#### LITERARY NOTES.

The Atlantic Monthly for April contains installments of the two serials now running: A Singular Life, by Mrs Elizabeth Stuart Phelps Ward, and The Seats of the Mighty, by Gilbert

Fiction is further represented by the second part of Gridou's Pity, by Grace Howard Peirce, and a touching singlenumber story, by Annie Trumbull Slosson, entitled Dumb Foxglove.

An atmosphere of Spring is given to the issue by a delightful paper on Flower Lore of New England Children, by Alice Morse Earle. Two papers of educational interest are The Expressive Power of English Sounds, by Professor Albert H. Tolman, and The Basis of Greenough.

Poems and the usual departments complete the issue.

-Houghton, Mifflin & Co., Boston.

The Forum for April has for its lead er a brilliant essay entitled "The Real Quintessence of Socialism,'" by Mr. W. H. Mallock, the eminent English student of Socialism,-one of the most luminous expositions of the fallacies of Socialism that have ever appeared in periodical literature. An article on a kindred topic is by Mr. Henry Holt who concludes his series of papers on "The Social Discontent."-Forum Pub., Co.,

The April number of the Eclectic has a number of excellent articles-opening with one from the Quarterly Review, on "Oliver Wendell Holmes." On the same order is a critical article on "The signs, prices from 12c to 50c per yd.

Poems of Robert Bridges," by Mr. J.

C. Bailey, and a tribute to "Christina Baby Carriages in all styles and grades. Prices lower than ever before. Window Shades complete, only 17c. Shades made to order. Rossetti, by Mr. A. C. Benson. Mr. W. Hill James contributes an interesting paper entitled "Recollections of the Chinese War." The papers on travel and adventure take one through a wide variety of scenes.—Published by E. R. #### Grand Central Station Attendants.

"A practical demonstration of the wisdom establishing a free messenger and guide service at the New York Central station in New York city was given a few days ago," remarked a gentleman who had just returned from the metropolis this morning. 'I went to the kig town or the 200 evening that to the big town on the 9:20 evening train, arriving at New York at 7:30 on time to a minute, as usual. In the car that I was in was a charming old lady who had a big satchel. When we got off the train I proposed to carry the old lady's baggage to the street from away up at the forty-fourth-st. end of the de-pot. It's a long walk, you know, from that end to the Forty-second street xit, and the old lady was all alone was just about to take her satchel from the porter when a smart young man in a blue uniform, wearing a round red hat such as British soldiers wear, and having embroidered on the front in gold letters, 'Grand Central Station Attendant,' stepped up to her, touched his hat and politely asked where she wished to go. He took the satchel from the porter and carried it to the en trance, where, after protecting he from the horde of hackmen, he put her and her baggage on a cross town car and went back into the station. Of course it was only what he was hired to do, but he did it so nicely that I was greatly pleased, and the little old lady was pleased also. There was a troubled look on her face when she stepped off the train, but when she saw the uni-form of the young fellow who spoke to her it all disappeared. She knew she was in good hands and need not worry more. The messenger service is a great institution. When a lady boards a New York Central train for New York alone now she knows that she will be protected from the time the train starts till she is safely in a carriage or car in New York City. # Keep the Baby Fat.

"CAVE SPRING, GA., May 21, 1894.

"My baby was a living skeleton. The doctors said he was dying of Marasmus, Indigestion, etc. The various foods I tried seemed to keep him alive, but did not strengthen or fatten him. At thirteen months old he weighed exactly what he did at birth—seven pounds. I began using "Scott's Emulsion," sometimes putting a few drops in his bottle, then again feeding it with a spoon; then again by the absorption method of rubbing it into his body. The effect was marvelous. Baby began to stouten and fatten, and became a beautiful dimpled boy, a wonder to all. Scott's Emulsion supplied the one thing needful.

The Pontiac arrived at 6 o'clock, and William O'Mara, who has a contract to trim her, startel for the dock at the head of 30 men, mostly imported from Ishpeming. They were escorted by Sheriff Broad and 10 special deputies taken from the im-ported men. The old trimmers met them in front of the first pocket and on the first attempt to advance further a collision ensued. The deputies fled without a blow, leaving the sheriff helpless. Quite a number on both sides had their heads broken, but there are no serious injuries reported. One of the rioters was arrested by Marshal Maloney. The sheriff has called on the local company of the Michigan National Guard and they were placed under arms. The Pontiac left with her load without trimming.

Two Attempts to Wreck a Train.

Two attempts were made to wreck a Big Four train near Benton Harbor. The first attempt was made five miles south of Benton Harbor, where the train struck a dummy car, which had been placed on the track. The car was demolished, and the forward part of the engine was injured. Two miles further, while moving at a slow rate, the engine struck a pile of ties, causing a delay of two hours. This last accident occurred at the most dangerous part of the road, and had the train been running at its regular speed a fearful accident would have failed to explode. No cause is been the result. IF we do our work at home our labor at home will be employed and the wages paid at home will be spent at home This is the philosophy of Protection, and it cannot be abandoned, amended or abated. -Gov. Wm. McKinley.

THE reports in yesterday's dailies of the shooting affray in Louisville, Ky., Tuesday, show a deplorable condition of things in the blue grass state. The reports say that "at separate undertaking establishments in Louisville lie the bodies of perhaps two of the most prominent people in the state of Kentucky.' One was the son and private secretary of Gov. Brown, of Kentucky, the other that of Mrs. Fulton Gordon. The husband of the latter caught the two above mentioned prominent people in the act of adultery and riddled both of them with bullets. If two of Kentucky's most prominent people are guilty of such a crime what must be the moral condition of society as a whole in that commonwealth? This 'is probably, in a measure, indicated by the action of the coroner's jury which rendered a verdict of "justifiable homocide!" Because one or two persons committed a crime, a third is justified in shooting both of them in cold blood! We should probably expect such a verdict from a jury the members of which are parts of a social fabric where the "most prominent people in the state" are so frequently guilty of such crimes.

THE question of street sprinkling is one that should receive careful consideration before any conclusion is reached by the council. The dust nuisance is a serious one in Ann Arbor and if it can be abated without too great an expense it should be done. It seems that the only way to get at the matter justly is for the council to decide what streets it is especially needful should be sprinkled and then tax the property along such streets for, we will say, one-half the expense, the city bearing the other half Then if the residents along any other street, not included in the limit fixed by the council, desire their street to edit a page in a paper called "The when at least three-fourths of the resi- go. dents along any portion of such street for at least four blocks petition the council to have that portion of the street sprinkled. As it is, the business men are bled unmercifully for sprinkling the business streets which not only benefits them but benefits every resident in the city as well. By adopting the plan suggested above those especially benefited would bear the larger portion of the expense while the whole city would also bear a part, and justly as the more streets are sprinkled the more benefit to the whole city.

—the woman who keeps at a distance the complexion beautifiers, paints and powders, which soon ruin the face. A healthy glow to the skin, a face without wrinkles, and sparkling eyes, will be yours if you keep the system and the special internal organs in good condition. The young girl, or woman, often grows pale, wrinkled and thin, eats little, everything wearies her, she complains of herself as aching and sore and as sleeping poorly. Often she is troubled with backache, or a tender spine, with a bearing-down weight in the abdomen, or at periods she may be irregular, or suffer extreme pain from functional derangements.

Dr. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., in his long and active experience, met many cases of this kind, for which he used a prescription which was found to care such difficulties permanently in ninety-eight per cent. of all cases. Having proven so successful, Dr. Pierce put his "Favorite Prescription" on the market, and it is to-day sold more largely than any other medicine for the ills of woman.

For all functional derangements, displacements, ulceration, inflammation, and the catarrhal drain from the lining membranes

#### "A Night at the Circus,"

Nellie McHenry, at the Grand Opera House, May 6, will present her comedy called "A Night at the Circus." Miss McHenry has for many years been one of the most prominent figures among American soubrettes, and undoubtedly one of the most popular. She was one of the first to appear in the light order of entertainments that have since been classified as farce comedies. The play in which she is appearing this year has, according to all accounts met with much greater success than any other stage production in which Miss Mc-Henry has given her vicacious pres-ence. There is more or less of a plot to the piece. It introduces her as Mile. Mr. Gharife wurster and sister, and so come and so com contract, and attemps to have her ar-rested. The character is that of an Irshman whose matrimonial adventures cause most of the fun. Bright specialties will be scattered through the performance, among the most enjoyable of which will be Cawthorns concertina playing. An exceedingly strong company of 20 specialty people are in the cast, and includes such well-known favorities as Charles A. Mason, Fred. Many of our machines have run more than twenty years without repairs other Many of our machines have run more than twenty years without repairs, other than needles. With proper care they never wear out, and seldom need repair. We have built sewing machines for more than forty years and have constantly improved them. We build our machines on honor, and they are recognized everywhere as the most accurately fitted and finely finished sewing machines in the world. Our latest, the "No. 9," is the result of our long experience. In competition with the leading machines of the world, it received the Grand Prize at the Paris Exposition of 1889, as the best, other machines receiving only complimentary medals of gold, silver and bronze. BRITISH ORGANIZE THEIR OWN

GOVERNMENT. May Occupy More Territory in Nicaragua or Withdraw Altogether from

the Country-Waiting for Orders from

New York, April 30 .- A special to the World from Corinto, Nicaragua (by spe cial courier to Paso de Caballos, April 28), says:

England.

"The town is perfectly quiet. The British are organizing their government. An officer of the cruiser Royal Arthur tells the correspondent that the next two days will decide whether they will occupy more territory, including Paso de Caballos, or withdraw altogether, as important telegrams are expected from England. The messenger who takes this carries two telegrams from Admiral Stephenson, one for the British foreign office, the other for the admiralty office."

special from Managua says: is stated here that in of Nicaragua's tactics the "It proposition made by ed States Ambassador Bayard to the British government for a fortnight's time for Nicaragua to pay the indem-nity in will be accepted."

BRITISH BILL GROWING.

England Will Ask Not Only the Indem nity, but Expenses.

Washington, April 30.-Dr. Guzman, the Nicaraguan minister, was at the state department at 11 o'clock to-day. He had not up to that time received additional advices as to the situation at Corinto. It was stated here to-day that Great Britain will require Nicaragua to pay not only the original cash demand, but all the expenses Great Britain is put to in occupying and holding Corinto, and the expense of such other steps as she will take. This will include the expenses of landing the men, their cost of maintenance while on land, and the many incidental expenses of taking possession of a city. It is said that the as-sembling of the fleet at Corinto and the expenses while on board ship will not be included, as these are usual and necessary without reference to the locality of the ships.

#### MORE RAIN NEEDED.

Indiana Crop Report Makes a Fairly

Indianapolis, Ind., April 30 .- The Indiana weekly weather-crop bulletin says: Dry, warm, fair weather, with badly distributed local rains on two days, were favorable for farm work, but rain is much needed, especially for wheat and grass. Winter wheat in general is promising a good barvest, especially that on loose bottom lands; or uplands not fertilized and in clay ground it is less promising, standing thin and spotted in some fields. The continuous dry weather, relieved at long intervals only by light showers etarded the growth of wheat; in the entral and northern portions it is not stooling out well, but with more rain in the future the prospect for a good crop is enhanced.

Damage of \$100,000.

St. Louis, April 29.—Fire at 7 o'clock this morning partially destroyed the plant of the Kehlor Milling company in East St. Louis, causing an estimated damage to machinery and buildings of about \$100,000. The building, which is four stories in height and covers an area 50 by 150 feet, would have been completely destroyed but for the sprinkler system, which flooded the structure from roof to cellar. Most of the dam-age was caused by smoke and water, which will soon re repaired.

Novel Legal Proceeding.

THREE MEN DIE BY FIRE.

Home of Samuel Weaver Destroyed and

He and Others Perish. Pittsburg, Pa., April 30.-A frame dwelling, owned by Henry Snyder and occupied by Samuel Weaver and his family, burned last night. Weaver was very ill with typhoid fever and was known to have perished, but his body and that of Frederick Snyder, son of the owner of the building, were recov ered from the building. A male nurse who was attending Mr. Weaver was also burned to death, while Mrs. Weaver is in a critical condition from burns and fright.

The fire started in an adjoining house and soon communicated to the Snyder building. Mrs. Weaver is the mother of a 2-days-old baby and she and her child were rescued with great difficulty. A number of men ran to the rescue of Weaver and carried him part way out, when they laid him on a cot and continued their journey. The man who was at the head of the cot was walking backward. The space was cramped and the man was forced against a table, on which a gas lamp was burning. The lamp was thrown to the floor and the oil flashed out, setting fire to the carpet.

At this instant an outside porch which was burning gave way and swung against a door. The door fell in and a mass of burning wood followed it, some of it falling on Weaver on the men around him. The cot could not be moved and the rescuers were forced to leave the invalid and run for their own safety The fate of young Snyder and the nurse was not known until the morning.

#### DANGER NOT UNKNOWN.

Warning Concerning Condition of Epinal Reservoir Had Been Given.

Paris, April 30.-The Epinal reservoir the bursting of which caused the destruction of over \$10,000,000 worth of property and the loss of more than 100 lives, had a superficial area of 3,000,000 square feet. In 1884 a large fissure in the main dam developed. This was filled with cement and oak beams.

In 1885 the feed canal burst above Bouzey and carried away a length of Several houses were desixty feet. stroyed on this occasion, but no lives were lost, Some time before this an inspector of roads and bridges announced that the condition of the dam was dan gerous and notified the people of Bouzey to watch for a possible disaster. In 1892 there was a second accident to the wall near Epinal. During two years the wall of the dam, which should have een straight, has shown a bulge to the extent of about three feet. The chief engineer of roads and bridges who directed the building of the dam, had great difficulty with his colleagues in order to carry out his plan of a straight iam instead of a curved one.

This shape of the dam is now given as the cause of the accident, but there is a possibility that the disaster was caused by the illness for fifteen days of the inspector who was charged with the supervision of the dam.

WIFE MURDERER A PARANOIC.

Prosecution Will Say, However, that Dr

Duestrow Is Shamming. St. Louis, Mo., April 30.-Dr. Arthur Duestrow, the wife and child murderer has been taken to Union, Franklin county, where he will be tried tomorrow for the second time as to his sanity. New interest is added to the case inasmuch as the state has competent expert testimony, which it did not have efore. The defense will hold to the theory that defendant is a paranoic, though Governor Charles P. Johnson, his client had developed such new phases of mania as would be conclusive to a jury. The prisoner's every move ment has been noted by unseen watchers, and the prosecution will likely spring a sensation at this trial, as the state's attorney claims to have proof that the prisoner has unguardedly admitted he was shamming. Duestrow's income of \$12,000 is hypothecated far in advance for his defense.

Hitt Is Slightly Better.

Washington, April 30.—The condition of Congressman Hitt of Illinois was ery precarious this morning. He sank apidly yesterday, and at one time it was thought that he could not survive the day. Early this morning he re-gained consciousness and rallied slightly, but the improvement, it is thought, can be only temporary. Mr. Hitt's ill-ness is the result of a severe attack of a grippe. He is affected with rheuma tism, which, in its complications touched his heart, and he has also symptoms of a dangerous brain trouble.

Think Buchanan Will Have to Die. Albany, N. Y., April 30.—Lawyers judges and state officers here who have been interested in the Buchanan case of the opinion that the United States court will refuse to interfere in the case and that Wednesday Buchan an will have to die. This is the opinion of Attorney-General Hancock, Judge Joyce, the pardon clerk and Private Secretary Cole.

finally making up his mind that no es cape was possible, eluded justice by self-destruction. Volcano Is Again Active. Guadalajara, Mex., April 30.—The Collma volcano is again in a state of active eruption and the inhabitants o

the valley at the base of the mountain have been forced to abandon their

homes and flee for their lives. The mol-

ten lava and ashes have destroyed the growing crops and much valuable property in that section. Hall Wrecked by Gas Explesion. Elyria, O., April 20.-G. A. R. hall was almost demolished this morning by a gas explosion. A mas jet was left open last night and car of the place with gas. When aniter Martin Fider struck a mater in the hall this morning a heavy explosion followed. Fider was terribly

burned and is in a serious condition.

MAKING CANDY.

A Formula Which Will Greatly Ald Feminine Amateurs.

Feminine amateurs, who find it difficult in boiling sugar for making candy to fix the exact amount of its fitness for the purpose, will be aided by the following formula, condensed from a French source: Sugar in the process of boiling is susceptible of eleven changes according to the degree of heat to which it is subjected. The first is "snake thread," when, by dropping the finger and thumb into cold water and then into the boiling sugar, a fine thread forms between the two, and may be drawn out a little, when it breaks. This comes at temperature of 215 deg. Fahrenheit Large thread is when the thread reaches further without breaking-217 "The pearl," when the fingers may be stretched still further without breaking the thread, 220 deg.; "Great when the thread may stretched to the utmost limit of the two fingers without breaking, 225 deg. The blow," when taking up some of the boiling sugar in a skimmer, and blowing it through the holes it forms small bubbles, 230 deg. "Large blow, when the bubbles increase widely in size and number, 234 deg. "Small ball," when in dipping the fingers into cold water, and then into boiling sugar, and back again into the water, the sugar can be rolled between the fingers until it forms a ball, 237 deg, "Large ball," when the sugar has boiled longer and the ball becomes harder and larger 247 deg. "Small crack," when the sugar is taken up between the fingers and flies apart with a light crack or when bitten sticks to the teeth, 290 deg. "Great crack," when it breaks between the fingers with a sharp crack and bites clean and crisp, 310 deg. Caramel, the eleventh and last product, comes of a temperature of 350 deg. The lower degrees of heat are employed in the making of soft candies; the higher in the making of the crisp sorts.

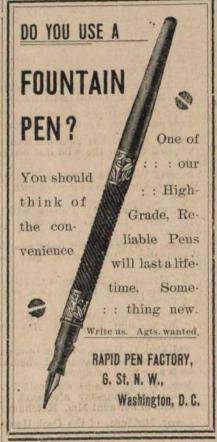

THE CZAR'S SWEETHEART.

The Mystery of a Beautiful and Devoted Woman.

The Polish dancer who was brought into world-wide prominence through the devotion to her of the Czar Nicholas II. of Russia has not long survived her dethronement, her death being now reported. She is described as very beautiful and captivating, having the admiration of all Poland, besides holding the affection of her imperial lover. She entered the corps de ballet at Warsaw when only 17, and two years latermet the czarewitch. The interest was prompt and mutual, and quickly became most ardent affection. The liaison was hidden for several years, but at last came to the knowledge of the late czar, who was frightened when he tested the depth of of his son's devotion to the danseuse. To weaken it, he kept Nicholas traveling in distant lands as much as possible, with, however, little effect. Only those who were actors in the imperial crisis will ever know how very near this queen of the ballet came to winning against England, Germany and Russia combined. The czar's wedding and coronation were her death warrant, figuratively and literally, as she has dropped from that time, and now the grave has closed over her, says one European correspondent, while another states that she is cutting a wide swath in Paris

Wonderful Banylon

Ancient Babylon may perhaps be called the most wonderful city of the world. No less remarkable were hanging gardens referred to in the Old Testament and described by some of the early profane writers. The city itself was fifty miles in circumference, its walls being 350 feet high and 87 feet thick. The city was built in the center of a vast plain. The wife of the king came from a mountainous region, and did not like its barrenness. Hence the famous hanging gardens. They were suspended over 400 feet in the air and planted with trees, fruits and flowers. No less than 200,000 slaves were employed in their construction. All this to please his wife.

Great Britain Sends a Fleet and Lands a Force of Marines to Enforce Demands for Indemalty for Expulsion of Consul Hatch-Serious Trouble Expected.

troubles last year, has landed troops at the port of Corinto and Kear Admiral Stephenson has announced that the payment of the inlemnity will'be

It will be remembered that several weeks ago the United States secured a delay of action by Great Britain on the ground that Nicaragua would pay the indemnity, but the little republic backed out at the expiration of the time asked for and Great Britain again commenced hostile action which cul-minated in the seizure of Corinto to collect the revenues. The Nicaraguans promptly declared Corinto a closed port so that dutiable goods may not be landed there. The native officials and population abandoned the town and the authorities went to San Juan Sur, the Nicaraguan cable port cutting the wires connecting the cable port with Corinto so that the British forces at the latter place could not communicate with their home government except by sending a boat to the cable station, 125 miles. The main body of the Nicaraguans who had abandoned Corinto crossed a lagoon which separates the town from the mainland and strongly entrenched themselves. The situation is now regarded as ominous of serious trouble for the dispatches indicate that Nicaraguans are disposed to resist any further advance by the British.

Uncle Sam's Position in the Trouble. Washington: The situation in Nicaragua, with the British occupying Corinto and the port declared closed by the Nicaraguan government, pre-sents many possible complications. From the best information obtainable seems almost certain that the administration will not attempt any in-terference with the dispute between Nicaragua and Great Britain as long as the latter confines itself to the col-lection of the indemnity. It is stated that the state department has all along advised Nicaragua that the expulsion of Consul Hatch was an offense that no self-respecting country could overlook and prompt reparation was due Great Britain. There can be no doubt that the action of the Nicaraguans in declaring Corinto a closed port has seriously complicated this most troublesome question, and may force Great Britain to more drastic measures, but even if there is no resort to hostilities at present, it opens a prospect of alarming events in the future, which may, and in fact arc, even regarded as likely to involve the United States directly in the affair in spite of the earnest disposition of the administration to avoid

the entanglement.

If the occupancy of Corinto fails in its object and Great Britain should declare war on Nicaragua, it is said that the administration would still decline to interfere so long as the war was carried on, not for the aggrandizement of Great Pritain or the acquisition of territory, but for the sole purpose of collecting the indemnity. To go be-yond that, however, the administra-tion, it is said, would consider a viola-tion of the Monroe doctrine, also a violation of the Clayton-Bulwer treaty which would not be tolerated. But it is not believed in official circles that Nicaragua will carry her resist-

Dun's: Neither the rising speculative markets nor the steady gain in industries has eeased and it is wholesome that there are fewer suns of hesitation in the productive industries than in speculative prices. Wage strikes grow more numerous and cause some trouble, and retail demand lags behind wholesale and jobbing purchases and production in some branches, but through many conflicting reports the fact with a rush and whirl, but with more safety, and the revival of activity helps confidence to fail follures were to be dearer, is retarded by shrinking demand for products, for, on the whole, new business is said to be smaller than if a february or March. STATE LEGISLATURE.

SENATE.—Oth day.—One of the most impor-ant measures of the present legislature was sed-the House bill providing for a uniform Washington: The British fleet, which was sent to Nicaragua to cn-force the claim of Great Britain of \$75,000 indemnity for the expulsion of Consul Hatch during the Eluefields troubles last year, has landed troops at the port of Corinto and Egar Admi sommittee with amendments prolithiting spring shooting and limiting the fall season for shooting ducks to the period between Sept. I and Dec. 31. House.—The McLaughlin resolution for a constitutional amendment proscribing that but native hora and naturalized americal eithers and the object and naturalized americal eithers and the tower the and to read the constitution of the state in the English language before they can vote was agreed to in the House committee of the whole, the measure having already passed the Senate. Persons on whom the right of suffrage is already conferred are exempt from the operation of the constitutional amendment, in case it is adopted by the people. The committee on education made a favorable report on the bill making it mandatory on the part of school boards to supply, free of charge, text books to pupils in the public schools. The state affairs committee rencommended the measure establishing a state board of five to regulate veterinary practice in this state. All veterinary practice in this state. All veterinary practiculars are to register. The ways and means committee reported without recommendation the bill making an appropriation for a normal sensor in the upper peninsula. This committee reported favorably several bills: To appropriate \$2.500 to the State Historical and Pioneer society: 4.000 to the city of Kalamazoo for a sewer to accommondate the insane asylum: \$5.000 a year to enable the state board of agriculture to establish courses of lectures in the various branches of agriculture. The general charter bill for the incorporation of third-class cities was passed with only one amendment of importance—limiting municipal indebtedness to two per cent of the assessed valuation. The indebtedness must be authorized by a two-thirds vote of the people. SENATE .- 70th day. - An appropriation of

\$152.646 for the school for the deaf at Flint was recommended by the committee. The state affairs committee reported the Wildey tax statistician bill with a request that it be referred to the committee on finance and appropriations, which was granted. In committee of the whole the Senate agreed to the bill creating a commission of five to assume charge of the Mackinac State park, and appropriating \$2.000 for its support. The Foote bill fixing the open season for deer from Nov. I to 25 and fixing five deer as the maximum number to be killed by any one hunter was also agreed to, as was the Senate bill to reorganize the state board of health. The finance and appropriations committee reported favorably the bill to sell certain lands owned by the state in Lansing and devote the proceeds not exceeding \$25,000 for constructing a home for the governor of Michigan. House—No bills passed. Talk filled the hours and very little was accomplished. The bill to repeal the mortgage tax law came up and of course caused a great deal of discussion. It failed to pass, was reconsidered and tabled.

MARQUIS OF QUEENSBERRY.

Author of Pugilistic Rules and Prosecutor of Oscar Wilde.

The prominence given the Marquis of Queensberry in the Oscar Wilde case be interesting in the sporting world. He is one of the characters of Great Britain. Known among pugilists as the author of the Marquis of Queensberry rules, his name is familiar to all ring followers. These rules were in vogue in the days when Tom Allen, Joe Goss and Jem Mace were the great English fighters. John L. Sullivan was the first to make them popular America, Few people know that, among other titles to fame possessed by the pugnacious Marquis of Queensberry, is that of being a poet, and one, too, of no mean order. He published a volume of really good poems in 1880 and perhaps the best one of all is that entitled "The Spirit of the Matterhorn," the beginning and conclusion of which contain lines of singular merit, delicacy and spirit. Lord Queensberry was likewise formerly on the turf and his racing colors were green, with salmon sleeves. Perhaps the bestknown episode of his career was his interruption of Tennyson's successful play, "The Promise of May," at the Globe theater. The villain of the piece is an agnostic and throughout the drama is held up to ridicule and obloquy. Lord Queensberry, who was at the time an enthusiastic, resented this insult to what he considered to be his creed and accordingly on the fourth night of the performance rose from his seat in the orchestra stalls and exclaimed in a loud tone;

"I am an agnostic and I strongly protest against Mr. Tennyson's gross caricature of our creed."

Great excitement ensued among the audience which continued until the marquis had left the house, escorted by a policeman.

#### A "HOODOOED" TRAIN.

New York Central Men Railroad Shy of It -Sure to Meet with Some Bad Luck.

There is not a railway man on the New York Central who runs on freight trains that does not believe that the through freight known as A. S. No. 1, is a "hoodooed" train. The train runs from Albany to Suspension Bridge, and in the past few years has met with many accidents. Saturday morning the "hoodooed" train left Syracuse on time. Charles Detsel, a brakeman, who has been running on the road for the past five years, was assigned to make the run as forward brakeman. Detsel did not wish to take the run, saying to his companions that the train was "hoodooed," and that he believed he would meet with some bad luck. Everything went right until the train reached Coles' bridge, between Lock Berlin and Lyons. A brakeman on a westbound local that followed saw Detsel lying in the ditch at one side of the track, and the train was stopped and the injured man taken to Lyons. The entire scalp was torn off his head and he is in a dying condition. It was this train upon which Conductor Gowan was killed at Adams Basin Wednesday of last week. His death was caused in a similar manner. Conductor Orr met his death last summer on this train, and it is a fact that the "hoo-dooed" train met with five accidents on five consecutive days about a year

The following incident would be hard to believe if it had not occurred right here in Grand Rapids, and investigation by our representative has placed it beyond the reach of doubt. These are the facts in detail: Mr. J. H. White of No. 25 Haifley detail: Mr. J. H. Willie of 10.

I consulted a physician, who said the pain was from 'gravel' stones; gradually grew worse; the pain was in my back and side. My back swelled up in a great ridge, and I finally grew so bad that I was taken to bed, as helpless as a child. I passed blood, and when the pain was at its worst I was like one crazy. The doctor injected morphine to give me relief, but further than that he said he was powerless, and nothing would do me any good but a surgical operation. I believe my flesh was literally cooked in the attempts to relieve my agony, everything was used, mustard plasters, turpentine, hot cloths and all such things. I was in this condition, given up by the doctor, and almost out of my mind with suffering. I commenced taking Doan's Kidney Pills, and really I felt easier in 20 minutes. After about two hours I had a passage of urine, and passed blood and some 'gravel' stones which greatly relieved me. I rapidly improved. I took in all six boxes, and I feel to-day entirely well. Mine has been a wonderful case. I feel that I cannot say anything strong enough for Doan's Kidney Pills. My great wish is that they may become well known. They will prove a boon to man-

The Manufacture of Wild Men.

There are many curious trades in the world, but the most strange must surely be the "artificial manufacturer of wild men." Yet a well-known English doctor in China has just certified from his own personal experience that this art is regularly practiced in the Flowery kingdom. First a youth is kidnaped, then bit by bit he is flayed days. alive, and the skin of a dog or a bear grafted piece by piece upon him. His vocal chords are next destroyed by the action of charcoal to make him dumb; and the utter degradation of the mental faculties is effected by keeping him immured in a perfectly dark hole for a number of years. In fact, by treating him like a brute for a sufficiently long time he is made into one. At last he is exhibited to the entirely credulous Chinese as a wild man of the woods and his possessors reap a rich harvest. The priests, it seems, are adepts at the When a kidnapper, however, is eaught by the people he is torn to pieces, and when the authorities get him they torture him and promptly behead him.

OF THE WORLD.

HELEN MAY DICKINSON.

Disease of the nerves, vitality at low ebb, nervous prostration and all attendant evils and troubles are the result of the high nervous strain, the everlasting hustle of the American people. High authorities say it is the air, the climate that seems to intoxicate the people with such a mad desire for wealth and position, that they never know when to rest. This unremitting work, push and energy has made the United States the richest country on the face of the globe, but work, worry and a peculiar climate has made the American people a nervous race.

#### "Now as well as ever."

Mr. George Dickinson, Deputy Supreme Commander of Knights of Maccabees of the World, whose residence is Emporium, Pa., writes:

cabees of the World, whose residence is Emporium, Pa., writes:

"Dear Friends:—I feel grateful to you for the great good your valuable medicine-Dr. Miles' Nervine-has done my little girl. She was almost blind from amaurosis, [disease of the optic nerve] and could not tell daylight from darkness. We were in despair that our rosy, baby girl should not be able to see out of her round, blue eyes. It seemed impossible, as they looked as well as ever, but it was true; she became worse. Afterseveral prominent oculists and physicians had failed, we finally decided to try Dr. Miles' Nervine. It restored her eyesight. I bought two more bottles and she is now permanently cured. I hope you will publish this letter for the benefit of others. I recommend it wherever I go. I also hope that your wonderful medicine will become so well known that every house will keep it as a standard remedy. Its merit only needs to become known for this to become an established fact."

Dr. Miles' Nervine is not a chance discovery, but the result of 20 years study, careful investigation and experiment by Dr. Franklin Miles, the great specialist in diseases of the heart, brain and nerves. It is sold by all druggists on a positive guarantee that the first bottle will benefit you. Should it not you may return it and obtain your money. This allows you to give it a fair trial without any risk. This proves our confidence in the medicine. This proves that it is made to cure. This proves the merit of the remedy, if it was an ordinary medicine, this unparalleled offer could not be made. It is a specific for all nervous diseases such as Nervous Prostration, Dizziness, Sleeplessness, Headache, Neuralgia, Rheumatism, Apoplexy, Epilepsy, Convulsions, Backache, Nervous Dyspepsia, St. Vitus Dance, etc. Sold by all druggists at \$1 a bottle, six bottles \$5, Pills 25 cents.

# About! Knives.

A cheap Pocket-knife can be bought at every Store, but it is not the kind you want.

One dollar is the lowest price that a really good knife can be sold for. This Moumn is placed in this paper to adver-ie the very best Pocket-knife ever-sold. It is J. C. Tidmarsh's Sheffleid Steel Knife.

Never buy a knife only because it ooks well. If blades are not the best looks well. If blades are not the best Sheffield steel they will soon bend, no matter how they will look. Still, you want a fine-looking knife.

The United States law provides that only samples to agents and to the trade will be admitted free of duty. You can, therefore, see the advantage that I have in sending samples to agents over those who deal in Sheffield goods in America.

I am an advertising agent! I am f trusted with a certain amount to spent advertising these knives (the be-value ever seen in America at Of Dollar each). Now, the knill is own best advertisement.

Imagine a Pocket-knife (31 inches long) with the most beautifully-grained vory handle-genuine African ivory mand with two blades of the very best Sheffield steel that will last a lifetime and cut like a razor. The tips of the handles are heavily plated with sterling silver. And then a very nice chamois leather case goes with each knife. Now, would it not be easy work celling this life at the property of the prope selling this knife at One Dollar each? I know it would, for it looks as if it were worth two dollars.

And so it is if you compare it with the value offered in the ordinary Store.

Is not this knife its own best adver tisement.

You can make \$4 per day selling these knives. This is a genuine and straigtforward statement. This is counting that you show it to only twelve buyers every day. And every one that sees it will say it is good value for \$1. The knives are sold to you at \$8 per dozen; you sell them at \$1

I determined to use large sum of advertising money entrusted to me in sending out free samples to those who promise to act as agents for the sale of these knives

I will send you a free sample, but you must sign the promise at the foot of this column, and make a deposit to show that in asking for the knife you are acting in good faith.

The deposit that I ask of you is 44 cents about half the wholesale cost of the knife, and less than one-third what you would have to pay for a knil like it, if you bought one.

Send the money by a Postal Order or one-cent stamps for 44cts., and put a five-cent stamp on the letter, which must not weigh more than one-half

The deposit of 44 cents will be placed to your credit, and will be deducted from your first order at the dozen rate.

I am an advertising agent, contractor and publisher with one of the largest Advertising businesses in the world, and I absolutely guarantee to send, postage paid and duty free, the knife described above free to anyone who signs th promise below, and sends it with th deposit as stated.

Let me advise you not to part will your sample, even if you should lose sale at \$1 by refusing, as it will taltime to replace it. I could not send you another even if you sent the full \$1. After the sample they can only be supplied to you by the dozen as there is duty on them to be paid.

Any English Banker can give you information about my high standing, or write to the publisher of this paper, who knows that I do a large and straightforward advertising business, and that'I do exactly as I say.

I have taken this pace in this paper for three years! The first one answer-ing this advertisement after this number of the paper has come out will, if he likes, have his name printed in this space as agent for these knives.

The Editor of the Springfield (Ohio)
New Era writes, in his paper of June
29, 1894:—"I have received a sample
knife from Mr. Sears, and am very
much pleased with it. He is the owner
of a very large advertising business
in London, and is, I believe, perfectly
responsible and straightforward."

HYDRAULIC FORGING.

Fully Developed in Germany and Utilizoo by England.

Announcement is made that the Brener-Schumacher process of hydraulic forging, so fully developed in Germany, has been introduced in England by a Leeds concern, who have made a press that exerts a pressure of 700 tons, and can make long and slow strokes or short and quick ones, as desired; a large steam cylinder is used instead of a pumping engine, the piston of which is prolonged and acts as a ram for exerting hydraulic pressure on the forging tools through the medium of a second hydraulic cylinder. Briefly, there are two steam cylinders placed over the press to lift the forging crosshead, by which the upper forging tool is carried, and, when it is desired to work in the ordinary way with heavy pressure, the admission and exhaust of steam in these lifting cylinders is controlled by the same lever which regulates the admission and the exhausting of the steam in the large driving cylinder, but steam in the large driving cylinder; but for quick working, direct and uninterrupted communication is established by means of a separate cock between these lifting cylinders and the boiler. In this way there is then always the full boiler pressure beneath the cylinder, tend-ing to keep the crosshead and upper tool at the top of the stroke, but the main steam cylinder, which puts or the forging pressure—through the hydraulic mechanism—is of so much greater area than the combined area of the two small cylinders that the crosshead is pressed down with con-siderable force, although, of course, with less force than if the two lifting cylinders were exhausting in the usual

. SHINE IN DARK.

Illuminated Bodies Can Be Made in a

Simple Way. Some additional experiments have been made in France, it appears, to de-termine the specific action of a considerable lowering of temperature upon the brilliancy of certain bodies which shine in the dark after having been exposed to sunlight. Tubes of glass filled with the powdered sulphides of calcium, barium, strontium, etc., all substances possessing the property of phosphores cence in a high degree, were exposed to the solar rays and afterward proved to be luminous in the dark, this being done in such a way as to fix upon the memory the mean value of the progressive diminution of the emitted light. and the time also was noted during which the light was strong, less strong and weak, respectively. The tubes were next placed in bright sunlight for one minute and then suddenly introduced into a double-walled glass cylinder, the interspace of which was filled with nitrous oxide at 140 degrees C. In about five or six minutes the temperature of the tubes was some 100 degrees. They were then withdrawn, and, when observed in a perfectly dark chamber, no luminosity whatever was perceptible. As the tubes recovered their normal temperature, however, the phosphorescence returned, without the exciting agency of the sun's rays or of diffused light. These results were proved to be general for all phosphorescent substances employed. The experimenta showed, too, that the production of the phosphorescent light requires a certain movement of the constituent molecules of bodies.

BICYCLES IN NEW YORK.

Wheels Will Grow This Year. Gotham has been on wheels the past winter. That is not to say that it has now retrograded from that most fascinating position, or is thinking or doing so; for the bicycle has developed all so the sound of t

sorts of delightful possibilities, says a York paper. A bicycle suit has been found to be wonderfully chic and becoming, and withal riding is really such great sport. So that all roads that can be ridden on a wheel this coming spring and summer will lead to happiness, and the bicycle bids fair to be the favorite vehicle at the different resorts where New York people have their beautiful country homes. The Michaux club, for the present, is the center of all bicycle festivities, and whether the Michaux club made the bicyclists or the bicyclists made the Michaux club it would be difficult to tell. At any rate, they are developing together so rapidly that there are beginning to be rumors of a permanent club house, with all the conveniences of such a place.

An Old Eaglish Custom.

An ancient custom of "tossing the pancake" was observed at Westminster (London) school on Shrove Tuesday. procession of pupils was formed, headed by one of the abbey vergers carrying a frying-pan containing a newly-made pancake. Admission having been gained to the hall, the cook, whirling the frying-pan three times round his head, hurled the pancake amid the crowd of boys, and the one who secured the largest piece received the usual award of one guinea.

DRAWING WIRE

An Interesting Process in Mechanical Art Described.

One of the most interesting mechanical processes as now practiced is that resorted to for the drawing of wire. The rod is received by the wire drawer in the form of a coil, the rod being of varying section and the coll of a weight depending upon the purpose for which it is intended. One end of the rod is pointed and somewhat reduced by ma-chinery, and the coil receives a bath in mild acid to remove all oxidation, then is washed in lime water to give a drawing surface, and finally dried in a suitable oven. When ready for drawing the pointed rod is inserted in one of the holes of a drawing plate, the latter being generally of steel though cast iron is in some cases used; the drawing holes are conical and the rod is inserted from the larger end, while on the other side of the plate the pointed end is seized by power pincers and pulled until enough has been drawn through to allow of its being passed around and fastened to a drum or reel which is driven by power; of course the rod is reduced in area and much elongated, and this without any perceptible loss of metal. While passing through the plate it is kept lubricated with what is called wire drawers' soap or grease; and after being drawn through this first hole it is put through a series of smaller holes until it has been brought down to the requisite and But the compression and disturbance of the structure of the rod consequent upon these reductions have hardened it so much that at certain stages it is necessary to stop the process and soften the metal by annealing; it is then again washed in acid, etc., and the drawing

A False Diagnosis.

La Grippe is confounded by many persons with a severe attack of catarrh which in some respects resembles the former. These individuals suffer severely with pain about the forenoon, eyes and ears, with soarness in throat and stoppage of the nasal passages, and in fact are incapacitated for work of any kind for days at a time. These are ca-tarrhal sufferers. Ely's Cream Balm has been used with the best results in The remedy will give instant

FOR THOSE BURIED ALIVE.

Device to Supply Them With Air-Car Signal the Sexton.

There are a great many people in this city who have a constant dread of being buried alive. Whenever their thoughts turn on death they consider this possibility. It is not strange, therefore, that the genius of the American inventor has come to the front in this field and has patented a number of articles designed to guarantee that when you are in your grave, in case you should come to life, you can tell the cemetery authorities and be resurrect-I saw such a machine yesterday.

It consisted of a long tube running down through the coffin to the nose of the supposed corpse. Down this tube fresh air was constantly forced by means of a pinwheel attachment over the grave. On the forehead of the supposed corpse is placed a large button of wood, adjusted in such a way that in case the supposed corpse should move in the grave a sort of foghorn signal will be blown up above the ground and the grave digger summoned

It Is the Same Now that It Was a

A peculiar fact was lately pointed out the president of the Manchester, England, Geological society, namely that although much has been done to improve the operation of coal cutting, the collier's pick remains exactly what it has been for the past century, and as to coal-cutting mechanisms, not a single machine of the kind is at work in the Manchester district today. As to the motive power and the three methods of driving, viz., steam, compressed air and electricity, the president considered steam to be impracticable, but much was to be said in favor of compressed air as to being safe as well as helping to cool and ventilate the work-ings, but the loss in transmission is very great; on the other hand electrical transmission involves a loss of not more than five per cent., and now that the difficulty from sparking has been over-come, it must be regarded as the mo-tive power of the future. A novel ma-chine combining these two forces has been introduced; it has, in a word, the advantages of compressed air, while the actual motive power is electricitythe mechanism is, briefly stated, a cut ter-bar drill and an electric motor connected by suitable gearing, and in doing its work only the minimum of dust is produced.

Bristol Likely to follow the Lead o Manchester Enterprise.

According to the English journals the completion of the Manchester ship canal is likely to spur Bristol to a similar engineering enterprise, . com petent authoritites having already been intrusted with the planning of the best means of providing dock accommodations on the Avon for the largest vessels, with an estimate of the probable cost. The river Avon, from Bristol to Avonmouth, is said to resemble a deep trench some seven miles long, and at no part more than 900 feet wide, so that, when the tide is in, this trench is more or less filled with muddy water of a depth varying according to the height of the flood, and, when the tide is out, the steep black sides are exposed to a considerable depth, and down in the central hollow a narrow stream hastens away rapidly to the mouth; the channel is available navigation by large ships only at high tide and the idea is to transform the entire estuary of the river into a huge dock seven miles or so in length, with dock gates and a lock entrance run out in the frame of an immense dam 900 feet long, stretching right across the mouth of the river, pierced by a lock entrance at the north end of the passage of ships, and by sluices at the south end for the emission of the overflow of the river water, outside jettics to facilitate the warping of vessels into the lock and outside breakwaters to protect the entrance channel, inside quays with a sufficient depth of water to permit the biggest liner to lie alongside of them, a graving dock adapted to the largest craft, and a pier for pas-

An Invention for an Idle Hour.

It is well to cultivate patience, says the London Graphic. This seems a trite axiom; applied to cards, however, it has a new signification. Marie Antoinette was fond of games of patience, and ex-Empress Eugenie played patience every morning, and those of us who know and practice some of the 130 various games which are mentioned in the treatise on the subject may well find solace and amusement in an engrossing, if unsociable, pastime. Those twilight moments when reading is impossible or the brain is weary, those dull half hours of the evening when conversation is exhausted, or the mistress of the house is alone by the fireside, are infused with a new zest and a fresh delight by the game of patience. The possibilities are endless, the incombinations require numerable thought, and the minutes slip away unconsciously as one hangs eagerly over the chances of the palm-leaf patience or the Reussite de Marie Antoinette. Besides which it has one especial virtue-it does not require, like bizique, chess, or even Halma, more than one player; it has variety, interest, novelty, and makes no exorbitant demand on the intellect. Altogether an excellent invention for an idle hour or the bedside of an invalid who is too listless to work, too weary to read, and too weak to write.

A RACKWARD SPRING.

Following a Severe Winter, Brings Blood Diseases, Nervous Derangements and chronic Catarrh.

Never was there a greater demand for spring medicines-something to purposes as Pe-ru-na? Thousands of have long ago decided this questionthat Pe-ru-na has no equal in these cases. Poor, shrunken dyspertics become er of pastry, the "punkin," and that be-strong, vigorous and hearty after a few wildering apotheosis of American inses. Poor, shrunken dyspeptics become the blood. Chronic catarrh in all phases and stages, cases that have defied the best of treatment for many years, take a few bottles of Pe-ru-na for their entire relief. Nervousness, debility, weaknesses of both sexes, sleeplessness, irritability, despondency, hypochondria, a restaurant keeper not to include these all these disappear when Pe-ru-na is used according to directions.

nia, a clever and gifted girl, with great linguistic and musical accomplishments Bret Harte's two eldest children, both of them boys, were born in San Fran-cisco. The Hartes then moved to New York and it was there Jessamy and her sister Ethel were born. The family at present is living in Plainfield, N. J., where for a number of years the mar- mayor may tie the knot sometimes exried sister of Bret Harte has had a lovely old-fashioned residence. Miss Harte, when a very little girl, used to draw funny images and pictures of Our own form of marriage by priest or queer children on the margin of the leaves of all her books. She was a practically a civil ceremony, as it indreamer. She would sit for hours perfectly quiet when a little child, absorbed in thoughts all her own. Of a sudden, she would ask for a pencil and paper. The "thoughts" would then appear thereon, in the shape of roses, jessa-mine and English violets, or else pictures of pretty children, always made with wings.

Happiness. How much the possession of happiness depends upon the point of view we choose to take in seeing things! She who determines to look upon the bright side of affairs will generally find that some brightness is visible; she who wants to point out to herself and others that discouragements abound, can, as French lovers must post at the mairie a rule, succeed, to her own satisfaction in the gloomy pursuit. There is such a thing as curbing one's natural ten-dency to depression and in wholesome fashion casting lamentable melancholy out of doors. And one means to this end is mentally and spiritually to outgrow the necessity of being happy. The less one thinks of the deprivations and lack of those conditions which are commonly supposed to be requisites of happiness, and the less one cultivates a spirit of restless pursuit of happiness— a spirit which by its very lightness and delicacy eludes a harsh grasp—the more likely is happiness to come all unsought, particularly if one is more anxious about securing conditions of happiness for others than for oneself.

An Amusing Oversight.

An amusing incident occurred at a freethinker) they will go to the priest fashionable wedding in London. One friend, who determined to save her the priest who performs the religious money and credit at the same time, took a broken ear-ring to a famous jeweler of Bond street and ordered the little stone to be set as a scarf-pin for the groom. As she sagely remarked: "It does me no good, and, coming from such a famous establishment, they are sure to prize it and think I paid a lot of money." When the package was returned from the shop the wedding guest failed to examine her proposed present, and merely dispatched it with her card and compliments. Imagine her disgust when strolling through the rooms where the bridal gifts were displayed, to find a dozen people about her offering, and each one smiling. For a moment she hesitated then pressed forward, and lo! there was the precious white satin covered box, bearing the prize name, it is true, but, alas! below: "From the repairing depart ment." And, even worse than all. Resting on the blue cotton beside the pin, was an old broken bit of earring returned by the conscientious

Only the civil marriage is recognized in law volves filing a certificate with the board of health. Under the French law a girl may not marry until she is after 15 years old and a man until he is more than 18. If the girl has been betrayed this section of the law is not operative. Men under 25 and women under 21 must have the consent of their fathers and mothers. After that age the consent of the father alone is neces-The father may withhold his consent for three months. The son or the daughter must ask him three times. If he refuses the third time and both are of legal age they may be mar-

ried without the paternal blessing When the woman is 25 and the man is 30 they are required to ask the father only twice. The asking must be through a notary, who makes an official record of the fact. After the man has passed 30 and the woman 25 years the law supposes that they have ac quired enough wisdom not to need the sanction of their parents. After having waited for the approval of the head of the home and received it the patient of their arrondissement (each ward in Paris has its mayor) on two successive Sundays the announcement that Armand is going to marry Suzette and that if anybody has any objection he or she shall file it with the mayor or his assistant.
