ROW OVER S. L. A. TICKETS

STUDENTS LECTURE ASSOCIATION HAS FOUND A BAD LEAK.

Tickets Were Sold and not Accounted For-Somebody Will Probably Go Before the Faculty.

For several years the Students Lecture Association has had trouble and this year seems likely to break all rec-

Mr. Hosner said: "The leak is on the board and amounts to about \$800. The tickets all go into the hands of the vice president, who gave them out to other members of the board to sell. After selling all they could, they would bring back the remaining tickets and followed two other suspects to Jackson, \$2.00 each for those sold. The vice president has several of the board Schumacher, who are now in jail, charged with more tickets than they actually sold; that is, he claims that a man has sold a certain number of tickets and owes a certain amount of money still; while they deny the charge and say they have paid up every cent.

"There are eight persons short in this way and the leak, of course, lies with them or the vice president. I don't know which but there is certainly rascality somewhere and the rascals are sure to be found and turned over to the faculty."

There are two minor features of the trouble that show how the board has done business. President Sadler took fifty tickets to Palmer's Drug store to be sold. Later he called to get the cash and the unsold tickets, but was told that one officer of the association had called and taken the cash and another had gobbled the tickets.

He demanded cash of the one who said: "I left tickets there on sale and that's my cash." The other said: "I left tickets there on sale and those are my tickets." The druggist said he knew nothing of the matter, so the president seems to be out \$100 worth of

All single admission tickets to Nansen's lecture were turned over to the assistant treasurer who left those unsold in the ticket office. About twenty-five disappeared and the president says the assistant treasurer is responsible while the latter denies the state-

TWO DAMAGE SUITS.

Weatherbee and Miller Both Claim Damages.

Edson Weatherbee was injured while crossing the Detroit street bridge in '95. He sued the Michigan Central but Judge Carpenter decided that the city, and not the railroad, is responsible. Acting in accordance with this decision Weatherbee began suit against the city on Monday, for \$5,000.

The decision caused a good deal of hard feeling against the railroad and may lead to the opening of North State

Another suit against the city was begun Monday by Nicholas Miller, whose leg was broken as he claims, by a defective sidewalk. Miller asks \$2,000.

LIKE A FAIRY TALE.

Boy Fell Into a Ditch and Found a Long Lost Watch.

Four years ago Miss Carrie Read, of Pittsfield, lost a watch in Ypsilanti. The watch was valued at \$35 and Miss Read made careful search which resulted in nothing, until one day last week when she heard it had been offered for sale to an Ypsilanti jeweler.

The woman who offered it for sale to the jewelryman said her son fell into a ditch north of the Normal one night and noticing something bright picked up what proved to be the watch. Its crystal was broken but it was otherwise uninjured. How it got into the ditch is a mystery for Miss Reed was not in that part of town when she lost the watch.

Bad Tramps.

Three colored tramps assaulted a brakeman on the Ann Arbor railroad Tuesday. They were arrested and jailed here. They claim to be bad men and one says he has served time for shooting a man. They are from the south.

GREAT AMERICAN DRAMAS.

Joe Jefferson Says We Have Material For Them.

Probably a larger audience than that which gathered Tuesday, to hear the great actor, Joe Jefferson, never filled University Hall. Crowds filled the aisles and other crowds went away.

Mr. Jefferson caused roars of laughter by referring to the professors on the platform as "scenery" and to himself as being "disguised as a gentle-The business of the Association is man." He says the drama must amuse conducted by a board of directors even if not correct in details. THE JOHN SHADFORD CASE Now On Trial for the Second Time

84,500 Claimed. The case of John Shadford, against the street railway, was called in the

circuit court Monday and is exciting a good deal of attention. In 1895, Shadford was employed by the company as lineman. Standing on a high scaffold one day, he seized a

wire above with a vise but the vise gave way and let him fall to the ground, injuring his legs so that both are paralyzed. He brought suit in the circuit court in 1896 and was awarded \$4,500 damages. The case was appealed and a new hearing ordered, the court holding that the company was in no way to blame unless a defect in the vise caused the fall. This, the court claimed had not been proven.

In the suit now on, and an effort is being made to show that the instrument was defective and that it was to blame for the fall and injury. Several expert witnesses swear that this style of vise had been abandoned by all reputable companies before Shadford was injured. Hon. A. J. Sawyer appears for Shadtord, and Mr. Payne, of Detroit, is council for the company.

We could publish a page of what we claim S.S.S. will do, but the people prefer to read of what it has done, and hence we give the testimony of reputable, well-known people in different parts of the country, who gladly tell of how S.S.S. has cured them of blood diseases, after trying other treatment in vain. other treatment in vain.

No wonder S.S.S. has such staunch iends. The experience of those who take it to-day will be the same as of those who twenty years ago found it the only cure. Blood diseases are obstinate, and cannot be cured by one medicine in a dozen which claims to cure them; so when S.S.S. is taken with satisfactory results, after a disappointing experience with other remedies, it is not strange that it has grateful friends by

Wheat Sown Late is in Bad Condition.

The December crop report says: The average condition of wheat in the state is 88 per cent of condition in average years. The figures for the southern counties are 84, central 91, northern 101. From the statements of correspondents in the southern counties it is clear that the fields in that section are unusually spotted, the plant has made small growth and does not cover the ground as in average years. Wheat sowed early on thoroughly cultivated ground is in nearly average condition. But a large percentage of Michigan wheat was sowed late, on ground that it was impossible to properly fit owing to its extremely dry conpermanent, but ten years have elapsed and no sign of the disease has yet apprevailed in the early part of Novemprevailed in the early part of November was exceptionably favorable and of marked benefit, but it was then too late for wheat to make its usual fall blood diseases, which other remedies growth. It was in the case the Grand opera house, convicted in the police court of violating the law by running his theater on Sunday night. The defense contended that as they gave a portion of the receipts to charity, they were exempt from prosecution under the law. After hearing the testimony Judge Grove took the case away from the jury, said that the charity claim was simply a bold attempt to evade the law, and he ordered a verdict of guilty. A notice of appeal was at once given and the case will be carried to the supreme court immediately.

The Tunnel Co. Responsible.

The coroner's inquest on the terrible catastrophe in the St. Clair tunnel at Port Huron, whereby Engineer Courtney, Conductor Dunn and Brakeman Dalton, of a tunnel train crew, lost their lives, and Brakeman Potter and Fireman Duncan sustained shattered minds, the latter's condition being precarious, resulted in a verdict holding the Tunnel Co. responsible for the awful results of the accident and censuring the authorities of the company for the weight of the train, and also for the long delay in rescuing the unfortunates, and recommends that some means should be provided whereby an alarm can be given if anything goes wrong in the tunnel.

THEMS OF NEWS.

IMPORTANT AND INTERESTING MATTERS IN BRIEF.

British Officials Find Much to Worry Them in Their Foreign Affairs-The President's Mother is Dead-Cuba's Prospects are Bright.

British Have Troubles of Their Own. Comment is made in London over the fact that four cabinet meetings were held the past week. With France trying to filch slices of African territory which Great Britain is in the habit of calling her own, and Germany loosening the "cinch" which England has always claimed to have in China, while Great Britain herself is trying to grab a little more country at various other points, and with the preparation of the legislative program, the ministry has no lack of worries. France is deliberately pursuing the task of seizing the upper waters of the Nile above Khartoum, thus cutting the British line of communication between Cape Town and Suez.

All the British forces under Gen. Sir Wm. Lockhart, on the Indian frontier, have been withdrawn to the Bara valley for the winter. Thus the largest and best equipped force ever assembled in India has failed and the whole work will have to be repeated in the spring. About 1,400 officers and men killed or wounded, 35,000,000 of rupees spent in loss and British prestige weakened on the frontier are the debits against which a few mud huts and Sangars blown up and probably several thousand natives killed are the only apparent credits.

Mrs. McKinley Dead.

Mrs. McKinley, mother of the President, died at Canton. She passed away quietly, surrounded by her family.

President McKinley continued his vigil all day and up to the last moment, much as he had the preceding days. He sat almost constantly in the sick room and there secured about all the rest he had. His attention has been almost wholly given to the patient, watching intently for the slightest change. He had the newspapers at his side, and when the mother rested peacefully he glanced over the columns for the news of the day. He and his wife took a few turns on the porch for exercise and a little fresh air, and a little later he and his brother Abner took a walk through the back streets. Aside from this he was scarcely out of

China Yields All Germany Asks.

Dispatches from Shanghai say: It is reported that China is willing to pay an indemnity of 1,000,000 taels, about \$781,250, and to grant all the German demands, including the temporary cessation of Kiao-Chau bay and adjoining territory.

Dr. Steubel, the German consul at Shanghai, has been ordered to Kiao-Chau to establish a regular German administration. Investigation shows that the coal deposits in the province of Shan Tung, which will become available to Germany, with railway and mining concessions are most valu-

Baron von Buelow, the German foreign minister, is showing an iron hand in the management of affairs, and the emperor, it is said, is not informed of any important foreign move until after it has been made, when he officially approves of it instead of directing it as heretofore. It is understood that it was on this condition Baron von Buelow accepted the portfolio of foreign affairs, and his policy seems to please the populace.

Francis Kossuth, leader of the party advocating the cessation of the agreement between Hungary and Austria, and the independence of Hungary, has declared that this party wishes economic separation from Austria as a lever to obtain political independence. a misleading policy, and that these "We want," he said, "a separate army "We want," he said, "a separate army collect cash premiums leading policy and separate finances. The king of holders to believe that it covers every Hungary would be emperor of Austria as a sort of supplementary occupation. to Hungary.' Ex-Senator Dubois, of Idaho, who has just reached home after an extended visit to Japan, China and Hawaii, says the United States will not annex these islands except against the bitter opposition of the natives. He says there are no less than 1,200 male Americans on the island and nearly half of them are opposed to annexa ion, while nearly all the balance of the population are against it. Gov. Pingree has paroled Hiram Wheeler, sent from Charlotte to Jackson in November, 1896, three years for assault with intent to do great bodily harm; also William Bellamy, sent from Grand Rapids to Jackson in June, 1896, two years for larceny.

The U. S. cruiser Yantie, which is to be a training ship for the Michigan Naval reserves at Detroit, has at last arrived at Detroit, after a most eventful voyage from Boston. She was at once put in the Detroit drydock to be placed in proper style.

The big steel steamer City of Bangor, from Duluth to Chicago with wheat, struck a bowlder between the piers of the Canadian canal, at the "Soo," breaking a hole in two compartments of her water bottom. She sank to the bottom just below the canal piers.

John Markle, living 10 miles north of Cass City, discovered his 6-year-old daughter in a nude condition lying in the snow unconscious, her clothing being entirely consumed by fire and the body burned to a crisp. The little one died in a short time in terrible agony. How the child's dress caught to have me give you for Christmas. on fire is a mystery. "All right," was the answer. "Would on fire is a mystery.

Railroad Commissioner Wessellus has sent a letter to A. G. Blair, Canadian minister of railways, suggested the necessity for joint action on the part of Michigan and Canada relative to the establishment of safety devices and police regulations for the St. Clair tunnel at Port Huron, so that the repetition of the recent fatal accident may be avoided.

The Michigan Sugar Co., of Bay City, with a capital stock of \$200,000, has filed artices of incorporation with the secretary of state. Thomas Cranage is president, Hon. S. O. Fisher vice-president, and other prominent capitalists are interested in the enterprise. The company is organized to manufacture beet sugar on which the state now offers a county.

Wm. J. Makeley has been arrested at Mason charged with soliciting insurance for "graveyard" companies, which have no permission to do business in the state. Makeley signed his father's name as president and his own as secretary and it is said they have been doing a land office business. Insurance Commissioner Campbell says more arrests will follow.

Work on Grand river improvement have stopped for the season. The channel thus far has been dredged for a distance of 10 miles, and 14 miles yet remain to work on. The amount expended has been \$19,875, and about \$30,000 still remains to complete the work. When the present appropriation is expended it is proposed to ask for another of \$250,000.

block, Bay City, destroying a large stock of drugs and Christmas goods and damaging the stock above by smoke and water. The loss on the governor of the province of Santiago stock is about \$8,000, and to the block, Harding fell and was hurt about the back while going to the fire.

Attorney-General Maynard, who is assisting in the trial of the case commenced by Pingree to compel the Michigan Central railroad company to sell family 1,000-mile tickets for \$20, required by the law of 1891, believes he will be able to show that the Michigan Central company has forfeited its rights under its special charter by consolidating with other companies.

Adjt.-Gen. Irish says: "The state military board has not permanently sidetracked the new Ionia company as is generally believed. The fact is there was a vacancy in the Second, caused by the mustering out of the old Ionia company, and a majority of the board gave the White Guards of Grand Rapids the first chance. When another vacancy occurs the petition of the present Ionia company will be considered."

N. W. Phillips, of Saginaw, has written to Gov. Pingree, stating that a stringent law is needed if the spread of the black gnat pest among fruit trees is to be restricted. Plum and cherry trees are rapidly being made unproductive. The remedy is to cut out and burn the affected trees. Gov. Pingree has called the attention of the state board of agriculture and Rep. R. D. Graham, of Grand Rapids, who is a prominent horticulturist, to the matter.

Insurance Commissioner Campbell is now after the mutual fire insurance companies organized under Michigan laws. He says that many are issuing possible liability. As a matter of fact such policy holders are liable for an assessment although it is not so stated. Campbell says he shall insist upon a straightforward policy. Liability of nembers must be plainly started.

The Ann Arbor railroad is preparing o run its car ferries across Lake Michigan to Manistique, where a connection will be formed between the east and the Lake Superior country. The Chicago Lumber Co. owns and operates about 30 miles of railroad north to Munising, which is now con-nected with the Northwestern main line and the South Shore road. Thus the Ann Arbor will have an outlet to the west and the whole upper peninsula country north of its present western terminus in Menominee. The boats will run to Manistique the entire

THURSDAY, DECEMBER 16, 1897.

PRESIDENT McKinely's currency proposition, outlined in his message, is simple and yet seems likely to be so effective in breaking the "endless chain" which has so much disturbed the Treasury and the business of the country, that there is good reason to hope that a sufficient number of votes may be found to insure its passage in the Senate, there being little doubt as to its acceptance by the House.

THE Democratic liars continue their denunciations of the Dingley law, based upon absolute falsehoods. A sample of this is found in a recent publication of the New York Journal, which, on the morning following the persentation of President McKinley's message, said that President McKinley "finds the Dingley bill producing smaller revenues and greater deficits than the measure his platform denounced ever did." The absolute falsehood of this statement is shown from the official figures of the Treasury Department, which set forth that the recipts under the Dingley law \$7,000,000 in excess of those of the Wil- the central counties two, per cent lowson law in the first four months of its history, being in the four months in which it has been in operation \$90,000,000 against \$83,038,007 produced by the

IT is proper to remark that those distinguished Democretic editors who showed signs of distress on the morning following the announcement of Secretary Gage's estimate of a deficit of \$21,000 000 in the fiscal year 1897 will probably find that they have had their trouble of any size in the fiscal year of 1899. the War Department to put into its figures for the year the entire amount estimated for by officers in charge of river and harbor works, the result being that the estimates for river and harbor appropriations were over \$60, appropriation will be for more than onefourth of that sum. So that it is probably' indeed almost certain, that the fiscal year 1897 will present a surplus of from \$30,000,000 to \$30,000,000 or prehaps more than that, despite the fact of the law the estimates are so much in excess of what anybody expects the and of the 51 reporting hog cholera, 43 appropriation of that year will be.

The President's Message.

No State document which has emanated from the White House in many years has been received with greater satisfaction and commendation by citizen, irrespective of party, than has the message of President McKinley. Discussing two great questions-the proposed reform of the currency and the Cuban situation, as well as many others of no inconsideraable importance-the utterances of the Pressdent are regarded as unusually important and unusual ly satisfactory. as he was able to select and send to Spain his own representative, he made him the bearer of a calm, dignified discussion of the Cuban situation, in which the Spanish government was given clearly to understand that the United States could not longer look with complaisancy or silence upon the cruelties and injustices practiced in Cuba. The receipt of this information was followed by a complete change in the Spanish policy, which if carried out seems likely to so ameliorate the condition of the Cubans as to bring about at least a large proportion of those opportunites for self-government which they so desire and at least however justify this Government in delaying more extreme action at this time. Whether the autonomy which the Spanish government has offered to Cuba will become an PRESIDENT McKinley's utterances absolute fact and cause a cessation of mended by all classes of citizens and there is no uncertainty in words of the members of all parties. Crop Report Shows Michigan Live Stock Healthy.

The average condition of wheat in the state, Dec. 1, was 88 per cent of condition in average years. The figures for the southern counties are 84, central 91, and northern 101. The average condition in the state is three, in the first four months are more than in the southern counties five, and in er than on December 1, 1897.

These figures represent as accurately as it is possible for figures to represent the judgment of correspondents as to Wilson law in the corresponding period the condition of the growing wheat crop. From the statements of correspondents in the southern counties it is clear that the fields in that section are unusually spotted, the plant has made small growth, and does not cover the ground as in average years. Wheat sowed early on thoroughly well cultivated ground is in nearly full average condition. This is particularly true of level fields, or those moderately so. But a large percentage of Michigan wheat was sowed late on ground that for nothing. FIFTY-FIFTH CONGRESS.

The Senate received 108 new bills in its second day's session. Mr. H. De S. Money, of Mississippi, was introduced and the oath of office was administered to him. A motion to take up the Lodge immigration bill was contested by friends of proposed legislation to confer authority upon the President to act for the protection of the government's interest at the sale of the Kansas Pacific railway and was pending at the close of the session. The House became embroiled in a lively skirmish over the distribution of the various parts of President's message to the committees. The conflict of authority came between the ways and means committee and the banking and currency committee. During the debate Gen. Grosvenor, of Ohio, fired the first gun against the civil service law, and Mr. Johnson, of Indiana, in a ringing warning, declared that if a bill to on the Cuban question are being com- hostility there, is yet unanswered but emasculate the civil service law were passed it would meet the presidential veto. Eventually Mr. Dingley, of the ways and means, in deference to the opposition of the members of the banking and currency committee, agreed to a modification of the order of distribuwith perfect safety, be left in his hands ous peace, just alike to the Cubans and tion so as to send to the ways and means committee all matters relating 'revenues, bonded debt of the country interest so intimately involved in the and the treaties affecting the reve The resolution was then adopted. SENATE. - Third day. - A short ses

sion, chiefly consumed by the members in the presentation of memorials, reso lutions and bills. A resolution pre sented by Mr. Allen, Populist, of No braska, declaring it to be the sense of the Senate that the United States should recognize the political independence of Cuba, was made the subject of some remarks by the Nebraska senator, in course of which he criticised the President for not carrying into effect the pledge of the Republican party made in its last national platform to recognize the independence of of the President and his advisers, who the Cuban republic. Mr. Allen said he would not be content with the recognition of belligerency, but would insist upon the acknowledgment of their political liberty. If necessary, this recognition should be backed by a fleet of American vessels in Cuban waters. A bill was favorably reported by the committee on foreign relations prohibiting pelagic sealing by people of the United States. It is believed that this measure will settle the differences with was introduced in the House also. The only other business of importance before the House was the pension appropriation bill which was reported from committee. The House session lasted but 15 minutes.

SENATE. - Fourth day. - A large amount of minor business occupied the day. Senator Gallinger, chairman of the committee on pensions, called attention to the increasing demand for private pension legislation and requested senators to be careful in the future to see that their bills for private pensions were meritorious before they were introduced. An attempt to se eure an appropriation for the relief of the Klondike miners resulted in a resolution calling on the secretary of war hour was spent on private pension bills and 45 were passed. House-The pension appropriation bill stirred up a debate which promises to be extended to considerable length.

Fifth day .- No session of the Senate. House.-The pension appropriation bill passed without amendment-carrying \$141,263,880. The amendments offered rate to correct alleged ex isting abuses were all ruled out on the point of order that they were new legislation. The debate touched not only the question of our pension policy, but that of civil service reform and the receipts and expenditures of the treasury under the Dingley law. On the latter question Mr. Dingley made an important statement in which he expressed the opinion that the receipts would equal expenditures before the close of the present fiscal year, and predicted a surplus of \$10,000,000 for the following year. The civil service law was savagely attacked by Messrs. Grosvenor and Brown, of Ohio, and Mr. Linney, of North Carolina, and was warmly defended by Mr. Johnson, of Indiana, who won warm applause for the sentiments he expressed.

Secretary of the Treasury Gage in his annual report gives the total receipts of the government from all sources as \$430,387,167 and expenditures \$448,439,622, showing a deficiency of \$18,052,454, as compared with the fiscal year of 1896; the receipts for 1897 increased \$20,911,759, the increase of the expenditures during the same period being \$13,594,713. The present tariff act, the secretary says, has not been in force long enough to determine fully its merits, but it is believed that when in full operation it will afford ample

THE VALUE OF DISCIPLINE

Discussed in Rev. Forrest's Sunday Evening Sermon

"Bearing the yoke in youth" was the subject of Rev. W. M. Forrest's sermon

Sunday night.
"In youth," said he. "men and women should bear the yokes of discipline. These yokes are several in number. First comes the yoke of education, which all should wear in the days of youth. There have been times when measure will settle the differences with many a nation's government would Great Britain and Canada. A like bill have been overthrown had the nation's people been educated; but today we realize that education is the best de-fense of nations, especially to those of Republican form. There was a time when it was thought that an uneduca-ted man could do more and better work than an educated one, but today, the man without an education has not nearly the opportunity of becoming what he ought to be, which is possessed by the one who is educated. The time is not far distant when the working man or woman must have a liberal man or woman must have a liberal course of instruction. Education is a kind of sixth sense. It gives keenness, power and scope to the other senses. A man truly cultured has opeued up before him an ideal world, a world where poverty can not enter. If we refuse to learn—if we spurn this worke we miss the opportunity of head for information on the subject. An yoke, we miss the opportunity of becoming what we ought to be.

Each one should bear the yoke of

labor, having before him a fixed pur-pose, aim or object. Youth is the time to determine what that object shall be. Great men who became immortal made their greatness possible in youth. Alexander, Pitt, Keats, Shelley and Byron, laid the foundation of their fame while young. Men like Seneca, were capable of learning in old age, because in youth they bore the yoke of earnest. persistent toil that made future attainments possible.

all yokes. Religion is the highest and noblest thing in this world. Even in nations that seem to be cursed by their reilgions, their religious system is still the highest thing in the nation. The yoke of religion saves us from shame and degredation and makes our lives beautiful here and far more so beyond. Bear the yoke of discipline in youth; bear the yoke of education and toil and they will bring you peace and joy in the days to come."

YOUNG GIRLS.

Their Conduct and Health Often Mystifies Their Mothers.

Young girls often feel, and consequently act, very strangely.

They shed tears without apparent cause, are restless, nervous, and at times almos

seem self-absorbed, and heedless of things going on around them. Sometimes they complain of pain in lower parts of body, flushes of heat in head, cold feet, etc.

Young girls are not free from incipient womb troubles.

Mothers should see to it that Lydia surgent army, and Col. Bacallao, his E. Pinkham's Vegetable Compound is promptly taken; all druggists have it. WOULD WARN INVESTORS.

Editor Helber Dues Not Believe the Stock in the New Telephone Co. A. Good Investment.-This Is What He Said Last Week About the Business.

Editor Helber says: "Many of our readers have doubtless been approached, as the editor of this paper, to invest in stock of the new telephone company.

As money similarly invested is usually lost, it is advisable for private individuals to look upon all such enterprises with suspicion and distrust and to keep their cash in their pockets.

It's very doubtful if such of our citizers with suspicion and distrust and to keep their cash in their pockets.

zens who have been inveigled into placing money into this enterprise will ever receive back one penny of their investment, to say nothing of a profit. If these so-called bonds were a de-sirable and profitable investment there would be plenty of large capitalists ready and eager to take them.

The entire affair rests upon 'Specu-lation' of the few so-called 'founders'

who are putting in nothing but shrewdness and wind. These furnish the experience and will draw what is in it while it is extremely doubtful if the resident bond holders will ever re-alize anything on their investment, but Over 60 such enterprises have failed, of late, after only a short period of existance, the stock holders losing their

Y. W. C. A. Entertainment.

At High Shool Hall, Friday evening, December 17, will be given the first entertainment for this year by the Y. W. C. A. The program includes music—a solo by Mrs. Frederic Leland, of Toronto college, and a violin solo by Miss Rose French, whom some of us have heard play delightfully at our rooms. The greater part of the evening will, however, be given to the two elocution classes of the association, under the direction of Miss MacMonagle, who is also engaged in similar work in the Ypsilanti association. One of her pupils from there will take part. giving a pantomime to music. Our Y. W. C. A. class of young ladies have been preparing a drill arranged by Lilly Hoffner Ward, upon the sweet old custom of ringing the Christmas bells. The ten young ladies in their white Greek robes will form a pleasing contrast to the fifteen little girls, who dressed as fairies; will dance around dressed as fairies; will dance around dressed as fairies' will dance around "The Greenwood Tree" in company with Jack Frost and Snowflake, in the little comedietta prepared for Christ-

mastide, by Caroline Evans Huse. Usually we have advertised these entertainments for several weeks, but this is almost the first notice for this one and will be the last in this paper.
"When found, make a note of" and
please don't forget the date. The proceeds of these entertainments have, for the past three years, nearly paid the rent of our parlor and rest room and it is quite necessary that they should do so this year. Knowing, as we do, that the entertainment is well worth the entrance fee, 10 cents, we do not hesitate to further urge the public to support this class in its efforts to port this class in its efforts to aid financially in the work of the association. The elecution class deserves your hearty co-operation in this matter | Corrected Every Thursday Forencon, and we bespeak a full attendance next | Wheat, per bushel \$ 87

GIRLS DANCED ALONE

At the Annual Spread Given to the Freshman Girls.

About four hundred girls attended the "freshman spread" Saturday night. The sophmore girls paid all expenses and the junior and senior girls assisted by bringing freshmen to the spread. The entertainment consisted of dancing and some funny incidents occurred, due mainly to the inability of girls to re-member the partners with whom they

had engaged dances. Aside from the orchestra, no men were present; two or three looked in at the windows, however. The affair is given each year and is designed to give the freshmen girls a chance to meet the women of the upper classes.

CAUSE FOR ALARM.

How baldness begins.

How to prevent it.

Every person, male or female, shrinks from baldness. It adds'to the appearance of age and is a serious discomfort. The cases are rare when the falling out of the hair may not be stopped, and a new and healthy growth of the hair promoted. The hair grows in the scalp like a plant in the soil. If a plant flourishes, it must have constant attention; it must be watered regularly and find its food in the soil where it is rooted. It's so with the hair. Neglect is usually the beginning of baldness. Dandruff is allowed to thicken on the scalp. The hair begins to loosen. The scalp loses its vitality. The hair, insufficiently nourished, begins to fade and to fall. The instant need in such a case is some practical preparation which, supplying the needed nourishment to the scalp, will feed the hair, give it strength, and so produce a strong and healthy growth. All this is done by Dr. Ayer's Hair Vigor, the most practical and valuable preparation for the hair that can be obtained. It tones up the scalp, does away with dandruff, stops the hair from falling, restores the original color to gray or faded

SPLENDID CUBAN VICTORIES

Destroy a Spanish Town-Kill 800 Spanlards-Capture a Scaport.

Reports have been received of th capture of the Spanish stronghold at Guisa, by the Cuban insurgents under Gen. Garcia, and they state that the entire garrison of the town, composed of 800 men, was killed. Only 45 Span ish soldiers survived and they were made prisoners by Gen. Garcia. The Spanish official report describes the terrific effects of the pneumatic dynamite gun used by Gen. Garcia. The insurgents fired 72 dynamite shots on the forts and each shot wrought terrible havoc. Not a house remains in Guisa, all having been blown to pieces. Besides the dynamite gun the insurgents used two field pieces, and completed the destruction of the town in

Caimanera is the port of Guantanamo, and is situated 15 miles from the latter place, on the Bay of Guantanamo. The insurgent force plundered a store and carried off the the sum of \$30,000 which had just arrived from Havana. The insurgents killed the soldiers and the paymaster who were guarding the treasure. Numerous Spanish guerillas, the official announcement concludes, have joined the insurgents.

They had been drinking together, quarreled and went into the street to fight, whereupon Laughlin knecked Dyer down. Dyer's head struck the curb and he died immediately. Laughlin is in jail.

Preventing the Plague, Three Italian physicians, Drs. Lustig, Gaeotti, and Malenchini, have returned from Bombay with a preventive serum for the plague, which they assert is superior for the purpose to Dr. Yersin's. It is not intended to cure, says Scientific American, but to prevent the disease, is more easily prepared than Yersin's, is free from bacteria, dry, and harmless to man and beast. It is introduced by injection in small doses mixed with sterilized water, producing a slight local rash, which disappears in 24 hours. The doctors

CHANGE YOUR SHOES,

Health Demands That You Own More Than One Pair.

A generally delicate feeling prevail. when the subject of feet is broached, as if a conversation based upon in might have in it somewhat of the indelicate; and when discussed at all the style of the shoe and the cost of it are about the only permissible points one may dwell upon, says Harper's Bazar. We must all ruefully admit that the latter is a worthy subject for consideration, but it would be a less depressing one if taken up more thoroughly. Proportionately it is not one of the great extravagances of the wardrobe, but we demand of one pair of shoes at least double the service we ask of a dress, a skirt or other garment. Were we to resolutely supply ourselves in the beginning of each season with an adequate number and variety of shoes the purse as well as the body would ultimately be the gainer. We wear one pair too steadily. We would look upon it as dangerous to our health to wear any other garment a proportionate length of time. From an economical standpoint it is more profitable to keep six or seven pairs of street shoes in wear, using them in regular turn. Notwithstanding the hard, firm, almost impervious character of the finished outside of the leather footwear, it should be remembered that the rough inside is more or less absorbent. The healthy foot should perspire as freely as the rest of the body; and since we cover it with leather instead of the light and easily cleansed fabrics employed for the person generally, we should at least see to it that as many changes are provided for it as for the freer portions of the body.

Were this done the leather would have the same opportunity for purification and drying out by thorough airing as have other garments, the heavy texture of which prevents them from knowing the cleansing medium of soap

EARLY ENGLISHWATCHMAKITG

British Timepleces First Made at the End of the Sixteenth Century. I am enable to trace any reliable evidence of English watches having been made until quite the end of the sixteenth century, although German and French productions were · imported earlier, says Good Words. Derham, in the second edition of his "Artificial Clockmaker," published in 1700 mentions an eight-day watch which he was told belonged to Henry VIII., but the context clearly shows a weighty timepiece is referred to. Among the pos-sessions of Edward VI., as quoted by Wood from a royal household book, is "oone larum or watch of iron, the case being likewise of iron gilt with two plummettees of led." The first words of this description may seem to indicate a watch with a mainspring, but such an assumption is at once dispelled by the "plummettes of led." That Elizabeth owned a large number of watches is certain. In 1571 the Earl of Leicester gave to his royal mistress "one armlet of shakell of golde, all over failely garnished with rubyes and diamonds, having in the closing thereof a clocke," From this it will be seen that the modern custom of wearing the watch in a wristlet is but a revival of sixteenth century fashion. It is said that Mary Queen of Scots had two "death's heads" or skull watches. which she presented, one to each of two favorite maids of honor. Among others which tradition has assigned to the Scottish queen, Octavius Morgan mentioned two which he considered to be of the period claimed for them. One was a ghastly memento Morl watch in a case of crystal formed like a coffin and the other an octagonal watch. The latter, it is asserted, was given by Mary to John Knox, the reformer The possession of many watches is ascribed to James I, but such as he did possess do not appear to have been utilized as timekeepers on every occasion, for in Savile's record of a state journey to Theobald's in 1603, it is stated that the king stopped at the bell at Edmonton, and, wishing to count the number of vehicles passing in a certain time, he called for an houre glass."

HANK'S START IN LIFE.

He won the Girl by Getting Her Dress for Her,

"And now he's one of them there millionaires," mused the grizzly frontiersman whose relatives had induced him to come back for a brief visit in a center of civilization, says the Detroit Free Press. "I see it right here in the paper. He owns railroad stock, minin' stock and lots of other stock. I knowed that there same Henry M. Holdem when he done nothin' but punch stock fur other people out on the plains. He was a genoine cowboy and as fast a feller in a round-up as I ever see." "You must be mistaken, uncle." "Nothin' of the kind. When I talk about people you kin bet I'm allus dead certain of my fac's. We sists Nature, called him Hank them days, and he was jist as handsome a youngster as ever throwed his leg over a saddle. Jist by puttin' things together as they kim out, I l'arned as how he was a college gradyate and was goin' so fast a clip and scatterin 'the old man's money so rapid that they sent him out Gloomy Fore- there fur to git a schoolin' in economy boding of dan- and build up ag'in. He was soon the ger, and the fav'rite on all the ranches 'bout there, that jined ours. Some of the swell people up to Leadtown, twenty miles away, what knowed her people gave a ball fur her. Her and her dad went over in the cool of the forenoon, and after dinner was in a lawyer's office talkin'. It seems Hank got some money frum that same lawyer once a month and was there too. He heerd the ole man laughin' and tellin' how they had kim away frum the range with the wrong valise, leavin' her ball dress ahind, and her a'most crazy about it. Hank never says a word but jumps on his horse, goes that twenty miles as though Injuns was after him, gits the dress, changes critters, makes the same wild run back and throws the girl into a fit of happiness when he delivers the goods on time. A year's courtin' wouldn't have made him so solid. The very next winter they were married. Hank was as steady as a deacon, both ole men boosted him, and now you see where he is."

LONGFELLOW ON EMERSON.

Other Real Estate. Funny Twist Which He Gave to the

Verse of His Friend. In the first number of the Atlantic Monthly, forty years ago, Ralph Waldo Emerson had a poem called "Brahma," which puzzled both critics and common readers, says the Hartford Courant. Some said it was the greatest poem of the century; some said it was nonsense. The first verse ran as follows:

"If the red slayer thinks he slays, Or if the slain think he is slain, They know not well the subtle ways

I keep the passes and turn again. That winter it happened that a relative of the poet Longfellow living in another state bought a sleigh, and in a family letter to the cousins in Cambridge there was a wail lest the January thaw, which had followed the purchase, should keep them from enjoying the gay cutter that season. When the letter was answered, Longfellow contributed this verse, which has, we believe, never been printed:

"To -, on the Purchase of a 'If the red sleigher thinks he sleighs

Or if the sleighin' thinks it is sleigh-They know not well the sutble ways

Of snow, that comes—and goes again." It is delightful to find Longfellow

Lachaume, the Planist, Says It Beats Boston and Is Like Paris.

The Free Press gives the following conversation which occured recently in the Russell House, between Lachaume, the famous pianist, and Jean Gerardy, the equally distinguished cellist.

"You have no real critics at all in this country. Boston has one in Mr. Hill, but New York-bah! There are no critics there. The best thing about you people out west is that you don't pretend to be critics. Out in your uncoast, the people are more natural, more alive to the beautiful in nature an artist warms toward such people and he can think he is being apprecical culture in Boston? Bosh, they don't know anything about music; they think they do. Detroit-I have been here three times-is a good town for a musician to come, for the people are appreciative, it seems to me. But the greatest place in the world for an artist," turning to Gerardy, "is Ann Arbor. You must go there, Gerardy. That audience is so enthusiastic it would inspire anybody. No New York and Boston coldness there. That's somesomething like old Paris, the greatest city in the world."

THE GREAT HUXLEY.

What Huxley, the Great English Scientist, Considered the Best Start in Life.

The great English scientist, Huxley, said the best start in life is a sound stomach. Weak stomachs fail to digest food properly because they lack the proper quantity of digestive acids (lactic and hydrochloric) and peptcgenic products; the most sensible remedy in all cases of indigestion, is to take after each meal one or two of Stuart's Dyspepsia Tablets because they supply in a pleasant, harmless form all the elements that weak stomachs lack.

The regular use of Stuarts Dyspepsia Tablets will cure every form of stomach trouble except cancer of the stomach. They increase flesh, insure pure blood, strong nerves, a bright eye and a clear complexion, because all these result only from wholesome food well digested.

Efficacious Prescription.

A lady who had suffered tortures from a corn upon one of her toes called on a professional chiropodist. He soon relieved her of the hardened little offender, and besides paying him his fee, she thanked him heartily. "Please tell me, doctor," she said, "how I can prevent another one coming in its place." "Well, madam," he replied, after a moment's reflection, "I am a prescription that will always prevent a corn from coming." He tore a leaf out of a note book, wrote a few words upon it, and handed it to her. It read: "Looshoo. Apply once a day." "You can get it at almost any place," he explained. "There is no charge. You are welcome." After inquiring in vain at several drug stores for "looshoo," she showed the prescription to a friend, who studied it a moment, and said: "Why, that is plain enough.

One of the best equipped systems of railway in the United States is the Cineinnati, Hamilton & Dayton road, popularly known as the "C. H. & D." "This line seems to be enjoying the lion's share of Army and Navy travel. They have recently put on a through train between Washington and Chicago, their principal train leaving Washington at 11 45 a. m. and arriving in Chicago the following day at noon. They use the Baltimore & Ohio system from Washington to Cincinnati, where they connect with their own system to own system to Chicago. Some time ago they reduced their time of running trains between Chicago and Cincinnati to eight hours, which is one of the fastest trips made in this country. Their night express between Chicago and Cincinnati is equipped with compartment cars that are models of elegance and beauty. This road caters to Army patronage and always extends every accomodation possible to officers traveling over their line and it is no wonder that they get the service patronage. They offer to their patrons the best line between Washington and Chicago, via Cincinnati, and especially between the cities of Cincinnati and Louisville Sample. and Chicago, Toledo or Detroit. Mr. D.
