A Pointed Reply – Primary School Fund–The Inland League–A Tramp Dies–Unity Club–An Oid Paper– City Council, Etc.

A Brief but Pointed Answer.

To the Editor of the Register:

Sir: Permit me to say just a word in reply to the ridiculous questions asked by B. W. in last week's REGISTER. It will take only a few lines to give his questions all the answer they deserve. I will give my answers in the same order in which the questions were asked.

seem to be very much wrought up over the Mayor's course.

Seventh, The Mayor, advising with the city attorney, has done more to enforce the law than any other mayor we have had for years past.

Let B. W. just wait until the Mayor's year is up and I believe that even he will admit that Prof. Thompson has made a model chief executive. Respectfully yours,

Through the kindness of Mrs. C. A. Wright, of 97 S. State-st, THE REGIS-TER was recently permitted to examine a copy of "The New Hampshire Gazette" published at Portsmouth, Oct. 7, 1756. This particular copy is the property of Master Fred Wright and was the gift of his aunt, Mrs. Josephine White. In introducing himself the editor says: "Upon the Encouragement given by a Number of Subscribers agreeable to printed Proposals, I now publish the Weekly Gazette for the Province of New Hampshire; depending upon the Favor of all Gentlemen who are Friends to Learning, Religion, and Liberty to countenance my Undertaking, as this is the beginning of Printing in this Province so that I may go on cheerfully and continue this Paper in a useful and entertaining Manner." The paper which consists of four pages 6 x 7 inches is printed in type about the size of our long primer, and consists mainly of war news, relating the various movements of the French and English armies. The paper printed on Brown, of Cleveland, Ohio, a noted Oct.7 had one dispatch from Boston, dated Oct. 4 and one from New York under date of Sept. 27, which the editor seem- night on "Child Characters of Dicked to think was decicedly recent news. Let the word Calvinism be rightly understood. It has come to indicate

merely a certain notion of the Divine Sovereignty. But this was only a single Calvinistic idea, and but a mere fragment of the system. James Arminius of Holland, still a Calvinist, did not agree with this view of Calvin. The Metho-

dists, organized by John Wesley, protested against it, yet they sprang out of the great body of the English and American Calvinists. Still more to my purpose, the Calvinists, having in the strict sense neither priest nor king, formed even in France a kind of rudimentary

republic. They were reproachfully called Huguenots, which word is but the German Eidgenossen, with such change as a French tongue would put upon it. It was the name given to the Swiss confederated cantons. To call the Calvinists Huguenots, therefore, was to call them confederate republicans,

Discretion.

Two burglars broke into the house of a merchant who was generally considered to be very rich. After herculean efforts they managed to open the safe, but who can describe their disappointment when they found that it was empty and all their labor in vain? At that moment the master of the house, awakened by the noise, appeared on the scene. For a moment all three stood there as if turned into stone. The merchant was the first to come to himself.

How to solve the silver question would become a much easier problem if more works were published of the nature of Professor A. B. Woodford's monograph on "Use of Silver as Money in the United States, "* which has recently been issued by the American Academy of Political and Social Science. It is an historical sketech and contains the best presentation of the actual coinage policy of the United States which has been made. The portions which will perhaps prove most nteresting are where Professor Woodford explains that cause which led to

the passage of the Act of 1873, and where he explains the origin of the modern bi-metallic controversy. There is an appendix to the work which contains a number of tables and charts, and gives much information that could not well be incorporated in the monograph itself.

STATE OF TRADE.

Business Is Irregular and the Improvement Slow.

32r Heavy Load Commerce Has to Drag in Climbing Up Again-Not Much Specslation-Business Failures and Bank Statistics.

WEEKLY REVIEW.

NEW YORK, Nov. 18.-R. G. Dun & Co.'s weekly review of trade says:

Basiness is gaining, but it is a constant emplaint that the improvement is slow. This is because very few realize how heavy a load basiness has to drag after it in climbing up again Legislative uncertainties weigh heavily, but other loads many overlook. The past de-pression, with trading and manufacturing fail-urns involving more than \$235,000,000 in mine months, besides banking failures of enor-mena liabilities and failures of railway and other forms, involve conthunal embarrassments wher firms, involve continual embarrassments which men are prone to forget. There has been great encouragement during the last week in great encouragement during the last week in the fact that November payments are far mere satisfactory than was feared, and yet the extensions of the month would have memed alarming in other years. Merchants whe collect part of the amount due are re-joined, but their buying power is not as large as usual. The extraordinary shrinkinge in parthases for consumption, if lessening, has will made it impossible for many firms to go on as before, and the largest failure of the last week, that of the Thurber-Whyland com-many. Ebustrates embarrassments which canmust week, that of the thursdriving and com-pany, iRostrates embarrassments which can-make terminated in a week or a month. Mon-enary difficulties no longer hinder. It is true the treasury cash has fallen to \$97,385,595, of which \$55,400,801 was in gold, but there is no manh alarm as there was when the gold reserve went below \$100,000,000. Business is not lear-mean the treasury and it is well that it is not

for en the treasury and it is well that it is not. "It has not been much of a week for specula tion, and that, perhaps, is encouraging. Stocks have slightly declined-railroads an average of 33 censs per share and trusts \$1.25 per share, the grangers and some of the trusts being especially weak.

oduce markets weakness was the rule. "in produce markets weakness was the rule, and yet the yielding was but small. Wheat is quoted a full cent weaker. Corn is one cent hower, with larger receipts, Cotton, with larger receipts, is an eighth lower. Pork prod-weaks are lower, with large selling, and coffee is the been set. miso lower.

"The condition of industries improves, but ing wisely wait the revival of purchases by customers. Twenty-four works of all kinds have wholly or in part resumed against four-ties stosing, yet less than half the iron work-ing power is active, and out of ninety-nine macken works at the east only ten are workmy full time, while forty-five were shut Novem-

"The failures for the week have been 324 in She United. States, against 205 last year, and 35 im Canada, against 35 last year.

Bradstreet's says:

"General trade has been irregular without actual increase in volume. At the south im-provement in demand is noted in leading Tenpeorement in demand is noted in leading Ten-messee and Texas cities. Heavy sale of south-ern pig iron and the breaking of the drought in the southwest are features. Atlantic meakoard and gulf state cities, with ex-ceptions, report trade very quiet, funds membranes permitting stocks to run steadily down. Improved collections in Georgia with-ers special notice. The cold wave has stim-mated demand for seasonable goods at Cincin-mati, Louisville, Chicago, St. Louis, Omnha and Bealmin, where unseasonable mild weather has mat, housened, the age, St hous, omana and Dulnth, where unseasonable mild weather has caused depression. Country merchants at the westare buying much less than a year ago, and fewer holiday novelties are being sold. Demand for nalls is being checked because of the out from \$29 to \$21 in price and the outlook for further reduction. At eastern cities there is a masse hopeful feeling, but no improvement in demand, except within a day or two, for cloth-flag, woolens and shoes.

"Out of 597 bank suspensions within ten mmenths 25 per cent were national, 37 per cent state and 35 per cent private banks. Out of SMM,042,000 liabilities of all suspended banks maxional banks had 40 per cent, state 22 and private 13 per cent. Only 30 per cent of all sus-pendes banks resumed by November 1, 50 per cent. of suspended national banks have re-cepted 25 per cent of the state and 17 per cent. of the private banks.

Complications with Russia.

SAN FRANCISCO, Nov. 20. – The steamship Australia, from Honolulu, reached here at 8 a. m. She failed to bring the expected news of the restoration of Queen Liliuokalani to the Hawaiian throne, Minister Willis having for some reason failed to pre sent the secret manifesto of the United States government to President Dole. The United Press correspondent at Honolulu, writing under date of November 11, says that President Dole received United States Minister Albert S. Willis on the 6th. Mr. Willis accompanied the presentation of his letter of credence with a brief address, of which the following are the most important expressions

The Minister's Address.

The Minister's Address. "Aside from the geographical poximity and consequent preponderating commercial inter-ests which center here, the present advanced civilization and Christianization of your people, together with your enlightened course of law, stand to-day as ben-eficial monuments of American zeal, courage and intelligence. It is not sur-prising, therefore, that the United States were the first to recognize the independence of the Hawaiian islands and to welcome them into the great family of free, equal and sovereign nations; nor is it surprising that this historie tie has been strengthened from year to year by important mutual reciprocities and agreethe has been strengthened from year to year by important mutual reciprocities and agree-ments alike honorable and advantageous to both governments. Invoking that spurit of friendship and hospitality which has ever been the shield and sword of this country. This law provided for the silver dollars of 4121% grains and declared that "the dollars, half-dollars, quarter-dollars, dimes and half-dimes shall be legal tenders according to their nominal value for any sums whatever."

Death in a Head-End Collision.

The Pittsburgh & Lake Angelica NEW YORK, Nov. 20.-There was a mine at Ishpeming, employing 500 men, head-end collision shortly before 1 has suspended work for the winter. The miners struck for higher wages, o'clock Sunday morning between east and west-bound freight trains on the Pennsylvania railroad at South Broad Stonewall J. de France was disstreet coal chutes, Newark. David Green, of Philaddelphia, engineer of charged at Detroit on an abduction one of the trains, was instantly killed. The engineer of the other train and the two firemen were severely injured.

OUIT WORK. Employes of Every Branch of the Lehigh Valley Service Strike.

WILKESBABRE, Pa., Nov. 20.-All the employes of the Lehigh Valley railway went out on a strike at 10:45 o'clock Saturday night. The railroad officials have notified the sheriff to be in readiness, as they may need his assistance. The officials say they can get all the men they want and can fill the places . of the strikers in a few hours. The strike involves more than 95 per cent. of the employes, including engineers, firemen, trainmen and telegraph operators.

The immediate cause of the strike is the company's refusal to recognize any committee or body of men as the representative of the employes of the road. After repeated at-tempts made by the grand officers of the several railway organizations to gain audiences with the officials of the road, and after a subcommittee from the general committee sitting at the Binham house in this city composed of bona fide employes of the road has failed to secure recognition from the road's highest representative in this city, First Vice President Voorhees, a further consultation was held among the grand officers of the organized train workers, and the order to quit work was telegraphed to all the employes along the line of the road. The result was a general strike was declared.

The Deficit in the Government Treasury

Daily Increases. WASHINGTON, Nov. 17.-The treas-ury's available cash balance was still further depleted Thursday to the extent of \$700,000. The loss was, however, entirely in the currency balance, which was reduced over \$1,000,000. The net gold reserve increased \$500,000 Thursday. The net balance stands at \$97,388,595, of which \$85,490,891 is the gold resurve. The receipts of the government for this month are not as heavy as was hoped, and the deficit in the government's account shows already a loss of nearly \$5,000,000. The receipts have been \$14,540,000 and the expenditures \$19,365,000. This makes the total deficit so far this fiscal year \$29,000,000, the proportional loss this month being much greater than for the preceding four months.

GUATEMALA REFORMS.

Proclamation Relieving the Laboring Classes from Slavery.

WASHINGTON, Nov. 21. - President Barrios, of Guatemala, has published a decree which is, in fact, a proclamation of emancipation of the laboring classes from slavery. It has been the custom of the government, through its military agents, to take forcible possession of the persons of the lower classes at any and all times, sending them to work where they pleased. It often happened that the voluntary laborers of a small planter would be taken away and sent to a more powerful rival. Henry C. Stuart, consul general at Guatemala, reports that the president's decree is to Corner of Detroit and Catherine-sts. go into effect March 15, 1894.

10. Learn as much as you can about men and

11. For the sake of forming a good natural style and acquiring command of language, write poetry.

Vertical Handwriting.

Professor Joseph B. Witherbee, writing in The Popular Science Monthly, calls for universal reform in penmanship. He says the demand among business men now is for a style of penmanship that can be written rapidly and that can be easily read. The present fashion, with its sloping letters, is so Thus, with row upon row of steel post far from meeting these requirements and girder, the skeleton is built, until it that commercial firms complain boys reaches any height desired. Then the now do not begin to write so well as the boys of a generation ago did.

The kind of hand that will fill the bill any direction. He claims that this is of house are very great. the natural style, and that the slanting chirography is only obtained after long and painful effort on the part of the pupil. The vertical handwriting is much more easily read than the sloping one, just as the plain letters of ordinary print are more easily read than italics.

In England the reform has so far progressed that the civil service examiners require the upright writing on the part of applicants and will accept no other. This is on account of its greater legibility. Vertical style copybooks have already been published in England, and on the whole we may look upon this as the handwriting of the future.

Portable Garbage Furnaces.

In its intervals of whacking the silver men over the head the Chicago Tribune gets in some valiant work for smoke prevention and sanitation in the Windy City. It has lately discovered a perambulating garbage crematory, which seems to fill a long felt want. This furnace on wheels is hauled by two horses from fees house to house, receiving at each the scraps of vegetable and animal refuse thrust into a furnace, which consumes

as it travels. The right way to dispose of garbage,

seems desirable. The machine is divided

into three compartments. In one of

these the refuse is dried; in another it

is baked. The whole receptacle is 8

feet long and 41 feet wide. The fuel

used is kerosene. One of the savings ef-

fected is that of cartage for the refuse.

This amounts to the cost of 15 or 20

wagons daily, it is claimed, vehicles

which would otherwise be employed in

gathering the garbage up and hauling it

Another Brooklyn couple have re- posed. vealed the domestic unhappiness which, like a worm in the bud, preyed upon their souls. It was Schoolmaster Priddy and his wife. Of course all their mutual friends who read their sad story are very, very sorry that the wicked newspapers will publish unpleasant stories. Of course!

The trouble seems to be that Schoolmaster Priddy strove to enforce pedagogic methods in the domestic domain, and it would not work. He considered himself as much the moral head of Mrs. Priddy as if she had been one of his pupils. She said he flew into rages and treated her cruelly, even to the extent of administering that corporal punishment still allowed in moderation in some public schools. She was of the opinion that he should pay for thus bestowing on her his moral admonitions, so sued for a separation, alimony and counsel

Priddy, being brought to book, denied the cruelty. His wife was vain and from the kitchen. The mass is then frivolous, he said. She absolutely would not obey him, which was sad indeed. Not only she refused to obey him, but she was inordinately fond of dancing when mankind are civilized enough, will and other amusements outside of her be to use it for the enrichment of the home-that, too, though she was 50 years soil. But until that day the best thing old. One would think that with such a to do with it will certainly be to burn delightful companion as Priddy in the it, and the perambulating crematory house no well regulated wife would ever want to set foot outdoors. But women are queer creatures.

Do Your Work Well.

Half the people in this life make failcultivated the habit of doing small things well. In his secret heart probably no man thinks his ability has ever been recognized at its true worth. He is employed at small tasks, working for small pay, when to his mind he ought to be doing great things, getting high wages. Nine times out of ten, perhaps, the man who thinks this neglects in consequence the small, humble task he is set to do. He despises the business that brings him bread. He gets only cheap wages; therefore he will give cheap work. He is discontented, he is unhappy, he is ready to strike, change his business or even to slight his tasks to the extent of cheating his employer as far az charged. By and by he does get himself discharged. Then he rails at fate

The Silver Fight.

Not since the war has there been engendered in this country so much bitterness of feeling as has been aroused by the silver question. Even as then, states, families, lifelong friends, are divided among themselves. The eastern states have in general little conception of how desperately in earnest the common people of the west and south are in this matter. It seems really a fight of the rural districts against the large cities, and again a contest of the west and south against the east.

While the senators of Tennessee were fighting against repeal, the business men of Memphis sent to congress a great petition asking that repeal be passed forthwith. Chicago manufacturing and commercial firms were among those petitioning for repeal. When they learned this, the trades assembly of Denver resolved forthwith to boycott the firms that demanded repeal.

The silver bullion which, under the Sherman law, the government has been buying annually amounts to within a small fraction of enough to coin into 78,000,000 silver dollars. For this amount of silver, purchasing at the market rates. the government pays at present \$50,000,-000 a year. It therefore has left, after paying for the bullion, enough to make 20,000,000 silver dollars more. This left over bullion is called in coinage parlance "seigniorage." The compromise on which the senate majority so nearly agreedthen split-provided that all this seigniorage should be coined and placed in the United States treasury.

There are at least two great regions in which Christee are wanted and welcomed. They are Central and South America. A company in San Francisco has contracted to supply 30,000 Chinese laborers to planters in Central and South American states. Another contract made by the same company binds it to supply 10,000 Japanese and Chinese as agricultural laborers in Peru. The latter contract was openly made with the Peruvian consul general at San Francisco. Some nations have not our little prejudice against contract labor.

Even the fires have been something unprecedented in this record breaking year of 1893. During its first nine months losses by fire were \$26,840,000 greater than for the same time in 1892. In some cases payments on fire losses have broken up insurance companies. Not less than 12 of these companies will go out of business at the beginning of 1894, because of bad luck in 1893.

Nobody will grudge to Charles W. Ferris the \$260,000 clear profit which his great wheel has made at Chicago. A good share of the money will go into Ferris' own pocket, one may hope. The wheel had first to clear its own cost (\$300,000), then to pay the fair authorities 50 per cent of the receipts. When it is remembered that the great revolving circle has done all this and yet paid the profit mentioned, one may guess at the business it did.

Year by year the time is cut down by ocean steamers in their passage across the water. If an outsider tries to ascertain how it is done, he finds that it is all a mystery of triple expansion engines, high, low and intermediate, double ended boilers set in batteries of six, twin screws working through apertures in the stern frame and smoke funnels 120 feet high and 21 fost in diameter.

A prominent New York city paper has become so English that it headed a recent dispatch "Lifts For the Queen" instead of using the customary Yankee word "elevator." Perhaps it will be making its clothing advertisers say "topcoat" instead of overcoat next. The New York dudes already call it "topcoat.'

The living of each Trappist probably costs no more than sixpence a day to the community. Assuming that the money brought into the common fund by those who have a private fortune-the fathers, as a rule, are men of some independent means-covers the establishment expenses, and the taxation imposed by the state, there must remain a considerable profit on the work of each individual, whether he labors in the fields or in the dairy and cheeserooms, or concerns himself with the sales and the accounts, or, like the porter at the gate, tests with an instrument the richness of the milk that is brought in by the peasants, lest they who have been befriended by the monks in sickness and penury should steal from them in return.

Origin of the Peach.

Nothing is now more universally accepted than the fact that the peach is an improved variety of the almond. The almond has a thin shell around the the new birth as we have seen, and by the word comes the assurance of salvation (1 John v, 11-13). Our part is to meekly re-ceive the word. To this end we must sim-ply have done with all iniquity, cleanse ourselves from all filthiness of the flesh and spirit and find perfect holiness in the fear of the Lord (II Cor. vii, 1; Heb. xii, 1, 2). 22. "But be ye doers of the word and not hearers only, deceiving your own selves." Jesus Himself said, "Not every one that saith unto me Lord, Lord, shall enter into stone, which splits open and shows the stone when mature. This outer skin has simply become fleshy in the peach, so that it is all that gives it its specific character. It seems now clear from investigation in the history of ancient Babylon that in their gardens, nearly 4,000 years ago, the peach was cultivated then as it now is.

It must have been many years before saith unto me, Lord, Lord, shall enter into the kingdom of heaven, but he that doeth this that the peach was improved from the almond, and this fact goes to show the great antiquity of the fruit. Possibly

"But whose looketh into the perfect law of liberty and vontinueth therein, he being not a forgetful hearer, but a doer of the work, this man shall be blessed in his deed." The layer in the tabernacle at which the priests washed their hands and feet is suggestive of the word of God by feet is suggestive of the word of God by CATTLE in good condi-cxix, 9), and it was made out of the looking glasses of the women (Ex. xxxviii, 8). In stead of looking at ourselves, we are to look at Him who is revealed to us in the word

of God. 20. "If any man among you seem to be religious and bridleth not his tongue, but religious in his relideceiveth his own heart, this man's reli-gion is vain." The third chapter is a discourse upon this little unruly member which ofttimes works so much mischief. The tongue is harder to manage than horses or wild beasts or serpents, but al-though no man can tame it God can, for the things which are impossible with men are possible with God, and there is nothing too hard for Him (Math. xiv, 26; Jer.

xxxii, 17). 27. "Pure religion and undefiled before God and the Father is this, to visit the fa-therless and widows in their affliction and to keep himself unspotted from the world." The religion that is manifest in talk, how-ever good, and is not accompanied by a consistent life is vain. The church member whose tongue is given to slander and backbiting is worse than vain and is heaping up torment for himself. But that Chrisup torment for himself. But that Caris-tian who, constrained by the love of Christ, goes about doing good, making the widow's heart to sing for joy (Job xxix, 13), is glori-fying God and helpful to men whether they say much or little. See Math. v, 16; I Cor. xv, 58; Titus iii, 8; Rom. xii, 1, 2.

gardening in some respects, at least so far as it relates to many of our cultivated fruits, was as far advanced 6,000 or 8,000 or perhaps 10,000 years back as it is to-day.

Phœnicians, many thousands of years ago, as is proved by the records, had in their gardensalmonds, apricots, bananas, citrons, figs, grapes, olives, peaches, pomegranates; and even sugar cane was in extensive cultivation. Certainly this shows how far advanced these nations were in garden culture many years ago. -Detroit Free Press.

HOW CERTAIN WELL KNOWN PEOPLE LOCKED IN THEIR YOUTH.

Physiognomists Will Be Interested In These Pictures of Murat Halstead, Mrs. Cleveland, William L. Wilson and Miss Frances Willard Taken In Early Life.

The interest that people manifest in the happenings of the childhood and youth of famous men and women is the same in kind, if not in degree, as that which leads to the treasuring in many an old fashioned bureau drawer of primitive daguerreotypes and old tintypes kept as mementos of vanished days. The photographer was not necessarily an artist then, and the pose of his subjects was frequently an awkward if not an ungainly one, but there is generally some one who, gazing on the well re-membered lineaments, can see in the picture a beauty not patent to other eyes and who would not exchange the picture for the work of any artist of eminence depicting some other woman's child. Out of just such treasuries come just

People like to study these pictures just as they like to read details of the early sion at New Wilmington and is a leadas they like to read details of the early life of the subjects of biographies, with some latent idea that "the child is father" which he has devoted himself since the of the man" and that in the youthful first discovery of the wells. He bears a features, as in the early traits, they can striking resemblance to Governor Mcdiscover the budding promise of future

It is easier to discover this promise, however, after the subject of the picture or biography has become well known, for even the expert physiognomist, though he may detect the innate greatness in the youthful countenance, cannot be certain of the direction in which it will manifest itself in after years. Murat Halstead, the great journalist, for instance, judged by a picture of him taken during his early college days, should have been a poet rather than a man of affairs. Yet his genius did not manifest

itself in that direction, if the popular notions about poets are correct ones. It may be that the fearlessness, earnestness, generos. ity and speculative thoughtfulness shown in the picture have been more happily applied in the ca-

A PATRON OF ART.

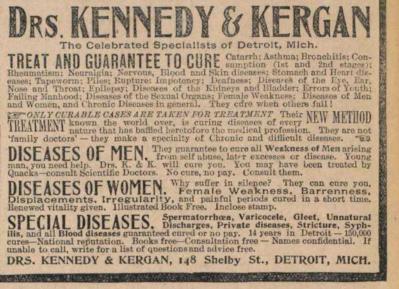

Frederick Layton's Contribution to the Public Institutions of Milwaukee. The Layton Art gallery in Milwaukee is a handsome structure and contains many rare, costly and beautiful works of art. It was given to the city, completely built, equipped and endowed, by Frederick Layton at a cost of \$265,000, estimated to be half the amount of his fortune at the time of the donation. But his generosity did not stop there. He has continued to present pictures to the gallery ever since, and never makes a trip abroad, though he goes frequently, without bringing back one or mere paintings for the adornment of its walls. He is a prominent figure at all the great art sales both in America and Europe and his taste and judgment are considered excellent by artists and connois-seurs. The result is that the Cream City has an art gallery of which she is

justifiably proud. Mr. Layton was born in England, but

Nervous Debility and Catarrh Cured. Thomas Minchin says: "I was reduced to a nervous wreck—only weighed 118 pounds. The result of early abuse was the cause. I had the following symptoms: Miserable mentally and physically, melanchola, nerv-ousness, weakness, specks before the eyes, dizzy, poor memary, paplintion of the heart, flushing, cold hands and feet, weak back, dreams and losses at night, tired in the morning, pimples on the face, loss of ambition, burning sensation, kidneys weak etc. Doctors could not care me; but Drs. Kennedy & Kergan by their New Method Treatment, cured me in a few weeks. I weigh now 170 pounds. It is three years since I have taken their treatment."

Blood Disease and Dyspepsia Cured. Blood Discase and Dyspepsia Cured. Major Simfield says: "I had Dyspepsia and Catarrh of the Stomach for many years. To make matters worse I contract-ed a Constitutional Blood Discase. My homes ached. Blotches on the skin looked horrible. I tried sixteen doctors in all, A friend recommended Drs. Kennedy & Kergan. I began their New Method Treat-ment and in a few weeks was a new man with renewed life and ambition. I can-not say too much for those scientific doc-tors who have been in Detroit for four-teon years. I conversed with hundreds of patients in their offices who were being cured for different diseases. I recommend them as honest and reliable Physicians."

A picture of William L. Wilson of West Virginia at the age of 9 years should have been indicative of his future great-ness, for he confesses that his earliest ambition was to be a lawyer and member of congress. That his membership should include five successive terms and the chairmanship of the ways and means committee probably was not specified in boyish dreams, nor is it likely that his ambition then considered the possibility of the presidency of the West Virginia university or the regency of the Smith-sonian, which have since fallen to has Personally Mr. Layton is one of the iot. WOMAN'S WORLD.

LUCY STONE'S NAME ON THE LIST OF ILLUSTRIOUS AMERICANS.

Fields In Which Women Are Rapidly Pushing Forward--Seasonable Suggestions For Homemakers-Interesting Personals About Women.

This distinguished woman died at Boston on Wednesday at the age of 75 years. As a pioneer in the movement for the legal and political elevation of women she had lived through ridicule, obloquy and even persecution, until at last she was honored and reverenced as the heroine of a great, beneficent and actually accomplished revolution.

The young people of this generation cannot properly appreciate the persis-tent courage displayed by Lucy Stone and her sister women's rights agitators when they started out in that movement 40 years ago. All the prejudices of society were against them. They were looked upon as monsters, as women who had unsexed themselves and as enemies of every conservative social institution. They were jeered, hooted, mobbed and insulted. Lucy Stone was a name of derision. She was despised and objurgated. The sight of a woman as a speaker on a public platform or as an officer of a public meeting provoked astonishment and contempt. At this time, when every right advocated by Lucy Stone is granted to women and is exercised by them as a matter of course, such unreasonable and tumultuous opposition at a period so recent seems inconceivable.

Complete woman suffrage exists in only the two states of Kansas and Wyoming, but in 32 states of the Union some degree of woman suffrage is allowed, and in all of them women can have every political privilege on an entire equality with men whenever they ask for it, and they will in no wise suffer either in masculine reverence and admiration or in public estimation because they make the demand. Every legal right sought by Lucy Stone has been granted to women. They are even treated with partiality by the laws, as compared with men. Their individuality is respected. It is not lost in marriage.

Every avenue of activity is open to them, and they can pursue it without reproach or criticism-without even attracting attention because of their innovation. They are as free as men to earn their living in any lawful way they please. They are not debarred by any social prejudice simply because they are women from following any honorable career, public or private, which they may desire. They are debarred only by the natural physical limitations which shut them out from employments requiring great strength and endurance.

Lucy Stone's name must be enrolled on the list of illustrious Americans .-New York Sun.

Vassar Students' Ald Society.

A scholarship of \$200 is offered by the Vassar Students' Aid society to the student passing the best examination for admission to the freshman class of Vassar college, the examinations to be held in June, 1894.

This scholarship covers one-half of all charges made by Vassar college for one year's board and tuition. It is offered as a loan, not as a gift, but no interest is asked, and no date of payment is fixed.

Examinations will be held in Chicago, Denver, Cleveland, Cincinnati, St. Louis, Washington, Louisville, Detroit, Omaha, San Francisco, and, if necessary, arrangements may be made for examinations in other localities.

or seven pies, and will, if set on a pantry shelf, take up less room than two pies would. It may be nailed to the wall and thus utilize space otherwise wasted, or it might be hung in the cellar or cellarway. A stout strap nailed to the top will be convenient in carrying it from place to place, if it is not stationary. Instead of hinging one side of the box on for a door, it would be well to make a frame to fit and cover it with wire netting and hinge this on for a door .--Housekeeper.

Handsome Garter Clasps.

Garter clasps are really work: of art in these days. They flash as many jew-els as the pendant which milady wears suspended from her throat. The latest novelty is a Roman gold snake wound up in a flat coil, with its head thrust out in an angry manner for the special purpose of displaying the brilliancy of its diamond eye. The garter to which it is attached is a wide piece of black silk elastic. A new set of silver garter clasps are heart shaped, framed in turquoise. The garter itself matches the color of the stone. The sensible woman clings persistently to the side elastics. In coloring they are as gay as her fancy dictates, and the safety pin and fastenings are in sterling silver .- New York Advertiser.

A Busy English Woman.

Miss May Abraham, the first woman factory inspector in England, began with a private secretaryship to Lady Dilke, where she obtained an insight into studies of practical economics. Next she became honorary treasurer of the Woman's Trades Union league, and in her official capacity visited all the industries where women were combining to protect their interest. Seeing the great need of legislation, she went at the head of deputations to the home secretary. She organized and addressed a great labor demonstration in Hyde park. As inspector she has been thoroughly investigating some of the most dangerous industries, with a view to remedying their worst features .- London Letter,

A Wail From Canada.

Women in France take charge of newspaper stands and are constantly employed in counting houses. At Havre the ticket office is in charge of a woman. In Canada nearly all classes of clerical work are rapidly passing into the hands of women. Two young women now enter the civil service at Ottawa to one young man. Mark the result. Shops and offices are all but closed to young Bright young fellows are forced men. to toil for long hours, often at night, for the munificent salary of \$15 a month. Marriages are on the decrease in proportion to the population—a most lament-able result, to be seriously considered by all women earning their own livelihood. -Canadian Exchange.

Don't Polish Your Nails.

If you want to be quite up to date don't polish your finger nails any more It isn't considered good style to have them shine as though they had just been dipped in the butter. And leave it to nature to tint them, which she will do quite sufficiently if you have any good, healthy blood in your veins. The pink salves and powder and the polishing are meretricious and in bad taste, and were invented by the manicures to make people believe they were getting something for their money when they sat for an hour letting a young woman fuss over their hands and do what they could just as well have done for themselves in half the time and at no expense.-Chicago Tribune.

A Woman's Device.

A trunk that can be elevated to a desired height for convenience in packing and unpacking is the recent invention of a Philadelphia woman. It will appeal to all persons who travel, as it completely obviates the necessity of bending over into a back breaking position and is most easily operated. The inventor, Mrs. Elizabeth R. Palmer, says that she originated the idea while recovering from a severe illness that was wholly the result of a hard day's packing.

Mrs. Dr. Beecher's Sentiments.

Dr. A. M. Beecher, a woman physician of Newtonville, Mass., is a cousin of Henry Ward Beecher, and has the typical Beecher face and, it may be added, the typical Beecher straightforwardness. Recently before a club, in the course of an address, Dr. Beecher created a decided sensation by putting herself on record with the opinion: "No woman who has the spirit or instinct of motherhood can fail to mother something. Better a pet dog than nothing at all."

Helping One Another.

Miss Sallie Lou Brett of Thomaston has been elected the beneficiary of the Georgia Weekly Press association at the State Industrial school at Milledgeville. Miss Ellen Dortch of the Milledgeville Chronicle proposed at the last meeting the plan of giving \$130 from the treasury of the association to assist a deserving girl. The beneficiary is to refund the money when she has passed through the school, and it will then be used to help some other girl.

A Woman Doctor of Divinity.

The Rev. Augusta I. Chapin, the first woman doctor of divinity, marched in the opening procession of the parliament of religions, which was headed by Car dinal Gibbons in his scarlet robes. Close ly following the cardinal came Mrs. Pot ter Palmer and Mrs. Charles Hewstin of Chicago, a city where Catholic women now enjoy the greatest publicity in work such as Protestant women have for some years been free to choose.—Philadelphia Ledger.

A VIVID DREAM.

A Passenger Kicked Out a Sleeper Window and Threw Himself to the Ground.

A young business man of Minneapolis bought a furnace and had it set up on Saturday. Yesterday he worked all day showing his wife how to run it so she would not burn the house down, and last evening took a sleeper for St. Louis. Near Fulton he had a vivid dream.

He thought his house was afire and his family was locked up inside. With yells of desperation which fairly froze the blood of the other passengers in the sleeper, he kicked in the door and found the floor burned away, his wife and everything in the house cremated, and he himself landed in the cellar with a heavy thud. The blow awoke him, and picking himself up he found himself by

No Buttons.

An idle observer of "trifles light as air," in a walk down Chestnut street recently, made a study of the various methods that women make use of in fastening the backs of their skirts, and with these results: From Broad street to Eighth 64 cases were encountered, and of this number 6 had regular hooks and eyes, 39 declared in favor of the common pin, and in 32 instances the pin held, while in the remaining 7 it dangled uselessly; 8 made no attempt to solve the problem, but just trusted to luck; 3 used black hatpins, woven in and out with great-skill; 14 impressed the safety pin into service, black ones and small; 2 utilized the ever convenient hairpin; 1 pinched the edges together with a clasp, and another used the gold pin of what was apparently a brooch on the inside of the dress. A curious fact was that not one used a button .- Philadelphia Record.

Happiness Begets Cleverness.

It should never be forgotten that the happier a child is the cleverer he will be. This is not only because in a state of happiness the mind is free and at liberty for the exercise of its faculties instead of spending its thoughts and energies in brooding over troubles, but also because the action of the brain is stronger when the frame is in a state of hilarity; the ideas are more clear; impressions of outward objects are more vivid, and the memory will not let them slip.

This is reason enough for the mother to take some care that she is the cheerful guide and comforter of her child. If she is anxious or fatigued, she will exercise some control over herself and speak cheerfully and try to enter freely into the subject of the moment; to meet the child's mind, in short, instead of making him sink for want of companionship.-Exchange.

Plucky Kansas Women.

The Sixth District Equal Suffrage association has voted to hold a convention in Osborne this fall. A vast amount of speaking must be done in the 13 months that remain before the amendment is voted upon, and it is designed to press into the service all the home talent, both men and women, who have any gift in that direction. Almost any woman can tell why she wants to vote, and most men can find words to assent to the propriety and justice of the demand women are making for the ballot. Even the children can recite and sing for it. "Neither delay nor rest" should be our motto till the polls close in 1894 .- Lincoln (Kan.) Beacon.

Bostonese.

The typical Bostonese young women are presumably making up their programmes for the coming season. What with for the coming season. morning lectures and readings, club and social teas, house musicales and charity sales for the afternoon, and theater, concert, opera and party for the evening, the young woman of the period has a busy time of it from November to May. Dante and Browning rather lead Shake speare, it appears, in the number of classes and clubs whose purpose is the elucidation of the obscure. Browning and Dante, it is said, stand for culture and are, in a way, safe. Put them down, therefore, young ladies, on the list.-Boston Herald.

Mrs. Harriet J. Bodge, the new chap lain of the national department Woman's Relief corps of the Grand Army of the Republic, who was installed at Indianapolis, is the wife of George R. Bodge of Hartford. She was department president of the Connecticut corps for two years, completing the second term last spring, when she was succeeded by Mrs. Augusta Hammond of Rockville, wife of President A. Park Hammond of the First National bank in that city. Mrs. Bodge is a native of Massachusetts, but has spent most of her life in Hartford .-Exchange.

A Window Garden.

Take a large "waiter," make a mound of leaf mold and carefully plant the ferns, arbutus, violets, hepaticas and other things, finishing the surface with mosses and placing running evergreen around the edges. Sprinkle and set on a table at the northwest window. Many happy hours may be spent watching that bit of green during cold, stormy days, when it is unsafe to go out of doors, and

the side of the railroad track. Glancing about him, expecting to see the train a wreck and the other passengers killed, he saw in the starlight his train vanishing in the distance. He had actually kicked out the double window of his berth with his bare feet and thrown himself feet first through the window to the ground while the train was running 25 miles an hour, and was unhurt, save three cuts on his left leg, caused by the broken glass.

The passengers notified the conductor, and when the train was backed they found the man walking to meet it. He was clad only in his nightclothes. It was almost impossible to believe his story, but his condition, and the deserted berth containing his clothes, and the broken window confirmed it .- Moline (Ills.) Cor. St. Louis Globe-Democrat.

A Curious Will Contest.

A curious will contest, according to Paris papers, is about to be tried in the Seine courts. Five years ago a Russian princess died, leaving a large fortune. There was great surprise among her relatives when the testament was opened. By one of its clauses she left 5,000,000 francs to the person who would remain a year in the chapel to be erected above her grave in the Fere la Chaise. The body of the princess, according to the legendary report, lies in a crystal coffin in a wonderful state of preservation. No one of her relatives has been able to remain longer than two or three days in the chapel. What will become of the 5,000,000 francs is the question.

The Comet Has a Short Tall.

Professor Brooks of the Smith observatory has obtained his third observa tion of the new comet first discovered by him a short time ago. At the third observation its position was found to be: Right ascension, 12 hours 25 minutes; declination north, 14 degrees 52 minutes, which shows the rate and direction of motion since discovery. As seen through the telescope the comet appears quite bright and has a short tail. This is Professor Brooks' nineteenth comet discovery .-Geneva (N. Y.) Dispatch.
