The University—President Angell.
The vexed question is at last settled. A President of the University has been elected, and has accepted the position. JAMES A. ANGELL, M. A., LL. D., now President of the University of Vermont, is the "coming man." He was elected at a full session of the Board of Regents held on Tuesday evening, receiving a unanimous vote. The report of the committee recommending the election of Mr. ANGELL was very complimentary to the administration of Acting President FRIZZELL, and intimated that that gentleman had been offered the position of President but declined to accept it permanently, and urged that Mr. ANGELL should be elected whenever he could be obtained. The salary of the new President is fixed at \$4,000 a year and his house, and he is to enter upon duty on the first of August next.
President ANGELL was born in Rhode Island, January 7th, 1829, and is therefore 42 years old. He graduated at Brown University in 1850, at the head of his class; taught for two years; went to Europe in 1850 to pursue his studies further; came back in 1853 and accepted the chair of modern languages and literature in his alma mater, holding the same acceptably until 1860; from 1860 for several years he was the popular editor of the Providence Journal; and in 1868 accepted the Presidency of Vermont University, which position he will resign to come here. His selection is favorably received, and we look forward to a successful administration.
We do not understand that any chair or professorship was assigned to President ANGELL, but we believe that History is his forte, and that he gives instruction in that department where he now is.
The salary may seem too great an advance on that paid in former years, but Mr. ANGELL would accept nothing less, and desirable men were scarce and found to command their own prices. Besides, he is in the prime of life, without accumulated wealth, with a family to support, and wants to get his support from the University, so that he may give his full time to the University, and not piece out a living as a traveling lecturer. Again, as President of the University, he must keep open doors, and that costs money.
As President HAYES found to his sorrow when his outgoes were compared with his income. These facts should be considered by legislators and others who may think the salary large.
J. V. JOHNSON, publisher of the late Charlotte Argus, has brought out a new paper, the Democratic Leader. Success to it politically and financially.
Bro. SANFORD of this Muskegon Enterprise has ventured on a daily edition. The first number is a neat looking sheet, and promises brightness and vigor. "Nothing ventured nothing gained," and may the Daily Enterprise win.
Another communication from Saline on that "big sell" is necessarily crowded out; and, besides, nothing is to be made by Saline, Ypsanti, or any other man by keeping up the contest.

Saturday evening last, the M. E. Church was filled with an audience of our lecture going people, to listen to LILLIAN S. EDGARTON, in opposition to "Woman's Rights," as expounded by DICKINSON, STANTON, HOWE & Co. Although one might question the propriety of a lady in the lecture field allowing her photograph—to be placed in every store and shop window, yet we suppose it is necessary "to draw," and can almost overlook the offense after listening to her lecture, believing that if any were attracted to the place by her picture, and were attentive to what she had to say, they must have received a grain or two of common sense.
"Woman is Coming," was her subject, but not in the political arena. She thought that woman, as a class, was hardly prepared for the ballot; that she needed a vast amount of education; that we had ignorant voters enough without including the ignorant portion of her sex; but it did not follow that they should be classed with idiots and negroes because deprived of the elective franchise. If woman wished place and power let her prove herself capable of receiving it, and man would be the last one to stand in her way. Let all trades and professions, which physical and mental ability would allow her to enter, be thrown open to her choosing, so that when obliged to support herself she could do so, but let her stand alone on the machinations and trickery of politics; that was not her place; it would elevate neither sex, but tend to de grade both. The "bearded monster" had governed the world for the past six thousand years, and he was certainly capable of doing so a few years longer. Woman did not wish to crowd man off the stage of action, nor usurp his power; they were created to travel through life together; man to provide for the home, and woman to make home happy. The lecturer evidently believed with LONGFELLOW when he wrote:
"As unto the bow the cord is,
So unto the man is woman,
Though she bends him, she obeys him,
Useless each without the other."
Woman had a sphere in which to work, and the ballot was not the panacea of all her ills. Intemperance was the worst enemy of the home, consequently of woman, and here was a field in which she could work, and work effectively. Let her ambition and energies be arrayed in combat with this monster evil, and her talents fitted to devising means to drive this curse, which was the cause of more heartaches and pains than any other sin, from the land. She could at least try, and if met by failure, would have the satisfaction of working in a good cause, and one that would elevate the entire human family. In speaking of the fallen sisters, Miss EDGARTON said that woman was her own worst enemy. If a woman is betrayed and falls, women are the last ones to take her by the hand and lead her back into society and the paths of virtue, while her betrayer is not only received back, but often—it seems—made more of than before. She had seen women gather up their skirts and walk in holy horror by a fallen one, lest the touch of her garments should prove polluting; and thus thousands of young girls, shut out from the better life and influences, were driven to greater shame and deeper degradation every year, by the action of woman, and she was led to exclaim:
"Woman is Coming," for a place in the hearts and homes of man, to be a co-laborer, and to help moralize the world by endeavoring to exterminate existing evils.
We can not give as long a review of the lecture as we should like, but suffice it to say, it was delivered in a very admirable and pleasing manner, and there was nothing in it impracticable, improbable or impossible. If all the female lecturers would take Miss E.'s view of this question, there would be greater applause from the men's side of the house, and they would suitably exclaim: Let her come!
A few "Old Settlers" of Coldwater recently went on a sleigh ride to "Deacon COOLEY'S" near Union City—the "Deacon" used to live at Coldwater, and are reported as having had a good time. After the supper, as a correspondent of the Sentinel states, remarks were made by various persons and many interesting reminiscences related. Mr. J. C. LEONARD, of Union City, is reported as saying, among other things: "One year, on the 4th of July, the Sabbath Schools held a celebration, coming from Coldwater to Union City, 700 persons had dinner. It was a very pleasant occasion." If our memory does not serve us a shabby trick, our "big boys" counted in that "700." The dinner was served on the banks of the beautiful St. Joseph, under the bluff just below the village—then not a railroad town, but with aspirations to be at the head of steamboat navigation. A steamer had just been built to test the raging waters of the St. Joe, and was then "tied up" below the bridge, the wonderment of the uninitiated among that "700." We believe she was run down to Three Rivers or Constantine, where her engine was put in; that on her first trip down the river her engine exploded, killing her proprietor; and that thus ended Union City's hopes of being at the head of navigation. Are we right, Bro. LEONARD? But about that Sabbath School excursion. We were fortunate enough to get a poor seat for the homeward ride, the hinder end of a lumber wagon, struck for a better conveyance after getting over to BARNHART'S Mills, and by a short cut and "foot and walker's line" made the remaining nine or ten miles as good time as the "wagon train," but considerably demoralized by the "day's doings." It was our last Sunday School excursion.
We invite attention to that "Railroad Report" which wasn't furnished us last week. Its suggestions should be acted upon promptly. To fall now would disgrace our city, and make its very name a by-word and laughing stock in every enterprising town in the State. The road can be built if our people will it, and will lay aside all petty jealousies and work together.
A committee of the Board went to Toledo on Wednesday on important business, the particulars of which we are not yet advised of.
—Since the above was in type we learn from Dr. DOUGLASS that a contract has been closed for grading, bridging, and tying a road from Mansfield and Tiffin through Toledo to the State line. It is also understood and agreed that no contract shall be made with any eastern road or roads, or their representatives, to iron, equip, and run this Ohio road that does not also make equal provision for the line between the State line and Ann Arbor.
We understand that a meeting of our citizens will be called for to-morrow evening, when the Directors will make a fuller statement of the condition of things, and present the several propositions received for ironing and running the road.
Let every citizen turn out.
The Rev. I. F. WALKER, of Lansing, will deliver a discourse to young men in the Episcopal Church, on next Sunday evening.

With the new year the Company extends its protection to its new patrons by issuing a more liberal policy than heretofore, containing fewer restrictions on occupation, residence and travel, which is designed to meet the demands of the times—Americans being proverbially a traveling people. The insured are by its policies permitted to travel or reside in any part of the world within the Temperate Zones, without the troublesome necessity of procuring a permit, or the imposition of an extra charge.—No restrictions are imposed upon occupations, except upon the few which are recognized as specially hazardous.
The new Special Non-Forfeiting features just adopted will still more increase the well known popularity of the NATIONAL. It is a modification of the Massachusetts Law, but shorn of its disadvantages. A few examples will show the difference between the Massachusetts non-forfeiture law and the Plan adopted by this Company.
By the Massachusetts Law a policy, issued at age 45, premiums for life, after 5 annual payments, will remain in force 4 years and 306 days after the payments cease; but the unpaid premiums with interest at 6 per cent. are permitted to be deducted from the policy if it becomes a claim before the expiration of the Term Insurance.
By the Special non-forfeiting plan of the NATIONAL, the same kind of policy at same age, after 5 annual payments, would be exchanged for a paid up Term Policy extending 4 years and 73 days; and should the insured die before the expiration of that time, the full amount of the policy would be paid.
In the case of a ten annual payment Ordinary Life policy, issued at age 40, after 5 annual payments the Massachusetts Law gives Term Insurance for nearly 144 years—subject to deductions of unpaid premiums as before stated.
Suppose the insured dies just before the Term Insurance expires, his premiums, \$61.68 (on \$1,000) at 6 per cent. int. for 5 years (to the end of the ten years) and interest continued till the fourteen years expire, will amount to \$560.40, which, deducted from the amount of the policy, will leave \$439.60 actual insurance.
The same kind of policy, in the NATIONAL, at the same age, and costing only \$46.45 per \$1000 for the ten years, after 5 annual payments, would be exchanged for a paid up Term Policy, for the full amount of the original policy, extending nearly 12 years.
The same Special non-forfeiting features applied to Endowment insurance, results still more in favor of the policies issued by the NATIONAL. (See examples of the workings of this plan as applied to Endowments in the Company's Rate Circular.)
The foregoing illustrations are based upon cash premiums—the premiums in the NATIONAL are always cash; most of the Massachusetts Companies allow a choice of all cash or part note or loan. Had the illustrations been calculated upon the loan plan (varying from 30 per cent. to 50 per cent. note) the result would have still further favored the all-cash, non-participating rates of the Stock Plan of insurance as practiced by the NATIONAL; the outstanding notes, with interest, in addition to the unpaid premiums being deducted from the amount of the policy.
In addition to this Special non-forfeiting plan, the NATIONAL still retains its former plan of non-forfeiture of giving paid-up policies for proportionate amounts of the original policies. The insurer must elect at the time of making his application, upon which plan of non-forfeiture he will have his policy written. The choice cannot be made at the time of surrender or change.
