#### Meeting of the Council.

The entire council, except Ald. Moore, who was ill, was present Monday night. Mayor Walker's veto to the resolution offering reward to anybody who would furnish evidence that much larger verdict. would convict the person who had been in the dog poisoning business, was read by the clerk. The clerk also read the Mayor's appointments for the next two years, as follows:

Treasurer-Chas. H. Manly. City Attorney-Chas. H. Kline

Fire Committee-Moses Scabolt. Board of Health-Dr. Kapp.

Building Inspectors-G. Luick, G. M. Clarken, J. J. Ferguson.

Marshal-M. C. Peterson Patrolmen-D. Collins, R. Armbruster, J. M. O'Mara, G. R. Isbell.

A. W. Cochrane was, upon the recom-

mendation of the Mayor, appointed special policeman at the water works pose without expense to the city.

A petition some three yards long asking the council to take action looking towards the sprinkling of the main streets by the city was received and referred to the water committee. The petition contained 316 names. J. A. Polhemus put in a claim for the value of a horse which was killed by slipping upon one of the new cement crosswalks. The matter was referred to the finance committee. The board of health petitioned to have the city secure a place for the dumping of garbage. This was referred to a special committee consisting of Alds. Prettyman, Koch and Shadford.

#### Dr. Cobern's Lectures.

Rev. Mr. Cobern gave his first lecture last Sunday evening describing his trip through the Land of the Philistines. He visited this unknown district of the Holy Land five years ago and had a number of remarkable and dangerous adventures besides noticing many fulfilled propheas seen by an eye witness 2500 years ago. He described Ashdod, the capital of ancient Philistia, as the inscriptions speak of it 1000 B. C. and then as it now appears. It is but a wretched jumble mud huts surrounded by a hedge of actus 12 feet thick and 12 feet high, in ull bloom and garlanded with honeyuckle. The second lecture will be iven next Sunday evening.

#### The Lewis' Art Gallery.

The famous Lewis'art gallery of Coldvater is now the property of the U. of M., the widow of the late Mr. Lewis. who after Mr. Lewis' death married a Mr. Dennis, having died yesterday morning. This is a famous collection of pictures and will be a great addition to our art gallery. The University however, has no building suitable to contain the pictures, so the collection will very likely remain at Coldwater until somebody gives money to erect a fro

TO A YEAR'S VACATION.

They Carried Off the Freshman Toast Master-And Then Were Asked to Interview the Faculty-They Plead Hard But in Vain-Eyans Holbrook, of Iowa, Harry Herdman, of Ohio, Frank Ketcham, of Detroit, he Gallty Parties, - Later a Law Student

At the meeting of the literary faculty Monday night the kidnaping affair was taken up. The three students named above were called before the professors and labored hard to convince them that the carrying off of the toast master for the freshman banquet was all in fun, merely a students' prank. The professors could not see it in this light and decided that such "fun' should be summarily punished and proceeded to sentence the three fellows to a year's vacation. The faculty was entirely unanimous in the matter so that there is no likelihood that the decision will be changed. Tuesday the law faculty expelled a student in that department for the same thing. The kidnaping of the toastmaster was not the worst feature of the freshman banquet affair. The parties who covered McVay's face with nitrate of silver can expect a much worse sentence if they are caught. Those guilty of this particular sort of 'fun" will be expelled without any unnecessary ceremony should positive evidence be obtained as to who are the guilty parties. The prompt action of the authorities on this occasion will probably put a quietus to such escapades for a long time to come.

#### Found Stolen Property.

Some days ago a quantity of stolen goods, about such as would be found in a bazar, were found secreted in a straw stack on John Lawrence's farm south of town. The place was watched for nearly s week in the hope that those who had deposited the goods might come after them. Last Thursday night three men came after the goods and were arrested. They gave their names as Geo. Richie. Geo. Kelley and Elmer Thompson. These men have been in custody here before for different offenses. Along with the goods were found some letters written in Arabic which may lead to the discovery of a regular band of thieves. The officers refuse to divulge the entire contents of the letters as it might hamper them in apprehending the others implicated.

#### The Cooley Bu-t.

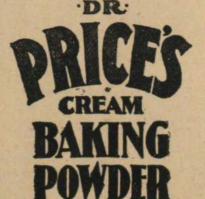

Arrangements are nearly completed for the dedication of the Cooley bust which will likely take place about the 20th of the month. The exact date will depend upon the Judge Hornblower, of who will deliver the address. nation concerning Judge Cooley. Gov. ling this week at Rich, it is expected, will speak in behalf of the people of the state. Professor Levi T. Griffin will give an address for the faculty, and R. J. Barr will pre sent the bust to the regents in behalf of the class. Prof. Stanley will arrange the music.

The Times last Thursday contained a committee be appointed to prepare a sensational article concerning possible charges which might be brought next year and ask for bids. Resolu- against justice Gibson and constable Weinman for some irregularity in arresting and fining people for violating orizing the city clerk to procure a gold the ordinance for riding bicycles upon to have been a piece of nonsense, and may result in a libel suit, if Gibson desires to push the matter.

Constable Weinman, of the seventh ward, suddenly disappeared a week ago last Monday. Last Thursday he was brought home insane by a farmer in Pittsfield at whose house he had called for food. He is laboring under the halucination that somebody is trying to kill him. He will probably be sent Styles in to Pontiac in a few days.

The game between the U. of M. and Cornell, at Ithaca, N. Y. last Saturday cies. He described the bazaars of Tyre was an exceedingly close one. The score of two to one in favor of Cornell shows that the game must have been well played by both sides.

ing, Hillsdale County. Mrs. Louise S. Rounds, president of Illinois State W.C. T. U. gives her elequent address on 'Social Purity' this evening.

A large number of leaders of the World's W. C. T. U. have registered berths in the Berlin for the two hundred dollar tour and the World's Convention in London in June, including a visit to Paris and Switzerland, which has been organized by Dr. Lunn.

An amusing story is told of Lord Russell, canon of Windsor, who became an abstainer late in life. In giving the reason for his convertion to teetotal ideas before a recent meeting, he assigned as the cause for his change that 'for forty years as a parish clergyman, he had been trying to cure drunkards by getting them to indulge in moderation, but had never once succeeded.' His amazement may be imagined when and valuable articles, notes and hints, presented by a close student and investigator."—Daily Spokesman-Review, forty years to drink in moderation, but forty years to drink in moderation, but had never once succeeded!"

DOES ALCOHOL WARM US?

A patient was arguing with his doctor on the necessity of his taking a stimulant; he urged that he was weak and needed it. Said he: "But, doctor, that the Pacific Northwest is 'strictly in it' as a producer of staple fruits."—J. B. Holt, Manager Snake River Fruit the doctor's crusty answer, "see here: must have some stimulant; I am cold this stick is cold," taking up a stick of wood from the box beside the hearth, and tossing it into the fire. "Now it is warm, but is the stick benefited?" The sick man watched the wood first send out little bluffs of smoke, and then burst into a flame and replied: Of course not; it is burning itself." "And so are you when you warm yourself with alcohol; you are literally burning up the delicate tissues of your stomach and brain.'

GUARD THE LITTLE BOYS.

"I've tried to take good care of my girls, and instruct them what they ought to know; but it is not so necessary with the boys. They will be sure to find out things, anyway" said a mother with a laugh.

"Yes, but how do the boys find out? Can a slimy stream pour forth good water? Can you safely trust your hired men or your boys' playmates to give instructions which you alone have the right to give?"

"But boys are so different from girls. It does not seem to make so much difference what their heads are filled with and what they do."

Many, alas! are of the same opinion as this poor, misguided mother, and it is a sad fact that the double standard of purity is established in our homes in dealing with the children of a family.

Mothers are lax with regard to the morals and manners of their boys, little thinking of the irreparable wrong they Lies NOT in Selling Cheap | thus doing, not only to those of their Goods. We don't wan't any own blood, but to society at trash in the house; but in large. Further than this, boys are often counted rough and unfeeling and natur. ally cruel, the real truth is that they are preciation of this store ex-Boys have just as warm, tender hearts as girls, and it is the duty of parents to keep them in an atmosphere just as pure, and to shield them just as carefully from evil.

Maternity will never be the subject of course jest to the boy who has his first ideas of the origin of life in a loving sympathetic way from either parent. The child's love for his mother is increased a thousand fold when he knows that he is a part of her very life. Steinway piano from the Ann Arbor Organ Co. The instrument was placed in the Association rooms last week, and it is hoped that the entertainment to church will wipe out the piano debt of fifty dollars. The Association is prospering, classes in English, Conversation, Elecution, Music and Delsarte fill two evenings of leach week, and the rooms are always open Saturday evenings.

It has been brought to my attention that Miss E. Cora DePuy, a late employe on The Democrat, charged for writing obituary notices which were published in the above named paper. Through the columns of this paper I desire to say that if money was paid Miss DePuy for such articles it was entirely without my knowledge, sanction or advise. Miss DePuy received pay, for services rendered, every Saturday night, the same as the other Democrat employes and if she collected money for writing obituary notices and published them in The Democrat, she did something that not for one moment would have been countenanced by me. This information was given by a lady who was charged \$10.00 for an obituary notice of her deceased husband, which was published three months ago, in The Democrat.

I make this statement to let the read. ers of The Democrat and the public generally know that in no case have I ever received pay for obituary notices published in The Ann Arbor Democrat EMMA E. BOWER.

#### A Great Feature.

The Recital on the great Columbian Organ, by Clarence Eddy, will be one of the most attractive features of the coming May Festival at Ann Arbor, May 17 and 18. This organ, it will be remembered, was built for the World's Fair and stood in Festival Hall during the exposition. After the Fair was over, it was shipped to Ann Arbor and set up in University Hall, as the gift of alumni and friends to the University. Mechanically it is the most perfect great organ in existence. It contains 3,901 pipes, the largest of which is 32 feet long. Connection between the keys and pipes is made by electaical apparatus, so that the response of the pipe to the fingers of the player is immediate, as in the case of a piano Wind is furnished by immense bellows, to which force is applied by means of two electric motors, one of five, the other of two, horse-power. The organ has four manuals and 116 stops. Prof Clarence Eddy is so well known that further account of him seems unnecessary; he ranks among the great organists of the world. The Organ Recital will be given Saturday morning, May

#### When to Sprinkle.

The Water Co. has made the following order relative to sprinkling lawns and streets by water takers:

Morning-All parts of the city from 6 to 8 o'clock.

Evening - All between center of Forest-ave. and Fourteenth-st., and center of State-st., 5 to 7; all west of center of State-st., 6 to 8; all east of center of Forest-ave. and Fourteenth-st., 7 to 9.

The use of hose larger than threefourths inch is prohibited without special permit; also sprinkling with nozzle with opening larger than three-sixteenths inch, and the use of more than one sprinkling fixture at a time. In sprinkling streets each consumer must

confine himself to his own property. For violation of the above rules the water will be turned off without further notice, and one dollar will be charg for turning off and on before service

These rules seem exceedingly strict, but the way some people waste water seems to justify such a course on the part of the Water Co.

#### Kearns-Edwards Wedding.

"The marriage of Richard Kearns and Miss Louise Edwards occurred yesterday afternoon at 5 o'clock, at the home of the bride's parents, Mr. and Mrs. Daniel Edwards, Capitol-ave north. The ceremony was performed by Rev. Father Slattery, in the pres ence of about twenty guests. Only the immediate friends and relatives of th families were present. The bride wor a traveling dress and was unattended Bartlett Wiley acted as best man. Mr and Mrs. Kearns left on the evening train for Detroit, where they will make their home in the future.

Low Water in the Lakes.

Lake levels are playing some peculiar freaks this spring. From various reports of low water made since the pening of navigation it would seem as if the mean lake levels are a foot below the ordinary stage. Thus far this season continued northerly winds have kept up the stage of water in Chicago harbor to its usual height, but at the foot of Lake Michigan the drop is reported from two to three feet, more especially in Green Bay, where it is said to be four feet. At both the Welland canal and the St. Mary's canal the limit of draft is materially Continual strandings on Grosse Pointe, in Detroit river, have given warning that cargoes must be materially lessened. The capacity of deep draft vessels, which do nearly all the lake commerce, has been reduced the lake commerce, has been reduced by the low water from 5 to 8 per cent. Gen. O. M. Poe says: "I don't blame them for being uneasy. There is a good reason for the low stage of water, and it will get still lower unless there are abundant general rains soon. Since February 1 the rainfall has been four inches short of the normal quantity in the entire lake region. Four inches all over the lakes and the country that is drained into the lakes means a considerable difference in depth. Besides this, there is the evaporation and outthis, there is the evaporation and out-flow going on all the time, all of which is lowering the lakes all the time.'

# THE ROYAL BAKING POWDER

possesses a peculiar quality, not possessed by any other leavening agent. It makes bread, biscuit, cake, muffins or rolls which may be eaten when hot without inconvenience by persons of the most delicate digestive organs.

Yeast, and all baking powders that produce the leavening gas by fermentation, as is well known, destroy those nutritive elements of the flour which are the most healthful and the greatest aids to a perfect assimilation of the food.

The Royal Baking Powder leavens the food perfectly by purely mechanical means, without changing or impairing any of the elements of the flour, thus making it both delicious and wholesome.

The latest investigations by the United States and Canadian Governments show the Royal Baking Powder superior to all others in purity and leavening strength.

SEWING MACHINES POPULAR? BECAUSE LADIES BUY THEM LIKE THEM AND TELL THEIR FRIENDS.

Many ladies have used our machines twenty to thirty years in their family work, and are still using the original machines we furnished them a generation ago. Many of our machines have run more than twenty years without their twenty years.

Many of our machines have run more than twenty years without repairs, other than needles. With proper care they never wear out, and seldom need repair. We have built sewing machines for more than forty years and have constantly improved them. We build our machines on honor, and they are recognized everywhere as the most accurately fitted and on honor, and they are recognized every-where as the most accurately fitted and finely finished sewing machines in the world. Our latest, the "No. 9," is the result of our long experience. In com-petition with the leading machines of the world, it received the Grand Prize at the Paris Exposition of 1889, as the best, other machines receiving only compli-mentary medals of gold, silver and bronze. #### MONETARY CONFERENCE.

Senator Jones Believes It Will Be Called

in October or November. Washington, May 7 .- Senator Jones, of Arkansas, believes that an interna-tional monetary conference will be held during the present year to consider the relationship of silver to gold as a money metal. He is one of the members on the part of the senate who will attend the conference in case one is called and has naturally kept track of all that has been done in the matter. He said that while Germany had not issued an executive call for a conference the action of the reichstag had been accepted as official by the governments of the United States, France and Great Brit-ain. Asked as to the time when he thought the conference would be called for, he said it would probably be late in the season, not earlier than October, and possibly as late as November. Both sides of the controversy were apparently anxious for delay. The English bimet-allists claim to be making substantial headway and are asking for all the time that can be given before the meeting of the conference.

CLOUDBURST IN KANSAS.

Two Houses Carried Away and a Woman Drowned-Town Flooded.

Herington, Kan., May 6.-Herington was visited by a cloudburst last night. The town and surrounding country was flooded. Lime Creek, which has been dry for a year, was converted into a raging torrent, and houses, horses, cattle and hogs were swept down stream. John Williams' house was carried away, and the family narrowly escaped drowning. The house of Samuel McManus was also carried away and wrecked by striking a bridge. McManus escaped, but Mrs. McManus was drowned. Her body was found lodged in a tree in the park south of town this morning.

If all wives and mothers could fully realize how apt each one is at all times to be bereft of the protector and sup-port of themselves and their children they would be more fully able to appreciate the real benefits of a life insurance policy. As an investment it is as safe and profitable as a saving's bank while in case of accident or fatal illness the return is much larger. Persuade your husband to lay by something in a life insurance policy and be protected in case of misfortune which sickness or accident may bring. wonderful.

Salesmen for Detroit houses talk very convincingly sometimes about how wonderfully low their employers buy because they sell dozens of pianos to our one.

Such arguments sound well, but are they based on facts?

How do they know how low we buy or how many pianos we sell. We sell dozens every year that never come to Ann Arbor.

We are state agents for four manufacturers and supply all their agents in Michigan. We are sole agents for The Clifford Piano and supply dealers in several states.

We make the Ann Arbor Organs and ship them to every part of the globe. We have nearly doubled our business every year since 1888.

We are known everywhere as cash buyers. Manufacturers are glad to sell us.

Is it not, therefore, reasonable that we can supply our customers at prices which fear no competition. Above are stubborn facts. Think over them and see us before you buy.

ECHOES OF THE EASTERN WAR.

Japan Will Make Concessions to Satisfy the Powers, but Russia Wants More.

Washington: Information has been received to show that, in response to Russian intimations, Japan has abated her claims to the cession of Chinese territory in Manchuria, and now offers to demand only the absolute cession of the extremity of the Port Arthur peninsula as far north as and including Talienwan. In return for this re linquishment of territory Japan will demand a considerable increase of the war indemnity originally fixed at 200, 000,000 taels. It is feared that this concession will not be sufficient to meet the demands of Russia, which will insist upon an entire abandon-ment of the Lao Tung peninsula. The Russian reasoning is that ly the occu-pation of Port Arthur the Japanese will dominate Manchuria as effectually as if she held the nominal title to the province. It would also be impossible or Russia to locate a western terminal port for the Siberian railroad anywhere in Manchuria as it would be easily closed at a moment's notice by the Japanese from their powerful base at Port Arthur, which would dominate from a military point of view not only Manchuria and the Gulf of Pechili, but also Wei-Hai-Wei, only 40 miles across the straits. Japan would also be in a position to control the commerce of

Mr. Poultney Bigelow, one of the best posted writers on European politi-cal questions, has written a splendid article setting forth the reasons for the attitude of the various powers. It may be summed briefly as follows: Russia wants the territory which the Japs have won; Germany's ruler de sires to secure a friendship with Russia and cause a coolness between that country and France; the republic of France weakly supports Russia's demands because of other entanglements with her; John Bull does not wish to China and Japan. But reports from incur the displeasure of either side, and Uncle Sam is always neutral in foreign scraps.

BRITISH LEAVE CORINTO.

learagua and Great Britain Come to an Agreement at Last.

Managua: The British and Nicaraquan governments have reached an agreement, thanks to the good offices of the United States, and the British narines have evacuated the port of to. Nicaragua has agreed to the \$77,500 demanded by Great Britain for the expulsion of pro-Consul Hatch and for other alleged damages to British subjects arising from the recent troubles in the Mosquito reservation, but instead of paying the money at the cannon's mouth, as the British government originally de-manded should be done, she will pay it in London 15 days after the last vessel of the British fleet withdraws from Corinto. Two of the three vessels promptly left the harbor after the marines were on board, but the Royal Arthur remained. The action of San Salvador in guar-

anteeing the payment of the indemnity as, in fact, her course throughout the whole dispute, is very favorably com-mented upon in official circles and it is believed that an entente will be established that will lead to results beneficial to both countries. It would not be at all surprising if this trouble with Great Britain should result in the formation of an alliance between the Central American states for defensive and commercial purposes. In fact President Zelaya has received numer-ous letters from neighbor states suggesting a commercial union. Not for years has there been such unanimity of opinion among the Spanish-American republics.

#### More Trouble in Nicaragua.

New York: A cable from Tegucigalpa, Honduras, says fighting has begun in Granada, Nicaragua. Disorder is also reported from Leon. The Hondurian troops concentrated at Cape Gracias will remain there, as it is feared that the threatened outbreak on the Mos quito reservation may extend here. Gen. Bonilla will take 4,000 men and go to President Zelaya's aid if requested. Washington: The fact that the rev-

olution is along the east shore is regarded as significant. This is the Mosquito region in which British influence has long been dominant. It has been apprehended by Central American diplomats that if the Mosquito natives made further trouble it would afford opportunity for further British intervention and probably an attempt to restore Chief Clarence. Japan Surrenders the Fruits of Victory.

Tokio: Japan precipitately abandons all Manchuria. Even the whole peninsula of Liao Tung, including Talienwan and Port Arthur, is to be given up. It is doubtful whether there will be any increase in the cash indem-nity. The facts are being kept secret here, but when the truth becomes known a universal public revulsion is certain. The present ministry is assuredly doomed. The government is anxiously guarding the foreign envoys. The diplomatic situation is unparalleled. The American opportunity is immeasurable. It is apparently not realized at Washington that supreme influence in the east for the next half century is easily obtainable through prompt, energetic action. The ratification of the treaty by China is still deferred

but is promised.

Che l'oo: The warships of several of the powers are fast assembling here. The situation is regarded as ominous. Already eight Russian warships including three torpedo boats have gathered here and more are expected. In addition another British, French and American and two German warships have ar-

The petition claims that the consolidated mortgage which was foreclosed was never properly authorized by the stockholders, and that it and the bonds it secures are absolutely void; hence the sale under it is null.

If You Have, Here's the Way to Rid Yourself of the Weariness and Pain Attending It.

Some people suffer with headaches, many people are worn out and weary all the time, many more people have lame back and backache. Few people understand the real cause of their aches, and fewer yet know how easily they can find a cure. Just a word of explanation before we prove that what we say is true. The we prove that what we say is true. The back is the key-note of the kidneys. It aches; that's a sign that the kidneys are not working properly; it is lame; another sign, the kidneys are out of order. The kidneys, you know, are the filters of the blood, but filters sometimes get clogged up. This means in their case that the blood courses through the entire system impregnated with poisonous uric acid, bringing on many a disorder which, if neglected, means disease perhaps incurable. And now about the cure:—Don't take our word for it; read what others say:

well known hardware and paint shop at 220 East Main Street, Kalamazoo. Mr. 220 East Main Street, Kalamazoo. Mr. Oaks has suffered a great deal from kidney ailments; he described his condition and cure as follows: "I had a bad, lame back, which I suppose was caused by my kidneys; was confined to my bed during bad attacks. I might say, from time to time, I have been in that condition for years. The princery organism was affected write. The urinary organism was affected, urine being scanty, highly colored, and difficult in passage. I was in a bad shape when I got a box of Doan's Kidney Pills, about which I had heard. I have used now two boxes of them, and the pills have removed all the pain and trouble. There was a marked improvement right from was a marked improvement right from the first, and it has continued right along. Doan's Kidney Pills are the right

thing in the right place."

CHEAP SOUPS.

How High Prices Now Asked for Meal May Be Met.

The large increase in the price of meats will, of course, affect more seriously people with moderate incomes. This need not be the case did such know how to avail themselves of the inferior cuts. There are half a dozen nutritious white soups which may be made solely of vegetables and in which the yolks of eggs beaten up in water and added at the last moment, take the place of meat. Dishes in which inferior cuts may be used are most numerous. In the marmite, for example, the cheapest portions of beef and mutton may be employed. To concoct this, fry in an upright earthern pot some salt pork. When the fat has all been extracted, pour it off and remove all sediments which may have been precipitated. Return the fat to the pot, then add in alternate layers meat, onions, carrots, turnips, and potatoes cut in slices. Al-The cheapest portions of veal may be even less trouble. "Serpentines" were in great request, but the most tasteful demonstration on the part of the students was their spontaneous ovation to Loie Fuller when she appeared, and was greeted with a shower of bouquets and violets, which fell so thick and fast that the stage was carpeted with them in an instant A delegation of the students presented Loie Fuller with a handsome and unique gift-an album, to which each student had contributed a sketch in pen and ink, pencil, or water colors, and some with a literary turn of mind also verses in her honor.—Queen.

Children Cry for Pitcher's Castoria. EASILY SCARED.

Medical Scientists naving a Jolly Time with English Aristocracy.

The English public appears at this moment to be under the spell of a bacillic spectre which disturbs severely he peace of mind of the well-to-do. With the advent of the epidemic of grip the doctors relied upon oysters and champagne as a mitigating remedy. Just at that time it was reported that typhoid fever was a possible sequence to indulgence in the first. In consequence the bivalve was avoided, with a corresponding increase in the dose of champagne. Following close on the heels of this theory came the discovery that death lurked in watercress. Dr. We suppose whenever they find a counterfiet dog they put a tag on him, and some folks don't like it.

Verdon, the medical officer of the health board of Lambeth, stated officially, after an inspection of the various water-The Times is authority for the remarkable fact that it is more than half water and consequently dangerous to the health of the people of London, who consumed all the Lambeth crop. On top of this it was announced that bread was postively dangerous unless baked at a temperature of 100 deg. centigrade. As no one could be positive that this particular degree of heat was employed in the brand which he consumed, all bread was looked upon with suspicion. To add to this burden of uncertainty, bacteriologists uttered a note of warning against the contaminating possibilities of the common house fly. It was clearly demonstrated by these investigators, that, in default of any other explanation, the fly must be held responsible for the spread of disease. There is at least one advantage in the acute interest of people in the bacillic theory, and that is the closer attention which is now given to care in the preparation of food. This is very much in evidence in the kitchens of hotels. There are many of these in New York, where every person who has anything to do with the cooking, preparing, or serving of aliments is required be fore he enters the kitchen to wash his hands thoroughly with antiseptic soap and to dry them on a separate towel. Care is taken that this process : tall be repeated at intervals during t e day, clean towels being provided t, each ablutio 1.

Mr. Jean Couet, the director of the culinary department of the Gil Blas of Paris, adapts his recipes to all classes. Among those given lately are two particularly available in families whose members possess robust appetites. The first is cabbage a la mode Blie. Put in a stock pot 3% quarts of water. When Dr. Pierce's Pellets cure constipation, it boils place in it 2½ pounds of beef liver-ills, indigestion, dyspepsia, piles and about 1 pound of smoked beef tongue. Add two cabbages of medium size, previously blanched. Cook for three hours. Withdraw the cabbages, drain them, season with butter, pepper and salt, cut in slices the meat and tongue, and place on the cabbage and serve. To blanch vegetables scald them where Loie Fuller now dances, leaving in strongly salted water. The liquid in hardly a spare stall in the house for which the cabbage and meat are boiled is immediately available for soup, with goer. Their enthusiastic admiration of the addition of a little butter and fried the serpentine dance showed itself in bread, or croutons. The second recipe is for leeks a l'hirondelle. Blanch some followed by a chanut or a kind of Red leeks, dry them, boil in water or beef stock. Serve like asparagus, with drawn butter or any white sauce.

FOR THE QUEEN.

A House Where Marie Antoinette's

Wardrobe Was Taken. On the upper or northern end of the Island of Westport, anciently called Squam, and situated in the Sheepscot Bay on the Maine coast, stood a large, square, old fashioned house, built of timbers, having one massive brick chimney in the center. It was owned and inhabited by a sea-faring on foreign voyages.

It was in the time of the French revolution, when this captain was on a voyage to France, that he was enand some of their furniture was already placed on the ship, and the king and queen were driven quietly down to the quay, where the ship's small boat was in waiting to take them off to the vessel. At the same moment secret agents of the revolution arrived just in time to arrest their king and queen soon after guillotined.

As soon as he found what had hap-pened Captain Clough put to sea with all haste, having the wardrobe and the furniture of the king and queen on board his ship. After a long voyage he arrived at Westport, Me., safely and stored the queen's wardrobe and furto the house used sometimes to see these things, and pieces of the queen's dresses are still kept by the Clough descendants, who live in Edgecomb, just opposite Westport.

On account of what I have nar-rated above the house came to be called the "Marie Antoinette House." Quite a long while after the events I have mentioned the old house was ferried across on scows to the opposite shore of Edgecomb, and placed high on the bank back from the river's brink, where it now stands, and is still inhabited. Many photographs have been taken of written was told me by the "oldest inhabitants," who received it as I tell it from their fathers and mothers.

After the house was more detailed.

After the house was moved to the Edgecomb shore it was inhabited by a man named Gardiner Gore, who kept a large store and was quite wealthy.

ART OF FRYING FISH.

The Jewish Method Is Probably the Best After All.

The art of frying fish in olive oil was imparted to western nations by the Jews. They found in the Italians and French receptive pupils; but in the Engish they encountered an obstinate allegiance to lard, which has never wavered in favor of any other medium. As our culinary traditions are derived largely from the English, lard or the fat of salt pork for frying is almost universally used in the United States. The superior merit of oil in this form of cooking is found in its limpidity and freedom from foreign matters. Moreover, the results obtained are more certain, and yet even American women, who live near waters, sait or fresh where fish abound, invariably employ salt pork in frying. None can excel them in the use of this medium, particularly those of the south side of Long Island. Although when they fry eels they never oat them with bread crumbs or flour the fish emerge from the pan flaky and crisp and of even tint. Should any one fancy this easy of accomplishment, he or she has only to attempt it to find how ikely is total failure. The Jews excel in frying as much on account of the minute attention which they give to the preparation of the fish before they place them in the boiling oil as from the use of that medium.

#### LITERARY NOTES.

Mr. A. C. Bernheim conttibutes to "The Century" for May a paper entitled "A Chapter of Municipal Folly," dealing with the squandering of New York's public franchises, an article which, while having special reference to New York, is applicable in general significance to other cities of the United States. The general interest in mu. nicipal affairs finds further expression in an editorial in the same number of "The Century," entitled "The Public trench some seven miles long, and at Safety is the Supreme Law," apropos of the recent decision of the New York State Court of Appeals sustaining the of a depth varying according to the New York City Board of Health in the height of the flood, and, when the tide enforcement of sanitary laws in tene- is out, the steep black sides are exment houses .- The Century, N. The subject of Fear will be taken up by Prof. James Sully in the next of his Studies of Childhood, to appear in the May Popular Science Monthly. His investigations show that while some children are afraid of heavy, rumbling children are afraid of heavy, rumbling 900 feet long, stretching right across sounds, like peals of thunder, others the mouth of the river, pierced by a are pleased by them, but are greatly disturbed by much smaller sharp sounds Opposite effects are produced in small children by the first sight of the sea .-D. In the May number of the New England Magazine, Mr. C. Many fine illustrations accompany the article.-Warren F. Kellogg, 5 Park Square, Boston,

The articles on "Money, Banking, and Currency," appearing in Harper's Weekly, express the views of a writer who evidently holds, with President Cleveland, that "What is now needed more than anything else is a plain and simple presentation of fhe argument in favor of sound money." The words quoted are taken from the President's letter of April 13th addressed to the Chicago committee.—Harper & Bros., N. Y. City.

The current number of the Eclectic opens with a valuable article on the "Evolution of Modern Society in its Historical Aspects." It is followed by Mr. Henry Irving's "Acting: An Art." ### A SCOTCH STORY.

The Trumpeter's Breath Doubless Was Laden with Odors of Scotch Whisky.

Mr. Finlayson, town clerk of Sterling, Scotland, was noted for the marvelous in conversation. He was on a visit to the earl of Monteith and Airth, at his castle in Taha, on the Loch of Monteith and was about taking his leave, when he was asked by the earl whether he

has grown out of a goose's mouth from a stone the bird had swallowed, and which she bears around the loch. It is just at present in full fruit of the most exquisite flavor. Now, Finlayson," he added, "can you, with all your power of memory and fancy, match the story of the cherry-tree?'

"Perhaps I can," said Finlayson, clearing his throat and adding: "When Oliver Cromwell was at Airth one of the cannon sent a ball to Stirling and lodged it in the mouth of a trumpet which one of the troops in the castle was in the act of sounding." 'Was the trumpeter killed?" said the

'No. my lord," said Finlayson; "he blew the ball back and killed the artilleryman who had fired it!"

Bristol Likely to follow the Lead of Manchester Enterprise.

According to the English journals the completion of the Manchester ship canal is likely to spur Bristol to a similar engineering enterprise, competent authoritites having already been intrusted with the planning of the best means of providing dock accommodations on the Avon for the largest vessels, with an estimate of the probable cost. The river Avon, from Bristol to Avonmouth, is said to resemble a deep no part more than 900 feet wide, so that, when the tide is in, this trench is more or less filled with muddy water posed to a considerable depth, and down in the central hollow a narrow stream hastens away rapidly to the mouth; the channel is available for navigation by large ships only at high tide, and the idea is to transform the entire estuary of the river into a huge dock seven miles or so in length, with dock gates and a lock entrance rur out in the frame of an immense dam lock entrance at the north end of the passage of ships, and by sluices at the south end for the emission of the overflow of the river water, outside jettice to facilitate the warping of vessels inco the lock and outside breakwaters to protect the entrance channel, inside quays with a sufficient depth of water to permit the biggest liner to lie alongside of them, a graving dock adapted to the largest craft, and a pier for pas-

TIPS TO SERVANTS.

They Absorb an Enormous Amount Annually in England.

A Paris journal, discoursing of tips to servants in private houses both in England and on the continent, says that It is difficult for one to form an idea of the enormous sums in the way of gratuities absorbed by domestics employed in the homes of the English aristocracy. It gives the amount realized annually by the butier of a rich resident of Grosvenor square, London. This individual receives in tips from visitors the sum of £1,000, or \$5,000 in addition to his regular pay. The Prince of Wales, who is naturally a heavy sufferer from exactions of this kind, has undertaken, so far as Sandrington house is concerned, to abolish the cus-He has given orders, according to the French journal, that any servant who accepts a gratuity from a visitor shall be promptly dismissed. Guests of the Stamford hotel, on Michigan avenue, were horrified Sunday at an accident to a young lady which occurred right in front of that famous hostelry, which has become a kind of latest style of riding bloomers, which pace she was, the entire bloomer was stripped off her shapely right limb. The spectators were for a moment paralyzed at the extent of this catastrophe, and two or three young ladies who were just about to mount their wheels blushed as red as a rainy sunset, but the dashing damsel was equal to the emergency. With a dextrous hand she disengaged herself from the mangled bloomers and stood before her admiring and astonished audience arrayed moment was vanishing southward over the hard roadway at a two-mint te gait

CURSED BY A BEGGAR.

Residents of a Chicago Suburb Excites Over a Placard.

The residents of the village of Sag Bridge, a small station on the banks of the canal on the Alton railroad, are considerably excited over a mysterious person who decorates their front doors with the following inscription, which is written in a bold hand upon a piece of wrapping paper:

"May the curse of God Almighty fall upon you. May you have all kinds of bad luck, and may you die a starving death.

The first to discover the placard was Jacob Marks, the village sexton, who lives in the hollow. He started to leave his home shortly before 6 o'clock to toll the church bell, as is customary every morning at 6 o'clock. He started to close the door when he saw the piece of pasexton's domicile could see it.

NOVEL FLOATING CANNERY.

Schooner Gracie T. to Go South After Turtle and Guavas

The two-masted American schoones

Gracie T. finished fitting out at an East river pier the other night for a unique passage in southern waters. She will practically be a floating cannery. She sailed for Port Royal, Jamaica, and thereafter, until the fall, she may be seen in West Indian, Floridian, and Gulf ports. Until a few weeks ago she was owned by James Tregarthen & Son. Benjamin Wood, with several speculative friends, bought her and had her prepared for the commercial expedition which, its promoters hope, will yield a big percentage of profits, says a New York special. The Gracie T. carried six canners and a chef, besides her skipper, Captain Wilbur, and a cross of provider that the company of the commercial experiments of the commercial experiments. bur, and a crew of several men.
