The Ann Arbor Music Co.

The resignation of Mr. Lew H. Clement as manager of the Ann Arbot Organ C., in order to take a position in Wheeling, W. Va., has caused a change to be made in the management of the Ann Arbor Organ Co.'s business. This change consists in disposing of their entire retail department in order to devote their entire energies to pushing the manufacture and sale of the Ann Arbor Organ. The retail business of the above firm has been purchased in a new company composed of Mr. Frank Legg, who has been with the Organ Co., for several years, and Mr. Morris Scabelt, son of Moses Scabolt of this city. Mr. Seabolt has been in the music business in Manistee for a umber of years. Both these young be it. men are wideawake and will make the music trade in Ann Arbor hustle. They have rented the elegant new store room at No. 21 E. Washington.st., to which place they will remove August 15. The new company is already planning to let every man, woman and child in Washtenaw county know about their business, and from the plan adopted they are sure to succeed. THE REGIS-That wishes the young men success in their new undertaking and believes they will surely acheive it.

A Cake Wain.

Did you ever see a "Cake Walk?" Doubtless but few of our readers have ever enjoyed such a privilege. The colored people of this and neighboring towns are making elaborate arrangements for the proper celebration of Emancipation Day here on the 31st, and one of the features of this occasion will be an old fashioned Cake Walk at the Armery in the evening. THE REG-ISTER will not make an attempt to give a description of this historic custom among the colored people. If the must go to the Armory on the evening making thorough preparations to preseut the famous 'Walk' in a manner befitting the occasion. It will be well worth seeing.

CLOSING DAY OF THE BAPTIST CONVENTION.

Interesting Reviews of the Foreign Churches and Their Needs-Visiting Ministers Occupy Milwaukee Pulpits-

Milwaukee, Wis., July 21.-The Baptist Young People's Union convention cosed Sunday with two great meetings in the Exposition building. In the morning Baptist clergymen occupied the pulpits of most of the churches of the city, and each one was filled to tendance being so great that an overflow meeting had to be started in the

At the close of the praise service came what is known as the world review of Baptist missions, conducted by Dr. Wilkens, in this review reports were received from the missions in foreign countries either by word of mouth or by letter. The majority of the reports were made by letter. The first came from Italy, a letter from Rev. John H. Egar, missionary at Florence, being read by Rav. John H. Ladd of Bristol, Conn. It gave deplorable picture of the condition in that country, which the letter said was borne down by the deadening and corrupting influences of priestcraft, which made it one of the hardest, as it was one of the newest mission fields. The first Baptist had appeared in Norway in 1859, and now there were 2,300 Baptists in that country. Rev. Frank Peterson, of Minneapolis, spoke for the Swedes and gave a history of the movement in that country from its first inception up to the present. In Sweden. he said, there were now 555 Baptist churches, and the students from the university at Stockholm had gone into many foreign countries as Baptist missionaries. In the United States there are 261 Swedish Baptist churches. At the conclusion of Mr. Peterson's remarks the Swedish choir rose in their ized by congress in 1792, and its coinseats and sang a song in their native age was begun in 1796. language. After isfteen years of mission work there were sixteen Baptist churches and 1,000 converts. Short letters were read from Japan and Paris. When they were finished Dr. Wilkens called for "America," the Americans singing the words familiar to them, while those from Canada and the provinces sungy God Save

The last address was from the Germans, Rev. J. C. Grimmel of Clyceland, Ohio, was the speaker and made one of the most interesting talks of afternoon. Why on earth didn't my friends come back and give me a chance to go and hunt up my-property if it were possi ble? I wonder how I should go about a bicycle trip with the Atlantic ocean between ms and my bicycle. My usually calm and majestic countenance showed signs of anxiety, I fear. The fact is. I was about as near flying all to pieces as a hen with her brood of ducklings paddling about on the mill pond. As I stood there a homely old mule came pulling a heavy truck upon the pier, insulted by the policeman, and beaten by the driver. I too was about to join in the maledictions being heaped upon him, just as they always are when one of his kind makes his appearance. when I suddenly caught sight of a bicycle in the wagon, and the bicycle name-plate read "Cleveland." Halle tujah! It was mine. Instantly that scrawney, knock-kneed old beast. seemed handsomer to me than any horse I had ever seen. Glorious old mule! Long may he continue to delight the eye of the expectant traveller. And as I poundered over this occurrence, I thought how often good deeds, and helpful ones, will make the uglies features look fair and beautiful. Soon my friends came back and we

went aboard. At 12 o'clock the gang plank was pulled in, and the Furnessia began backing out of the dock. Just as she got well started, a pretty young tady came rushing upon the pier, probably feeling a good deal worse even than I had a few minutes before 'Surely they will wait for her," 1 hought. I would have done so any time. But they didn't and we all felt sorry for her. Our boat backed slowly out three or four hundred feet and we had almost forgotten the unfortunate livorce. It looked and between them according to which like a dog chasing a railroad train and l wondered what it would do with us if it caught us. But all at once I spied a the wife and 4 year old boy. When pink jacket in the wheel house of that tug, and then realized that it takes more than a British Steamship Co., to get the better of a Yankee girl. The little boat came alongside and in a moment more, amid the cheers of the passengers, that American girl came clambering up over the sides of our ship. Just then the stars and stripes were run up to the mast head, and after more cheers for our flag and our girl, we looked about us, some to see what sort of a home we were to have for the next ten days (for the Furnessia is a slow boat) and others to get a last glimpse of New York. We went down the river, past pier after pier, past the Statute of Liberty, and were soon on the At'antic itself. Ahert of us was he big Canard steamer "Campania," According to rail- but she rapidly went ahead and in an our or so was lost to sight.

While land was fading out of sight the French ship, La Bretague. and later the Umbria. Then we had lunch and by night we felt that our voyage had really commenced and wondered if we should have cam weather tomorrow. A few already looked as if the; would say:

Backward, turn backward, O time in thy Set me on land again, just for tonight"

However, most of us felt pretty good, and clear up to to-day the Furnessia has had a most smooth ocean to plow failed to come true. We have since day appeared.

For several days out there was great desire to reach the banks of Newfoundland as the comparatively shallow waters which extend for many score miles from the shores of that island are called. Here the American fishermen co ne in their little schooners, and stay on the sea and fish all summer, salting and packing their catch on board their boats. We were in hopes we might see some of these crafts, but were disappointed. This business of fishing as the Gloucester fishermen are obliged to carry it on, is perhaps the most dangerous occupation ordinarily engaged in by men. I once read an article in the Century, in which the author stated that in one town near Gloucester there was only one man who could be called old. All the others of anywhere near his age had met their death upon the sea. The Banks is a particularly stormy part of the ocean, also one of the most liable to fog. Besides all this the tracks of all the trans-Atlantic lines cross the Banks and more than one stout fisherman has gone to his death, without the passengers on the steamer which struck his frail sebooner knowing that anything had happened. One of the most impressive pictures I ever saw was that of a little sailing vessel broken squarely in two, while dimly outlined and rapidly vanishing in the darkness and fog, could be seen the stern of the great black hull which had struck the little boat. I could imagine a shout or two, a few splashes,

perhaps a boat lowered from the big ship, and all was over. Such a thing frequently happens.

flush-tanks, unless the supply is metered. They had fifteen in use; but after the first two months they discontinued the use of them and none have been used since. They do not furnish water to any department without being paid for it. Mr. Talbott thought it right not to

Still sewers need flushing for sanitary reasons. Though desirable, it was, perhaps, not necessary to connect flushtanks with the sewers, and these should be regularly flushed once in two days ir twice a week, it being much better o furnish the same amount of water in me flushing than to distribute it over two or three. The flush can operate without a waste of water. He had measured them and tested them, and though there is no danger either of their leaking through the fixture, if a proper fixture is chosen, or operating more than the number of times set for he thought it wrong in practice to furnish free water for the purpose any more than for the fire hydrants. The proper remedy is a meter, and, if the construction is wrong, it will be looked after. If it is flushing too frequently, that will be remedied. The tests he referred to lasted at intervals for over two years and a half; and the flush tank had not operated in seventy hours, without any perceptible leak. Mr. Maury did not think flush-tanks could be made wateright, or that they came under the conditions of the ordinary, practicle work. A gentleman from St. Louis, one or the most prominent engineers there, told the speaker that six years ago in West Moreland place, which is a fashionable juarter of St. Louis, the real estate wners had put in six automatic flushtanks of the then most approved patern, such as are now in use in Peoria. He had made an examination of these the other day. Three of the tanks had been disconnected, because they were utterly unserviceable, two of the remainder were not fiushing, although water was running rapidly into them. The other was flushing, how many times he did not measure, as ne devoted a good deal of time to the two tanks that were not flushing seeing the water rising in them, and did not have time to wait to see how long the one that was flushing took. He said the whole thing evidenced to his mind the inefficiency of flush-tanks, and their unreliabity as a means of flushing

Mr. Pitt has to supply free water to the lush tanks in Tuscola, Fla., where the sewers have a fall of 1 foot in 1,000. As the statement had been made that it is not necessary to clean the sewers, he have. At Tuscala they take a hose from he water company an four different streams, and sometimes use 100,000 gallons of water to bring out one gallon of sewage. Such sewers certainly cannot be kept clean without flushing and flush-tanks.

Mr. Tucker said in Memphis the flush. tanks are not on the main line, but on the lateral, which run; a distance of some 400 or 500 feet. At the end of the line they put a tank. It might be on that line of sewers there would not be more than a half dozen water consumthrough. One of my companions in- ers and a great many sewer connecquestion as to which was the greatest attraction, the World's Fair or Buffalo a storm tomorrow, since he had seen a flush-tank at the end of the line, but 'ringbone on the sun, but his prophecy not necessary to flush twenty times a

Mr. Ward said that about two months of Protection by developing her own from city to city through the country, industries, and is making wonderful but there is the most convincing eviappointed to go around with him to examine the flush-tanks to see what they were doing. Of the 75, 72 were found, and, the weather being bad, the other three were not discovered. Thirty-one were dry and had no water in them for months, while 41 were running fast, some consuming 240,000 gallons of water in twenty-four hours. No one eyer com plained of that,

Healthy, happy children make better men and women of us all. A man is hardly himself until

of us all. A man is hardly himself until he has the development that responsibility brings. After the child comes, the father and mother both plan and promise what shall be done with it. A little care and a little planning before birth is often more important than anything that can be done after.

On the mother's health and strength depend the life and the future of the children. A weak and sickly woman cannot bear strong and healthy children will cure almost any disorder of the feminine organism. Dr. Pierce's Favorite Prescription has been tested in thirty years of practice. It is healing, soothing, strengthening. It is perfectly natural in its operation and effect, By its use, thousands of weak women have been made strong and healthy—have been made the mothers of strong and healthy children. GROWTH OF BRITISH MALAYSIA. It Has Been Little Less Than Wonderful.

Among the "unconsidered trifles" which go to make up the vast total of our empire there are few of which Englishmen have more reason to be proud than the states that border on the Straits of Malacca, says the Saturday Review. The colony known as the straits settlement consists of two small islands-Singapore and Penang-and three bits of territory on the mainland, the whole covering some 1,500 square miles, with a population of about 600,-000, comprising almost every nationality in Asia. Singapore itself-selected by Sir Stamford Raffles in 1819 as an emporium for the trade of Malaysiapromptly justified the wisdom of its founder; as a naval and coaling station it has been growing in importance ever since the Suez canal changed the course of eastern trade, but it as the capital of a considerable dependency. that it is likely to figure more attractively, perhaps, in public estimation. For there is behind these so-called settlements a hinterland of great and increasing value. Twenty years ago this territory was ruled by Malay chiefs who seem to have been incarnations of despotism and rapacity. The thousands of Chinese who were engaged in tin mining there were subject to little control but that of their own headsmen and indulged in faction fights nearly as bloody as any engagement in the late Chino-Japanese war. Piracy was of daily occurrence. The people "occupied land, but did not own it; they worked by command and without payment; they were liable to be deprived of anything that was worth taking, or to be taxed to meet the necessities of their ruler or local chieftain; their wives and daughters were liable to be requisitioned by members of the ruling class," and to fall subsequently into the condition of slaves. The murder of a raiyat was a matter of easy settlement, if it caused any inquiry at all, and a Chinaman met in a lonely path might be stabbed for the sake of a few dollars, with the certainty that no question would be asked.

Also 3 \$60 The Malays laughed, we are told, at the idea of British soldiers making way through their pathless forests, but they were undeceived. The country was not only penetrated but occupied by British troops for months and that feeling of respect established which is an essential element in dealing with orientals. That was in 1876. Thas been held that consumption is hereditary, and the fact that one person of a family had diell with consumption was considered a sure sign that others of that family could not escape it. This is partly true, and partly untrue, A man with weak ungs is likely to transmit that weakness to is children. But there is no reason in the

his children. But there is no reason in the world why the weakness should be allowed to develop. There is no reason why the lungs should remain weak. Weak lungs predispose a child to consumption. They provide a place for germs to settle. That is all that is necessary. Once let the germs of disease gain a foot-hold, and they increase with a deadly rapidity. Pretty soon the blood is full of them, and so loses its healthfulness and its strength-giving qualities. If the weakness is in some other organ, the disease will show itself in that organ. The germs will get into the blood, just the same, and the body will begin to lose strength. We speak particularly of consumption because it is most common—because it causes more than one-sixth of all deaths in the world.

If there is a weak and crumbly spot in the foundation of a house, the owner clears out the decaying material, supplants it with new, strong stuff. That's all there is to do. That's all that's necessary.

That is exactly the thing to do with the lungs. Keep them full of rich, red, wholesome blood, and the weakness will disappear. Decaying tissues will be thrown off, and new material will be added until the lungs are well and perfectly strong again. This is the thing that Dr. Pierce's Golden is children. But there is no reason in the orld why the weakness should be allowed

and new material will be added until the lungs are well and perfectly strong again. This is the thing that Dr. Pierce's Golden Medical Discovery does. This is what makes it cure 98 per cent. of all cases of consumption where it is taken according to directions. It searches out disease germs wherever they may be in the body. It exterminates them completely and forces them out of the system. It supplies the blood with rich, life-giving properties. Judge Lane, of Adrian, handed down nis opinion in the proceedings institu-ted by Henry C. Smith against the L. S. & M. S. Railroad Co., asking for a mandamus to compel the company to issue to himself and wife the 1,000-mile tickets provided for in act 90 of 1893. The court orders the issuing of a mandamus, the effect of the decision being to hold the Lake Shore subject to the general railroad law of the state. The case will be appealed and will ultimately find its way to the supreme court of the United States.

The judge declined to pass upon the constitutionality of the act, holding it is not the province of circuit courts to handle questions so grave. He intimates, however, that were he to do so, he would be of the opinion that the act was void.

The recall of Abdullah Pacha to Constantinople is received here favorably as a sign of peace. The conduct of the Cretan deputies, in their refusal to debate further until they have received replies to the demands they formulated, is approved here.

JAMESON'S TRIAL CONTINUED.

Leading Members of the British Bar Make Arguments.

London, July 20.—The first trial at bar since the famous Tichborne claimant case was begun this morning when Dr. Jameson, Maj. Sir John Willough by, Col. R. Gray, Col. H. F. White, Maj. R. White and Henry F. Coventry were arraigned before Lord Chief Justice Russell, Baron Pollock and Mr. Justin Hawkins. The charge agains the defendants is violation of the neutrality laws by invading the territory of the South African republic. Sir Edward Clarke, for the defendants, made a motion to quash the indictment on the ground that it was indefinite in its allegations and that it had not been proved that the foreign-enlistment act had been proclaimed where the offense alleged had taken place. Sir Richard Webster, Q. C., the attorney-general, replied on behalf of the government. When the attorney-general had closed his argument the court adjourned until to-morrow.

Among all old world apes the teeth are the chief weapons for defense against natural foes and for combats for mates or tribal supremacy. The canines are in most cases enormously developed, insomuch that ill-informed naturalists have suggested that a near primates and the carnivora. As a mater of fact these formidable teeth have nothing to do with alimentation but are purely weapons of war as are the bayonet and the Maxim gun. In practically every emergency demanding unusual energy, obstinacy and courage they come into play. In every conflict with the world, the flesh and the devil-as such things are understood in | pithecoid society-the temporal and masseter muscles are the chief arbiters of war. To become a great and powerful anthropoid it is absolutely and brutally necessary to have a large and strong jaw to give firm attachment to the teeth and good leverage to the muscles. That for an immense epoch our pre-human ancestors achieved success in life in like manner is as tian Endeavor, which is the first one in clear as the print of "Maga" to those who have learned to read nature's handwriting. Since those days of true Arcadian simplicity our life has become bewilderingly complex and our methods for settling social difficulties have changed generally for the better. But here, as in so many other instances, the habits of a past age have left an idelible impress on the nervous system.-Blackwood's Magazine.

Two Old Centlemen Got Together and

Swap Stories. "Oh, yes, I played in those days. Baseball was baseball then," and the old gentleman sighed over what he regarded as the decadence of the great national game, says the Detroit Free Press, "Now they get nine men together and make a machine of them. The whole thing is nothing more nor

less than an animated mechanism. Then we had a live ball and I used to swing a hickory bat pretty nearly as long as a rake handle. You can imagine what came off when I made a hit. The crowd would hear something like the shriek of a shell and then the umpire would toss out a new ball while I chased two or three runs in ahead of me, Now, just to illustrate," and the retired veteran of the diamond began making a diagram while his hearers grouped about him. "Here's where we played at New Castle, Pa., with the old Neshannocks. Charley Bennett was catching. Here runs the Ohio river, way up in the rear of the grounds, which lay open to the high bluff which marks the bank. Now, Bennett was doing some mighty batting and a fellow from a college nine was giving him a tight race. Each one of them rolled a ball over the bluff and I began to fear for my laurels. But the third time up I saw one coming that just suited. I settled well on my feet, concentrated all my strength for one supreme effort, swung old hickory, and when the ball quit going it struck water half way across the river. Why, they stopped the game to try and take measurements, while professional managers were offering me all kinds of money. I was the hero of the hour, the king of batters, thehello, there, Judkin; delighted to see you. It's more than twenty years-

"Yes, the last time we met was at the

game you just described." The old gentleman turned a little white about the mouth but rallied with infinite generalship. "Yes, of course, you were there, and it was a day of miracles, for you went down to the river and caught a ten-pound bass that was served that night at the hotel."

temptation with the beautiful lie all power in the state. framed for him?

Judkin flushed and inflated with pride. The two jolly rogues went out together. Before the evening was over that ball had been knocked nearly a quarter of a mile into the country beyond the river and that bas was fifteen pounds strong.

ENGLISH TAXES.

The Paer Man Is Hemmed in on All Sides. There are inhabited-house duties, in-

come tax, land tax, probate tax, legacy

tax, succession duty, birth and death certificates, marriage licenses, licenses for certain businesses and duties on certain manufactures, says Chambers' Journal. Locomotion is taxed-carriages, cabs and omnibuses all requiring licenses-and even the trains pay a railway duty on first and second-class passengers. In the matter of liquids, beer and spirits incur both duties and licenses; wine, tea and coffee pay a customs duty, and for water there is the rate. Dried fruits are subject to customs dues. Licenses are required for the use of armorial bearings on carriages, plate fewelry and notepaper; for the sale of patent medicines and keep ing male servants-Susan, in her neat cap and apron, however, is duty free, "for which relief, much thanks," as Hamlet says. Dogs, little and big, we all know, are taxed. Tobacco is doubly taxed, there being a manufacturing duty and a retail license. The venders of jewelry containing a certain portion of the precious metals must be armed with a gold or silver plate license. One must not shoot game or sell it without special licenses, and to blaze away at the humble sparrow entails a gun tax. An endeavor to "lighten our darkness" involves the gas rate. Uncle who receives a family plate or jewelry in pledge has to be provided with both pawnbroker's and plate certificates. The clergy are entitled to certain fees for the burial of their parishioners. When the burial is in a cemetery the chaplain attached to it performs the service. After paying his salary, the established ministers collect the balance of the fees for themselves, thus levying a tax on every corpse in their parishes. Thus the poor man is hemmed in on all sides by taxation. Birth, marriage, death, food, habitation-all make separate revenue demands upon

BAPTISTS AT MILWAUKEE HAVE EARLY SERVICES.

All the Day's Sessions, Including the Early Services, Are Well Attended Interesting Proceedings of the Variou Meetings.

Milwaukee, July 18 .- The fact that the sunrise prayer meetings were an old story this morning did not affect the attendance perceptibly, and at 6:30 the four churches were filled. At the First Baptist church Rev. G. W. Partridge of Cincinnati presided, Rev. Benjamin Weod of Boston led the meeting at the Tabernacle Baptist church, and at the South Baptist the leader was Rev. Calvin A. Hare of Indianapolis At the Second Baptist church Rev. A P. Mihm of Wilmington spoke. Then the delegates went home to breakfast

At 9:30 they were enroute again, this time for four churches, in all of which the general topic of the "Young People's Society as a Working Force" was discussed. The morning meeting at Immanuel church was presided over by Rev. R. B. Smith of Parkersburg, and he first paper was read by C. O. Millspaugh on "How We Conduct Our Junior Society."

Large Attendance at State Association

Convention at Niagara Falls. Niagara Falls, N. Y., July 18 .- The interest manifested in the present monetary discussion is probably responsible for the unusually large atpndance at the third annual convention of the State Bankers' Association, which opened this morning at the International Hotel. All the leading banks of the state were represented and there were many visitors from Ohio, Michigan and New Jersey. The convention was called to order by Bradford Rhodes, and after prayer by Rev. A. S. Bacon the annual reports of the officers were presented. At to-morrow's session the convention will take up the question of the prosperity of banks insuring the prosperity of the people and the government.

UNCLE SAM'S MENAGERIE.

How the Government Secured a Lot of

Snakes and Monkeys. From the Buffalo. Express: The sovereign power of the government has won a victory in a legal controversy which is officially labeled the United States vs. seventeen boxes of snakes and twenty-three monkeys." It was a peculiar case, and appears to have been the outcome of the jealousy of a clique of importers of snakes and monkeys in New York toward a rival. The members of the clique made up their minds that they would not tolerate a new dealer, who might become a formidable competitor in the market. When they were called on as experts to fix valuations they named their estimates so high that the consignee of the snakes and monkeys could not afford to pay the duty assessed. Government officials did not know how to take care of the goods. Snakes should have a bath every day, and these did not get the proper treatment. The monkeys, too, were not well cared for. The result is that about all the reptiles are now dead, and the decision of the court is that the government need not make good the large loss of the consignee. This may be good law, but wherein the justice of it consists it is impossible to see.

Involved in Obscurity.

The pratice of the wife assuming the husband's name at marriage, according to Dr. Brewer, originated from a Roman custom and became the common custom after the Roman occupation. Thus, Julia and Octavia, married to Pompey and Cicero, were called by tho Romans Julia of Pompey and Octavia of Cicero, and in later times married women in most European countries signed their names in the same man-ner, but omitted the "of." Against this view it may be mentioned that during the sixteenth and even at the beginning of the seventeenth century the usage seems doubtful, since we find that Catharine Parr so signed herself after she had been twice married, and we always hear of Lady Jane Grey (not Dudley), Arabella Stuart (not mour), etc. Some persons think that the custom originated from the scriptural teaching that husband and wife are one. This was the rule so far back as Braeton (died 1268), and it was decided in the case of Bon vs. Smith, in the reign of Elizabeth, that a woman by marriage loses her former name and legally receives that of her husband. Altogether, the custom is involved in much obscurity.-Philadelphia Ledger.

Good Coffee, It is asserted by men of high profes-sional standing that when the system needs a stimulant, nothing equals a cup of good coffee. It is also affirmed by eminent physicians that Ayer's Sarsaparilla braces up the system, quickens flagging energies, increases the appe-tite, promotes digestion, and for all the purposes of a blood purifier is the most reliable, the most powerful, as well as the cheapest medicine ever devised.

Silver Sentiment in Michigan. Detroit, Mich., July 20.-From reports thus far received throughout Michigan it seems that many farmers have become convinced that free silver is the one thing needful for their happiness. A mass meeting was held in Scotts, Cheboygan county, Thursday night, and a big majority of the voters, democrats and republicans, pronounced in favor of the democratic ticket. At Flushing 75 per cent of the farmers are said to be avowed and enthusiastic freesilver men, and in Tuscola county, heretofore strongly republican, every one is surprised at the growth of the free-silver sentiment. The feeling is even making inroads on the republican side of the house, and in many of the counties the opinion is expressed that Pingree, a free-silver republican, is the only one who can save the state for the dominant party. Information from he upper peninsula seems to show that he miners and laboring classes are in second with the farmers of the lower

Great Oaks From Little Acorns Grown Is a line from the trite old verse we used to recite in our school boy days.

It has a forcible application to those small ailments which we are apt to disregard until they reach formidable proportions. A fit of indigestion, a "slight" attack of constipation, it is assumed, will soon pass off, but it is very apt to get worse, and in the meantime is neg lected until the ailment becomes chronic and then, if not entirely eradicated, is constant annoyance and menace of worse consequences, for diseases, re-collect, beget one another. THE TRADE REVIEW.

FINANCIAL CONTROVERSY UN-SETTLES BUSINESS.

Merchants and Manufacturers Not Eager to Invest Their Money-Little Trading in the Stock Market-Failures for the

New York, July 20 .- R. G. Dun & Co.'s Weekly Review of Trade says: Disapproval of the action at the Chi-

cago convention would seem to have had some influence in the markets the past week, but a far more important factor has been that the financial future is still uncertain. This acute attack of doubt coming at a time when business is for other reasons seriously depressed, has made the week unusually gloomy in speculative circles.

The wheat market has been remarkably well supported, despite a very favorable government report, and prices are a shade higher than a week ago. Western receipts of wheat have been 3,581,633 bushels, against 1,485,349 for the same week of July last year, and Atlantic exports, flour included, have been 1,485,981 bushels, against only 547,018 for the same week last year. These and other reports do not indicate a small yield.

Cotton has fallen about 1/2 a cent in options and 1/4 cent in spot prices, holders of large quantities in expectation of a cotton famine in July having changed their minds. The closing of about three-quarters of the southern mills and half the northern in producing capacity pending the new crop will help to prevent a disastrous decline in prices of goods, but the yield is likely to be more than 9,000,000 bales. The decrease in consumption here is not as yet effective in helping the prices of cotton goods, which are still selling at about the lowest quotations ever made.

The woolen manufacture is waiting, and as new orders are exceedingly slow the sales of wool at three chief markets were for the week only 2,155,100 pounds. There is no change in prices, and western holders are still asking higher prices than eastern markets can

The output of pig iron from July 1 was 180,532 tons weekly, against 182,-220 June 1, and 17,194 tons a year ago. The decrease since the maximum was reached, Nov. 1, 217,306 tons weekly, has been material, and yet stocks are rapidly accumulating, those held by producers, not including the great steel companies, amounting to 815,822 tons, an increase of 29,929 tons for the month of June, or about 7,000 tons per week, which indicates a consumption of less than 173,000 tons.

The demand for finished products of iron and steel is extremely narrow. But in bars, the combination has found itself unable to maintain prices, and there are renewed reports that the great decrease in sales of nails will force a reduction of price August 1. Bessemer pig has not changed in quo-tation at Pittsburg, although several individual low sales at Indianapolis and Pittsburg are reported. The average of iron and steel prices is the lowest since a year ago.

Failures for the week have been 269 in the United States, against 256 last year, and thirty-five in Canada, against thirty-nine last year.

Is a blood disease and only a blood reme dy can cure it. So many people make the mistake of taking remedies which at best are only tonics and cannot possibly reach their trouble. Mr. Asa Smith, Greencastle, Indiana, says: "For years I have suffered with Sciatic Rheumatism, which the best physicians were unable to relieve. I took many patent medicines but they did not seem to reach my trouble. I gradually grew

worse until I was unable to take my food or handle myself in any way; I was absolutely helpless. Three bottles of S.S.S. relieved me so that I was soon able to move my right arm; before long I could walk

across the room, and when I had finished one dozen bottles was cured completely and am as well as ever. I now weigh 170."

Democratic Campaign Talk.

Washington, July 20 .- Senator Jones of Arkansas, the chairman of the national democratic committee, returned from New York Friday. He says that his eastern visit was a private one and that he did not see either Mr. Hill or Mr. Whitney. Senator Jones expects to issue a call for the meeting in New York at the time the notification committee informs Mr. Bryan of his nomination. It is not probable that the permanent headquarters of the national committee will be selected until that time. The senator prefers either Washington or Chicago for these headquarters. Although the formation of the executive committee is practically in the discretion of the chairman, the prospect is that its personnel will not be finally determined until the meeting of the national committee in New York,

BIG DOG-BIG STORY.

A Charleston Man Vouches for the Truth of This Tale.

"I'll tell you a dog story," said a gentleman to a Charleston News and Courier reporter recently, "that is hard to believe, and yet I give you my word that it is absolutely true. Now, you doubtless remember that on Christmas eve there was considerable noise on the streets, firing of crackers, etc. This was, I noticed, very annoying to my big mastiff, who is kept in a small stable yard on my premises. The dog, however, was, I thought, secure, as it was confined by a high wire netting and fence.

"During the evening I was obliged to go out to summon a physician on account of the illness of my little girl, and after coming back about 11 o'clock sat up in a dressing gown and slippers to wait for the doctor's arrival. Presently there came a long ring at the bell and then another and another. 'That's not the doctor,' said I to myself, and, grumbling at the idea of callers on business at that hour, I went down to the door. Opening it, imagine my surprise at seeing my 100-pound mastiff standing with his feet on the gate-post, ringing the electric bell with his nose. It was evident that he had been reading the papers that the coachmen had left about the stable and, finding himself locked out, said to himself: 'I'll press the button and he'll do the rest.' I of course invited him in and escorted him through the house to his own quarters, where I found he had broken through the wire netting and probably gone out to investigate the Christmas bombardment, but he had forgotten the way back and so called me up."

POLITICAL FORCES LINE UP FOR THE FIGHT.

Republicans Will Begin the Campaign from Chicago Monday-"Sound Money" Their Slogan-Illinois to be the Bata tle Ground-A Hot Fight Promised.

Chicago, July 1 .- The western re publican national headquarters will probably be located at the Auditorium, and Mr. Hanna will marshal his work ing forces and install his chief lieutenants there before returning to the east. The silverite democrats also have practically arranged to establish their

headquarters in Chicago, and the gold democratic national headquarters are located here now; so that the hottest kind of a campaign is looked for in this state during the approaching fall. It will be a campaign of education. Not since the days of Douglas and Lincoln will the issues now before the people be so fully and fiercely debated as in the coming campaign.

Immediately after the national headquarters have been opened by Mr Hanna the country will be flooded with the very best kind of "sound-money" literature. Mark Hanna will start the ball rolling here at once. Within the next three days the work will be begun. The gospel of the gold standard will be preached through the medium of circulars, hand books, pamphlets,

and the public press. The Chicago headquarters, though termed the western headquarters, will have control of the situation throughout the United States, with the exception of the strip of states along the Atlantic seaboard. The entire Mississippi valley falls under its jurisdiction, also Kentucky, Tennessee, Louisiana, all states on the eastern bank of the Mississippi, as well as those on the other shore; and all the great northwestern states and the Pacific coast states come under his control. Hanna will divide his time equally between this city and New York. The following will be the Chicago executive committee: M. A. Hanna, chairman; Charles G. Dawes, Illinois; Henry C. Payne, Wisconsin; William T. Durbin, Indiana; Cyrus Leland, Kansas. These men will work in conjunction; National Committeeman T. N. Jamieson, of Illinois, and A. B. Cummings, national committeeman

from Iowa, The coinage question will not, course, be the only issue that will be pushed to the front, but it will be the paramount issue in the campaign. The discussion of the question of the gold democrats will render valuable assistance, as their campaign will be also one of education and instruction.

Spain in a Conciliatory Mood.

London, July 20 .- A dispatch from Mudrid to the Standard says that relations between Spain and the United States are now on a satisfactory footing. The dispatch adds that no final decision will be taken in the case of the Americans captured on board the filibustering schooner Competitor and on American claims for various indemnities until the session of the cortes closes. It is further reported that the United States will recognize Captain General Weyler's regulations requiring the registration of foreigners before he will allow them the privileges of their foreign citizenshop, only in so far as they do not clash with the Spanish-American treaty of 1877.

Missouri Gold Men to Meet.

St. Louis, Mo., July 20.-Prominent gold-standard democrats of this ctiy have taken the first step toward repudiating the ticket and platform of the Chicago convention. They decided to issue a call for a convention of the gold-standard democracy of Missouri to dtermine whether or not a third ticket shall be put in the field; whether the fight for gold shall extend into the congressional districts, or whether the bolters shall come out openly for McKinley and centralize their efforts on him. Circulars will be sent all over the country to gold-standard leaders, asking them to co-operate or be present at the meeting.

WALL WILL NOT BOLT.

Wisconsin Leader for Bryan and the Democratic Ticket.

Milwaukee, Wis., July 20.-E.C.Wall the Wisconsin member of the democratic national committee, will not bolt. He will support Bryan and Sewall, and will do everything in his power to help them to election. This announcement caused surprise in this state, as it was taken for granted all along that he would follow the leadership of Vilas and Bragg and come out for a gold candidate. His decision to stand by the nomination will do much to weaken their influence and it is doubtful now if they can muster much of a following in their effort to put a gold candidate in the field in this state. Wall was chairman of the state central committee here in the two victorious campaigns which the democrats conducted, and he has a large following. At present he is in poor health, and it is doubtful if he can stand the strain of

taking an active part in the campaign. Senator William F. Vilas at the Milwaukee said he had no statement to make, and it was undecided what would be done in reference to issuing a call for a meeting of gold men. The action of Mr. Wall in announcing that he would stand by the Chicago platform has disarranged the plans to some extent, but the senator said it would have no effect on the course of events.
