mills for support.

PORTLAND, Me., July 22 .- At a directors' meeting Thursday it was decided to shut down the mills of the Westbrook Manufacturing company, makers of ginghams, from July 20 to September 4. The monthly pay-roll is \$20,000. There are three reasons that unite to cause the shutting down. The goods now being manufactured cannot be sold until October, and no money can be realized on them until next spring. It is not deemed advisable to pile up goods. The mill has been in operation thirty years without a shut-down, and some repairs are necessary.

PLATTSBURG, N. Y., July 22.—The Chateangay Ore & Iron company, whose mines and iron foundries are located at Lyon Mountain, closed down Thursday, as also did the Crown Point Iron company mines and iron makers at Crown Point. The cause given is dullness in the iron trade. About 1,000 men are thrown out of employment. The principal stockholders of both companies are New Yorkers.

BOLLING MILLS STOPPING. MILWAUKEE, July 22.—The Ray View rolling mills of the Illinois Steel company, which were recently started up at nearly their full capacity, are gradully being closed again, and at the present time not more than half the plant is in operation. Manager Hinton said to-day that the shutting down of the mills was owing to the exceedingly dull condition of everything in these

HIGHLAND FALLS, N. Y., July 25.—
The Forest of Dean mines, situated near this village and owned and operated by the Poughkeepsie Iron Ore company, have closed down for an in-definite period. One hundred miners are thrown out of work. These mines have been operated without interruption for the last, hundred years. No reasons are given for the closing.

She Sought Death, CHARLESTON, Ill., July 24.-The westbound mail train on the Big Four killed Miss Belle Day Saturday a mile east of this city. A coroner's inquest devoloped the fact that she was demented and had deliberately gone out to meet the train and at the approach threw herself in front of the engine. She had been a teacher in the public school the past year and was well and favorably known.

Piraces' Deadly Work. London, July 25.-Advices received here say that a piratical outbreak oc-curred among the Achinez passengers on board the Dutch steamer Rajah Kongsee, trading on the eastern coast of Achon, and the Achinez killed the English captain, mate and twenty-two of the Asiatic sailors.

Hanged and Burned. Мемрия, Tenn., July 24.—Lee Walk-er, the negro who assaulted Miss Mollie McCadden and four colored girls last week, was lynched by a mob a few minutes after midnight Saturday night. After the hanging a huge bonfire was built in the street and the body cut down and dumped into the flames.

WEIR CITY, Kan., July 25. - The

guards at shaft 47 had a pitched battle with a mob of strikers at 10:30 o'clock Monday night. The mob approached the mine quietly and fired into the shaft. Deputy Sheriff Grant, who was on patrol guard, returned the fire and, calling the other guards, defended the mine against the mob. Over 100 shots were fired, but none of the deputies were injured. When the mob saw that the guards were standing their ground they fled. It is not known how many, if any, of the mob were shot.

LOWEST PRICE YET.

The Government Makes Silver Purchases at 69.6. WASHINGTON, July 25 .- Acting Director of the Mint Preston purchased

.07,500 ounces of silver Monday at 69.6. This is the lowest price yet paid for silver in the history of the govern-ment purchases. There were seven bidders offering in the aggregate 286,000 ounces at from 69.7 to 70.5. The offers were declined by the acting director of the mint and counter propositions of 69.6 made. Two of the bidders accepted the government's offer and let go 40,000 ounces more at the same figure.

Dant, the contractor employed to make the excavation for the electric light plant; William E. Covert, superintendent, and Francis Sasse, engineer of the building, holding them responsible for the old Ford's the ater disaster of June 9 last in which twenty-three persons lost their lives and a large number was injured.

THOUSANDS ARE IDLE.

Hundreds of Unemployed Miners and Railroad Men Arrive at St. Paul Daily. Sr. PAUL, Minn., July 24.—It is estimated that 3,000 to 4,000 idle men are here and hundreds more are arriving daily. Many are from railroads and mining regions. Many are well educated persons. The few Michigan mines still running intend lowering wages greatly. The men say they will then quit. This will add from 5,000 to 6,000 more unemployed to the 4,000 in Michigan who have already quit.

Death of Gen. Rawlins' Father. GALENA, Ill., July 22.-James D. Rawlins, the father of Gen. John A. Rawlins, died here Friday at the age of 92. He was a native of Kentucky and settled here in 1827, and was supposed to be the oldest surviving settler of northern Illinois. He tought in the Winnebago war of 1828 and the Blackhawk war of 1832. He had eight sons, of whom John A. Rawlins became famous by his association with Gen. Grant. Another son, William, is a lawyer in Chicago.

WHAT SHALL WE DO ABOUT IT!

A good many citizens are asking whether the Water Company can col-Slect their rates in advance or not, and whether the user of the water has not a claim for a rebate on account of the many days when the supply of water was inadequate or unusable from contamination. So far as the first question is concerned, the company may make its own regulations about otime of payment. So long as the price -charged is not above the average of *that charged by other corporations in -cities of the same size, the company may draw its contract with the user as vit pleases. Providing it is one of the derms of said agreement leither expressed or necessarily implied, that the taker shall be entitled to good healthaful drinking water, or that it shall be carried to certain elevations in the house; then it would seem that for every time the water is contaminated or fails to be carried to the point agreed on, the users could claim and be legally entitled to a proportional rebate. And further, were there real damages inflicted upon the user of the water through the failure of the water company to make the agreed upon supply such damages would be perhaps col-Mectable from the company.

THE WATER COMPANY'S CON-TRACT.

Anyone who will take the time to Mook over the contract between the City of Ann Arbor and the Ann Arbor Water Company will be soon convinced that the Water Company were very far From being abused thereby. In fact, it looks as thought they would be willing to go to considerable expense and trouble to keep their franchise. Some extracts from that contract may be opportune to show what the city may require and where the benefits accrue to the company. Some of the propositions made by the council committee are in line with the contract and one or two contrary to its express provisions. The following are extracts from the

contract parties of the first part means city, and of the second part, Water

For the service and continued supply of water, as above specified, the parties of the first part hereby agree to pay to the party of the second part the sum of four thousand dollars per annum, payable semi-annually, from and after the time when said water works, shall be completed and in operation in addition to the five hundred dollars above

population, and supplied by private ompanies. The party of the second part, in consideration of the premises agrees when requested so to do, to furnish water for the seven public school houses of the said city, and the three fire engine houses, for the sum of two hundred and fifty dollars per annum; also to furnish water for two public drinking fountains for the sum of one hundred and fifty dollars per annum; also to furnish water for washing gutters and flushing sewers, whether now constructed or hereafter to be built, and for the city

council room for the sum of one hundred dollars per annum; also that they will furnish water for any school house or houses, that are now in process of construction, or that may hereafter be built, for the sum of twenty-five dollars

COLLEGES NOT NECESSARY.

A World's Congress of Education is in session in Chicago, a mammoth and distinguished assembly of teachers. Before one of the sections the Hon. R. H. Mahanny U.S. Minister to Ecuador read a paper on "The Failure of College Education." Some of his remarks were as follows: "Useful and distinguished citizens are more likely to come from the village school than from the college hall." "In colleges individualism and independence are lost, egotism and delusions flourish. This is precisely wherein popular education is superior to the college brand. It is my deliberate opinion that all the colleges of the United States could be obliterated without perceptible change in the forward march of American progress." "Who would presume to say the same of the public schools? This is the true test of relative failure or success. If it were not for the activity and success of the common schools, the universities would be in a very primitive condition.' The speaker went on to say that a pseudo-aristocratic atmosphere exists in some American colleges and the fact that it is pampered is a proper charge to be leveled against American college training.

Mr. Mahanny should come to Ann Arbor and visit a great democratic university where independence is encouraged and where egotism and delusions are roughly trampled upon. Then let him take a look at the roll of graduates and size up the nearly 100 per cent of these graduates in honorable and important employment, actively taking a leading, responsible, and efficient position in the work and progress of the world. If he is a really honest investigator, it is probable that he would conclude that higher education instead of destroying the value of the lower, as his remarks imply, may be so administered and is so administered here, as to cultivate still further the valuable qualities instilled by the instruction of the common schools.

Those of our readers who contemplate visiting the World's Fair should arrange for their hotel accommodations in advance of their going, thereby saving a great expense and annoyance in looking up a suitable and reasonable hotel after their arrival. We decided to, and have made inquiry con cerning the various hotels at Chicago as to their price, rooms and location, and after careful investigation, have decided to recommend the hotel, "The Syracuse", situated at Windsor Park, at the foot of 75th st., it being near the fair grounds, partially surrounded by a beautiful grove, fronting on the shore of Lake Michigan, which contributes its cool evening breezes to refresh the tired frame after a day's jaunt, and to make sleeping easy and delightful. "The New York State Educational Journal" endorses the hotel, "The Syr-

acuse , as follows: Some time ago we promised our readers to visit Chicago and examine the hotel accommations offered with reference to recommending advance arrangements for the summer. Immediately on our return from Egypt we went to Chicago and looked over the ground carefully. We have de-cided to recommend "The Syracuse," a building erected by men we know and in whom we have confidence and which seems to combine more advantages

These requisites seem to us indispen-

(1) The hotel should be on the Lake Chicago is a hot place in summer, and only the Lake breezes will make sleep-ing at all comfortable.

It should be reached from the Exposition grounds by boat. How annoying it is to crowd into horse-cars and trains on a hot afternoon all our readers know. At Paris nine-tenths of the visitors were carried by the little

(3) The drainage should be perfect. This will be the great danger at Chicago. Hundreds of cheap buildings have been erected with cheap plumbing and cesspool reservoir. If typhoid fever does not result, it won't be the fault of the builders.

(4) There should be the quiet and the privacy of home. This is the ob-jection to the turning of school-houses into dormitories. Sight-seeing is hard work, and when the day is done the visitor should have a room of his own

to wash in and to rest in.

(5) The price should be reasonable We are satisfied that the lowest rate at which it will be possible to obtain rooms that are at all suitable is one "The Syracuse" combines all these advantages: iollar a day.

(1) It is on the Lake, fronting the shore, 300 feet from the water, where there are pavillions for bathing, boats, fishing, etc. The few rooms fronting the Lake will be as desirable as one

could wish, and all will be comfortable.
(2) The steamboat pier is directly in front of the hotel. Besides, the hotel itself is only a mile from the grounds, which can thus be reached by easy walking. This will be a great consideration, for the electric display at night, for which a million dollars has been appropriated, will be one of the important features of the fair. It is also two blocks from the electric cars, and three blocks from the station of the Illinois Central, and those wishing to

go to the city will be much surer of a seat than from the fair grounds.

(3) The rooms are all lathed and plastered, and well furnished, with woven spring mattresses. When you lock the door you are in your own castle, as much as at home. This is different enough from tents and dormitories.

TERMS.

The hotel accommodates only 400 persons, and the rooms we have selected and engaged as the best will accommodate only 200. Early application should therefore be made. If you know just when you will go, we can assign you a particular room, and give you a diagram of the hotel showing just where the room is located. If you are not ready to fix on a specific date, we can give you a contract to furnish you as good rooms as are vacant at the time you present yourself. It is better you as good rooms as are vacant at the time you present yourself. It is better, however, to engage for a fixed date.

What We Know About War

We make no pretentions about our superior knowledge of war-What we know goes but a little way in comparison with the knowledge of those who have really "been there."

What We Know About Pianos

Is a different matter. We have advanced beyond the primer of the piano business. We have the actual experience as manufacturers, jobbers and retailers. Have visited for the purpose of better informing ourselves every prominent piano factory in New York, Baltimore, Boston and Chicago. Our knowledge of pianos is more than theoretical.

Can You Ever Expect to "Know it All"

You employ the physician when sick, the dentist when you have defective teeth, the watchmaker to repair your watch-because of their knowledge. A certain amount of confidence too must be reposed in them. You trust to their knowledge judgement, experience and honesty.

Why Not Buy Your Piano the Same Way

We have at all times the Steinway, Mehlin, Chickering Bros., Ivers & Pond, Bear Iman & Gray, Braumuller and Erie Piano to show you-Each selected as the best of its class.

You have full opportunity for examination and comparison and in addition the benefit of our honest opinion and advice. Is not this an advantage worth considering when buying.

Then "Talking About Price"

A good article is worth its price-quality, especially in music goodsis of first importance. Our price is ready for your considerationwe have no doubt in its power to please.

What we want is a chance to show you our goods and to quote you our prices.

BOTH FOR \$2.00 A YEAR.

THE GREAT ILLUSTRATED MONTHLIES have in the past old for \$4.00, It was a wonder to printers how The Cosmopolitan, with its yearly 1536 pages of reading matter by the greatest writers of the world, and its 1200 illustrations by clever artists, could be furnished for \$3.00 a year. In January last it put in the most perfect magazine printing plant in the world, and now comes what is really a wonder:

WE WILL CUT THE PRICE OF THE MAGAZINE IN HALF FOR YOU!

Think of it, 128 pages of reading matter, with over 120 illustrations—a vol ume that would sell in cloth binding at \$1.00

FOR ONLY $12\frac{1}{2}$ CENTS.

which has the strongest staff of regular contributors of any existing periodical, and the ANN ARBOR REGISTER,

We will send you THE COSMOPOLITAN MAGAZINE

FOR ONE YEAR FOR ONLY \$2.00.

LITEBARY NOTE.

The July Book Buyer has portrai and biographical sketch of James Anthony Froude, the distinguished English historian, biographer, and man of letters. It will be read with interest and pleasure. Charles Scribner's Sons, New York, N. Y.

The July number of the New England Magazine has two especially attractive illustrated articles: "Mount Washington," by Julius H. Ward, which forms the opening paper, and "In the Footsteps of Jane Chester," by Oscar Fay Adams. There is the usual amount Fiction, Poetry and essays on subjects of general and current interest. New England Magazine Corporation, Boston,

With the July number, the Annals of the American Academy of Political and Social Science begins its fourth year and volume. Judging from the size and contents of the present number, the new volume will be much larger and better than those which have preceded it. The July number contains 200 pages, 149 of which are filled by the five principal papers. These are "The Progress of Economic Ideas in France," by Maurice Block, of the Journal des Economistes; "The Relation of Economie Study to Public and Private Charity." by Professor James Mayor, of the University of Toronto; "The Monetary Situation in Germany," by Professor Walter Lotz, of the University of Munich; "Taxation of Large Estates," by R. T. Colburn, Esq., of Elizabeth, N. J. and "The Use of Silver as Money in the United States," by Professor A. B. Woodford, of the School of Social Economics, New York. This number also contains a report of the eighteenth and nineteenth sessions of the Academy, Personal Notes, Book Reviews and

The Magazine of the Future.

The July Cosmopolitan will mark the most radical step ever taken in periodical literature. With that issue the magazine, unchanged in form, in fact, one of the best numbers the Cosmopolitan ever issued, will be put on sale at twelve and one-half cents per copy -\$1.50 a year. The cutting in half of a price already deemed low for an ila lustrated magazine is the result of an intention long since formed, to give to the public an illustrated monthly of the very highest class at such a price as must bring it within the reach of all persons of intellectual tastes, however limited their income. There are more than ten million readers in the United States and less than eight hundred thousand magazines are printed to supply their demands. More than four years have been spent in reaching the organization necessary for the production of The Cosmopolitan at this price,

figure hitherto undreamed of by the reading world. Each department of the work has been slowly perfected, until with the January number of this year one hundred and fifty thousand copies of the magazine were prepared upon presses and machinery of the most improved form, built with a view to producing the finest results at the very minimum of expense-the only establishment in the world, it is believed, devoted exclusively to the printing of an illustrated monthly magazine. To establish such a magazine upon such a basis at the outset was impossible. Only the rapid growth of The Cosmopolitan's editions, almost unprecedented in magazine records, has produced the conditions which make this departure from established prices possible. The Cosmopolitan promises to make the year 1893 the most brilliant in its history. No other year has seen such an array of distinguished names as will appear upon its title page during 1893. DeMaupassant, Mark Twain, | Georg Ebers, Valdez, Spielhagen, Francois Coppee, Flammarion, and Paul Heyse, are some of the authors whose work will appear for the first time during this year in the pages of The Cosmopolitan. Among the artists whose work will decorate its pages for the first time during 1893 are Laurens, Toussiant, Virge, Rochegrosse and Schwabe. William Dean Howells will be a regular contributor during 1893-94. A feature of the July number will be triple frontispieces by Rochegrosse and Guillonet.

What to Expect. Don't expect an advertisement, says Printer's Ink, to bear fruit in one night. You can't eat enough in a week to last you a year and you can't advertise on that plan either. How to Cook Green Corn.

Never put green corn into hot water The best receipt for cooking is this: First, buy good corn. Be sure that the silk at the end of each ear is brown, then open each ear, and by pressing the finger nail in one of the kernels, see that the milk flows freely. Remove the outside husks and take all the silk from the ear, leave the inside husks on, put in a kettle of cold water. To every ears put one tablespoonful of salt and three tablespoonfuls of sugar; place ket-tle on fire and let boil just ten minutes after it comes to a boil. It will then be perfect. Serve with husks on, covered

Decidedly Shaky.

A trembling hand, an uncertain step fidgetiness, indicated by restless shifting from one place or posture to anoth usually mental annoyance at unexpected noises, are among the indications of extreme nervousness. These seem trifling, but the health of men and women in this condition is "decidedly shaky." liable to be overthrown disastrously by causes which the vigor-ous might defy. To fortify the nervous system, general vigor must, through the medium of reinforced digestion, and a renewal of an impaired power of sleep ing at night, be raised to a healthful standard. A guarantee of this is Hosteter's Stomach Bitters, which re-establish es digestion, bile secretion and the basis, thus renewing that bodily equilibstrength and nerve tranquillity. kidney complaint, rheumatism, neuralgia, and as a preventive of the first attack or subsequent return of malarial disorders, this medicine is without a peer. A HOME MISSIONARY.

HIS EXPERIENCE WITH THE

OWEN ELECTRIC BELT. AN OLD MAN

SIRE TO ENLIGHTEN THE PUBLIC.

WITH PROGRESSIVE IDEAS AND HIS DE-

The winter of 1884-35 was my first experience with rheumatism. I was traveling as a home missionary, and with great difficulty and suffering I reached my appointments. It was located in my hips and back. From that time to this year of grace, 1891, I have suffered more or less under the grip of that disease. About three years later, liver complaint, and the calo-mel taken to cure it, fastened upon the walls and organs of my chest, a rheumatic

affection from which I was never wholly free, and at times even a breath was a cruelty. Yet, in a general way, my health has been as good, perhaps better than the JOSEPH ADDISON HALLOCK (Octogenarian.)

During the last days of the late year, I bought of Dr. Owen two of the Owen Electric Belts. One I have worn, the other a daughter has worn. In either case the remedial has been satisfactory. The rheumatism of my chest and hips I can no longer find. A limited case of varicocele, of more than thirty years standing, after two weeks use of the Belt, has diminished to a mere lump, and a few days later could not be found. A nasal catarrh of years had so affected the substance of the nose that a friend in jest twitted me of brandy. My nose is itself again, and other symptoms of nasal and throat catarrh are fast disappearing,

carrying my deafness of seven years with them.

I have studied electricity in its bearings upon mental and physico mental phenomena for fifty years, and have seen its wonders in these directions, and, thus prepared, my attention was easily turned to its efficiency in controlling the nerves, muscles and motions of the living, as galvanism does those of the recent dead. I have no wish to undervalue any appliance which carries a real electric current

from a genuine battery to human nerves with a gentle, a genial force; but I do wish to do my utmost to disarm public fears as to the well-ordered Electric Belts. JOSEPH ADDISON HALLOCK (Octogenarian),

'What do you mean by the 'truth?" "That the rajah's ruby was in the possession of the doctor, or rather of him and yourself, for on a certain night not long ago you sat with him in the upper room of the house with the lamp burning on the table, while you discussed what should be done with the gem, meanwhile passing it back and forth between you. I do not think you will deny that.

"I have not done so." "If you wish to know why I am so certain about it, I reply that I saw you thus engaged.

"Nevertheless he bestowed particular attention on you, for he, too, knew that you carried the rajah's ruby, and he was ready to take desperate chances to get it. Had you gone out this evening carrying it with you, you would have been as saulted somewhere in the city and robbed. But you left it in the safe at the hotel and spent the evening enjoying the "Old Homestead." Besides," he added heartily, "the service you have rendered me entitles you to what you ask. Listen, therefore, and you shall hear the story of the rajah's

THE STORY OF THE RAJAH'S RUBY. As has already been stated, the wonderful gem known as the rajah's ruby first came into prominence more than 200 years ago. Like all minerals, its age is beyond computation, but it is enough for present purposes to say that when it was carried to England by the doughty soldier whose title to its ownership it is not best to inquire into too particularly he took with it a series of superstitions that would have been incredible in these later days.

But the period named was that in which the belief in witchcraft was general, and the clergy as well as the laity cherished fancies and beliefs at which our children would laugh.

With the ruby was inclosed a writing on parchment, first engrossed in Sanscrit and afterward translated into English, to the effect that the owner of the rajah's ruby could retain possession of it only by obeying certain requirements. First of all, he must always keep it in his possession—that is, he must never deposit it in the custody of another nor anywhere except beneath his own roof. He could take it with him if he chose while journeying, but he must retain his guardianship over it. Thus the best course at his command was to place it in a strong safe in his own dwelling. That

was precisely what was done by Miss Livermore, its last owner. The invention of the false gem was an idea of old Captain Ashleigh, who served Great Britain during our Revolution. The real jewel was kept in a secret drawer in the safe, while the counterfeit vas left where a burglar, after once opsining entrance, was sure to find it.

The early British owners of the ruby ere in constant dread of a visit of emissaries from India. Overtures were made several times from different rajahs of that country for its purchase, but they were rejected, since another legend connected with the gen was that whosever parted with it for money would speedily meet with violent death.

Two attempts were made to steal it, but the vigilance of its possessors prevented success, and shortly after the close of our war for independence the ruby was brought to this country by the grandfather of Miss Livermore. When it was left to her, she inherited with it the strange myths and fancies as well as the false gem, whose purpose she fully understood.

While she shared to some extent this singular belief attaching to this jewel, she was a lady of education and deep religious convictions. She wished to cast off the chain, though not wholly able to do so. There can be no doubt that her mental worriment over its possession induced a state of nervousness which eventually reduced her to the condition of an invalid.

Thus matters stood when Dr. Maidhoff, her family physician, learned the whole truth. He was a man of strong mind and had no patience with bigotry and superstition. This led him to use his utmost influence to persuade her to disregard all the absurd injunctions she had received with the heirloom.

"It has been a curse to every one that had anything to do with it," he said. Sell it for the comfortable fortune it will bring and get rid of the pest." "But, doctor, you know the penalty,"

she said, with a smile in which there "Faugh! You do not believe any such

rubbish. "No-that is, I try not to believe it

and do not. Yet when I contemplate the step I shrink with a dread that I suppose is mostly due to my poor health." "Undoubtedly, and why, therefore, pay any heed to it?"

'I wish it had never been left to me. If I could will it to you or any one else, I

"I don't want it, but I want you to get well, which you will never do as long as you remain morbid over that. I shall give you no rest until the thing is sold and off your mind."

A third injunction, coming down from former generations, was that the owner of the rajah's ruby must never give it away or will it to another until such an act was among the last of his or her life -that is to say, while Miss Livermore was at liberty to designate by will the next owner of the gem, that owner could not receive it until the former's death. Thus, as long as the injunction was heeded, Miss Livermore must remain tied to it, for such virtually was her situ-

While the good lady was in this state of incertitude and distress, Dr. Maidhoff received two valuable allies in the persons of the niece, Miss Gilder, and her betrothed, Arthur Fairchild. They ridiculed her wealthess with such success that she was forced to the deciding point.

"I will sell it and take the chances. Heaven will not permit any harm to come to me for such an innocent deed."

It was at this juncture, while Miss Gilder was absent among her friends and Fairchild was in another section on business, that the alarming letter arrived from India, written by a person unknown to them, but who Miss Livermore instinctively felt was a friend. She sent for Dr. Maidhoff and gave him the letter. He read it through and was so angered that he tore the missive in two and flung one portion in the grate. Then, feeling that he had been too hasty, he picked up the larger part, replaced it in the envelope and shoved it into his pocket.

His first impression was that this was an attempt to terrify his patient into parting with the ruby, and he was indignant to observe that its reception had thrown her into a deplorable state. But, reasoning more clearly, he decided before the close of the day that it would be criminal on his part to disregard the warning. He did not expect the coming of the East Indians, if they came at all, for some days or weeks, and, despite the fact that they did reach Ellenville by a strange coincidence almost at the same hour as the letter, he was unaware of it.

He had allowed Detectives Manson and Simpson to believe that he knew this, and therefore was guilty of a carelessness which laid him open to suspicion, but he was called out in the country that evening and had no knowledge of what occurred until the following morning, when Martha, the servant,

came in great haste for him. He found Miss Livermore in a sad condition and in danger of death. The burglar had appeared at her bedside just as was stated and compelled her to give the combination which opened the safe. The criminal departed with the false instead of the true gem.

The effect of this midnight visit upon the doctor was more unaccountable than upon the woman. It convinced him of the utter unscrupulousness of the men that had come across the sea to secure the rajah's ruby. He was sure that, although they had been deceived by the colored glass, they would soon return to recover it and probably revenge themselves upon the woman that had de-

ceived them. Cases are not lacking where the bravest men have broken down, become "rattled," as the expression goes, and figuratively gone to pieces under a long continued nervous and mental strain. Major Chorpenning, who made the wonderful ride alone from Salt Lake City to Sacramento with the United States mail, more than 30 years ago, has related to us a similar experience. He passed the dead bodies of the five men of the previous train, all of whom had been massacred by Indians, and coolly gathering the mutilated remains gave them the best burial possible. He did this without a tremor of the nerves, though he knew he had reached the most dangerous portion of the route and saw at that time the

smoke from the signal nres of the rea men who were waiting a short distance ahead to ambush and kill him.

The brave fellow rode straight on with his two mules, on the alert for danger. He passed safely through, but late that night, when alone in the desolate solitude, broke down and wept like a child His nerve left him, and for two hours he was in a state of absolute collapse. Then his courage revived, and he

When Dr. Maidhoff learned the truth about the Sepoys, he was affected in much the same way, though he repressed all evidence of it. He became panio stricken and did that which none would have been quicker than himself to condemn at another time. The coma into which Miss Livermore sank suggested the pretense of giving out that she had really died.

"Those dusky fiends will learn of it," was his thought, "and they will be so terrified that they will hasten out of the country and never annoy us again, even though there be 100 rajahs's rubies to steal. Miss Livermore's condition is so much like death that no eye besides the professional one can know that it is a case of suspended animation. When we reach Warhampton, she will revive that is, probably she will, for she is in a sad state and is by no means certain of recovery. We will keep her in seclusion and then let her be seen at the end of a couple of weeks or so. No one will question my course, as they might do if I persisted in declaring her dead after she had come to herself again."

It will be admitted that there was considerable ingenuity in the scheme, and but for the mistake the physician made in calling in the aid of the detectives the truth would probably have remained a secret within a very narrow circle. But we repeat, except that he lost his head completely for the time, and for the opportune coms of the lady, Dr. Maidhoff would never have conceived the plan, which he condemned as soon as he had gone just too fer to recede, without placing himself in a most peculiar post-

He summened Arthur Fairchild and Evelyn Gilder to his assistance. They were dumfounded at his blunder, but since he himself admitted it they agreed, ont of consideration for him, to keep the matter a profound secret until the jewel was disposed of. Then it could be stated that Miss Livermore, on being taken to Warhampton, showed signs of returning vitality and eventually regained her health. The story would be a sensational one, but the physician's well established reputation would avert all suspicion from him.

The doctor had sent to Chief Varick while flustered over the burglary and ancertain what he ought to do. He regretted his course, but it was too late to recall it. It was believed that it would be easy to mislead the detectives, and many ingenious attempts were made to do so; but, as has been shown, the friends in this instance reckoned without their

But Miss Livermore gave way under the combined persuasion of the doctor, and her niece, and the latter's betrothed. Miss Gilder was anxious to have the business adjusted and the suspense ended. She dreaded more than any one else the work of the detectives. She was convinced that the act of Dr. Maidhoff, if brought to light, was likely to result seriously to him and would gravely compromise all. It was this conviction, shared by her

aunt, that led the latter to surrender the ruby to the physician and Fairchild with full permission to sell it. The doctor received so many callers at his house and office that he was

afraid of holding the various councils of war there. As the place most likely to be free from interruption, he went to the Livermore homestead, where certainly there was no cause to look for

Meanwhile Miss Gilder became convinced that one or both of the East Indians were in the neighborhood and that mischief was brewing. She became more nervous than her aunt had been. The story brought thither by Martha almost prostrated her, and even when she remained at the doctor's office she required him to signal to her that all was

In truth, as the reader has learned, the young lady had a truer conception of the situation than any of her friends, who were in actual danger from the Thugs

During all this time Dr. Maidhoff carried the rajah's ruby with him while making his professional rounds. He had recovered his usual pluck and insisted that this was the safest course, since no one would suspect him of lugging any surplus wealth about with him. Ah, if Wichman and Lugro had but

known that the gig of the physician, as it bobbed around the country, carried the matchless gem which had brought them thousands of miles across land and sea, they would have assailed him with the stealthy ferocity of their own jungle tigers and despoiled him of its possession

Arthur Fairchild wished to go to New York at once with the ruby, but his betrothed was in that timid, apprehensive state that she would not permit it for several days. Finally she gave her consent, believing the coast was clear. Little would she have slept during his absence had she known that one of the dreaded sepoys rode in the same car with him all the way to the metropolis, and that both were shadowing the unsuspecting young man,

Regarding Wichman and Lugro, they doubtless gave up the attempt to recover the rajah's ruby after the defeat of their last effort. Their fitness for the extraordinary part they played was proved by the consummate skill with which they prepared the letter, when the only specimen of Fairchild's writing obtainable was his signature on the register of the Astor House. They probably returned to India with little delay, for their deeds laid them open to prosecution, and they had nothing to gain and much to risk by remaining in this coun-

try.

The rajah's ruby was sold for a round sum to one of the leading jewelers in New York city, while the large diamonds formed part or the ornaments worn by Miss Gilder at her wedding,

which took place a few months later. The remarkable gem from India, we believe, found its way back to England, where it was finally settled in the possession of one of the titled families, from whom it could not be purchased for the price of a kingdom

Miss Antoinette Livermore was rid of the gem and pest at last. Despite the horrible evils that were threatened to any owner who parted with it as she had done, nothing of the kind has as yet befallen her. On the contrary, her health has steadily improved until today she is certain that she is better physically than she has been for many years.

The moral of which is that we who are not the owners of wonderful diamonds, rubies, pearls and precious stones should congratulate ourselves rather than envy those who are burdened with their possession.

THE END.

Liszt's Influence.

The influence of Liszt on the destiny of the piano was immense. I can best compare it with the revolution brought about by Victor Hugo in the mechanism of the French language. This influence was more powerful than that of Paganini in the world of the violin, because Paganini dwelt always in an inaccessible region where he alone could live while Lisat starting from the same point, deigned to descend into the practical paths where any one could follow who would take the trouble to work seriously. To play like him on the piano would be impossible. As Olga Janina said in her strang book, his fingers were not human fingers, but nothing is easier than to follow the course he marked out, and in fact every one does follow it whether he knows it or not. The great development of sonority of tone, with the means o obtaining it, which he invented, has be come the indispensable condition and very foundation of modern execution .-Century.

Total Number of Prizes for this County, 226.

County, State, and Number of Tags in each package. All charges on packages into prepaid.

READ.—SPEAR HEAD possesses more qualities of intrinsic value than any other plug tobacco produced. It is the sweetest, the toughest, the richest. SPEAR HEAD is absolutely, positively and distinctively different in flavor from any other plug tobacco. A trial will convince the most skeptical of this fact. It is the largest seller of any similar shape and style on earth, which proves that it has caught the popular taste and pleases the people. Try it, and participate in the contest for prizes. See that a TIN TAG is on every 16 content of the process of SPEAR HEAD you buy. Send in the tags, no matter how small the quantity.

Very sincerely,
