

## A NARROW ESCAPE.

**ARTHUR SWEET AND ALFRED SCHULTZ HAVE A CLOSE CALL**

While at work in the sewers—Sweet was cementing tile—Schultz was laying the pipe—Trench ten feet deep—In—Sweet was rescued in twenty minutes—Schultz underground nearly an hour.—It was a close call for both.

While at work in the lateral sewer in front of No. 51 Packard st., yesterday at quarter to 3 p. m. about 20 feet of the sewer was suddenly filled by a cave-in. Arthur Sweet, of this city, who is employed to cement the pipe and Albert Schultz, of Detroit, who lays the pipe were caught and entirely covered. Work of rescuing was instantly begun. Sweet was got out in about fifteen minutes. He was badly jammed but not seriously hurt. Schultz, however, was not rescued for nearly three-quarters of an hour later. He was still alive though considerably bruised and exhausted from the great weight that was upon him. Up to going to press last evening it could not be learned how serious his injuries were. Contractor Collins is of the opinion that the earth, as well as the braces were loosened by the passing of the street car on Packard-st. It was a close call for the men. They, however, may consider themselves lucky that it did not turn out worse.

## IN THE RACE.

**Hon. James O'Donnell Admits That He is a Candidate.**

Ex-Congressman James O'Donnell, of Jackson, has declared his intention to become a candidate for the Republican nomination for governor of Michigan in 1896. In conversation with a representative of the Resorter Wednesday he said:

"While I have not as yet entered upon an active campaign, my name is before the party for its consideration, and when the time comes for active work my friends will be at the front. Everything in Michigan looks Republican, of course, but the plurality will undoubtedly depend on what position is finally taken in reference to silver. I do think that extremists will be fewer when the campaign fairly opens, but there can be no doubt that the issues are most fairly drawn."—Petoskey Resorter.

## NOT A BIT AFRAID.

**They Take Up the Challenge.**

Ann Arbor, July 20th, 1895.

Converse G. Cook, Mgr. P. N. of P. Ball Club: Business before pleasure, Mr. Cook, but we feel we can easily spare the time to do a "small job" like the one you offer, therefore we propose to "clean up" on your "bold-faced" aggregation Saturday August 10. In this contest "everything goes on the hook" and you must take it as it comes: use "modern faces," do everything on the "point system" and when the "jig is up," "paste your dupes" and we will measure up our strings.

GEO. R. COOPER, Mgr. Register B. B. Club.

## Will Send Them to Coldwater.

For some time Marshal Peterson has been looking up the case of the Jacques family, who live on N. Fourth-ave., between Catharine and Kingsley-sts. It had often been reported to him that they lived in filth and that the family was exceedingly large. He has investigated and has found that there are nine children at home, seven of which are under 12 years of age. The father and mother are lazy and are derelict in educating their children and also in procuring food for them. The marshal is busy today getting an order from the probate court to have six of these children sent to the Coldwater school. George is 2 years old, Willie 3, Clara 5, Marshall 6, Josephine 8, Joseph 10. These are the ones he wishes to have sent there, as out of all these only one has ever been to school and she for only six months. As Marshal Peterson states it, the house is filthy and the heads of the children are lousy and everything in sight is dirt and filth. This morning he was down to the house and the father was at home smoking a pipe, while his ten year old boy was at work. Work is plentiful on the sewers and it is only through laziness that the man has no job.—Times.

Since the above appeared in the Times these people got wind of what was going on and have disappeared. It is believed that they have returned to Canada from where they came.

Teachers should remember that the State Teacher's Institute for Washtenaw County will be held at Ann Arbor, commencing at 10 o'clock a. m., Monday, July 29th, and closing at 4 p. m., Friday, August 2d. Superintendent of Public Instruction, Pattengill, will have

**Dr. Price's Cream Baking Powder** World's Fair Highest Award.

charge of the institute and suggests that, as the time for study will be limited, all those expecting to attend should review their arithmetic, grammar, geography, history, physiology, civil government, pedagogy, reading and orthography. Full particulars in regard to board, etc., may be obtained upon application to W. W. Wedemeyer, Opera House Block, Ann Arbor.

## HOMOEOPATHIC TANGLE.

**DR. O. R. LONG, OF IONIA, REFUSES THE DEANSHIP.**

He is offered a Big Salary But Still Refuses—Says He Wants to Give His Attention to Criminal Insanity—But it is Hint d That He Does Not Want to Give Up a Good Place and Come Here to be Dropped—Other Business Done By The Board at Its Meeting in Detroit Last Thursday.

The Board of Regents held its July meeting at the Russell House in Detroit last Thursday. A full board was present except regent Keifer who is in Europe. Another effort to induce Dr. O. R. Long, of Ionia, to accept the deanship of the homoeopathic college, was made but without avail. Dr. Long was in Detroit, but it is stated that he flatly refused the place even though the regents offered him \$3,000 per year. The doctor is medical superintendent of the Ionia Asylum for Insane Criminals and made the excuse that he was especially interested in this line of work and does not wish to give it up. Some of the doctor's friends, however, hint that this is not so much the reason as is pretended, that the doctor does not like the situation of things homoeopathically considered, and prefers to hold on to a sure thing rather than to risk coming here and being led into some sort of a rumpus and then having his resignation called for. The regents will not have another meeting until September.

The board made the following appointments of special lecturers for the department of law: Constitutional history, advanced course, Andrew C. McLaughlin, A. B., L. L. B. Interstate commerce, Thomas M. Cooley, L. L. D. Admiralty, Henry H. Swan, A. M., judge of the United States District Court. Toxicology and its legal relations, Victor C. Vaughan, Ph. D. Medical jurisprudence, Marshall D. Ewell, L. L. D. Injunctions and Receivers, James L. High, L. L. D. Insurance, Melville M. Bigelow, Ph. D. Mining law, John B. Clayberg, L. L. D.; Comparative Constitutional law, Richard Hudson, A. M.; Patent law, George H. Lathrop, Ph. B.; the Railroad Problem, Henry C. Adams, Ph. D.; Copyright law, Frank F. Revel, A. B.

There were two lecture chairs in the law department not filled by the board. They are as follows: Code Pleading and Practice, formerly occupied by Samuel Maxwell, justice of the Supreme Court, of Nebraska; History of common law, formerly occupied by William C. Hammond, L. L. D.

The board left it with Professor Hutchins to make recommendations for the appointment of the instructors.

The board appointed the following named assistants for the chemical laboratory for the year 1895-6: Assistant qualitative chemistry, Charlton B. Ross, Ph. B., at a salary of \$200 in place of E. C. L. Miller, of the class of '94 who got the same amount last year, Herman E. Brown at a salary of \$200 in place of P. F. Trowbridge, of the class of '94 who received \$250 last year, George Wagner, Ph. C., at a salary of \$200 in place of James Seymour, of the class of '94 who received \$196 last year; assistant in pharmacy, James Seymour, Ph. C., at a salary of \$200 per year in place of J. L. Washburn, of the class of '96 who got \$150 last year.

It was decided that the dean of the engineering department, Charles E. Green, should be given an assistant at a salary of \$300 a year, assistant yet to be named. The librarian asked the board to enact a rule that everyone should leave the library at the closing hour. The librarian has had trouble with some of the professors at closing time heretofore and found it difficult to get them out. The board enacted the rule as requested. The board left it with the secretary to see that a sidewalk was laid in front of the university property in West Detroit, on Romaine street, between Cavalry and Campbell streets.

Plans were received with regard to the proposed new woman's gymnasium, to cost \$50,000. The plans call for reading, waiting, reception and cloak rooms, a hall for the Woman's League, shower bath and locker rooms and a fully equipped gymnasium. The building is to be a wing addition to the Waterman gymnasium. The plans were drawn in the East. Another set is to arrive in a few days. The board authorized the committee on buildings and grounds to adopt a plan for the building to receive bids and use their judgment about proceeding to lay the foundation and erecting the building.

## A BIG FACTORY.

**THE ANN ARBOR ORGAN COMPANY WILL BUILD ONE AT ONCE,**

If the Stock is Subscribed—It Probably Will Be Without Much Doubt—A Five Story Brick Factory Contemplated—This Will Give Employment to Many More Workmen—Just What is Needed in the City.

The constantly increasing demand for the popular Ann Arbor Organ has gone far beyond the capacity of the present factory to supply. This has made it absolutely necessary that something be done to enable the company to turn out a larger number of instruments.

Though the factory has been running from 13 to 14 hours a day nearly the entire year, there are still orders on the books unfilled, and some orders have been countermanded. This should not be necessary when a few thousand dollars would build a new factory, furnish ample facilities and make the employment of from 16 to 20 more workmen necessary. Already nearly one-half of the increased capital stock offered by the company for the purpose of enlarging the factory has been subscribed. A few thousand dollars is yet necessary, and it is recommended that those who may be interested look into this matter.

The history of the company has been one of continual progress; each year has shown a gain. The reputation of the instruments has spread to all parts of the world, and orders are being obtained from Australia, England and South Africa as well as nearly every state in the Union. The management has always been in the hands of some of the best known business men of our city, who have shown great enterprise and yet have been conservative and careful. The prospects of a largely increased business, the employment of at least 15 more workmen and a reduction in the cost of manufacture should make our citizens look with favor on a project which is at the same time a benefit to our city and a profitable financial investment.

## Summer Normal School.

The attendance at the Normal continues to increase daily.

The applicants for first and second grade certificates are working hard and if they fail to receive their certificates it will not be for lack of study on their part.

Third grade teachers are devoting much time to arithmetic and grammar. The first and second grades are taking advanced work in these branches also, thus forming a large and attractive class. Supt. Chisholm, of Newberry, is the able and energetic instructor in these branches.

Algebra, physics and geometry are taught by Prof. Keeler. The teachers, under his able instruction are making rapid progress, and all seem to appreciate the easy manner in which Mr. Keeler handles his favorite subjects.

Prof. J. A. Chisholm, commissioner of schools for Schoolcraft county, will teach classes in autography and orthoepy.

The class in civil government is composed of all the teachers in attendance. The attention is good, the instruction thorough, and the interest in this class and in U. S. history, shows conclusively that Supt. Cavanaugh is master of these branches and of the best methods of teaching them.

As a review school for advanced teachers, the summer normal is just the place.

Many of the best teachers in this and other counties are classed among its students, some of whom are University graduates, and many others are graduates of high schools.

That the school will be a grand success is a settled fact, and too much credit cannot be given the shrewd manager, Supt. Cavanaugh, for the interest he has taken in the school and in the welfare of the teachers.

WITH WOLVERINES. BRIEF ITEMS ABOUT MICHIGAN PEOPLE AND THINGS. St. Clair Visited by a Destructive Storm—The Marquette County Miners' Strike—Forest Fires Still Continue to Burn—Benzonia Visited by a Conflagration.

Negaunee and Ishpeming Miners Still Out. The ultimatum of the striking miners of Ishpeming and Negaunee was sent to the local representatives of mining companies. A meeting of the latter was held and the matter forwarded to the headquarters of the several companies.

No Strike at Iron Mountain. A mass meeting of the Chapin miners was held at Iron Mountain. It was unanimously agreed to ask for more pay. A committee was appointed to present the demands to the superintendent.

Severe Cyclone at St. Clair. A storm with many features of a western cyclone made a 20 minutes visit to St. Clair and in that time destroyed one life and about \$15,000 worth of property. The storm first struck near Lenox, 14 miles southwest and its trail was marked by uprooted trees, wrecked outbuildings and fences.

Serious Forest Fires Still Burning. Traverse City: Forest fires are still burning fiercely in the Filter pine tract, near Interlochen. About five hundred acres are destroyed. Other fires are abating, as light rains have fallen.

Jacoryll Man to Go Over Niagara Falls. Jacoryll Bartholomew, the Jackson aeronaut, proposes to go over the falls of Niagara on a trapeze attached to a bar between two balloons. The contrivance resembles a huge dumb bell.

Four Men Injured—11 Horses Burned. Small & Johnson's livery barn caught fire at Benzonia and spread to three adjoining dwellings, all four buildings being destroyed. Four men asleep in the barn had narrow escapes and were badly cut breaking through windows and were burned more or less.

Sensational Elopement at Muskegon. S. B. Castle, superintendent of the Lake Harbor railroad, and Mrs. Lewis Woodward, eloped. Castle has a wife, and a son aged 17, at Allegan.

Nine Miners Entombed Alive. Nine miners were imprisoned in a mine in the first level of the Pewabic mine at Iron Mountain and the chances are that some of them were killed.

Holton Almost Destroyed. A cigar stub or a match carelessly thrown in the hay in J. P. Utter's large barn nearly wiped off the map Holton, a small village of 250 population, in Muskegon county.

The steamer P. S. Sterling, Capt. Ben Alford, from Monroe to Toledo, picked up a capsized yacht in Lake Erie, saving the three men who clung to the bottom. The steamer took them on board and towed the yacht to Toledo.

CUBAN WAR NEWS. Reports of Encounters Which Favor the Spaniards—Ship Load of Arms Seized. Dispatches from the scene of war in Cuba are very conflicting. It only seems reasonable that the Spaniards having control of most of the news sources should color information to suit themselves.

Havana: Gen. Navarro engaged the insurgents near Cobre and routed them with slight loss. The coffee plantations of Nuevo Songo and Magdalena have been burned by the insurgents. At Invista Hermosa 500 insurgents attacked Maj. Arminian with 100 men and after an hour's fighting were forced to retire with a loss of 28 killed and 40 wounded.

New York: After a test of dynamite balloons which was claimed to be very successful, the New York Cuban Libre club have placed in the hands of the manufacturers a large order of balloons and rockets with a full complement of dynamite cartridges to be ready for shipment July 25.

Baptist Young People's Union. The fifth international convention of the Baptist Young People's Union of America was held at Baltimore with a very large and enthusiastic attendance. Eugene Levering, chairman of the board of trade of Baltimore, delivered the address of welcome on behalf of the churches of Baltimore.

Harry Bowden, a Pennsylvania railroad telegraph operator, was killed by tramps at Bicyrus and his body placed on the track where it was struck by an engine and decapitated.

REVIEW OF MARKS. Dun's says: The week's news is not entirely encouraging, but is all the more natural because there are signs of midsummer dullness.

This list of used pianos represents our stock of rented instruments, together with a few odd styles and sample pianos, which we desire to close out to enable us to direct all our efforts to the sale of the Clifford Pianos, in which Company we have recently become interested. Among these instruments are some rare bargains. Every piano has been carefully regulated, tuned, and put in first-class condition. Most of them show but little wear, and all have been carefully polished, and, where deemed necessary, revarnished. We are very desirous of closing out every odd piano in stock, as we wish to devote our entire energy to the instruments in which we are directly interested. Every piano on this list is guaranteed to be exactly as represented, and will be taken in exchange by us for any new piano at its full value at any time within one year. Correspondence invited. VARIETY OF NEWS ITEMS FROM VARIOUS PLACES.

**Whole Family Shot to Death by an Italian**  
—K. of L. to Boycott National Banks  
—Two Firemen Killed at Cincinnati  
—Scheme to Purchase Cuba's Liberty.

**A Whole Family Shot Down.**  
Rosario Gioradano and family lived upon the Terre Haute plantation in St. Johns parish, near New Orleans, and employed Joe Noska and wife. Noska became enraged for some slight reason and vowed vengeance. The Gioradano family were seated at the supper table when he entered the room and without a word fired a load of shot at Mrs. Gioradano. She fell to the floor a corpse and several shots went through both legs of the babe in her arms. Gioradano ran forward when the assassin fired again, fatally injuring him. Mary Gioradano, the ten-year-old daughter, received a portion of the load of buckshot which entered her abdomen, literally tearing it to pieces. At the same time little Nicolina fell wounded through the head. The assassin did not move but when he saw Benedetto Gioradano, a nephew of the dead woman, and Charley Columbo coming toward him, he coolly reloaded and raised the gun and fired both barrels, the two men falling to the ground dead. The murderer then made his escape to the woods.

**K. of L. to Boycott National Banks.**  
General Master Workman Sovereign, of the Knights of Labor, has issued a manifesto to the members of that organization, as well as to kindred organizations throughout the country, having in view the establishment of a boycott on all national bank notes. In part he says:  
Behind the proposition to perpetuate a monetary system in this country based on a single gold standard is a proposition to perpetuate the national banks. The national banks are responsible for the destruction of the greenbacks, the payment of the bonds in coin, the funding acts, the demonetization of silver, and all the corrupt financial legislation in this country during the past 3 years. They have boycotted and discriminated against every kind of money that promised relief to the debtor class and prosperity to the industrial masses. They are boycotters of the most cruel and merciless kind. Now we propose, through the Knights of Labor, our former Alliance, People's Party and all other reform organizations, that a boycott be placed on the notes of national banks, and that on and after September 1, 1895, our people be requested and urged to accept no national bank bills in any of the ordinary transactions of business.

**Train Crashed Through a Bridge.**  
A freight on the Santa Fe road fell through the bridge at Monument, Cal., burying beneath the wreck seven people, three of whom were killed outright and four fatally injured. A dozen other people sustained broken limbs and other injuries. The freight, loaded heavily with lumber and stone, started over the bridge and as the engine neared the end the workmen underneath saw the bridge rock and shouted an alarm. Before the danger could be realized, the engine and 20 cars came crashing through, burying those who could not get out of the way beneath the crushing weight. The bridge was over a gulch and was 50 feet high and about 300 feet long.

**Two Firemen Killed at Cincinnati.**  
Two firemen were killed and 18 injured at the fire that started in Seaman's tobacco warehouse at Cincinnati. The firemen were under the walls when they fell. The monetary loss will be between \$300,000 and \$400,000. It is believed the fire originated from a match or cigar stump thrown carelessly near the hay. The warehouse went up like an explosion. Then the fire spread to Nelson, Morris & Company's large stables. The adjoining commission and tobacco company warehouses went up like piles of kindling. The dense smoke from the burning piles of tobacco prevented the firemen from seeing their danger.

**Syndicate to Purchase Cuba.**  
Washington: A syndicate of wealthy New Yorkers, it is learned from state department sources, has been formed and is awaiting the proper crisis in Cuban affairs to advance again the proposition for the practical purchase of Cuba. The plan will be modified to agree with the scheme of Secretary of State Hamilton Fish during Grant's administration. It looks to the amicable settlement of the Cuban question by purchasing the independence of their land for \$100,000,000.

**Two Killed by a Storm at Camp Meeting.**  
A tornado swooped down on a grove near Zanesville, O., where a camp meeting was in progress. The attendance was very large. The wind prostrated great trees. One was thrown on the auditorium crushing it. Mrs. Clem Wilson and Mrs. George Desel were killed. A baby in Mrs. Wilson's lap was saved. A son of Mrs. Wilson's was seriously hurt.

**148 People Drowned.**  
The Italian steamers Ortigia and Maria P. collided off Isla Delpinto at the entrance of the Gulf of Geneva. The latter sank and 148 people were drowned. All the boats of the Ortigia were lowered and the crews rescued all they could. Among the saved is a child 8 years old, who is the only survivor of a family of seven.

**Five Sailors Scalded on a Torpedo Boat.**  
Five sailors, members of the engineer's gang on the U. S. torpedo boat Erissson, were terribly scalded by the bursting of a hot-water pipe in the engine room while the boat was out on a run preliminary to her speed trial off New London, Conn. It is thought at least four of them will die, and probably all.

Chicago police have discovered the half-burned remains of Annie Williams another victim of that arch-fiend and murderer, H. H. Holmes, who butchered the Pletzel children at Toronto.

A committee of prominent Cincinnatians, headed by Mayor Caldwell, were received on board the new cruiser Cincinnati by Rear Admiral Bunce, and all the officers on duty in the Brooklyn navy yard. The object of the visit was to present a magnificent silver service from the citizens of Cincinnati. The presentation was made by Mayor Caldwell and it was accepted for the vessel by Admiral Bunce.

## A GREAT COUNTRY.

Comments About the Famous Pecos Valley By an Eye Witness.

Col. M. Frost, one of the best known and most successful newspaper men in the south-west, recently visited the famous Pecos Valley, in New Mexico. Among other things he said:

"The last was my fourth trip to the Pecos country within the past five years and I have kept careful account of the progress and development of that section. This has been so great that only a personal examination will convince one of its magnitude and success. The irrigation systems in successful operation in the counties of Chaves and Eddy are simply stupendous. These contain more water today than would be necessary for ten times the amount of land now under actual cultivation and use. Enormous storage reservoirs have been constructed and contain water to overflowing; in fact, spill ways have been used twice this year on the McMillan, the Eddy and Hondo reservoirs already. Lake McMillan, as one of the reservoirs is named, submerges an area of 8,330 acres to the average depth of ten feet, the greatest depth being forty-two feet. One filling of it irrigates 80,000 acres of land, and it is filled from the Pecos river and flood waters twice a year. It is a large lake, from nine to ten miles long and from one-half to three miles wide.

"There are plenty of good schools; there are banks, churches, four newspapers, telephone systems, railroads running along and through the entire irrigated belt, electric light plants, an ice plant, good roads and many other substantial modern improvements. The two counties are in good financial condition and the value of property is constantly on the increase. So far this season there have been driven from the valley or shipped by rail about 60,000 head of cattle and before this month ends about a million and a half pounds of wool will be shipped. The valley will show as its principal product this year, about 120,000 tons of alfalfa, and this fall there will be shipped and for sale about 5,000 Egyptian corn and alfalfa hogs. These are worth today on the ground, four cents per pound, and the Pecos section is the only one in New Mexico that has gone into that profitable business of raising and feeding hogs, so far. The feeding of sheep for mutton has also commenced and will be increased rapidly, as the experiment has proven successful and profitable.

I have examined dozens of farms and orchards in every part of the Pecos Valley in New Mexico, above Roswell, at Roswell, below it, between Hagerman and Eddy, between Eddy and Texas line, and found alfalfa, Egyptian corn, potatoes, fruit trees and grapes to do well, and in many parts to do famously well, and in no part of the valley, where attention and work was given the crops and the lands, have I found that the soil or the water did not do the full work expected. Within three years this valley will produce 500,000 tons of alfalfa, and then the most profitable business will be the fattening of cattle, sheep and hogs for meat, many orchards and vineyards are being constantly set out and improved, and many of them will be in full bearing within three years, and the fruit crops will simply be immense. This has already been demonstrated in some of the older sections of the valley, as for instance, in the vicinity of Roswell, and there is no good reason at all why the remainder can not and will not do so well.

"The progress of the section is shown by the fact, that within the past six months the Pecos Irrigation and Improvement company had disposed of more land than it has within the first three years of its existence. Lands, with water rights attached, according to location, are sold by the company at prices ranging from \$35 to \$60 per acre, and the annual water rental averages \$1.25 per acre. The policy of the company, of late has been to sell small tracts, and the latest sales have been mostly of forty and eighty acre tracts to actual settlers, and to a very excellent class of American farmers from the north-western states and from the western and middle states."

Those of our readers who are interested in this famous valley should read the advertisement of the Pecos Valley Improvement Company in another column of this paper.

## BATTLE OF COPENHAGEN.

Sensation of One on Ship During an Awful Scene of Death.

Toward the close of the action, Col. Hutchinson reported to me that the guns wanted quill or tin tubes (which are used as more safe and expeditious than loose priming) and wanted me to send some, adding: "His own men were too ignorant of the ship, or he would have sent one before my return," says a writer in Macmillan's Magazine. I told him: "I knew no one that could so well be spared as myself." He, however, objected to my going, and, as I was aware of the dreadful slaughter which had taken place in the center of the ship, I was not very fond of the jaunt, but my conscience would not let me send another on an errand I was afraid to undertake myself and away I posted toward the fore magazine.

When I arrived on the main deck, along which I had to pass, there was not a single man standing the whole way from the mainmast forward, a distance containing eight guns on a side, some of which were run out ready for firing; others lay dismounted and the crews remained as they were after receding. In this dreary scene I shall

be excused for sniggering as I walked across the body of a dead soldier. I hastened down the fore ladder to the lower deck and felt really relieved to find somebody alive; from thence I reached the fore cockpit, where I was obliged to wait a few minutes for my cargo and after this pause I felt something like regret, if not fear, as I remounted the ladder on my return. This, however, entirely subsided when I saw the sun shining and the old blue ensign flying as lofty as ever.

I never felt the genuine sense of glory so completely as at that moment and if I had seen any one attempt to haul that ensign down I could have run aft and shot him dead in as determined a manner as the celebrated Paul Jones. I took off my hat by an involuntary motion and gave three cheers as I jumped onto the quarter-deck. Col. Hutchinson welcomed me at my quarters as if I had been on a hazardous enterprise and had returned in triumph. Mr. Yelland also expressed great satisfaction at seeing me in such high spirits and so active.

## NEW LAW FOR BUTCHERS.

It Prohibits the Exposure of Meat or Poultry Outside Their Shops.

There is little in the outward appearance of a New York butcher shop nowadays to indicate the nature of the business carried on within, says the World. This is in consequence of the rigid enforcement by the police of a law passed during the late session of the Legislature, prohibiting, under a severe penalty of from \$100 to \$500, the exposure in front or within a store of fish, game and poultry. Strictly construed, this would require all meats and provisions to be kept in the ice boxes and only brought out as called for. The police are under instructions, however, to permit a reasonable exposure of goods within the store, but the lavish decoration of the exterior with quarters of beef, carcasses of sheep, lambs, calves and pigs and long lines of chickens and turkeys, so large a feature of Second, Third, Seventh, Eighth, Ninth and Tenth avenue markets, is a thing of the past. A thousand dollar's worth of stock on the outside was not an uncommon thing. Many butchers kept the show unimpaired until the meat and poultry were nearly in the condition that called for condemnation and confiscation. The health authorities were behind the passage of the new law. Its enforcement meets with no opposition from the better class of butchers, who only insist upon its being impartially observed. With housewives it is an especially popular measure.

## Colossal Children.

The quaint little town of St. Nicholas, in East Flanders, boasts the possession of two children of such extraordinary abnormal growth as to put completely in the shade all similar infant prodigies of the past or present. These veritable Brobdignagian youngsters are boy and girl. The elder, Master Clement Smedst, is 15 years of age and weighs no less than 429 pounds (30 stone); the circumference of his body is 6 feet 6 inches; he measures 36 inches around the leg and 28 inches around the arm. His sister Bertha, is 8 years old, and turns the scale at 224 pounds (16 stone). In spite of their enormous dimensions their activity is remarkable, for they trip and skip about with all the agility of other children of their age. It is an astonishing sight to see these infant mountains of humanity romping about in country lanes with other children of the village. One would imagine them to be the offspring of a race of giants, so high do they tower over the heads of their little playfellows. Their appearance is decidedly interesting, both having extremely handsome and regular features. Bertha, like other girls of tender years, delights in nursing a doll, which seems ludicrously out of place and proportion in the arms of the young giantess. The couple are attracting the attention of the country around, and on fine days crowds of people flock into the quiet little town in order to catch a glimpse of these colossal children.

## A GRAND TRIUMPH.

Baffled Many Times but Success Comes at Last.

(From the Grand Rapids Press.)

The following incident would be hard to believe if it had not occurred right here in Grand Rapids, and investigation by our representative has placed it beyond the reach of doubt. These are the facts in detail: Mr. J. H. White of No. 25 Halfley Place, has been an instructor in penmanship in different business colleges for the past fourteen years. He says: "Last October I was suddenly taken ill. I consulted a physician, who said the pain was from 'gravel' stones; gradually grew worse; the pain was in my back and side. My back swelled up in a great ridge, and I finally grew so bad that I was taken to bed, as helpless as a child. I passed blood, and when the pain was at its worst I was like one crazy. The doctor injected morphine to give me relief, but further than that he said he was powerless, and nothing would do me any good but a surgical operation. I believe my flesh was literally cooked in the attempts to relieve my agony, everything was used, mustard plasters, turpentine, hot cloths, and all such things. I was in this condition, given up by the doctor, and almost out of my mind with suffering. I commenced taking Doan's Kidney Pills, and really I felt easier in 20 minutes. After about two hours I had a passage of urine, and passed blood and some 'gravel' stones which greatly relieved me. I rapidly improved. I took in all six boxes, and I feel to-day entirely well. Mine has been a wonderful case. I feel that I cannot say anything strong enough for Doan's Kidney Pills. My great wish is that they may become well known. They will prove a boon to mankind."

We are sadly in need of more rain. The showers we have already had, have done some good. Still there has not been enough rainfall to do the shade trees any good. Hundreds of them are dying and unless we have rain, and lots of it, soon many more will be too far gone to revive.

DURING the first ten months of the McKinley Tariff the aggregate of bank clearings in the United States was over six billion dollars greater than during the first ten months' operation of the Gorman Tariff. This represents an average of \$600,000,000 a month more business transacted during the McKinley Tariff period than at present.

We believe that today the wool growers are more in need of protection than they ever were. In Australia the prospects are that the supply of wool will, before long, be very largely increased, owing to the abundant supply of water that is now being secured there by artesian wells. The American wool growers have had a hard time of it and they are equally entitled to protection with the woolen manufacturers.

Now that the city owns a first-class road roller and stone crusher, their is no reason why we should not begin at once to have better streets. The council cannot, of course, go beyond its means in making new streets, but it should, at once, stop all dirt work except what is absolutely necessary for safety and put every dollar of the street fund into permanent macadamized roads. It will result in an incalculable saving in the long run.

THE question of the homeopathic faculty is still an unsettled one, at least so far as some of the chairs are concerned. There seems to be considerable opposition on the part of some of our citizens to the regents offering to make an exception in the case of Dr. O. R. Long and allow him to be dean of the department and at the same time reside in Detroit, if he would accept the position. It is claimed that this is a concession to the friends of removal. We do not see how it necessarily implies anything of the sort.

DURING the four years from 1890 to 1893, inclusive, the average number of miles of railroad built was 4,685 in each year. During the year 1894 only 2,247 miles were built, less than half the average of the four preceding years. Either from lack of funds or lack of confidence, or both, the railroad companies were unable, or unwilling, or both, to extend their mileage when the country was suffering from a Free-

"RUN-DOWN," "tired out" woman who complains of headache, loss of appetite, extreme lassitude and that "don't care" feeling is pretty sure to be suffering from "Female Weakness," some irregularity or derangement of the special functions of womanhood. Very often womb troubles set the nerves wild with fright and as a result the woman suffers from sleeplessness, nervousness, nervous prostration, faintness and dizziness, irritability and indigestion. In all cases of irregularity or suspended monthly function and in all those nervous diseases depending upon local causes, Dr. Pierce's Favorite Prescription will restore you to perfect health. Instead of the exhaustion and feeling of weight and dragging down in the abdomen, you feel fresh and strong. For young girls who suffer from irregularities, for the hard-working woman who suffers from catarrhal inflammation of the lining membranes causing a constant drain upon the system, there is no prescription used by any physician which can equal in results Dr. Pierce's. For over thirty years Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute of Buffalo, N. Y., has used his "Favorite Prescription" in the diseases of women which had long been his specialty and in fully ninety-eight per cent. of all cases, it has permanently cured.

Mrs. JOHN M. CONKLIN, of Patterson, Putnam Co., N. Y., writes: "I am enjoying perfect health, and have been since I took the last bottle of Dr. Pierce's Favorite Prescription. I took five bottles of it. Never expected to be any better when I commenced taking it, but thank God, I can say that I am glad it reached my home. I had falling of the womb, and flowing caused by miscarriage, and was very weak when I commenced taking your medicines. I was cured by taking five bottles in all—two of the 'Favorite Prescription' and three of the 'Golden Medical Discovery.'"

MRS. CONKLIN.

Trade administration. This falling off of more than 50 per cent in the demand for material and labor is spread among all the industries that are directly affected by railroad consumption. Now that they have an assurance of good times and Protection again, there is more business activity in these directions.

THE number of new bicycle companies that are being organized and the millions of dollars being put into new factories for supplying wheels for next year would surprise most people could they realize how rapidly this business is developing. It does not cost, at the outside, more than \$30.00, if it does that much, to manufacture the very best wheel on the market. The sharp competition that is certain to follow the increased output next year is sure to bring the price very near the cost of construction. At least the time has practically passed when wheels can be sold for three or four times the cost of manufacture.

ANDREW JACKSON, good enough in his way in his day, would turn in his grave if he knew of the case of the Allegheny letter carriers. It was Andrew Jackson, as is well-known, who first applied the doctrine, "To the victors belong the spoils," to American politics. What would be his horror, then, to learn that at Allegheny three letter carriers were removed for not properly doing their work, and that these three letter carriers were democrats, and the only democrats among the forty postmen at the Allegheny office. The men were removed by orders from Washington.

Seriously, though, this case is the best possible evidence of the growth of the civil service reform idea in American politics. A few years ago who would have dreamed it possible that after a President had been in office for more than half his term but 75 per cent of the letter carriers in any office would be members of the administration party, and that these would all be removed for not doing their work properly?—Times-Herald.

Two salvation army delegates were in the city Tuesday making arrangements for storming the city on the first day of August. There is to be a district rally in Ypsilanti on July 31st. There is to be a large number of notables at this meeting in Ypsilanti, all of whom are to come to this city. Meetings will be held in the Presbyterian church.

Two young men from this city, Theodore Radke and Charles Huddy, went to Whitmore Lake last Saturday. In the afternoon they became gloriously intoxicated, and proceeded to indulge in a large amount of unseemly conduct. They were finally arrested and taken before Justice Moss. They will have a hearing next Saturday. They are out in the mean time on bail of \$200 each.

The Ann Arbor Board of public works has elected Wesley Hicks "Superintendent of Manholes." His time has been divided in watching the mouths of Hammond of the Argus and Beal of the Courier at their meals, and of A. J. Sawyer and E. Norris, in the circuit court. Thus far he has discovered nothing that indicates a failure to work properly in either case.—Adrain Press.

The new roadroller was given a severe test last Monday in the presence of the street committee of the common council. It climbed the Observatory street hill for a distance of nearly half a mile in ten minutes and did it easily. The test of digging up and rolling some of the hard road bed on Geddes Ave. showed that a fifteen ton roller is none too heavy and that if properly handled the roller is alright.

A lighted cigar stub carelessly thrown down, was the cause of burning down—or up—the little hamlet of Holton, near Muskegon, Saturday. The only buildings left standing in the place of 250 inhabitants, are the G. A. R. hall, three stores and a market.—Courier.

The greatest misfortune of all was that not one of the three stores left kept cigars for sale. How the inhabitants must have suffered until a new supply could be secured.

Chas. D. Bigham, of 724 N. Main-st., went home last Saturday night, and it being so warm and oppressive he sat down in a chair on the stoop to keep cool. Along about half-past one o'clock he fell out of the chair on to the floor and thence to the ground. In sleeping with his head inclined upon one side the nerves or cords of the neck became somewhat rigid, and the sudden fall it is thought snapped some of them in two, as he has suffered great agony ever since, so much so that yesterday he begged of his family and the physician to put an end to his life. Whether he will recover or not the physicians think very doubtful.—Courier.

studying medicine at Ann Arbor. He did not, while there, pass by the name of Holmes, but Herman W. Mudgett. I remember him as a mild, meek, inoffensive student, of ordinary ability, and seemingly the last person in his class to follow the murderous career that he seems to have followed. He was graduated from the medical department of the University of Michigan in 1884. I have his photo in a class picture."

THE CRUSADE CHURCH.

Of the seventy women who belong to the Crusade band which marched from the church at Hillsboro, Ohio, Dec. 23, 1873, twenty-two were present at the all-day memorial service held in the church recently, previous to its demolition to make room for the new building to be erected upon the ground. Mother Thompson who led the praying band, presided over the meeting, and several of the other crusaders took part recalling the scenes of those early days and the wonderful world-wide out-growth of that response to the Divine call to service.

PSYCHOLOGY.

Professor William James, of Harvard, in his text-book on psychology, says:

"Could the young but realize how soon they will become mere walking bundles of habits, they would give more heed to their conduct while in the plastic state. Every smallest stroke of virtue or of vice leaves its scar. The drunken Rip Van Winkle in Jefferson's play, excuses himself for every fresh dereliction by saying, 'I won't count this time.' Well, he may not count it, and a kind heaven may not count it, but it is being counted none the less. Down among his nerve cells and fibres the molecules are counting it, registering and storing it up, to be used against him when the next temptation comes. Nothing we ever do is, in strict scientific literatures, wiped out. Of course, this has its good side as well as its bad one. As we become permanent drunkards by so many separate drinks, so we become saints in the moral, and authorities and experts in the practical and scientific spheres by so many separate acts and hours of work.

"WHAT SHALL WE EAT?"

There is a scientific relation between intemperance, and the food and drink used by man. The food should be that which nearly as possible supplies the chemical elements of which our bodies are formed in about the same proportion that they exist in the body naturally. Very much of the food used by the higher classes of civilized people contains too much carbon, consequently unnatural heat is produced and thirst is caused.

It has been aptly said; "Thirst causes intemperance. Remove the cause of thirst, and you will remove intemperance." The vegetarians claim that meat is a highly stimulating food, and as such produces intense thirst. In an article in the Union Signal, Lady Henry Somerset, while admitting she was not a vegetarian, stated that this one method of reform was coming to the front, and temperance women would do well to study its merits. The claims of vegetarians are that a vegetable diet produces not only better physical results, but mental and moral as well. Among the points claimed are less susceptibility to heat, cold and fatigue, the more ready healing of wounds, less irritable temper, keener mental perceptions and almost absolutely no thirst.

Dr. Henry Babcock says, "Permanent cures from drunkenness have been made by a vegetarian diet, devoid of vinegar and spices. One man was advised by his physician to abstain from meat for some local disease. Before he was aware of it he had lost the craving for both alcoholic drinks and tobacco. Many a mother lays the foundation for strong drink in the very food she places before her family.

The Students' Directory.

The Students' Directory will be published this fall in more complete form than ever. It will be issued promptly on Nov. 1. It will contain the name, department, class, city address, and home address of every student enrolled in the University on the above date. An edition of 2000 copies will be published. This handy reference book is one constantly used by all students in the University and is therefore the best advertising medium in which to keep an advertisement constantly before the student body. There is probably not a student in the University who does not make use of this directory several times every week during the school year. Orders for space in this book may be left at THE REGISTER Office, or given to the undersigned, or to Mr. O. E. Wagner. Those who call first will have choice of location.

HOT WEATHER.

An Easy Way to Keep Comfortable.

It is only through food that the human body is sustained. Food makes good blood if it is properly digested. The proper operation of the organs of the body will be carried on perfectly as a rule if one will abandon the habits of Tobacco, Whiskey, Coffee, etc. Stomach quickly recovers itself and does its work correctly. Those who find it hard to give up coffee can do so slowly if they will use Postum Cereal in its place. This is made of pure grains but looks and smells like fine coffee, while it has only the elements of wheat, etc., which are nourishing and fattening. Postum Cereal is eminently the drink for hot weather as it contains all the elements of food necessary for the body and helps one stand the nervous strain on the system during the heated term.

SEALED PROPOSALS WANTED.

Sealed offers to purchase Thirty Thousand Dollars of the bonds of the City of Ann Arbor, State of Michigan, will be received by the City Clerk at any time on or before Monday, August 19th, next, at twelve o'clock noon.

These bonds are to be sold for the purpose of raising money to enable the city to construct lateral sewers in Districts Nos. 3 and 4, otherwise known as Hill and Huron street Districts and they were authorized by a special act of the Legislature, and will draw interest from August 3rd, 1895, at 5 per cent per annum, payable at the City Treasurer's Office. The principal will mature in yearly installments of Seven Thousand Five Hundred Dollars and are to be charged upon their respective districts payable on or before the first day of March of each year. The bonds will be issued in denominations of \$500 each. The said bonds will not be sold for less than face value and accrued interest and the right to reject any or all bids is reserved.

By order of the Common Council. GLEN V. MILLS, City Clerk.

SOME GOOD ADVICE.

The Board of Health Gives Citizens Some Pointers.

Many complaints have come to the board of health during the heated term of offensive odors arising from privy vaults, which upon inspection have not been found to contain sufficient matter to warrant the board in taking action to have them cleaned and the contents removed.

The board of health would therefore recommend that all persons having such offensive vaults (and others, too) procure a quantity of slaked lime and occasionally scatter some in their vaults. This will overcome the offensive odors and add much to the cleanliness and sanitary condition of the same.

By order of the Board of Health. H. B. DODDLEY, Secretary. ELI M. MOORE, President.

Resolutions of Respect.

Whereas, in accordance with the law of our maker the angel of death has entered our circle and taken from our midst one of our charter members, Lady Lottie Blades; therefore be it

Resolved, That we, the members of Arbor Hive, No. 113, L. O. T. M., sincerely mourn the loss of a true and faithful sister, who was ever ready to work for the cause of our sisterhood.

Resolved, That we extend our heartfelt sympathy to her sorrowing mother and friends; and be it further

Resolved, That these resolutions be entered upon the records of our Hive and that a copy be sent to the bereaved mother, that they be published in THE REGISTER, and that our charter be draped in mourning for the space of 30 days.

A TRAGEDY IN MID-AIR.

The Hawk Catches the Weasel, but Gets the Worst of It. The weasel is a dainty and luxurious liver, in his way, says the Houston Post. He steals the freshest eggs, selects the tenderest chickens of the brood, and will sometimes kill several for a single meal, sucking the warm blood and eating only a small portion of the flesh. He is not only sly and cunning, but remarkably courageous. He will often attack an enemy much larger and stronger than himself, and he does not lose his wits even in imminent peril. This heroic quality is sometimes strikingly evinced. Two farmers in Titus County, Texas, were eating their midday meal, when they noticed a large hawk circling in the sky overhead. He was gradually narrowing his circles while approaching the ground, and it was apparent that he would soon drop upon his victim. The men looked about cautiously, without movement or noise, and presently discovered a weasel stretched out upon the warm side of a log, not far away, probably sunning himself after a long morning's sleep, for the weasel does his sleeping in the daytime and his work at night. But the weasel quietly blinked at the sun, either unconsciously of the danger or indifferent to it. The farmers had just made this discovery when the hawk came gliding down, swift as an arrow, seized the weasel in his powerful talons and rose again almost perpendicularly. All seemed at an end for that weasel. Soon, however, the movements of the great bird became strange and unnatural. His wings worked rapidly and convulsively, as if making a great effort to sustain flight, then he began to sink, slowly till finally he fell straight like a plummet to the ground—dead! From under the outstretched wings crept the weasel, apparently unharmed. What had happened? The weasel had quickly stretched his long supple neck under the hawk's wing, stuck his teeth into a vital part and sucked out the life blood. The muscles of the hawk relaxed as the blood was rapidly drained. There was a last desperate effort at flight; the wings flapped uselessly in the air, and the heaviness of death brought him swiftly to the ground, very near the spot where the weasel had been basking in the sun.

Howells Did Not Accept the Bribe.

I found that there were stations which were considered particularly desirable by the fruiterers, and that the chief of these was in front of the old United States court house. A fruiterer out of place, whose family I visited for the charities, tried even to corrupt me, and promised me that if I would get him this stendlo (they Italianize "stand" to that effect, just as they translate "bar" into barra and so on), he would give me something outright. "E poi, ci sara sempre la mancia" ("And then there will always be the drink money"). I lost an occasion to lecture him upon the duties of the citizen; but I am not a ready speaker.—W. D. Howells, in the Century.

THE CLEVELAND AND BULLALO.

"New and Up to Date." Appreciating the liberal patronage extended to us during the past two years, and realizing the importance of increased passenger and freight capacity, the Cleveland and Buffalo Transit Company has contracted for a mammoth side wheel, steel steamer of the highest grade, containing every known requirement and device for strength and safety, to be completed and ready for service at the opening of navigation, 1896. The steamer will, in size, speed and elegance, by far surpass any steamer of her class ever constructed for lake service. In fact, she can justly be termed "the leviathan of the great lakes." The hull will be constructed of open hearth steel of the best character known for ship building; a test being made from each plate separately under the most improved methods of inspection. Steel will be used in her construction to the greatest practical extent. Her engines will be of the compound beam type, with a low pressure cylinder, 80 inches in diameter, and stroke of 12 feet; with Slickles Valve Gear which will cut off at any point of the stroke, while the engine is in motion. The saloon will contain an upper and lower tier of 160 commodious state rooms, parlors with bath rooms, lavatories, etc. In addition there will be a number of single berths in the forward part of the ship, which will greatly augment the sleeping capacity, being thus able to take care of some 600 people in berths. The dining room below the main deck, will be finished in hard wood and decorated in high art and will be reached by a magnificent stairway from the Social Hall. The Electric Light plant will be of the most improved character with a capacity of 1500 lamps, together with a search light of immense power. Great care will be taken in the illuminating features of the ship, and it is safe to say, that she will favorably compare with any first class hotel in this respect. For comparison, only the famous side wheelers of the Fall River line can be cited. As to size, a fair idea of this can be arrived at, when it is known that her freight capacity on the main deck will be 800 tons, and the passenger capacity, under U. S. inspection, 3000.

Michigan Central Excursion.

The Michigan Central railroad will sell round trip tickets to parties wishing to attend the Hackley Park Assembly at one and one-third fare for the round trip. Tickets will be on sale July 26, 27 and 30, and on August 1, 2, 3, 4, 5, 6, 7, 8 and 10. Tickets will be good for return up to and including August 17. Tickets will be on sale on the above dates at the Michigan Central depot. H. W. HAYES, Agt., Ann Arbor, Mich.

Sealed Proposals.

Sealed bids will be received at the office of the City Clerk of the city of Ann Arbor, until 12 o'clock, Thursday, Aug. 1st 1895, for lighting the streets, alleys and public places of said city for a term of five years beginning the 31st day of December A. D. 1895, with not less than 96 arc lights of 2000 candle power and three incandescent lamps of 65 candle power each for 265 nights all night, 365 nights all night, 265 nights from twilight to 12:30 and 365 nights from twilight to 12:30. Separate bids for each proposition on. The right is reserved to reject any or all bids. GLEN V. MILLS, City Clerk.

Gas and Gasoline Stoves Repaired.

Do not throw your old stoves away until examined and condemned by an expert. Your old stove, nine times out of ten, it as good as new and only needs repairing and lining up, at a small cost. In connection with our toaster manufacturing, we have prepared to repair gas and gasoline stoves. We will warrant all work leaving our hands and if not done as represented, your money will be refunded. We employ nothing but expert men who thoroughly understand this line of work. We employ no boys and charge double prices for their work. All work is thoroughly tested before leaving our hands and nothing but perfect work is allowed to go from our manufactory. Send a postal to us and we will send after your stove and a competent man will examine it for you. Address, Electric Toaster Co. 734

### THE FIEND INCARNATE.

Eight Murders are Now Laid at the Door of H. H. Holmes.

The more thoroughly the detectives investigate the record of H. H. Holmes, the fiend who is now in prison at Philadelphia, the more blackened his hands become with the blood of his innocent victims. In addition to almost positive proof that he murdered R. F. Pietzel, at Philadelphia, to secure insurance on his life, and Pietzel's two little girls at Toronto, to be rid of two heirs of Pietzel's property, it is scarcely doubted that he killed Pietzel's boy at Detroit for the same reason. The detectives claim that Holmes also murdered Minnie and Ina Williams, of North Worth, Texas, at Chicago, to secure possession of their property. And now it is thought that he also "removed" Mrs. I. L. Connor and her 12 year old girl, of Davenport, Ia., at Chicago, after he had caused her husband to obtain a divorce from her. The reason given by the officers for the last two crimes is that Holmes feared that they knew too much for his comfort. Thus, to recapitulate, there are now eight murders credited to Holmes as follows: Pietzel in Philadelphia; Julia Connor and her daughter, Minnie R. and Ina Williams, in Chicago; Alice and Nellie Pietzel in Toronto, and little Howard Pietzel, possibly in Detroit.

### A Brave Engineer's Nerve.

As the Montreal express on the Adirondack & St. Lawrence railroad rounded a curve on a heavy down grade near Utica, N. Y., the engineer, Wm. Brassel, saw 500 feet in front of him a trestle, a quarter of a mile long, enveloped in flames. Brassel says he was so frightened his hair stood on end, but he saw it was impossible to stop the train, so he opened the throttle to its widest and the train rushed swaying through the flames, and stopped safe on the other side of the structure. Before it came to a standstill the burning trestle fell in a heap of ruins on the rocks 50 feet below. There were 75 passengers on the train.

### Filibustering Expeditions to Hawaii.

The customs authorities of the Puget Sound district have been instructed by the U. S. government to keep a sharp lookout for filibustering parties fitting out for the Hawaiian Islands. A few days ago it was reported vessels were openly loading and freighting to the islands munitions of war for the royalists who are preparing for another uprising. It is believed a large quantity of arms and ammunition have been smuggled into Hawaii from Puget Sound. One source of information says it is planned to commence a rebellion Sept. 1, and that 4,200 will be in readiness to bear arms against the government.

### Japanese Defeated in Formosa.

A large force of Black Flags attacked the Japanese troops at Tokoham, island of Formosa, and fought with desperate courage. The Japanese were only saved from defeat by the superior discipline of their troops. But they were finally compelled to retreat before the onslaught of the Chinese. Another fight took place 60 miles south of Taipei. The Black Flags were in almost overwhelming numbers and fought with the utmost bravery and stubbornness, and only the shells from the heavy guns of the Japanese saved the latter from dire disaster. As it was the Japanese were compelled to retreat.

### Filibustering Vessel Captured.

Upon oath of Wm. Lynch, a seaman, that the tug George W. Childs had been engaged in landing men, arms and ammunition for the rebel army in Cuba, Collector Brown, of Jacksonville, Fla., ordered the tug to be detained. A revenue cutter gave chase and fired a blank and a loaded cartridge, which caused the Childs to heave to, and the cutter returned to port with her. The Childs is held for not having a passenger list for a party that landed on the Florida keys. Lynch will libel the tug for wages due him.

### Five Negroes Killed by Dynamite.

Two months ago a dispute arose near Mart, Texas, between A. Phillips, a Negro, and Phil. Arnold, white, both farmers, in which the latter killed the former, and was in turn killed by Phillips' son. Feeling has been bitter between their friends. At 2 a. m. the house occupied by Mrs. Phillips, was dynamited, blowing it to pieces and setting fire to the wreck. There were six Negroes in the building, five of whom were killed.

### Pan-American Congress of Religion.

About 5,000 delegates to the Pan-American congress of religion and education attended the opening session at Toronto, Ont. Warring Kennedy, mayor of the city, read an address of welcome. Samuel G. Smith, president of congress, replied, and speeches were made by others.

### Stambouloff is Dead.

M. Stambouloff, ex-premier of Bulgaria, who was murderously assaulted at Sofia, Bulgaria, by four men with knives and short swords, died from his injuries. The officials of the city are being condemned on all hands for their very evident endeavors to shield the murderers.

### Four Men Killed by a Train.

Four men were instantly killed while crossing the Fitchburg railroad near Williamstown, Mass. A party of six men were riding in a two-seated, covered carriage, when they were struck by a west-bound express. Two of the men escaped by jumping.

Wm. Lunstedt and five others of New York City went out for a sail and were caught in a storm which capsized the boat and all but Lunstedt drowned.

Chief of Police White, of Omaha, has discharged 25 alleged political and sectarian agitators from the police force. The edict has been issued by the chief that policemen must not let political and religious affairs interfere with their duties as officers.

Four masked men went to the house of John Miblin, near Ashland, O., and battered down the door with a fence rail. The men then bound and gagged Miblin and his wife and tortured the couple, holding burning matches to their feet and hands. The robbers secured \$13, all the money in the house. Miblin and his wife are both very old and almost blind.

### PUNISHMENT WAS SWIFT.

Story of the Kitten-Napping Monkey and a Nemesis.

Dick Walker lives at No. 15 Vandam street, and is manager of an uptown glassware emporium, says New York World. Animals of all sorts he is fond of, especially dogs and monkeys. The mate of a Brazilian ship recently brought him a monkey which he named Adam. The simian was very tame, and was allowed the liberty of Mr. Walker's residence and back yard. The fence there was a favorite roosting-place for Adam until Friday.

Mr. Walker was looking out of the window, and in the next yard saw a mother cat with three or four kittens. She carried them one by one in her mouth and deposited them on the grass plot. Adam was gravely watching the proceeding, and suddenly descending into the neighbor's yard, he seized a kitten as he had seen the cat do, and with it dangling from his jaws, he scrambled up the fence. He was not slow either, for right behind him was Mrs. Cat, with her back up and her tail as big as a muff. Along the fence to the window Adam ran, and jumped into the room. Mr. Walker took the kitten from him just in time, and shut the window. Mrs. Cat knew no stopping, however, and through the glass she dashed, and after Mr. Adam. Walker managed to separate them, but not until he was scratched and bitten, too. Adam was punished severely by the enraged cat, and whenever he sees one now he runs under a sofa and hides. He still owes Mr. Walker the price of a pane of glass.

### VICTORIA'S NEW SECRETARY.

Sir Arthur Bigge Said to Have Great Tact.

Arthur John Bigge has been appointed by Queen Victoria to be her private secretary, in place of Sir Henry Ponsonby, who has been very ill for some time. Sir Arthur Bigge is said to have remarkable courtesy, talent, and tact. He was Lieut.-Col. Bigge of the Royal Artillery, when appointed, but the Queen made him a knight as a further mark of her esteem. Sir Arthur Bigge, K. C. B., C. M. G., comes of an old Northumbrian family, being the son of the late Rev. J. F. Bigge, vicar of Stamfordham, Northumberland. He is in his 46th year. Entering the Royal Artillery in 1869, he successively became captain in 1880, major in 1885, and lieutenant-colonel in 1893. He served through the campaign in Zululand in 1878-'79, and was mentioned in dispatches. In the latter year he was appointed aid-de-camp to Sir Evelyn Wood. The French Prince Imperial, when attached to the Royal Artillery, became acquainted with Lieut. Bigge, whose intimate friend he remained until the young Prince's tragic death in South Africa. He became groom-in-waiting in 1880, and seven months later was appointed assistant private secretary to the Queen. The ability with which he performed these duties marked him out for further promotion in the royal household, and this was not long in coming. In 1881 he was made querry-in-ordinary. In that year Bigge married Constance, daughter of the late Rev. W. F. Neville.

### The Deepest Mine.

It has been the undisputed claim of Austria that she possesses the deepest metal mine in the world, 3,675 feet below the surface at the time of the great fire in 1892. It has now been surpassed says The Engineering and Mining Journal, by the No. 3 shaft of the Tamarack Copper Mining Company, in Michigan, which on December 1 was 3,640 feet deep, and is now more than 3,700 feet deep, the average rate of sinking being about 75 feet a month. This makes it beyond question the deepest metal mine in existence, and only one other shaft has reached a greater depth, that of a coal mine in Belgium, for which 3,900 feet are claimed. The Adelbert shaft in Germany reached a depth of 3,281 feet.

### "Heads I Win, Tails You Lose."

Sandwich, Mass., offered a bounty of 25 cents for a muskrat's head, and the town of Bourne 25 cents for a muskrat's tail. The boy hunters sold the head at Sandwich, paid 5 cents car fare and sold the tail at Bourne. Each town changed its offer at the same time, and the boys cheerfully sold the muskrat's tail at Sandwich and the head at Bourne. Now the town fathers will meet and agree to pay for either the muskrat's head or tail.

## BIG PROFITS ON Small Investments.

Returning prosperity will make many rich, but nowhere can they make so much within such a short time as by successful Speculation in Grain, Provisions and Stock.

## \$10 FOR EACH DOLLAR INVESTED can be made by our Systematic Plan of Speculation

originated by us. All successful speculators operate on a regular system.

It is a well-known fact that there are thousands of men in all parts of the United States who, by systematic trading through Chicago brokers, make large amounts every year; ranging from a few thousand dollars for the man who invests a hundred or two hundred dollars up to \$50,000 to \$100,000 or more by those who invest a few thousand.

It is also a fact that those who make the largest profits from comparatively small investments on this plan are persons who live away from Chicago and invest through brokers who thoroughly understand systematic trading.

Our plan does not risk the whole amount invested, on any trade, but covers both sides, so that whether the market rises or falls it brings a steady profit that piles up enormously in a short time.

Write For Convincing Proofs, also our Manual on successful speculation and our Daily Market Report, full of money-making pointers. All Free. Our Manual explains margin trading fully. Highest references in regard to our standing and success.

The land along the valley, with plenty of water for irrigation, is the richest land in the country. For the purpose of raising Peaches, Pears, Apples, Grapes, Plums, Apricots, it is equal to any section in California. The cost of land is **Surprisingly Low**, while the water tax is merely nominal. There can be no question that in the next three or four years land in this valley will increase, from three to five times what it can now be secured for. The company that has constructed these great reservoirs are anxious to place the land with actual settlers and are using every legitimate means to induce farmers to remove to so inviting a field. ### Huge Amusement Venture at Detroit.

Detroit is branching out with a gorgeous fireworks festival and a big spectacular production, with the features of a new summer park. The idea was conceived and executed by Messrs. H. A. Everett and Albert Pack, the promoters and owners of the new Detroit railway, who secured two entire blocks of city land, erected a large grand stand to accommodate 10,000 people, constructed an artificial lake of considerable size and secured the celebrated Pains, the pyrotechnists of the World's Fair, to equip the spectacle which requires 650 people and 12 tons of scenery. This pyro-spectacle is founded upon Tom Moore's beautiful Oriental romance, "Lalla Rookh," and will be presented 10 days, the same as it was given at Manhattan Beach last summer. In addition to the pyro-spectacle itself athletes, equilibrists, divers and jumpers and a half-thousand performers are employed. This production will cost no less than \$35,000. Performances occur each Tuesday, Thursday and Saturday from July 23 to August 10 with a grand exhibition performance August 7. The whole is to be a series of fetes to celebrate the building of the Detroit railway, which is the first and only one of its kind in the United States and was a pioneer in the three-cent fare line.

### Three Deaths in a Peculiar Accident.

In attempting to avert a collision between the tug Torrent and the steam barge Sitka, which was towing the big schooner Yukon, in the St. Clair Flats canal the Torrent became entangled in the tow line which swept almost everything above deck on the Torrent into the water. Capt. Ralph H. Hackett, of the Torrent, and his watchman, David Canary, were struck by flying timbers and instantly killed on deck. John Cattanch, the wheelman, was knocked into the canal and drowned.

### MICHIGAN HAPPENINGS.

The Escanaba, Frankfort & South-eastern railroad, has been sold to the re-organization committee of the Toledo, Ann Arbor & North Michigan railway.

Isaac Burr, aged 5, fell into Bell river at Marine City. An Indian rescued him after he had been under water 12 minutes, but his life was saved.

Mrs. Theresa M. Porter, committed suicide at Detroit. She had been in ill-health about two years from severe nervous prostration, resulting in insanity.

The Port Huron & Lexington railroad will probably be abandoned. President Brennan is unable to float the bonds of the road and private capital cannot be interested in the enterprise.

The five year-old daughter of Chas. Johnson was burned to death near Stephenson. She tried to build a fire in the cook stove and her dress caught on fire.

Fred Barr, arrested at Big Rapids on a charge of stealing from his employer, Reese Marshall, of St. Johns, a horse which he drove to death, is but 16 years of age and a former inmate of the industrial school.

The Thompson Lumber company's drykiln, with 60,000 feet of hardwood lumber, burned at Thompsonville. The planing and sawmill were saved. All lumber in the yard was also saved. Loss, \$1,000, fully insured.

The Marinette & Menominee Paper Mill company has decided to erect a \$50,000 sulphite plant at Menominee.

Thos. W. Palmer is announced to address his fellow-toilers at a picnic of Washtenaw, Wayne, Oakland and Livingston farmers at Whitmore Lake, August 24.

Jacob Threlf, of Ann Arbor, deliberately threw himself in front of a motor car on the Rapid railway between Detroit and Mt. Clemens and was instantly killed.

Wm. Robinson started to Lapeer with a load of baled hay. The load caught fire from his pipe and he was fortunate enough to save the horses and himself.

Four Chinamen were captured at Detroit while being smuggled from Canada. A sleeping car conductor and porter were arrested for hiding them from the officers.

At a party at Bad Axe given by Mrs. A. Haymarket two men began to quarrel. Fred L. Harder tried to make peace, but was fatally stabbed in the stomach by Herbert Sheets.

Bishop Richter, of Grand Rapids, assisted by Frs. Hudon and Steffes, of Manistee, laid the cornerstone of the new Catholic church at Frankfort. The edifice will cost \$10,000.

A stubborn fire in the Jackson paper mill created great excitement among the convicts in the state prison adjacent. The fire did \$15,000 damage to rags, jute and other material.

August Rollenhagen, aged 17, was hauling water in barrels near Ravenna. Going down hill the barrels tumbled, throwing him between the horses. He was dragged 30 rods and died.

The only fatality from forest fires occurred near Alden. Geo. Herenden, sent his five-year-old boy after the cows. He became surrounded by the flames and was roasted to death.

The barns and outbuildings on the farm of Peter Gunlock, near Lenox, were destroyed by fire. Two horses, a lot of new agricultural implements and 20 tons of hay were consumed.

The long continued drouth about Jackson was not disturbed by light rains which fell in various parts of the state and the question of supplying the city with water is becoming serious.

Receiver Burt, of the T. A. A. & N. M. railroad, has secured a right of way for a new route from Ann Arbor to Whitmore Lake. A number of expensive sinkholes, dangerous to life and to property, will be avoided.

Reuben Morningstar, of Shelby, gave his 5-year-old boy an old revolver to play with. It happened to be loaded and was discharged, the ball passing through, the little fellow's head, causing immediate death.

Forest fires destroyed the mill of the Phelps Lumber company, near Keno, together with 2,500,000 feet of lumber; also the barn of Supervisor George R. Loucks, of Martiny township, Mecosta county, together with its contents.

M. D. Degroot was instantly killed and John Molloy seriously injured by the fall of a scaffold at Wickes Bros' boiler shop at Saginaw. The men were both colored and they were engaged in whitewashing the interior.

Oceana county fruit growers are making terms with the transportation companies to extend their markets for fruit into Ohio, Indiana and southern Michigan. Heretofore they have shipped mostly to Chicago and Milwaukee.

One-half the farmers around Galesburg are hauling water from the Kalamazoo river for their stock and even that resource promises to fail soon. The oldest inhabitant fails to remember a condition of affairs approaching the present.

A four-year-old daughter of Fred Whitney, a farmer near Bankers, died from poisoned apples. The vines in a potato patch had been sprinkled with paris green and the apples had fallen off a tree into the potato patch. An eight-year-old girl is not expected to live.

The Clark house burned at Cheboygan together with the barn, a span of horses, wagons and all the boarders' clothes. Loss \$4,000; no insurance.

The fire is supposed to have originated by children smoking cigarettes in the barn. The roof was burned off D. C. Peltor's barn also.

Fire was discovered in the basement of F. R. Metcalf & Company's large dry goods store at Adrian. The flames were confined to the basement, but smoke and water destroyed the value of nearly everything on the upper floors. The stock is valued at \$50,000 and will probably be a total loss.

The drouth about Benton Harbor, St. Joseph, Niles and all through the fruit belt was broken by the advent of a terrific rain storm accompanied by heavy wind which blew a great deal of fruit from the trees and blew many trees down also. The two-story walls of a new bank building at Deatur were demolished.

The Nyanza, upbound with coal, collided with the northern liner, Northern King, downbound in a fog at the foot of Sugar Island in St. Mary's river, near the "Soo." The Nyanza was cut down and was run into shoal water, where she sank. The Northern King was apparently uninjured.

The Nyanza is owned by the McBrier syndicate of Erie, and was valued at \$110,000.

The thirteenth annual meeting of the Michigan State Pharmaceutical association was held at the Light Infantry armory, Detroit. The exhibits were presented at the Auditorium.

Druggists from all over the state—about 500 in number—were present. Officers elected: President, George J. Ward, M. D., St. Clair; vice presidents, E. F. Phillips, Ann Arbor; S. P. Whitmarsh, Palmyra; and A. L. Walker, Detroit; secretary, Benj. Schroeder, Grand Rapids; treasurer, Wm. Dupont, Detroit.

The drouth is bringing a rather peculiar trouble to Allegan. The river is the lowest in 40 years and the water works proprietors have issued rules that each house, store and factory must use only a certain amount of water. This placed the factories on short time and the Harrison Electric Light company refused to obey the rule.

The water company nailed up one of their water gates but the light people tore it open and surrounded their plant with live wires. The courts will now take a hand, but the drouth people have won the ill will of the citizens.

## LINDENSCHMITT & APFEL,

37 S. MAIN STREET.

### THE CITY.

Remember the annual excursion to Put-in-Bay one week from today.

Wm. Rettich was married a week ago last Saturday to Miss Lillian Neeb. It has been decided to hold the county fair on September 24-27.

Geo. Clarken has bought the DeForest property on N. Division-st.

Harvey Stoffel stood sixth in the Detroit bicycle races last Saturday.

Wm. Arnold, Jr., and Miss Emma Rauschenberger were married yesterday.

John E. Travis has begun work upon his new house at the corner of Division and Huron-sts.

Congressmen Aitken and O'Donnell are both nominally in the field for the gubernatorial nomination.

Euler and Pipp will do the carpenter work and John Koch the mason work upon John Travis' new house.

Pres. Angell gave an interesting lecture before the Summer School students, in room 24, Tuesday night.

There is every indication that the crowd which will take in the excursion to Detroit today will be a big one.

The case in Justice Gibson's court against the fishing law violators at Portage lakes was postponed to Aug. 10.

Pleasure riding upon the open street car last Sunday evening was especially popular. Many people who wished to ride were unable to do so.

The Young People's Society of the Zion Lutheran church picnics at Whitmore Lake today. Fare, round trip, 40 cents.

There were nearly 700 people, old and young, who attended the Bethlehem Sunday School picnic at Whitmore Lake last Thursday.

Fred. G. Schleicher is enlarging his store on S. Main-st. It will be 35 feet deeper. Mr. Schleicher will put in a line of tinware and toys.

Louis Leisemer, the editor of the Hausfreund Post will be the only orator who will speak at the German Day to be held in Ypsilanti, Aug. 22.

Mrs. Agnes Wahr celebrated her 64 birthday last Sunday by a family reunion. There were twenty of her children and grand-children present.

The game of base ball between THE REGISTER nine and the Y. M. C. A. nine will come off day after tomorrow. Both sides propose to put up a big fight.

The Ann Arbor Organ Co. sold sixteen organs at retail between June 17 and July 17. Wonder if any of the big Detroit music houses did as well? We doubt it.

It is remarkable how quickly the slight showers we have had have livened up the lawns whose owners had become discouraged and ceased sprinkling them.

It is reported on the dead quiet that the Republicans are laying pipes to capture the aldermanic elections next spring.—Argus.

And they will capture the majority of them, too.

Frank H. Bannister, of Owosso, a former Ann Arbor resident, died at his home in Owosso a week ago last Sunday. Mr. Bannister's parents and one sister reside in this city.

The insurance adjusters have allowed Geo. Craig \$1,830 for his loss in the burning of his livery barn. He is already at work rebuilding and expects to open up again by Sept. 1st.

Prof. and Mrs. E. D. Adams, of Lawrence, Kansas, report the arrival of a second son at their home. Mrs. Adams, it will be remembered, is the daughter of Dr. and Mrs. W. F. Breakey.

The Dexter town clock created a sensation the other evening by imitating some of citizens, after the legal "closing hour." It was wound up so "tight" that it couldn't go.—Adrain Press.

Miss Fannie Louise Gwinner has recently completed the translation from the German of "Introduction to the Interpretation of the Beethoven Piano Works by Adolph Bernhard Marx."

The leading lights of the Salvation Army in Michigan are to hold a meeting in Cleary Hall, Ypsilanti, July 30th and 31st. The next day they will storm the strongholds of Satan in this city.

Last Friday a bolt of lightning struck a flock of sheep on the farm of H. V. Watts, of Lyndon. Result, nineteen killed. Thirteen of them had their lives insured in the Washtenaw Mutual.

Rev. Dr. E. W. Ryan, of Ypsilanti, will preach at the first M. E. church in this city next Sunday morning, that is if the saloon men of Ypsilanti do not succeed in having him in jail at that time.

The attendance at the summer school is gradually increasing. Yesterday the enrollment had reached 180. It now looks very much as if the number would reach 200 after all. It is to be hoped that it may.

Mrs. J. U. Crouse, Director of the Chicago Kindergarten college, will speak to young women at all interested in Kindergarten work, on Saturday afternoon, at 3:30 o'clock in the parlors of the Unitarian church.

The firm of Goodyear and St James will dissolve partnership at the end of next month. Mr. Goodyear will continue the present business while Mr. St James will open up in the dry goods business for himself.

General Ypsilanti, who gave his name to this city, turned up missing about a year ago. It was generally supposed that he had been kidnapped, and diligent search had been made for his whereabouts since his taking off.

Let him who groans painfully in darkness or uncertain light, and prays vehemently that the dawn may ripen to day, lay this precept well to heart: Do the duty which lies nearest thee, which thou knowest to be duty; the second duty will already have become clearer.

A LUCKY ACCIDENT.

Why a "Jackstone" Maker Turned His Attention to Puzzles.

As an example of how a remunerative specialty in hardware forced itself on a receptive and appreciative Yankee, the following incident will be of interest: Among manufacturers small castings are often put in revolving cylinders with pickers or stars made of cast iron, having usually six inches, the extremes of which are about an inch apart.

ALMOST EATEN ALIVE.

Mosquitoes and Flies Attack a Man Who Escaped Drowning.

Five young men who left the city in a small sailboat for Greenwich had a terrible experience, says a Salem (N. J.) telegram. One of them, George Taylor, 21 years old, was drowned and another, William Warrington, saved himself by swimming and then narrowly escaped death from the bites of mosquitoes and greenhead flies.

The five had secured work at strawberry picking on a farm at Greenwich and expected to begin this morning. They had reached Dunk's bar, above Bayside, when they were struck by a squall. Despite their best efforts their boat was capsized and all were thrown into the water.

THE RAILROAD HOG.

There Are Six Varieties of Him and All Are Nuisances.

"The car hog is more and more in evidence every day," said a car conductor the other day to a World man. "The warm weather develops traits that have been dormant with the winter. I have counted six different varieties of the breed in a week. I used to be a raiser of stock in more prosperous days and I'm a good judge. The most common sort is that of the fellow who occupies more room than he needs; never sees that he could make room for anybody and is evidently the same when he is at home. I'll bet he's the first who gets to himself, gives no one else a chance and carries it down in his pocket."

"Then there's the fellow who crosses his legs and when any one seeks to pass simply turns his foot edgewise, so that twice as much dirt is rubbed off on a woman's dress and he gets half a shine for nothing. If a bigger man stands still and glares at him he will unfold his legs, but only then. This is the same animal who likes to stretch out in cross seats on the 'L' and clean his boots on the edge of the seat."

"The third of the species is less bold than his brothers. He is the chap who, when some one gets up, leaving a seat vacant, although there's a tired woman maybe next to him, plunges into the vacant spot, for she has had her back turned and the opportunity was—and always is—in fact, never neglected by him."

"The fourth sort is the rooster who reads another man's paper over his shoulder. I saw one the other day who was so interested in one article that he didn't see that the man who held the paper was furtively and arduously regarding him. The fact was brought to his attention, however, by the paper being pushed in front of his face and then a dozen smiling faces made his face turn fairly pale."

"The fifth is really only a pig. He's not grown, but thinks he is. His nose—that's not the word, but it will do—is retreousse, and the little bristles under it are carefully cared for. He likes to crowd close to a pretty girl and stare at her with such a yearning look. If he sits opposite her his eyes rarely wander from hers. I saw one young woman stare at the feet of one of that sort for five minutes. He pulled them back and fidgeted them about, finally resting on his toes. She kept right on staring and he became very uncomfortable. I'm told that's a sure remedy. He finally got out on the platform."

"The last of the railroad hogs I know, although there may be others, is the one who opens his newspaper so as to shut out the view of those on either side of him. If he's fold it down the center of the page—but, pshaw! he won't."—New York World.

CHANGING THE BIBLE.

Centuries Ago It Was a Very Dangerous Undertaking. About the middle of the twelfth century came, so far as the world now knows, the first galsayer of the general theory concerning the Bible. Then it was that Aben Ezra, the greatest biblical scholar of the middle ages, ventured very discreetly to call attention to certain points in the Pentateuch incompatible with the belief that the whole of it had been written by Moses and handed down in its original form.

Are You Ever Annoyed

by a buzzing or roaring sound in your head? Have you difficulty in hearing distinctly? Are you troubled with a continual dropping of mucus, irritating the throat and causing you to cough? Is your breath unpleasantly affected and accompanied with bad taste? Is your hearing less acute? If so, you have catarrh and should at once procure a bottle of Ely's Cream Balm, the best known remedy. The Balm will give instant relief.

SMUGGLED GLOVES.

Oregon Postal Officials Find Them in Packages of Papers.

Officials connected with the Postoffice Department of this city have discovered a neat attempt to swindle the United States Government by smuggling kid gloves into this city and escaping the payment of duties. Some time since a sudden increase in the newspaper mail between Hong Kong, China, and this city became apparent, says the Portland Oregonian. It was surmised that certain persons had become interested in the Japan-China war and were being supplied with newspapers containing full accounts of the war's progress, and the first lot of papers was delivered without question. Last Saturday there was another batch of papers received, many of them being addressed to women in the city, and the suspicions of the postoffice authorities were aroused. Collector Block, of the customs service, was informed of the suspicious nature of the packages, and thirteen of them were turned over to his custody for investigation. It is required, when the postal officials have cause to think that the mails are being used for the purpose of smuggling contraband goods, that the package under suspicion must be given to the Collector of Customs, and the party to whom the same is addressed must open the same in the presence of the customs officials for inspection. On Saturday a woman to whom a number of apparent newspapers had been sent called at the Custom House to receive the same from the Collector if they passed inspection after being opened and examined. Within the folds of the papers two pairs of kid gloves were found, and examination of other bundles resulted in similar finds. The gloves were all confiscated by the Collector, and will be sold at auction in due time.

The woman stated to the Collector that she had an idea who sent the gloves, but she refused to disclose any names, and there is no law to compel her to do so. Neither can the party sending the gloves be molested, and the only thing that the Government can do is to seize the goods. The gloves are of ordinary make, coming in a variety of shades, but those who have been receiving presents from such sources will find the supply of gloves now cut off, as every package of kids will be inspected. The duty on paper gloves is 50 per cent of the value at port of importation, and in amount the money which the Government has lost is a trifle.

TRIED TO KILL VICTORIA.

Six Attempts Have Been Made on the Queen's Life.

Since her majesty came to the throne she has been the subject of six attacks, but only three of them can be described as attempts on her life. The first attack on the queen occurred on Constitution Hill, on June 10, 1840, soon after her marriage, the assailant being a pot boy named Edward Oxford. Two years later, on May 30, 1842, John Francis fired at the queen when within a few feet of her carriage. This outrage also took place on Constitution Hill. In July of the same year a crack-brained lad named Bean leveled a loaded pistol at her majesty, who was driving from Buckingham castle to the Chapel Royal. St. James, but the weapon missed fire. In May, 1850, Robert Paine, an ex-tenant in the Hussars, as the royal carriage was emerging from the duke of Cambridge's gate, struck the queen with a stick, leaving a mark on her cheek and crushing her bonnet. In February, 1872, a youth named Arthur O'Connor presented an old and unloaded pistol at her majesty as she was entering Buckingham palace, and on March 2, 1882, a man named Roderick Maclean deliberately fired at the queen as she was driving from Windsor station to the castle, but no damage was done.—Westminster Gazette.

Sudden Extinction of a Family.

The Johannesburg correspondent of the Standard reports an extraordinary series of fatalities at Warrenton, where by a resident lost his whole family in the space of a few minutes. Three children left the house to go to their father, a farmer, who was in the field near. The three put their hands in a crevice of the rocks to obtain bird's eggs. In this crevice there was a deadly snake, which bit all the three. Two of them died before the third could get home to tell the mother what had happened. The mother, frantic with grief, tried to lift the third child on a horse to gallop for help. She pushed him too far; he fell over on the other side, fracturing his skull, and died instantly. The mother re-entered the house and found a fourth child had fallen in the bath and been drowned. The whole family died within one hour.

Terry's Silveren.

Among the many discoveries of the present age, none rank higher than the new metal silveren, which owing to its great durability and cheapness is bound to take the place of silver in the manufacture of fine tableware. Silveren is a beautiful white metal, will not tarnish or rust, and all goods made from it are warranted. We want everyone to have a chance to compare silveren with silver, so for the next sixty days we are going to give away one half dozen Silveren Tea Spoons free, to every person who will send for one of our Silveren sets, containing six Tea Spoons, one Sugar Shell, one Butter Knife. If at any time the Silveren goods do not prove satisfactory, return them and your money will be refunded. Remember we give you the Silver Spoons. Send at once as this offer is for 60 days only. Price Silveren set \$2.00. TOLEDO SILVER CO., 1162 TOLEDO, OHIO.

Journalists Writing to the Pictures of Artists Nowadays.

"The Tyranny of the Pictorial" is a theme that moves with well-grounded indignation a writer of the June Lippencott's. He is greatly annoyed by the present craze for pictures that is converting our literary magazines into picture magazines, and he gives the following striking illustration of this degenerate tendency:

"At least one of the magazines published in New York is almost wholly produced, as to its text, by three or four of its office men, who work over pen-names now more or less familiar from repetition on the title-page, and who 'write around' the pictures; that is, they supply the reading matter for somebody's photographs. Very few of the readers of this magazine are clever enough to detect this little trick in magazine-making; they fancy that whatever is published in an illuminated cover and with half-tones judiciously sprinkled in to make the best showing, is necessarily high-class reading matter. And, while we may deplore this cheap-John literature masquerading in disguise of the best and highest, we cannot but admire the business intuition of those publishers who recognize the selling value of mere pictures. Of course this subordination of what is literary to what is pictorial is particularly hard on the man dependent on his pen, now more numerous than ever before; but he is rapidly learning to take his medicine uncomplainingly, and he either has a camera or is facile enough with pen or pencil to produce a rough sketch which some professional sketch-artist can make over into a genuine masterpiece and affix his own name to with fitting artistic indelicacy."

About Knives.

A cheap Pocket-knife can be bought at every Store, but it is not the kind you want.

One dollar is the lowest price that a really good knife can be sold for. This column is placed in this paper to advertise the very best Pocket-knife ever sold. It is J. C. TIDMARCH'S Sheffield Steel Knife.

Never buy a knife only because the looks well. If blades are not the best Sheffield steel they will soon bend, no matter how they will look. Still, you want a fine-looking knife.

The United States law provides that only samples to agents and to the trade will be admitted free of duty. You can, therefore, see the advantage that I have in sending samples to agents over those who deal in Sheffield goods in America.

I am an advertising agent; I am entrusted with a certain amount to spend advertising these knives (the best value ever seen in America at One Dollar each). Now, the knife is known best advertisement.

Imagine a Pocket-knife (3 1/2 inches long) with the most beautifully-grained very handle—genuine African ivory mand with two blades of the very best Sheffield steel that will last a lifetime and cut like a razor. The tips of the handles are heavily plated with sterling silver. And then a very nice chamois leather case goes with each knife. Now, would it not be easy work selling this knife at One Dollar each? I know it would, for it looks as if it were worth two dollars.

And so it is if you compare it with the value offered in the ordinary Stores.

Is not this knife its own best advertisement?

You can make \$4 per day selling these knives. This is a genuine and straightforward statement. This is counting that you show it to only twelve buyers every day. And every one that sees it will say it is a good value for \$1. The knives are sold to you at \$8 per dozen; you sell them at \$12 each.

I determined to use large sum of advertising money entrusted to me in sending out free samples to those who promise to act as agents for the sale of these knives.

I will send you a tree sample, but you must sign the promise at the foot of this column, and make a deposit to show that in asking for the knife you are acting in good faith.

The deposit that I ask of you is 40 cents about half the wholesale cost of the knife, and less than one-third what you would have to pay for a knife like it, if you bought one.

Send the money by a Postal Order or one-cent stamps for 40c., and put a five-cent stamp on the letter, which must not weigh more than one-half ounce.

The deposit of 40 cents will be placed to your credit, and will be deducted from your first order at the dozen rate.

I am an advertising agent, contractor and publisher with one of the largest Advertising businesses in the world, and absolutely guarantee to send, postage paid and duty free, the knife described above free to anyone who signs the promise below, and sends it with the deposit as stated.

Let me advise you not to part with your sample, even if you should lose it, as at \$1 by refusing, as it will take time to replace it. I could not send you another even if you sent the full \$1. After the sample they can only be supplied to you by the dozen as these industry on them to be paid.

Any English Banker can give you information about my high standing, or write to the publisher of this paper, who knows that I do a large and straightforward advertising business, and that I do exactly as I say.

I have taken this space in this paper for three years! The first one answering this advertisement after the number of the paper has come out will, if he likes, have his name printed in this space as agent for these knives.

The Editor of the Springfield (Ohio) New Era writes, in his paper of June 29, 1894: "I have received a sample knife from Mr. Sears, and am very much pleased with it. He is the owner of a very large advertising business in London, and is, I believe, perfectly responsible and straightforward."

Sign your name and address to the following, cut it out and send it with Postal Order or stamps for 40 cents, and you will receive by return of post the beautiful knife as described above.

F. W. SEARS, ADVERTISING AGENT AND CONTRACTOR, WHOLESALE KNIFE ADVERTISING DEPARTMENT, 138 FLEET STREET, LONDON.

DEAR SIR,—I faithfully promise on my honor and honor to show the Sample Knife you have promised to send me to one or more of my friends, thereby constituting myself an agent. This will make me "in the trade" as far as Pocket-cutlery is concerned. By this promise I am entitled to a sample of your beautiful Dollar Pocket-knife with chamois leather case, to be sent me post-paid and duty free. I also enclose 44 cents Postal Order or stamps, which please hold for me until I send you an order at the dozen rate.

SPECIFICS.

NEWS IN BRIEF.

The Illinois law closing barbershops on Sunday is a success. Fred Meister drowned himself at Buffalo because a friend told him to. Two distinct earthquake shocks were felt at Springfield, Mo. No damage. Fire at Cornwall, Ont., burned 50 houses, leaving 800 people homeless. Everything is "dry" in New York City on Sunday under the excise law. The German Epworth League of the United States held an enthusiastic convention at Chicago. The American Wire company closed down their plant at Cleveland for three months owing to the strike. Terry Tuft, his wife and three children, were drowned by their boat capsizing on Lake Keuka, Bath, N. Y. Frank Wilson was killed at Niles, O., by a train which collided with a street car. Mrs. G. W. Holder was fatally injured. Charles D. Sherwood, ex-lieutenant-governor of Minnesota, was found dead, floating in the lake at Chicago. Suicide. A caisson of the big bridge now building at Nage Hamed, near Alexandria, Egypt, by a French firm collapsed and 40 workmen perished. The 12 principal glass manufacturers west of Pittsburgh met at Anderson, Ind., and formed a combine to raise prices 25 to 40 per cent. Ex-Secretary of State Foster has returned from Hong Kong, having concluded his duties as the agent of China in negotiating peace with Japan. A new gold field has been discovered in Colorado in the Green Horn range, near Florence. New strikes are also being made daily near Silver Cliff. The French chamber of deputies adopted a motion asking the government to negotiate a permanent arbitration treaty between France and the United States. Harry Jackson, a Chicago crook, was instantly killed at Portland, Ind., and Gus Barker was fatally wounded while trying to burglarize a store. The dominion government has announced its intention, in the Manitoba school trouble, to see that Roman Catholics are accorded the privilege of conducting parochial schools. The bodies of eight Chinamen were found in the San Joaquin river near Madeira, Cal. They had been working in the mines situated in the mountains eight miles distant. Foul play. At Scott, O., Everett Bryan shot Emma Thomas twice in the breast and then fired a bullet through his own body. Bryan was jealous because the girl danced with another man. Mrs. Mattie Chambers, of Centralia, Wash., received an infernal machine, from Rev. B. F. Fuller, she supposes. He is a Christian church minister, whom she justified a year ago and who was last heard of in Raleigh, N. C. At Pittston, Pa., Kate Connell, aged 24, found a revolver in his brother's pocket. She hoisted the window and began firing at some sparrows. One of the bullets struck Mrs. C. Kelley, an aged woman killing her instantly. Frederick Hellmann, a well-to-do mason contractor of Chicago, killed his wife, his four children and himself by closing his house as tightly as possible while the family slept and then turning on the gas without lighting it. By the breaking of a railing of a foot bridge crossing the Wabash tracks at Toledo two men and a boy fell 20 feet. John Walters died from the effects of his injuries. Walters' eight-year-old son and Frank Creiner were badly hurt. The explosion of a gasoline stove at Chicago burned Mrs. W. C. Bartel and Miss Ora King fatally. Another explosion of the same kind in the same city burned Mr. and Mrs. Gunnwald to death. Carelessness in both cases. It is proposed at Chicago to move the Immanuel Baptist church on rollers 50 feet one way and eight feet another, raise it and place a basement underneath. It is one of the largest stone edifices in that city and has a spire 150 feet high. The Standard Telephone company, which is backed by the Standard Oil and sugar trust interests, is negotiating for either the purchase outright of the Postal Telegraph company's plant or a controlling interest in the stock of that company so as to break the Bell telephone monopoly. In the U. S. court at Toledo, William S. Cushing, for the T., A. A. & N. M. railway, filed a motion for the stockholders to set aside the recent sale of the road. Their principal contention is that the Ohio portion of the company's property was not sold separately from the other property. A prize of \$5,000 is offered by the Chicago Times-Herald to the successful competitors in a horseless carriage or vehicle motor race between Chicago and Milwaukee. Definite details will be announced in the near future. The date of the contest will not be far from November 1. Nathan Goodrich, clerk at the T. & O. C. freight office at Fostoria, O., was riding on a hand car with his wife and little son when the car was struck by an engine. Mrs. Goodrich and the little boy were killed, both being horribly mangled. Mr. Goodrich was seriously hurt and he may not recover. Archbishop Kain, of St. Louis, has made a decision that removes the ban placed by some priests on Grand Army funerals. Under his ruling members of the G. A. R. attending funerals may enter the church wearing their uniforms and insignia, and may conduct funerals in accordance with their ritual in Catholic cemeteries. The executive committee of the great tent Knights of Maccabees has decided that Valley City tent, of Grand Rapids, must strike from its records all reference to the mass meeting, at which resolutions were adopted condemning Commander Boynton for his removal of Great Republic, Keeper Broughton, and is also required to apologize and pass resolutions expressing loyalty to the present officers. The tent will probably appeal to the great camp itself, waiting for the next year. Ed. Ryan's large grain storehouse and one residence were burned at Calumet. Loss \$10,000.

DR. HARTMAN'S ADVICE

Is Sought by Female Sufferers from Ocean to Ocean. All over the country there are women who have been invalids for many years, suffering with female derangements, which the family doctor can not cure. What a boon to such women is Dr. Hartman's free advice! So famous has his skill made him that hardly a hamlet or town in the country but knows his name. He cures tens of thousands, and he offers to every woman who will write to him her symptoms and a history of her trouble, whether it be change of life, ovarian trouble, menstrual derangement, or any other of that host of maladies classed under the title of female complaint, free advice and treatment. The medicines he prescribes can be obtained at any drug store, and the cost is within the reach of any woman. He describes minutely and carefully just what she shall do and get to make a healthy, robust woman of herself, when her household work will be a pleasure instead of a worry, and life be full of blessings. Every woman who suffers with any form of female trouble should have a copy of a pamphlet written by Dr. Hartman devoted entirely to the causes, treatment and cure of all forms of female derangements. Sent free to any address by The Pe-ru-na Drug Manufacturing Company, Columbus, Ohio. For free book on cancer, address Dr. Hartman, Columbus, Ohio.

WHEN THINGS GO WRONG.

The Best Thing to Do Is to Accept the Situation. Crossing the town the other day in haste to catch a train, writes Margaret E. Sangster in Harper's Round Table, the horse car was three times blocked by great vans which stood upon the track. The van drivers appeared to be unloading their goods in a very leisurely manner; to us in the car, with the precious moments slipping away like grains of sand in the hour glass, they seemed exceedingly slow and unhurried. I looked about on my fellow passengers. Some had flushed and angry faces, some could not sit still, but tapped the floor with their feet and uttered exclamations and looked at their watches. One or two stepped out with their bags and walked hastily onward. But a dear old lady in the corner of the car was a pattern of sweetness and amiability, and I heard her observe to her neighbor: "We will probably lose our train, but at this time of the day there are 400 trains every half hour, and it's never well to be put out by little incidents of this sort." She had the right philosophy. Through life, when little things go wrong, it will be wise to accept the situation without fretting, and by maintaining composure you will often be able to set them right again.

THIS IS A PROGRESSIVE AGE.

New and Startling Discoveries are Made Daily. The greatest discovery for sufferers of catarrh, Hay fever, Asthma is Mayers' Magnetic Catarrh Cure. Its wonderful cures since its discovery are known to thousands. This grand medicine will positively cure all forms of these terrible diseases. It accomplishes what no other remedy has done. So simple a child can use it. No cure no pay. One bottle will do the work and lasts for a three months treatment. Entirely new, no other remedy made like it. This is what the eminent Dr. Henry Carrington Alexander, D. D., L. L. D., has to say of its marvelous cure. The Gentlemen:—Ever since I have tried your famous catarrh remedy I have intended to give you a voluntary testimonial of its efficiency. I have been a sufferer for years from nasal and post nasal catarrh, and the bone-in my nose has been visibly changed in its shape. After a trial of all manner of good and indifferent recipes, I have no hesitation in pronouncing your Magnetic Catarrh Cure the best, the speediest and most effectual remedy I have yet encountered. I wish and predict your success in the effort to demonstrate the value of your neat device in the way of a truly scientific and meritorious inhalant. You have made me your everlasting debtor. I am my dear sirs, Yours faithfully, Henry Carrington Alexander. Sept. 12th, 1893.

Another 'Orrible Murder.

It was night; the stars were covered by a cloud of mist, the vivid lightnings flashed and shook their fiery darts upon the earth, the deep-toned thunder rolled along the clouded sky, the elements were in wild commotion, the storm spirit howled in the air, the winds whistled, the hailstones fell like cannon-balls, the huge billows of the ocean dashed upon the rock-bound shores, and torrents leaped from the mountain tops when the murderer sprang from his sleepless bed with vengeance on his brow, murder in his heart, and the fell instrument of destruction in his hand. The storm increased, the lightning flashed with brighter glare, the thunder growled with deeper energy, the winds whistled with a wilder fury—the confusion of the hour was congenial to his soul and the stormy passions which raged in his bosom. He clinched his weapon with a sterner grasp. A demoniac smile gathered on his lips, he grated his teeth, raised his arm, sprang with a yell of triumph upon his victim and killed—a mouse!

TUNNELING THE SIMPLON.

Swiss Alpine Barrier to Be Pierced for the Fourth Time. Little has been heard lately of the project for tunneling the Simplon, but it would appear at last to have taken final shape, if the Allgemeine Zeitung is to be trusted, says the Manchester Guardian. The tunnel when completed will be the fourth to pierce the Alpine barrier, but it differs considerably from either the Mont Cenis, the St. Gothard, or the Arlberg tunnels because its great length of about twelve and one-third miles, half as much again as the length of the Mont Cenis tunnel and nearly twice the length of the Arlberg tunnel, has made the work of construction peculiarly difficult. To construct properly ventilation will be far from easy and the engineers will have further to devise a means for lowering the temperature, which, it is estimated, will be 104 degrees Fahrenheit, for the tunnel will be very deep, 2,372 yards of superincumbent earth rising vertically from it in one place to the summit of the mountain. Its course may be roughly described as the chord of an arc made by the famous Simplon road, which was constructed by French engineers between 1801 and 1806. The northern opening is near Brieg, the southern near Iselle. The distinctive feature of the project is that two parallel tunnels are to be constructed about 220 yards apart and connected at intervals by galleries running diagonally from one to the other. Each tunnel is fifteen and one-third feet high and eighteen feet broad at the level of the floor and will contain one line of rails. Both tunnels will be constructed simultaneously, but at first only one is used for traffic, the other being reserved and utilized for purposes of ventilation. Meanwhile the existence of two connecting tunnels will greatly facilitate the task of excavating either of them. Rubbish will be more easily removed, machinery will be more easily brought to the rock face, and if any falls of the rock occur it will be possible to rescue the workmen and repair the damage. The work is to be pushed on from both sides at once. The galleries have for the first few yards to be excavated by hand, and it is estimated that the progress then made will be only at the rate of a meter a day.

The Great Spectacular.

For the big carnival performance of "Lalla Rookh" with which The Detroit Railway is to celebrate its birth and to inaugurate the new and beautiful Boulevard Park at 14th Avenue and Boulevard, Detroit, every last detail of the arrangement has now been made. One of the great nights of the entertainment will be called "Michigan Night." In characters of glowing, living fire will the great seal of the State be pricked out against the night with various colored lights.

Those who have seen the performance of "Lalla Rookh" all claim that it is the most magnificently splendid and gorgeous spectacle the new world has ever seen, not excepting those spectacles which were given during the World's Fair. At that Fair Pain had control of the fire works and his display every night consisted of forty different numbers, and the fireworks program which is to be given here contains everyone of those forty numbers in addition to the set pieces which designate each night, the batteries, arlequins of various gaudy colors produced by shells bursting in air, birds of fire flying from place to place and returning to their own cote, golden fountains throwing high immense columns of orange colored fire. Then he has, in the lot, a brand new feature which is called a festoon of fire. Nothing is seen of this display until suddenly it bursts into sight darkness. These fireworks are given in addition to the regular performance of "Lalla Rookh."

To give some idea of the scale of thoroughness with which the whole is envisioned it should be stated that Mons. Arnold Kiraly, whose name has been for years associated with dramatic and lyrical spectacles, was engaged by cable to superintend the training of the ballet and he arrived in Detroit Monday for that purpose. The Detroit Railway cars are now running direct to the main entrance to the park and everything is in readiness for the opening. Performance will be given July 25, 27, 29, August 1, 3, 6, 7, 8, and 10.

Divided Among Schools.

The parliamentary grant for elementary education in Great Britain was distributed last year in the following amounts: Board schools received £2,553,656; Church of England schools, £2,732,436; British and undenominational schools, £410,127; Roman Catholic schools, £321,421, and Wesleyan schools, £198,276. The average attendance of children at these schools was about 4,350,000.

Superstition in the Mountains.

One reason why it is so hard to get anybody hanged legally in the mountain regions of Kentucky is that the dwellers in the town fear that they will be haunted by the murderer's spook.

IT DID LOOK SUSPICIOUS.

Nevertheless the Overcoat Transaction Was Perfectly Legitimate. A robust young man, wearing a thick terra cotta overcoat, and a somewhat consumptive-looking companion, minus an overcoat, left a well-known Chestnut street cafe together at a late hour on Saturday night, says the Philadelphia Record. The former generously tendered his warm outer garment to his shivering companion, who gratefully accepted it for the walk home. On turning the corner of Sixteenth and Locust streets the pair were closely scrutinized by a big policeman. Arrived at his home, the thin man returned the coat to his stout friend and the latter started back toward his hotel on Broad street. When he reached the corner of Sixteenth street the policeman grabbed him. "Pretty slick guy, you are!" he exclaimed, "but I'm on to that little overcoat racket. I guess you got his pocketbook, too." "What do you mean, sir?" demanded the indignant citizen. "You just take a ride to the station-house," mildly urged the cop, "and tell the sergeant how you managed to get into that other man's overcoat." "Protestations were in vain. The mad man, with the terra cotta overcoat, had to submit, and only the presence of his thin friend, whom he promptly sent for, saved him from a cell.

THROUGH A BRICK.

You Can Blow Out a Flame if Your Lungs Are Stout.

"You wouldn't have believed it possible to blow out a candle flame through a brickbat," remarked a celebrated physicist, whose penchant is to give scientific research a practical bearing. "It can be done, however, and it illustrates the all-pervasive qualities of air. Most rooms are largely ventilated through their walls, and the brick and mortar are merely rudimentary lungs, which take in and throw out the atmosphere with the expenditure of a touch." "You may try the experiment yourself. Place a candle on the other side of your brick and use two funnels, with the flaring ends on the opposite sides of the brickbat with the small end of one in line with your mouth and the small end of the other trained on the candle flame. The least breath will make the light flicker, and a hearty expiration will extinguish it altogether. Try it and see."

COLORS AMONG FLOWERS.

Botanists Say All Flowers Were Yellow.

Yellow and white. Botanists are agreed that the earliest petals were yellow, and that, originally, all flowers were of that color. The order of development of color in flowers appears to be yellow, pink, red, purple, lilac, up to deep blue—probably the highest level—while white may occur in any normally colored flower, just as albinos are found among animals. As flowers become more specialized they become more dependent upon the visits of special insects, purple and blue flowers, for instance, benefitting most from and being most preferred by bees and butterflies. A French authority states that about 4,200 species of plants are utilized for various purposes in Europe. Of these only about one-tenth have an agreeable perfume, the others being either inodorous or having an unpleasant smell. White flowers are the most numerous. One thousand one hundred and twenty-four species out of 4,200 are white, and 187 of these have a scent; 931 (77 perfumed) are yellow; next in order comes red, with 823, of which 84 give forth perfume; then blue, 594 (34 scented), and violet, 308, only 13 of which have any perfume. The remaining 400 kinds are of various shades of color, and only 28 of them have a pleasant smell.—Boston Standard.

DO YOU WANT TO STOP TOBACCO?

You Can Be Cured While Using It.

The habit of using tobacco grows on a man until grave disease conditions are produced. Tobacco causes cancer of the month and stomach; dyspepsia; loss of memory; nervous affections; congestion of the retina, and wasting of the optic nerve, resulting in impairment of vision, even to the extent of blindness; dizziness, or vertigo; tobacco asthma; nightly suffocation; dull pain in region of the heart, followed later by sharp pains, palpitation and weakened pulse, resulting in fatal heart disease. It also causes loss of vitality.

QUIT SURELY IT IS TOO LATE.

To quit suddenly is too severe a shock to the system, as tobacco—to an inveterate user, becomes a stimulant that his system continually craves. "BACOCURO" is a scientific and reliable vegetable remedy, guaranteed to be perfectly harmless, and which has been in use for the last 23 years, having cured thousands of habitual tobacco users—smokers, chewers and snuff-dippers. You can use all the tobacco you want, while taking "BACOCURO," it will notify you when to stop. We give a written guarantee to permanently cure any case with three boxes, or refund the money with 10 per cent. interest. "BACOCURO" is not a substitute, but a reliable and scientific cure—which absolutely destroys the craving for tobacco without the aid of will power, and with no inconvenience. It leaves the system as pure and free from nicotine, as the day you took your first chew or smoke.

Sold by all druggists, at \$1 per box, three boxes, (thirty days treatment, and guaranteed cure,) \$2.50, or sent direct upon receipt of price. GHOST IN A HOTEL.

Narrative of a Singular Experience of Lord and Lady Dunraven.

Appropos of the report that the Brevoort house was to be closed up there is a story to tell about the famous old inn. The countess is described by those who know her as a woman much more inclined to common sense than to ghost-haunted cock lanes, even with Dr. Johnson's authority. She used to tell the facts in the tale simply for what they were worth. It was more than a decade ago, years before the Valkyrie was thought of, when Lord Dunraven was first interested in the mining regions of northern Michigan. He and Lady Dunraven were staying in New York for a few days before starting west and had taken rooms at the Brevoort—pleasant rooms—with a view of the avenue and a nice glimpse of Washington square. The first night, being tired with their voyage, they went early to bed, as it happened, not so early to sleep. Both the earl and countess were blessed with hearty English constitutions. They were not at all accustomed to lying awake till the small hours. They wondered what they could have done, what they could have eaten or drank to afflict them with such gratuitous vigilance. Just at a venture, finally, they bundled themselves out into an adjoining parlor, there, and slept soundly till morning. Next night and the night after there was the same wakefulness and in the end the same migration to the adjoining room for relief. They began to think they should have to leave town earlier than they had planned, for they would not for the world have made any pretext to shift chambers. The explanation, came out by chance. They had a call before long from an old-time New Yorker whom they met in England, an authority on all matters pertaining to the town's history. "I wonder," he remarked casually, "that they should have given you these rooms. You know it was in that room that a Mr. X. hanged himself." It was in that room that Lord and Lady Dunraven had tried to vainly sleep, and they exchanged significant glances. Of course it was only a coincidence, they said, but the next day they took their departure for the west.—New York Tribune.

A good appetite and refreshing sleep are essential to health of mind and body, and these are given by Hood's Sarsaparilla.

Mortgage Sale

Default having been made in the conditions of a Mortgage executed by Thomas H. Geer to Philip Leonard, for the purchase money for the premises hereinafter described, which mortgage bears date September 17th, A. D. 1884, and is recorded in the office of the Register of Deeds for Washtenaw county, Michigan, on the 20th day of September, A. D. 1885, in Liber 62 of Mortgages on page 583, by which default the power of sale contained in said mortgage became operative, and no suit or proceeding in law or equity having been instituted to recover the debt secured by said mortgage or any part thereof, and the sum of twenty-four hundred and fifty-three and fifty-three hundredths dollars (\$2,419.53) being now claimed to be due on said mortgage, notice is therefore hereby given that said mortgage will be foreclosed by a sale of the mortgaged premises therein described or some part thereof, to-wit: All of the following described land situated in the city of Ann Arbor, in the county of Washtenaw, in the state of Michigan, viz: Lot commencing at the north-east corner of lot No. one (1), in block No. two (2) north of Huron street in range No. four (4) east, running thence south thirty-five (35) feet on the east line of said lot, thence running west sixty-six (66) feet parallel with the north parallel with the east line of said lot thirty-five (35) feet, thence east on the north line of said lot sixty-six (66) feet to the place of beginning, at public vendue on Friday the Eleventh day of October, A. D. 1895, at 10 o'clock in the forenoon, at the east front door of the Court House in the city of Ann Arbor, in said county of Washtenaw, that being the place of holding the Circuit Court of said county. Dated, July 8th, A. D. 1895. PHILIP LEONARD, Mortgagee.

KITCHENS OF LONG AGO.

The colonial kitchens lasted in many country houses until about fifty years ago. There are men and women still living who vividly describe their glories. They were low, with heavy rafters lighted by small-paned windows, for glass was a luxury in those days. The chairs had narrow, high backs and rush seats. There was, besides, a rudely shaped "settee." The great wood fire burned its prodigious back log in the chimney, and was never allowed to entirely die out. Banked with ashes in the evening, there was always supposed to be a spark to rekindle into new flames in the morning. Not long ago a woman died whose pride it was to say that in the forty years of her married life the hearth fire never once went out. If so dire a mischance arose a child was sent to the nearest neighbor with a shovel to "borrow fire," and from the glowing pine knot firelight was again possible. Along the walls were festoons of dried fruits and vegetables.

Vintage of Grapes for Invalids.

The Port Grapes were produced by Alred Speer of New Jersey is the best medica wine in the market, and far exceeds any other produced. It is heavy in body, rich in flavor, and well adapted for sickly persons and for general family use. It makes new blood and gives color to the pale and sickly. Leading physicians prescribe this wine in their practice, and use it at their own homes. Druggists sell it.

The Incomparable Chicago & Alton

In these United States of America at least, and it is highly probable that throughout the entire world, the official record for the safety and welfare of its passengers made and maintained by the Chicago & Alton Railroad cannot be surpassed if indeed it can be equalled. Over its completely rock-balanced, dustless roadway between Chicago and Kansas City, Chicago and St. Louis and St. Louis and Kansas City, eighteen magnificently appointed express trains are run on uniformly fast time every day. But in spite of this heavy passenger traffic the official records show that from December 4, 1879 to December 4, 1890, eleven years, there was no passenger, who was in place as a passenger, killed on Chicago & Alton trains. Moreover there was not a passenger seriously injured, to the extent of losing a limb, an eye or a member of any kind during that time.

During the entire period of the World's Columbian Exposition in Chicago, when it was not an uncommon thing to find the usual passenger traffic of the road increased two, three and four-fold, and special excursion trains were very many, there was not an accident of any kind—a most remarkable record.

Besides being America's most popular railroad, the Chicago & Alton is the Pioneer Dining Car Line, the Pioneer Pullman Sleeping Car Line and the Pioneer Palace Reclining Chair Car Line. Be sure that your ticket reads over the Chicago & Alton Railroad, when its matchless and direct lines can form the whole, or even a part of your journey.

## WHY "No. 9" ARE WHEELER & WILSON'S SEWING MACHINES POPULAR? BECAUSE LADIES BUY THEM LIKE THEM AND TELL THEIR FRIENDS.

Many ladies have used our machines twenty to thirty years in their family work, and are still using the original machines we furnished them a generation ago. Many of our machines have run more than twenty years without repairs, other than needles. With proper care they never wear out, and seldom need repair. We have built sewing machines for more than forty years and have constantly improved them. We build our machines on honor, and they are recognized everywhere as the most accurately fitted and finely finished sewing machines in the world. Our latest, the "No. 9," is the result of our long experience. In competition with the leading machines of the world, it received the Grand Prize at the Paris Exposition of 1889, as the best, other machines receiving only complimentary medals of gold, silver and bronze. The Grand Prize was what all sought for, and our machine was awarded it.

## LIGHTING A PIPE IN A WIND.

A Sportsman's Device When Matches Failed to Do Their Work.

"Paddling up Sebec Lake last summer in a birch-bark canoe," said a New York sportsman to a Sun writer, "the breeze blew so hard and constantly that, try as I might, I could not keep a match ablaze long enough to light my pipe. After half a dozen matches had flared out in the lighting of them, I made some forcible remarks apropos of my failure. 'Let me show you how to do it,' said my companion, an old Californian, who was handling the bow paddle. 'Hand me a bit of that newspaper sticking out of your pocket.'"

"He took the piece of paper and crumpled it up into a wad, which he retained in the palm of his hand. Then striking a match, he closed both hands about it to shield it from the wind, after the traditional manner of the railroad navy in lighting his pipe. The flame instantly set the paper smouldering on the top without its breaking into a blaze. He passed the burning wad to me, and it served as a pipe lighter equal to a live coal, the high breeze fanning instead of extinguishing it. It was the simple invention of a practical mind, which served my turn then and afterward, and I commend the device to sportsmen needing tinder for a pipe light or to start a camp fire."

## ENGLISH IN SOUND.

A Unique Puzzling Composition by a 12-Year-Old Schoolgirl.

The Northwestern Magazine gives the following unique composition written by a 12-year-old school girl. Let our young readers see if they cannot make it still more puzzling: "A right suite little buoy, the son of a kernel, with a rough round his neck, flue up the road as quick as a deer. After a thyme he stopped at the house and wrung the belle. His tow hurt hymn and he kneaded wrest. He was two tired to raze his fare, pall face, and a feint mown of pane rose from his lips. The made who herd the belle was about to pair a pare, but she through it down and ran with all her mite, for fare he guessed would not weight, but when she saw the little won fiers stood in her eyes at the site. 'Ewe poor dear. Why do you lye hear? Are yew dyeing?' 'Know,' he said, 'I am feint.' She boar him inn her arms as she ought, to a roan where he might be quiet, gave him bred and meet, held a cent bottle under his knows, untide his choler, rapped him warmly, gave him a suite drachm from a viol, till at last he went froch as hall as a young horse."

## BUTLER FULL OF WAR.

Says He Would Like to Lead an Army Against Canada.

Before departing for his southern home and while talking to a group of reporters Senator M. C. Butler of South Carolina, in a manner deeply impressive, while discussing the relations between the United States and Great Britain with reference to the Corinto affair, said: "I have no criticism to put upon our government in that affair. It was the advice of Washington that we have no entangling alliances. But I tell you what I would like to have seen. Just as the British were sailing into that harbor I should like to have seen some of our own fine warships hovering along that coast. Those things happen, don't you know, and you can't tell just how. But three or four fine ships happening along there about that time—well, of course they would naturally be interested in seeing what the Britishers were up to in landing marines, and maybe there would have been a little pleasure party of American marines sent ashore to get a fresh supply of fruits. England does not want to have a war with us. We are too valuable to her commercially. And yet in her eagerness and greed she may get into it. I would not want anything better than to lead 10,000 men into Canada. It would please my old heart unmeasurably to assist in snatching that country from Great Britain and attach it to ours. We may do it, too. Who knows?"

## MOUNTED POLICEMAN'S FEAT.

Since the Philadelphia Officers Work on Wheels They Do Queer Things.

Officer Hancock, of the twenty-eighth police district, was patrolling his beat the other day on his bicycle when he espied a crowd of small boys on a huge pile of new lumber. The alarm was given that a "cop" was coming, and the boys made a general rush to get away. The movement upset the lumber pile, and the long timbers slid down toward the center of the street. They made a natural gangway up to the top, and Hancock, who had a good gait on, rode his way clear to the top. He landed in the soft clay on the other side, never losing his seat. The affrighted boys scattered in all directions, completely dumfounded by the policeman's remarkable feat. They keep away from that section now, for they say Hancock has wings on his "bike."

When she had Children, she gave them Castoria.

## OF BENEFIT AT LAST.

Republican Gains from the Six New Northwestern States.

The admission of six new states in the early years of President Harrison's administration was intended by the Republicans to strengthen the party in the northwest for the contest of 1892, and to make certain the control of the United States senate by the Republicans. As is often the case in politics, the plans arranged by the Republicans for strengthening themselves failed. Idaho one of the new states, was carried by the Populists. North Dakota scattered its electoral vote among the three candidates. The admission of the northwestern states gave an impetus to the free silver movement which cost the Republicans the electoral votes of Kansas, Colorado and Nevada, and the changes in the United States senate consequent upon this free silver defection put the Democrats in control of it. But in the last two years the political pendulum has swung back again and the Republicans are now about to get, tardily, it is true, some of the benefits of their legislation of six years ago. The next United States senate will contain twelve members from the newly admitted northwestern states. Of these, ten are straight out Republicans, one a Populist, and one, Roach of North Dakota, a Democrat. This gives the Republicans a lead of eight over the Democrats and Populists combined. Without the representatives of the six new northwestern states, the next United States senate would consist of thirty-seven Democrats, thirty-four Republicans, and four Populists, with Delaware not included in the count. The Republicans would only have thirty-four senators in a total of seventy-six, and Mr. Cleveland would have for the next two years a Democratic instead of a Republican senate on his hands to endorse or reject his nominations.

## RISKED LIFE AND MONEY.

Thrilling Story of Fear and Trepidation.

A little dried-up man, whose nationality was imprinted plainly on his face, walked into the First National bank the other day, gazed furtively about, hesitation in his every movement, says the Chicago Tribune. Then he as quickly and unostentatiously left the great room, his hand shoved deep into his trousers pocket. A few minutes later he reappeared, determination written in every deep line of his rugged face, though his manner did not lack hesitation. He stared about him until he espied a line of patrons making deposits at the receiving teller's window, and at the foot of the line he took his place. As one after another of the customers made his deposit the little old fellow drew nearer and nearer to the window and at each advance his uneasiness increased and his courage departed. When almost to the goal he turned abruptly, wagged his head in a deprecatory sort of way and again took a place at the tail end of the line he had climbed up so patiently. A second time he approached the window by slow degrees and a second time he turned away when his hopes were about to be realized. The third time he tolled up that ever-varying line and now it was apparent that this time he would do or die. Only two men stood between him and the teller and he shifted restlessly from one foot to another. Only one man now kept him from the counter and his agitation increased. That one man turned away. The little old man's time had come at last! He jerked his hand from his pocket and with it a huge roll of greasy and oft-fingered bills. He dashed the money down in front of the puzzled teller and in a voice husky with emotion, excitement, and suppressed nervousness exclaimed loud enough to be heard 100 feet away: "I want t' fine the bank!" He wanted to open an account, and no one interposed an objection.

## WON A WIFE BY BRAVERY.

Romantic Adventure in Japan of a San Francisco Sailor.

Charles Litner is one of the luckiest sailors that ever sailed out of this port on a sealing schooner. He is going to be married to one of the prettiest girls in Japan. Not only is she very pretty, but her parents are very wealthy, according to the story told by C. Burdell, says the San Francisco Examiner. Burdell came up on the steamer Coptic last week. Speaking of young Litner, he said: "Charlie is the son of Sebastian Litner, a laborer, who lives out on Nineteenth avenue. He is an athletic young fellow and has always had an ambition to see the world. That's why he shipped on the schooner Jane Grey and went roving over the seas in search of seals and adventure. While at Hakodota, Japan, a few months ago Litner happened to be on one of the chief thoroughfares one afternoon when a spirited pony ran away with a Japanese girl, Miss Siena Kato. Litner saved the girl's life by springing in front of the runaway and striking the pony a stunning blow on the head with a club. The act was regarded as one of rare bravery, and before we left Japan it was announced that Litner was engaged to marry Miss Kato. He was hurt in the accident and was first taken to a hospital, but was afterward removed to the young lady's residence at the request of her parents. The marriage ceremony was to have taken place two weeks after we sailed. They are probably married by this time."
