Over \$100,000 Expended on the Campus this Summer.

Few people fully realize how much money is expended on the Campus each year in new buildings and in making improvements. The present year is no exception. This summer the amount runs quite a little over one hundred thousand dollars. The amount includes the following items:

Reconstructing Law Building	\$65,000
Addition to Library Building	
Roof and Dome on University Hall	12,000
Work on Chemical Laboratory	3,000
Addition to Mechanical Laboratory	1,500
Sun Room at Hospital	1,500
Laundry and Sterilizer for Hospital	2,400
Extending Steam Heating Plant	1,500
General Repairs on Campus buildings	4,000

Total.....\$110,900

There are also a large number of other jobs to be done yet this fall. These include new cement walks about the law build. ing, overhauling the steam heating plant at the hospitals, necessitated because of the use of hard water causing the pipes to become clogged with lime, and the grading of the atheletic field. These will materially increase the total expenditure mentioned above.

One can readily see from these items how valuable the University is to this city from the standpoint of large expenditures for permanent improvements alone. These constitute but a small item when compared with the current expenses of the University during the cellege year.

ANNUAL MEETING OF A. B. C. F. M.

Not all the important conventions to be held in Michigan this fall are to be political. On Oct. 4th the annual meeting of The American Board of Commissioners for Foreign Missions will convene at Grand Rapids. This is the oldest Foreign missionary organization in the United States, having been established in 1810, and none has a more worthy record of self-sacrificing service and blessed achievement.

In 1820 the missionaries of the Board first carried to the Hawaiian Islands the Good News of Jesus Christ and the influences of Christain civilization. At that time the population of the islands consisted of a race of naked savages' in the lowest stages of barbarism, sensuality and vice. They were worshippers of idols and practiced human sacrifice. In the Missionary Rooms at Chicago is a cord with which one high-priest had strangled twenty-three human victims. the distinguished Boston lawyer, wrote; "The proportion of the inhabitants who can read and write is greater than in New England. They may be seen going to school and public worship with more regularity than the people at home. In no place in the world that I have visited are the rules that control vice and regulate amusement so strict, yet so reasonable, and so fairly Mrs. Battin came here last June and enforced. In the interior it is well unarmed." These "Jewels of the

Closed His Pores and Killed Him.

A great pageant was arranged in one of the old countries and on one of the floats a beautiful little boy, every por-tion of whose naked boly had been cov-ered with gold leaf, was seated upon a golden globe. His name was G iovanni. It was a day long to be remembered in the city. Thousands of magnificent the city. Thousands of magnificent floats took part in the parade but the one on which Giovanni, in his golden shin, perched high above the multitude was the most costly and beautiful of all. The boy was the golden Prince and his name was on every one's tongue. That night he was very sick, the next day he died. Every pore in his body had been closed by the golden sheen and he had practically been smothered to death.

definitely announces that the emperor of China has resigned his power to the empress (dowager empress), who has ordered the ministers to deliver to her An Incorrigible Convict Murderously Atin future their official reports.

It is said the recent reformatory edicts of the emperor probably caused the change. While the emperor was subservient and a mere figurehead, the dowager empress permitted him to remain in peace, but as soon as he attempted to act on his own initiative his practical deposition followed. The effect of the change will be great. Li Hung Chang will be reinstated in power and Russian influence will increase. The new order of things will undoubtedly prejudice British interests throughout China and will prevent the proposed alliance between China and Japan.

Wei-Hai-Wei: The British battleship Centurion, flagship of Vice-Admiral Sir Edward H. Seymour, the commander of the British fleet in Chinese waters, sailed suddenly under sealed orders, accompanied, from Che Foo, by the battleship Victorious, the cruisers Narcissus and Hermione, the torpedo destroyers Fame and Hart, and the dispatch boat Alacrity. It is supposed that the desination is Ta-Ku, at the entrance of the river leading to Tien-Tsin, the port of Pekin, for the purpose of making a naval demonstration there.

Yellow Mill Pond Tragedy Clearing Up. The police of Bridgeport, Conn., announce the complete unraveling of the Yellow mill pond murder mystery. They claim that Dr. Nancy Guilford caused the death of Emma Gill by a criminal operation; that the body was dismembered in the Guilford house; name Harry Oxley as an accomplice to the extent of being responsible for the condition of the girl and consenting to a criminal operation, and also implicate Dr. Guilford's son and daughter as accomplices in helping to dispose of the body.

Attempt to Murder Prison Guards. As the Marquette state prison guards were watching the prisoners at breakfast, Convict Dick Huntley arose from his seat, ran the length of the hall and lunged at Guard E. D. Mosher with a knife. Mosher clinched with Huntley, but the latter succeeded in stabbing the deputy in the abdomen, back and arm. The alarm was immediately sounded, and the entire prison force was soon in the mess room. The warden gave a command to the prisoners to march to their cell corridors. They obeyed sullenly, and when the order was given to get inside the cells, six or eight refused to move. Warden Freeman ordered the nearest guard to shoot. Huntley jumped for his cell door, but the bullet took off his thumb. The rest were cowed.

Huntley is incorrigible and was transferred from Jackson prison. He is serving 30 years, 10 of which is for the attempted murder of Deputy Northrop, of Jackson prison. Mosher, who was then guard at Jackson, shot him. It is believed this latest outbreak was part of a plot which included the murder of Warden Freeman.

Detroit Soldier Boys Welcomed Home A right royal welcome did Detroit give soldiers of the first battalion of the 32d Michigan Volunteer infantry, who returned to their home after five months in the service of their country. If the soldiers boys had any idea that, while they were encamped in the fever holes of the south, their friends had forgotten them, that idea must have been dispelled, for the streets were filled with cheering thousands. After a parade through the principal streets a formal welcome was given in the auditorium where Brig.-Gen. Henry M. Duffield, who commanded the 33d and 34th Michigan regiments at Santiago, and Mayor Maybury made rousing addresses. The various companies then marched to their own armories where their relatives and friends had tables loaded with good things waiting for them.

Young Banker Fatally Shot by Burglars. Samuel Rothfuss, aged 18, clerk in the Blissfield State bank, was shot down in the street in front of the postoffice at Blissfield by one of a gang, of six engaged in an attempt to crack the postoffice safe, and his condition is critical. Rothfuss was returning home from a call on his best girl when he caught the burglars at their work. Although Rothfuss was armed, one of the fellows, who appeared to be on guard, shot him in the abdomen before he could defend himself. The robber fired three shots and Rothfuss fired two, but without effect. The fusilade aroused the neighborhood, but the villains escaped with a horse and surrey stolen from the barn of Gus Barnholtz The report of Hon. Chas, Barnes, west of town. Rothfuss will probably

Women tell Mrs. Pinkham the whole truth about themselves and that is the reason she is able to help them.

> Nearly every woman suffers or has suffered from some trouble of the delicate organism that makes her a woman. The gratitude of those who

have been relieved of backache, racking pains or serious displacement, is boundless.

From grateful women everywhere come to Mrs. Pinkham most earnest words of thankfulness for vanished pain and restored health.

Many women have wasted years in almost constant agony, spent money freely in treatment and travel, and finally learning of Mrs. Pinkham's great knowledge, have written to her and secured without cost advice that helped them back to health.

In this way there is formed a bond of sympathy with an ever-widening circle.

Wherever women meet, they talk about the great virtue of Lydia E. Pinkham's Vegetable Compound.

Mrs. WEEDEN Says, "Mrs. Pinkham Saved My Life."

THE election of Frank E. Jones as prosecuting attorney would place that office in the hands of a fearless, inde pendent and able lawyer, one who is not controlled by some other official. This cannot be said of the administration of that office during the past two years.

A VOTE for Kingsley for sheriff will be a vote for one of the most able, cleanest cut and honest men who has ever been a candicate for that office in this county. Don't forget to vote for Kingsley, yourself, and in the meantime ask your friends and neighbors to do the same.

KINGSLEY and Gillen came out pretty nearly even so far as majorities in their respective county conventions were concerned. Kingsley received 127 out of 225 while Gillen had 130 out of 232. Kingsley had 98 against him on the fianl ballot while Gillen had 102 who did not vote for him.

ONE might think, from the efforts of The Times and other Democratic sheets that there was nothing left of THE REGISTER or its supporters,-that there is but little left but Judson. Well, well, that is news, If such rot is the only amunition the Democrats can use in the present campaign, they might better yield at once. Shots fired with such powder would not pierce a piece of tissue paper.

THE REGISTER last week incidentally and without the slightest reflection whatever, referrel to the occupation of one of the Democratic candidates for office. The statement, however, aroused a certain street loafer into a perfect fury and he proceeded to write a dczen line squib in which he called the editor of THE REGISTER every vile name he could think of, and Ward allowed the fling to go in his paper as editorial matter! THE CASE REVERSED.

The Ford Estate Wins in the Supreme Court.

Tuesday the Supreme Court reversed the decision of the lower court in the case of Walker, administrator in the Ford estate. This practically invalidates the sewer assessment in that district and will involve any number of perplexing complications.' Besides the Walker case there were nearly a dozen others who paid the sewer tax under protest. It is possible if the assessment

in that district is illegal it may be illegal in all the other districts in the city. This would make confusion doubly confused.

By studying beautiful literature we come to see how the choice of the words we use makes our speech pleasant or harsh. By studying about the things of which we read we learn much, and in telling this to each other we gain the habit of ready and interesting conversation. These are some of the things which we aim to do in our Y. W. C. A. class. This winter we shall take up some of Longfellow's shorter poems and one of Whittier's, almost as beautiful as Evangeline. DISEASE OF "HOOKS."

One of the Symptoms of Ophthalmia Possessed by Horses,

H. S. wants to know if opthalmia and hooks in horses' eyes are the same. He has been told that his fiveyear-old mare has hooks in her eyes, and a man who claims to be a horse doctor, wants to cut them out. This man has never had any college advantages, but reads good books, he claims, and says he has performed the operation successfully.

Ophthalmia is an inflammation of the eyes, while the so-called "hooks" are simply one of the symptoms of the disease. The alleged "hooks" of the eyes is the protrusion of the haw or membrane nictitans from the inner angle of the eye partially over the eyeball. It is a condition that accompanies inflammation of the eyes. It is, also, a characteristic symptom of tetanus. "Hooks" belong to the same category as "rollow horn" 'and "wolfin-the-tail" in cattle, or "black teeth' in pigs, and like them, is a relic of the age of ignorant empirics. You will do well not to allow a man to treat your stock in any way, who boasts of removing the "hooks" from the eyes. That is sufficient to brand him as an ignorant quack of the worst kind. If, as he says, he "reads good books," he evidently does not profit by his readings, because he can find no reputable work on the horse or on veterinary science that advises any such treatment. To remove the haw in such cases, is an unjustifiable cruelty to the horse, and instead of relieving the inflammation will increase it.

Diseases of the eye can rarely be satisfactorily treated by correspondence. If it is possible for you to do so, I would advise taking the horse to a qualified veterinarian for a personal examination and treatment. If unable to do so, try bathing the eyes several times daily, or preferably cover the eyes with a sponge or cloth kept wet with a solution of one dram sulphate of zinc in each two quarts of soft water. The following powders may also be given to advantage: Sulphate of soda, one pound; nitrate of potash, four ounces; mix and make into twelve powders. Give a powder in the feed wine daily

Superiority of Dorset Sheep.

J. E. Wing tells the Breeders' Gazette that he first bought Dorset sheep because they were "dog-proof." Ex-perience with them, however, has developed superior qualities, until to-day he considers Dorsets first-class in every way. They are hardy, vigorous and quick-growing, bringing healthy and fine lambs, even under ordinary treatment.

Yes, so it is, but the tronble is you have misunderstood the adage. It means if you stuff a cold you will have a fever as a result and then you will be obliged to starve. More colds result from over-eating than from any other cause. You don't believe that. Well, I will undertake to prove it to you, some other time. Meanwhile, just notice how many colds follow the big dinners of Thanksgiving, and Christmas.

Dr. Harlandson recommends as the afest and surest cure for sour stomach (acid dyspepsia) an excellent preparation sold by druggists under the name of Stuart's Dyspepsia Tablets. These tablets are large 20 grain lozenges, very pleasant to taste and contain the natural acids, peptones and digestive elements essential to good digestion, and when taken alter meals they digest the food perfectly and promptly before it has time to ferment, sour and poison the blood and nervous system.

Dr. Wuerth states that he invariably uses Stuart's Dispepsia Tablets in all cases of stomach derangements and ands them a certain cure not only for sour stomach, but by promptly digest-ing the food they create a healthy ap-petite, increase flesh and strengthen the action of the heart and They are not a cathartic, but intended

To Muster Out 50,000 More Volunteers. Another reduction of the volunteer army is under consideration and it is believed that by Oct. 15 about 50,000 Miss Tucker, who has had recurring attacks of appendicitis for some time, believed that by Oct. 15 about 50,000 mustered out. The army now consists of about 150,000 men, including regulars and volunteers, and after the armies of occupation leave for Cuba, Porto Rico and the Philippines 65,000 will be left to garrison the forts of the United States. This is far in excess of the number required.

Rheumatism.

Those who have Rheumatism find themselves growing steadily worse all the while. One reason of this is that the remedies prescribed by the doctors contain mercury and potash, which ul-timately intensify the disease by causing the joints to swell and stiffen, producing a severe aching of the bones. S. S. S. has been curing Rheumatism for twenty years-even the worst cases which seemed almost incurable.

Capt. O. E. Hughes, the popular railroad conductor, of Columbia, S. C., had an experi-ence with Rheumatism which convinced him that there is only one curefor that painful dis-case. He says: "I was a great sufferer from mus-cular Rheumatism for two years. I could get no permanent relief from any medicine pre-scribed by my physician. I took about a dozen bot-les of your S. S. Are the Opinions of Ann Arbor Citizens Eight Men Hilled, Eight Fatally Buretd Not More Reliable than those of Utter Strangars.

The above is a vital question. It is Fraught with interest to Ann Arbor. It permits of only one answer. It Can't be evaded or ignored. An Ann Arbor citizen speaks here. Garcia Visits Santiago.

One of the most important events at Santiago since the surrender of the city was the first visit of Gen. Calixto Garcia since he left there in a bad temper on July 17. The insurgent leader was accompanied by his staff and 200 Cuban cavalrymen, besides a number of Cuban officers. They were met just outside the city by Gen. Wood and other American officers. At the plaza Gen. Lawton, American military commander at Santiago, greeted Gen. Garcia, whose entrance to the city had been through streets thronged with cheering thousands. The Americans tendered Gen. Garcia a reception at the palace.

Gape-Worms and Work.

It is urged that it is useless to try remedies for gape-worms when they can be so easily removed by the tip of a feather being inserted in the windpipe. The claim is true; but if one had six hundred chicks, all gaping at the same time, in brooders, and one chick a minute is relieved, it would take ten hours to finish the work, and some of the chicks would be dead before relieved. The best and easiest remedy is to mix one teaspoonful of spirits of turpentine with every quart of cornmeal necessary, moisten it, feed it to the chicks, and scatter air-slaked lime freely in the runs. The turpentine is inhaled, and as the least quantity of vapor reaches the windpipe it destroys the embryo gape-worms.

Clean Yards.

Every time the yard is spaded, the filth will be turned under, and this is a necessity with small yards. The amount of manure that accumulates on the surface of the yard, not only from droppings, but also from the waste food is quite large, and the crops grown thereon will be large, as the richer the ground the thicker the seeds may be sown. The land will also be self-manured, as the hens will evenly scatter the droppings themselves, no hauling or handling of the manure being necesminers returned to town, having es- sary; but if no use can be found for the droppings that are collected from derground passages. All were badly under the roosts they can also be burned. Nineteen miners are still un- spread over the ground and then be atilized for producing green food.

Low Prices for Cattle.

At the recent sale of cattle at the Mountainside Farm, Mahwah, N. J., the Jerseys sold mostly at low prices, considerably below their real value. The Simmenthals averaged, all told, \$206 each, and the Normandys, \$102. The cross-bred calves sold all the way from \$10 to \$60. Those who attended the sale were able to secure bargains.

It Is Just as Important.

epidemic of which disease is reported in New Jersey.

An outbreak of cowpox is not likely to prove dangerous, or to spread to any extent, if the movement of infected stock be restricted, and attendants who care for the diseased cattle be not allowed to come in contact with healthy cattle. Cowpox is not readily carried on the air, as is the case with smallpox, but usually requires the actual contact of the infected animal or its products with the healthy animal, or is transmitted by inoculation. The hand of the milker is one of the most frequent means of inoculation, the virus being carried from the diseased to the healthy in milking. Even the milker himself is liable to become inoculated

and has not been previously vaccinat-ed. While some is a presting contast. While cowpox is a specific, contagious disease, it is not a dangerous disease, and with a little care and attention, rarely, if ever, proves fatal. The allied disease of the horse, the horse pox, is, also, a mild disease; but the sheeppox, like smallpox in man, is a dangerous disease which often terminates fatally. Cowpox is recognized by heat and tenderness of the udder and teats, followed in one or two days by the eruption of little, pale-red nodules the size of small peas, which continued to increase in size until the eighth to the tenth day, when a blister is formed having a breadth of three-fourths to one inch. The blister, or pock, as it is called, usually has a depressed center with a raised margin, and contains several distinct cavitles or sacs which are filled with a clear, straw-colored liquid. After a day or two, this clear liquid changes to a yellowish, thicker liquid from the formation of pus, and then soon dries into a brownish yellow crust, which is gradually detached and shed about the twentleth day, leaving one or more characteristic pits in the

quired for cowpox. Good nursing, with a light laxative diet, is all that is necessary. The cows should be milked as sores on the teats. Milking tubes can be used to advantage. If sores do form, apply any bland ointment, as benzoated oxide of zige of stment, or a mixture of equal parts of spermaceti and almond oil. The milk should not be used from infected cows_
