"President Angell's request of the legislature to take a day off and come down to Ann Arbor for one good straight look at a real live University is enthusiastically seconded by every professor, student and citizen of the town, for it is thought that such an experience would entirely dissipate some of the very crude ideas the legislators seem to have of this institution While the so-called investigation that is being made into the affairs of the University is no doubt instigated by the best of mo-tives, it places the institution in a false light before the people, and through no fault of the University, does it incalcu-lable harm. For instance, the action of Representative Wildey, which would be amuzing were it not so serious, is the result of a woeful lack of knowledge of the simplest affairs of the University. Giving him full credit for the lively in-terest in the weltare of the institution that every citizen of the state should have, it is not easy to see why he allows his criticisms of the financial matters of the University to become so public, eem to have of this institution While nentinquires at this end of the line. His query about the payment of two salar-ies to Prof. Trueblood is absurd to any one familiar with the circumstances. The professor spends half of his time in the law department and half in the lit-erary department. For his services he is paid \$1,250 in each, or \$2,500, the regular salary of any full professor. Mr. Wildey objects, also, to the payment of \$11,500 for running the general li-brary, while the expenses of the state library foot up only \$5,700. If the gen-tleman would stop to reflect, he would tleman would stop to reflect, he would see that the University library is used a score of times as much as the state library, and that consequently many more assistants and attendants must be employed. As to the discrepancy in the salaries of the librarians of the two libraries, it is perfectly apparent to any one at all familiar with the technical wants of a great University library, that the ability able to attend to its wants must be rewarded with a salary equal to that of the ablest professors. All other queries of the solicitous rep-"If next Sunday evening is pleasant there will be a lunar entertainment as these, but it is hoped that a visit by the legislature to the University will

Postmaster-General Bissel Resigns.

Washington: The resignation of Postmaster-General Wilson S. Bissell as a member of the cabinet was placed in the hands of President Cleveland, to be accepted upon the appointment of his successor. Mr. Bissell said: "I have placed my resignation in the hands of the President. The reason for so doing is that my professional work at home demands my attention and I feel that I cannot longer remain away from it. The business of the department is in good condition and its transfer to my successor can be made without affecting the public service." Hon. Wm. L. Wilson His Successor.

Pope's Seventeenth Anniversary.

Rome, March 5.—The seventeenth anniversary of the coronation of Pope Leo was celebrated yesterday with the most elaborate and solemn ceremonies.

End of the Fifty-third Congress SENATE -68th day.-This was the last legis-lative day of the fifty-third congress and in the lative day of the hity-third congress and in the closing hours more business was transacted than at any time during the whole session. The Senate gallerles were crowded during the two calendar days composing the one legisia-tive day. The naval appropriation bill was the first matter of importance. It carried provis-ions for three new battleships, as it came from the House. A strendous effort was made to re-duce the number to two, Mr. Hill, of New York, said that the United States had won her greatest achievements without a may and York, said that the United States and won realest achievements without a navy isually by diplomacy and reason instead 'cannon and force." Mr. George took oo sion during the day to state that if the wh sale appropriations stood as already made cotal for this session would exceed that of session since the government was form There were constant interruptions as cop-ence committees reported their progress ecconding differences on pending bils betw the Senate and House Larry in the day the agricultural and the fortilacions folks were finally agreed to and made ready for the Presi-dent's signature. Mr. Gorman, of Maryland, made a lengthy speech on the naval bill in which he practically said it would bankrupt the government to build many more battleships. Mr. Hansborough, of North Dakota, spoke in a sarcastic vein. He said the United States had nothing to fear from foreign nations. England had already captured the United States financially, had undercut our cotton spinners and had made \$5,000,000 on one bond deal. She would never make war upon a country which gave her such a revenue. Other speakers vere Messrs. Lodge, of Massachusetts: Higgins, Delaware: Prootor, Vermont: Vias. Wisconsin: Hawley. Connecticut, ard Chandler, New Hampshire. The inter supported the amendment provid-ing two battleships. In view of his service as secretary of the navy, his review of the evelop-ment of our new navy was followed with close interest. At that time, he said, we were spending about \$15,000,000 annually for the improvement of the navy. now our explani-tures reached z55,00,000 annually for the provision striking out 12 torpedo boats and in-serting six light draught composite guit boats of 1,000 tons displacement at \$220,000 was agreed to. Another provision for three tor-pedo boats, one to be built on the Pacific coast. One on the Mississippi river and one on the Guil of Mexico, was also adopted. A new amendment was adopted remitting the penal-ties against the builders of the Yorktown. Philadelpila. Baltimore and Newark. The naval appropriation bill was then passed with-out division. The sundry civil appropriation bill was also considerably discussed. The amendment for a delegation for an international monetary conference being the sticking point in the confer-ence between the two houses. It was agreed to and the bill passed. The House would not agree to the Senate mendment to the diplomatic and consult app-propriation bill providing for a Hawilian cable and it most of the amendments being of little gener interest. Rosebery on the Way to Recovery. London, March 5 .- Prime Minister Rosebery, who has been suffering from influenza, is now convalescent.

Gen. McClernand Weaker.

Springfield, Ill., March 5.-Gen. John McClernand is gradually becoming weaker. He is so feeble he can not rise to a sitting position in bed without assistance. The attending physician said last night he would doubtless live a number of days, and might possibly rally sufficiently to be out again. The chances, however, are against him.

Ex-County Judge Eller Indicted.

Omaha, Neb., March 5.-Ex-County Judge Eller has been indicted by the grand jury. His books were known to be considerably mixed when he went out of office. He is alleged to be short many thousands of dollars. The indictment was returned on testimony charging Elier with withholding money belonging to various estates.

by demanding the previous question. The con-ference report was agreed to and the sundry civil bill was adopted. A resolution was adopted that Speaker Crisp name the monetary delegates. with himself as one of the three. The senate having receded from its Hawaiian cable amendment to the diplomatic and con-sular bill it was agreed to by the House, as was the general dediciency bill. A resolution to place anti-tortine on the free list, and the naval appropriation bill was all that remained to be acted upon. These were finally agreed to and a recess was ordered. The closing hours were not marked or marred by any unpleasant incident. All the appropriation bills were out of the way, and the only feature being a rather brisk but brief debate on the results to flow from the projected monetary conference. The usual formalities of the end of a congress were gone through with. The concluding minutes were in the nature of a low feast. The best feeling prevailed. The resolution of thanks to from the projected wonset of the way and the schect which usually comes from a mem-ber of the majority, was offered by Mr. Cannon, in a very graceful speech, bearing testimony to the high appreciation in which the presiding officer was held by the Repub-lican minority. Mr. Wilson, of West Virginia, responded in behalf of the majority, and Mr. Simpson, of Kanass, for the Populists. Mr. Crisp returned his thanks for the kind words and at the conclusion of his speech, just before declaring the House adjourned, without a day. he appointed Mr. Cuiberson, of Texas, Mr. Hitt, of Illinois, and himself as members of the monetary commission. His own appointement was by resolution. As the Fifty-third congress came to an end the doxology was sung by the correspondents in the press gallery and the vast number of spectators.

Democratic State Convention.

Owing to the fact that there was no opposition to the renomination of ids cig Chief Justice John W. McGrath as justice of the Michigan supreme court the Democratic state convention which assembled at Saginaw was very brief. The temporary organization was effected by making Rowland Connor, of Saginaw, chairman, and John C. Caha-lan, of Wyandotte, secretary. "The Democratic party of Michigan." in the person of Mr. Donovan, of Bay, was called upon for a speech, and after committees were appointed a recess was taken.

Upon reassembling the temporary organization was made permanent, and nominations were called for. The The First district offered the name of Justice McGrath for renomination; it was seconded by every district and the nomination was made by acclama-

tion. The roll call for nominees for rereferred to the Michigan University brought forth the names of ex-Judge C. J. Pailthorpe, of Petoskey; Stratton D. Brooks, of Mt. Pleasant, and Miss Ella Hutchins, of Ionia. There was heavy opposition to the lady's name. The voting resulted in the unanimous selection of Judge Pailthorpe and the naming of S. D. Brooks by a vote of 816, to 34 for Miss Hutchins. When the resolutions committee presented their report there was considerable surprise, as it had nothing to say of political matters of the state or country, and contained but one section, as follows:

"The Democratic party of Michigan, in convention assembled, hails with de-In convention assembled, halls with de-light the rapidly increasing sentiment in favor of the restoration of silver to the position it so long held in the mon-etary system of our country, and un-qualifiedly declares in favor of the free and unlimited coinage of silver and red with full level tender power and and unlimited coinage of silver and gold with full legal tender power and and at a ratio of 16 to 1, and invites every patriotic citizen of Michigan, re-gardless of previous party affiliation, to join us in an imperative demand for immediate legislation to that end, and without regard to the project and without regard to the position of any other nation in respect thereto."

Foresters of Michigan.

Nearly 300 delegates attended the ninth annual high court of the Inde-pendent Order of Foresters in Lan-sing. High Secretary John Chambers reported a cash balance on hand of \$145.67. The total assets of the court are \$5,430.19, with liabilities of court are \$3,430.19, with habilities of \$2,333.88. Forty-two death claims, ag-gregating \$51,000, were paid during the year. The high court degree was con-ferred upon a class of 125 delegates. Supreme Chief Ranger Oronhyatekha, of Montreal, addressed the public at Baird's opera house. In his annual address High Chief Lee E. Joslyn, of Bay City, recommended that the ses-Bay City, recommended that the ses-sions of the high court should be held but once in two years. The order now has a total membership of 70,000 and a reserve fund of over \$1,200,000. In Michigan the membership has grown from 1,863 in 1890 to 8,243 in 1895, the increase during the past year having been 25 subordinate courts and 1.667

Eaton went from Lansing with other state officials and committees from the senate and and committees from the senate and house of representatives to attend the funeral of Mr. Pack. He appeared to be in his ordinary condition of health, and it was not until the funeral ser-vices over Mr. Pack were being con-cluded that Gov. Rich and others observed him gasping and struggling. He was carried into the open air and expired in a very short time. The cause was apoplexy.

Misenar Guilty of First Degree Murder. The Misenar murder case at Cold-water resulted in a conviction after a 16 days' trial. After 40 minutes deliberation the jury brought in a verdict of murder in the first degree. Judge Yaple granted a stay of execution for a new trial. When the jury returned their verdict Misenar's face was as pale as death, and he seemed to be completely exhausted, though he continued his insanity dodge in a weak way. Sheriff Swain found a pocket knife concealed in a window of Misen-ar's cell, with which he probably in-tended to commit suicide in case he was sentenced to the penitentiary.

Adjutant-General W. S. Green. Gov. Rich has appointed Col. Will-iam S. Green, of Detroit, adjutant-general to succeed the late Gen. Eaton. THE break in the deadlock in the board of public works last Wednesday night does away with the annoying status of affairs and gives the city a firstclass street commissioner. Mr. Leonard Bassett is well qualified for the duties of such position and will, we believe, give the best of satisfaction in the administration of his office.

THE resignation of Mr. Bissell, Cleveland's postmaster general, last Thursday, was a surprise to people generally. The prompt appointment of representative Wilson, the author of the famous Wilson bill, followed. Now, if Mr. Wilson can only devise some way in which to infuse a little "free trade" into the postal service without in any way crippling the department, he will render the dear people a great service and in some degree redeem his name as a patriotic American citizen.

THE Democratic state convention at Saginaw last Thursday renominated Chief Justice McGrath. His attempt to secure reelection will necessarily be a fruitless one, as times have changed since ie was elected to the position he now holds. Having been the recipient of the honors of the office as well as the emoluments thereof during the past years, the of being a Democrat.

THERE is a little matter to which we would like to call the attention of the new street commissioner. It is the great necessity of a street crossing on the west side of S. 5th-ave. at the intersection of Liberty-st. Only a few traces of the original crossing remain. During muddy weather it is not an uncommon thing for pedestrians to wade through mud from three to six inches deep in crossing the street at this point. A crossing should be put in at this place as soon as the frost is out of the ground this spring.

The February Inlander came out last Thursday. In this number Dr. S. A. Jones concludes his article, began last month, upon Geo. William Curtis. Karl E. SPRING NEEDS.

This Season.

SOME THINGS ARE OF THE UTHOST IMPORTANCE TO YOU.

This Will Tell You Just What You Blost Need Now and How to Get It.

In the spring changes always take place in our systems which require attention. There is a tired, languid feeling, a depression, the digestive organs become deranged, the blood is bad, causing the complexion to become affected and the person feels an inability to work.

At such a time a spring medicine is absolutely necessary. It will overcome all these conditions. It will invigorate the blood, regulate the digestive organs, clear the complexion, and make you feel strong and well.

Thanks to this wonderful medicine I am cured. I wish every sufferer might use it."

> The reason why you should take Dr. Greene's Nervura blood and nerve remedy is, because it is the surest and quickest medicine in its action known. It positively and permanently cures all forms of nervous weakness and exhaustion, invigorates the blood and gives health and strength. Take it now, for Dr. Greene's Nervura blood and nerve remedy will do more for you than any other remedy. It is the best spring medicine known.

He the principal speech in advocacy of the pro-position for authorizing \$10:000.000 of debt certificates to meet treasury deficiencies. He called in question the accuracy of Secretary Carlisle's report of the treasury's safe condi-tion and declared that a deliciency of skity millions for the fiscal year was assured. Work on the sundry civil bill was then pro-ceeded with. Among the amendments agreed to was one authorizing the selection of nine commissioners to represent the U.S. at the international monetary conference. Another amendment agreed to provides for a commis-sion of U.S. army officers to investigate the Nicaragua canal project, going over the route and making a report. Mr. Morgan said the in-quiry was desired in order to more fully in-form the next congress, as it had become evi-dent that the present House would not pass the Nicaragua canal bill. Senator Allison in-troduced a bill to incorporate the Maritime Canal Company of North America, whose ob-ject is to construct a deep waterway route from the great lakes to the Hudson river via the St. Lawrence and Lake Champlain. SENATE -67th day .- The Behring sea differ-SENATE -67th day.—The Behring sea differ-ences between the United States and Great Britain provoked an animated debate. Mr. Cockrell offered an amendment to the pending deficiency bill, appropriating \$80,000 for the ex-penses of another commission of arbitration to adjust the claims of Canadian sealers selved by the United States. Mr. Sherman opposed this second arbitration, saying fit was dishon-orable and unwise that the United States had not paid these claims through the compromise of 425,000, heretofore urged by the President. Mr. Sherman prophesied much trouble as a re-sult of reopening this subject. Mr. Morgan, chairman of the Committee on foreign refa-tions, and one of the United States commis-sioners at the Paris court of arbitration, de-clared that this plan to pay Great Britain a lumb sum for the Canadian selzures was in violation of the honer of the United States. Great Britain through its emissaries here was systematically violating the Paris award. With great vehemence he declared that the payment of \$25,000 would be a disgrace to the United States and to the administration. The contest was so effective that Mr. Cockrell withdrew his proposition. The deficiency bill was kept steadily before the Senate through-out the day and was passed after a struggle of three hours. HOUSE.—The entire day was de-voted to the consideration of bills on motions to pass them under suspension to the reise. Bills passed: To authorize the President to arrange for a joint commission to consist of three representatives of this government. Great Britain, Russia and Japan to investigate the condition of the fur seals and the regula-tions necessary to their preservation, and pending the report of the commission to nego-tiate for a modus vivendi to protect the seals auch amodus vivendi to protect the seals auch and us vivendi to protect the seals auch and us proposition to he consist of three heads found on the Pribylof ishnds: the ences between the United States and Great such a modus vivendi cannot be negotiat give the sceretary of the treasury authori till seals found on the Pribyloff islands Senate anti-lottery bill and the bill to p the state of West Virginia its share o direct tax refunded by the act of 1891. sundry civil, legislative and deficiency an priation bills were sent to conference wi debate. A cheap Pocket-knife can be bought at every Store, but it is not the kind you want.

One dollar is the lowest price that a really good knife can be sold for. This ploumn is placed in this paper to adver-i æ the very best Pocket-knife ever sold. It is J. C. TIDMARSH'S Sheffield Steel Knife.

Never buy a knife only because is looks well. If blades are not the best Sheffield steel they will soon bend, ne matter how they will look. Still, you want a fine-looking knife.

The United States law provides that only samples to agents and to the trade will be admitted free of duty. You can, therefore, see the advantage that I have in sending samples to agente over those who deal in Sheffield goods in America.

I am an advertising agent? E 1 a satrusted with a certain amount to 13285 advertising these knives (tho best value ever seen in America 2) Dat Dollar each). Now, the knills is its own best advertisement.

Imagine a Pocket-knife (31 inches long) with the most beautifully-grained vory handle-genuine African ivory and with two blades of the very beat and with two blades of the very best Sheffield steel that will last a lifetime and cut like a razor. The tips of the handles are heavily plated with sterf-ing silver. And then a very most chamois leather case goes with each knife Now, would it not be easy work selling this knife at One Dollar eac I know it would, for it looks as if were worth two dollars were worth two dollars.

fan, who has so long and so well served his community, is at last to have comoffice of a specialist, a woman comes forward browed like a Madonna or the glorious Greek Venuses, just as she may have selected.

The inventor of the new process clings to the argument that no woman can ever expect to lay any claim to beauty whose forehead is, as he expresses it, "ungracefully draped." says the New York Advertiser, and that of all beautiful women he never found a face that for half its charm did not depend upon the lovely framing of the forehead.

Modern training, he argues, has enlarged the size of women's heads nearly a half inch all around, and house thought they saw a burglar climbing out of one of the windows Tuesday night, but closer examination depth. The increase in the head's revealed skirts, and later Miss Maria size has taken from perfect feminine grace, and the widening of forehead from eyebrows to hair roots has nearly destroyed the low Madonna browed woman, the type of most perfect fem inine loveliness.

Grateful

Men and Women of prominence, and those serving their country equally well by being simply good citizens, good husbands and good wives, show their unselfishness by the anxiety manifested, when, having been cured of Heart Disease by Dr. Miles' New Heart Cure, their first wish is to reach some other sufferer with the good news.

G. W. McKinsey, an honored veteran of the war, and until recently, postmaster at Kokomo, Ind., writes under date July 26, 94: "I am constantly getting letters from all parts of the United States, asking for information of how I was cured of Heart Disease. As I had been severely troubled with Heart Disease ever since leaving the army at the close of the late war, I concluded, some two years ago, to give Dr. Miles' New Heart Cure a trial. The first bottle made a great improvement in my condition, and five bottles completely cured me, and I have not had a symptom of the disease since. I am rejoiced to know that my testimonial has induced others to use your remedies, and am glad to answer all inquiries for the sake of suffering humanity." And J. R. Bigelow of Webster, Mass., writes on June 15, '94:

"One year ago I was so feeble from heart disease I was obliged to retire from business, and my physician said there was no chance for recovery. ** ** As a last chance I tried Dr. Miles' Heart Cure. It gave me instant relief. I am now well and in active business."

Medical statistics have proven that one person in every four has a weak or diseased heart; yet not one person in forty gives the matter any attention, notwithstanding the fact that DR. MILES HEART CURE cures Heart Disease permanently in nine cases out of ten, and benefits every case. Dr. Miles' Remedies are the result of twenty years of study

and investigation by the great specialist in Nervous Diseases, Dr. Franklin Miles, and are sold on a positive guarantee that the first bottle will benefit. All druggists sell them at \$1, six bottles \$5.00, Pills 25c., or sent, prepaid, on receipt of price by the Dr. Miles

FREE COINAGE OF SILVER.

The free and unlimited coinage of silver, the product of American mines, at the old ratio of 16 of silver to 1 of gold, is the only solution of and remedy for the disturbed and unsatisfactory condition of trade, manufacture and general business of the country. The surreptitious act of 1873, divorcing silver and gold in our monetary system, was a crime of untold magnitude. It was the rankest kind of class legislation in favor of the wealthy against the producers of wealth, and hostile to the prosperity of the United States. It was an act of treason because done at the instance of a European syndicate and for bribe money, "giving aid and comfort to our country's enemies." To shield the guilty parties, the well authenticated facts, often published, have been vigorously denied.

Their Ingenuity in Woodwork Attracting Attention in | oreign Countries. The mighty advance in woodmaking

CLEVER AMERICAN MECHANICS

machinery in the United States has evoked surprise everywhere. In America the idea is to make everything of wood without hand labor, automatically where possible. This desire has been so successful, according to the Cincinnati Commercial-Gazette, that it is a rare exception a factory is found employing handwork. Every known description of woolwork, out of every kind of wood, is mage entirely by machinery. Many

Vill buy and sell Real Estate of these machines are veritable wonders, performing their work with a readiness and accuracy that excite the most profound attention. Some of the English experts say of them that they are the best examples of ingenuity ever produced, but of a lighter construction than the English make. But one must bear in mind that American iron when cast into form is very much tougher and hence does not require so much of it to give their machines strength and solidity. See us before deciding upon This is hardly true of English iron, and, the purchase or renting of a in consequence, their machines contain a great deal more weight in iron and consequently look more massive, but by experience it has been proved conclusively that the latest improved American machines are just as strong and just as capable in durability as those made by the English makers. Progressive English manufacturers

To do this they will have to turn to the Americans, much as it may be against their inclinations. American furniture, made entirely with machinery, is now getting a foothold in England, and attracts the admiration of English buyers, not only for its beautiful designs and finish, but for the superb construction; and, lastly, it can be obtained at a moderate price. Other articles of wood for domestic vehicles, agricultural, building uses. etc., are fast creeping in to the disadvantage of the English manufacturer. Indeed, wherein the American manufacturer succeeds it is only through the use of machinery and therefore the Englishman, in or. der to protect himself from encroachment, must adopt the American idea by using American machinery, for is it not a fact that the Englishman is behind the times in getting "up-todate" wood working machinery? If this statement is not correct show us

the fallacy of it. Machinery saves time and labor, consequently monsy.

TREE-TOWER. How the Stucil; Basques Have Preservel a Landmark.

Upon the wild shores of the gulf of Biscay there lives a rugged race, the descendants almost pure in blood, of the valiant Visigoths, who found their way into the inhospitable valleys of the Pyronees and Northern Spain, and held their own against Moor and Christian for many centuries. Time conquered them and made them Spaniards, and to-day the North of Spain is the stronghold of true Spanish patriotism.

Bilboa, the beautiful capital of the province of Bi-cay, has lost its most prominent landmark, the "Arbor de Guernica," the trunk of a tree standing upon the market square for many centuries and like the sturdy Basques braving the storms of time, until one day a stroke of lightning laid low the giant of former ages.

To reproduce this landmark and rear a lasting and beautiful monument of Basque patriotic feeling Don M. Alberto de l'alacio, an eminent engineer, has designed a unique tower of iron and glass, which is now in course of construction. The tower adheres in the main to the lines of an old tree. The foundation represents the roots, knotty and protruding from the soil; water surrounds the tree, dolphins, winged monsters and other fantastic figures spout water in all directions; three light bridges across the basin furnish access to the interior, a hall of 60 feet in diameter and gradually waking up to the fact that 23 feet in height being on the ground floor.

At a height of 35 feet another room of 45 feet in diameter is surrounded by a graceful gallery, adorned with the arms of the Basque provinces. Here the trunk of the tree really begins and, tapering slightly toward the top, it rises to a height of 120 feet, entwined by a spiral stairway em-blematic of the ivy clinging to the old oak. A gallery on the property oak. A gallery on top carries a dome representing the crown of the old tree and several long branches with the arms of the Basque provinces and electric lights. The dome is surmounted by an allegoric statue. Elevators to the dome will also be pro-~ided.

"As we missed nothing when the other barrels had been unpacked, my wife cudgelled her brains to explain the mystery. She finally remembered that when we gave up housekeeping, a year and a half ago, there was a economy she poked it all in a superfluous barrel, which was duly headed up and carted to the hotel where we spent the winter. It was stored in the garret without being unpacked,

"We accordingly have paid not hal to do with Elementary Instruction only for the storage for nine months of an empty barrel, but for its cartage on three different occasions-from the hotel to the storage warehouse, and from the warehouse to where we now

An Old Bank Note

The bank of England has in its possession a bank note dated December 19, 1699, for £555. It was printed from an engraved plate, but had blank spaces for the amount, date, number and signature. Across are written memoranda showing that it was repaid in three installments. In appearance it is not altogether unlike the modern note. In the bank library is another note for £25, which was not presented for 111 years. Another curiosity, said to be unique, and a bell ringer was thrown over the is a note for no less than £1,000,000, railing twenty-five feet into the dated 1782.

A SEVERE WINTER.

The Cause of Suffering and An Increase of Diseases.

This winter has been the most severe for many years. North, South, East and West intense cold and blizzards have prevailed. This will surely cause a great increase of sickness and death. Chronie catarrh and consumption always begins by catching cold. Thousands have started on the road toward a lifetime of misery from chronic catarrh or a sure death from consumption It is not too late yet to be saved and restored to a life of health and activity. Pe-ru-na will do it. It never fails to quickly cure chronic catarrh less than two years old. Of course Pe-ru-na cures thousands and thousands of cases of chronic catarrh that have run for many years, but in cases that are of more recent origin it cures, quickly, certainly and permanently. Every case of cold or cough that has resulted from the effects of our severe winter could now be cured in a short time by Pe-ru-na. Not a single one need fail. All those taking Pe-ru-na who desire the advice of Dr. Hartman about their cases should write, giving age, sex, disease and time of sickness, and he will answer free. A few weeks' treatment now will prevent years of suffering, and in many cases death. Address The Pe-ru-na Drug Manufacturing Company, Columbus, Ohio, for a free book on catarrh, colds, cough, la grippe and consumption.

THE MANGO TRICK.

A Scientist Discovers how the Yoghis Work heir reatest V onder. A French scientist, M. Ragonneau, has just discovered how to make a plant grow from a seed in thirty minutes as much as it would under ordinary circumstances in as many days, says the Cincinnati Enquirer. Heretofore nature has shared this secret with the Yoghis of India alone, and the methods pursued by these clever magicians in performing this trick have often been described. They plant a seed in the earth and cover it with a cloth. In a few moments the cloth begins to be pushed upward by the growing plant, which in a short time attains the height of several feet. Various theories have been advanced as to the modus operandi of this miracle, one of the latest being that the spectators are all hypnotized by the magician.

During his travels in India M. Ragonneau saw the trick performed frequently, and noticed that the Hindoos always imbedded the seed in soil which they brought with them especially prepared for that purpose. At last he learned that they obtained this earth from ant hills. Now, as every one knows who has inadvertently eaten one of those industrious insects, ants contain a large proportion of formic acid, with which in time the soil of their habitations becomes charged. This acid has the power of quickly dissolving the integument surrounding a seed and of greatly stimulating the growth of the germ within. After a little experimenting with

this acid the learned Frenchman was able to duplicate perfectly the Hindoo trick. His further researches have

America's Greatest Railroad Makes Another New Departure.

Geo. H. Daniels, general passenger agent of the New York Central, has inagent of the New York Central, has in-troduced a new scheme for helping pas-sengers arriving at New York, which is certain to add greatly to the popularity of "America's greatest." Beginning on March 1 uniformed attendants put in appearance at the Grand Central station. They most constraints station. station. They meet every passenger train, and it is their duty to carry hand train, and it is their duty to carry hand baggage, assist old people or passen-gers who are ill, help with children and baskets and show strangers the way to street cars, busses or elevated railroad trains. The passengers are informed of the presence of these attendants by printed leaflets, which are distributed in the cars pefore the arrival of the in the cars before the arrival of the train. Among these attendants are a Frenchman, a Dane, an Italian, a Span-iard and a German, all of whom speak English so as to be able to assist people English so as to be able to assist people of all nations. Mr. Daniels explains that many people arrive at the Grand Central station, and when they reach the street become bewildered, and in many instances take the wrong cars. The new attendants are expected to prevent mistal es by these strangers. No charge is made for the service, 54

Lather for chaving. It is commonly assumed that soap is used in shaving for the purpose of softening the hairs. This, however, it seems, is a mistake. It is used, on the contrary, to render them hard, dry, stiff and brittle, in which condition they best yield to the blade. Hair being naturally oily, were one to shave dry, or with water only, the razor would either slip over the limp hair without cutting it, or, entering about half way, bend the hair back and slice it lengthwise, all the while straining it most painfully at the roots, and, as the razor would thus slice and pull probably a large number of hairs at once, the pain produced would be intense. Most shaving soap contains a free alkali, either potash or soda, which combines with, and so removes the oil from the hair, leaving only the hard fiber, dry and stiff, as may be seen by taking a solution of carbonate and dipping a single hair
