

THE NEWS CONDENSED.

THE EAST.
PROBATION. The boy murderer of Boston, has written the story of his life, in which he re-creates all his former confessions. He claims to have been framed by the police into making a confession of being guilty of the crime for which he was first arrested, and that he was entirely innocent.

THE GREAT THIRTEEN-MILE SWIMMING MATCH BETWEEN H. JOHNSON OF ENGLAND AND THOMAS COYLE OF CHESTER, PA., for the championship of the world, came off in the Delaware river, at Philadelphia, and was won by the Englishman. Coyle became exhausted and gave up on the tenth mile. The entire distance swam by Johnson was 13 1/2 miles, and the time three hours and ten minutes. After being taken from the water by a launch, he was carried to a hospital and began dancing a jig. High Donahue of Springfield, Mass., has just accomplished the unparalleled feat of walking 1,100 miles in 1,100 consecutive hours. During the last few days of his weary tramp he was very nervous, and almost prostrated by loss of sleep, and fire-arms had to be discharged to wake him for his hourly toil.

At Philadelphia, on Monday, a fool named Conroy playfully pointed a gun at his young wife and killed her. He thought the gun was empty, but it was not. Conroy is now a widower. A decomposing body exploded the other day at Port Jervis, N. Y., with frightful effect. Three men were killed outright—the body of one of them, the engineer, being blown a distance of over a thousand feet, where it lodged in a tree. A large amount of money has been expended in the investigation, and it is believed that a Brooklyn gang of counterfeiters.

THE WEST.
A DEBARKER FROM BEAVER, Utah, states that the substance of John D. Lee's confession is that thirty Mormons, with the assistance of a large number of Indians, decoyed the emigrants from their intrenchments by a flag of truce; that all were murdered except seventeen children; that the deed was done under the orders of the leaders of the Mormon church; that he took the news of the massacre to Brigham Young, who deplored the transaction, and said it would bring disaster on the Mormon people. The statement of Lee, so far as known, only confirms the previous reports in regard to the massacre. During the progress of a fire at Cincinnati, a few days ago, the Chief Engineer of the Fire Department, Joseph G. Mergue, and six firemen were hurled beneath the ruins of a falling building. Fortunately only one of them, Richard Holcomb, was killed, though nearly all were badly injured. Chief Mergue's injuries were the most serious, but hopes are entertained of his recovery. A Laporte (Ind.) clairvoyant claims that Donalson and Grimes, the two conspirators who recently ascended from Chicago, are not yet in the air ship came down on the east side of Lake Michigan, at some point where two lakes are connected by a stream, or some sort of an island, in the midst of sand hills and pine trees. Thirteen coming down one of the men was cut under the eye and on one arm, the other being unharmed. It is reported they are alive and will shortly be heard from.

The Chicago Journal thinks there is a chance that the lost balloon is still drifting about in the high upper atmosphere, its passengers lifeless, and the vessel at the mercy of the currents. If so, it will, of course, ultimately descend to the earth and be heard from. The report of the Department of Agriculture is that the average crop in 1892 is about 8 per cent greater than last year. New England has raised her average about 11 1/2 per cent, and the Pacific States about 1 per cent. All the great crop-growing regions have increased their average, the Middle States 2 per cent, the South Atlantic States 3, the Gulf States 10, and the West 12. The average of the Ohio 7, States west of the Mississippi 4. The condition of the crop is below the average in the New England, Middle and South Atlantic States, the minimum condition, 82, being in Rhode Island, Florida and Alabama are also below the average, but the other Gulf States and the Southern States are above the maximum, 112, being in Missouri. All other States, except Missouri, 108, are below the average, minimum condition, 82, being in Wisconsin.

CRISIS OF "THE WOOD" will take comfort in the announcement by the Department of Agriculture that the tobacco crop promises a heavy yield. A cable telegram announces the landing on the English coast, of the steamer Abolition, of the American line, Philadelphia. All the passengers and a portion of the cargo were saved. It is now highly probable that a stop will be put to the cattle-stealing operations of Mexican bandits. The United States government has purchased a steamer, the Platteau, which draws only four feet of water, and is armed and manned for service on the Rio Grande. Other steamers of a similar character will be purchased and fitted out for the same purpose.

FOUR millions of silver, it is stated by the Western Union telegraph, will be coined at the new mint to be opened at the close of the Treasury Department promises that bank money shall shortly take the place of bank notes and greenbacks. A London telegram announces the death, at the age of 64 years, of Isaac M. Singer, the inventor of the sewing machine. The Postmaster-General has decided to put on a red mail train between Chicago and New York. It is intended to make the run between the two cities in twenty-four hours, a gain of twelve hours over the present time.

POLITICAL.
A CALL has been issued in Indiana for a convention to meet at Richmond, on August 12, to form a new party sympathizing with the principles of the Cleveland National Convention. The Connecticut House of Representatives has indignantly repudiated, by a vote of 102 to 50, the resolution to give the right to vote in Presidential elections. The Democratic State Convention of Maryland, in session at Baltimore last week, nominated John L. Carroll for Governor and Levin Woodford for Comptroller of the Treasury. Hon. S. C. Linn has been nominated for Congress in Mississippi.

FOREIGN.
A LONDON firm that recently failed for several millions has got into trouble. Its members have been arrested and sent to Newgate for their part in the charge of obtaining a million by the false pretenses. English courts do not appear to treat big thieves with as much consideration as do American jurists. Reports of the floods in England represent the damage done as immense. In many sections not only the growing crops, but those crops already harvested have been destroyed. The returns of the agriculturists there will be exceedingly small. English courts do not appear to treat big thieves with as much consideration as do American jurists. Reports of the floods in England represent the damage done as immense. In many sections not only the growing crops, but those crops already harvested have been destroyed. The returns of the agriculturists there will be exceedingly small. English courts do not appear to treat big thieves with as much consideration as do American jurists.

WASHINGTON.
THE POSTMASTER-GENERAL is in earnest in his proceedings against the contractors who fail in their obligations. Suits have been commenced against the bondsmen of over forty contractors who failed to comply with the terms of their contracts. PRESIDENT GRANT paid a flying visit to the Capital on Wednesday, held a three hours' cabinet meeting, at which all the ministers except Bellamy were present, and returned to Long Branch the same afternoon. At a recent meeting of the Cabinet the Cuban question was discussed, and it was authoritatively announced that the United States will no longer maintain a strict neutrality, but will actively help the rights to the struggling patriots.

There has been a small steel in the Treasury Department—only a thousand dollars—but it occurred among the girls who are engaged in counting the packages sent for redemption by the banks, and the agitator in denouncing the government. Aro now comes news of the failure of the bank in many districts of Portugal, caused by drought. The cattle are dying of hunger, and a famine is threatened. The reported plot to assassinate the Crown Prince of Germany was aro now comes news of the failure of the bank in many districts of Portugal, caused by drought. THE MOUNTAIN MEADOW MASSACRE TRIAL IS FAIRLY UNDER WAY AT BEAVER, UTAH. Several eye-witnesses of that cruel slaughter have given their testimony. The evidence against the crime concludes with the testimony of the leaders, and now, disapproved by an overwhelming array of rebutting evidence, forever rest at rest the story that the luckless emigrants perished at the hands of Indians. The story these witnesses tell agrees in the main, and surprises in minutest any of the horrible details which have been given by the newspapers. Although eighteen years have passed since the massacre occurred, the recital of its awful particulars strikes with fresh force, and with the feeling of sick horror which comes over the reader there is mingled the righteous passion of vengeance, and a wish that the fate of the slaughterers and their children might be visited upon such of our Mormon friends as are still on the latter side of hell.

SECRETARY FISH has received information that an association of counterfeiters, with their headquarters at Barcelona, Spain, are preparing to issue in this city \$12,000,000 in counterfeit notes on the Bank of England and Bank of France. Secretary Fish has directed the United States Marshal at New York, to send a party of men to the latter side of hell.

COMMISSIONER WATTS, of the Agricultural Department, in an interview with a correspondent the other day, stated that the late reports concerning the harvest of fall wheat justified him in saying that "about 75 per cent of a full crop would be realized, when 65 per cent has already been anticipated. He thinks the spring crop will prove a full one. He is not confident about a full market making low prices. He says that he has often seen the contrary, where wheat would advance very readily upon a flush market. He says the wheat harvests in France, Germany, and Italy, have been very good. He says that a good price for our home wheat, at a good year has been made up among the old accounts in the War Department, showing how a clerical error had a tragic result. An officer during the war was wrongfully charged with a defalcation amounting to \$1,000, and, being unable to readily demonstrate his innocence, he committed suicide.

GENERAL.
DEPARTURES received from all parts of the country, East, West, North and South, report an unusually abundant harvest in corn, oats, barley, oats and potatoes, with a fair yield of wheat, while the yield of the grasses is said to be enormous. The failures noted are in comparatively few and limited localities. A large proportion of the crop is already harvested. The July reports to the Department of Agriculture show that the average in corn is about 8 per cent greater than last year. New England has raised her average about 11 1/2 per cent, and the Pacific States about 1 per cent. All the great crop-growing regions have increased their average, the Middle States 2 per cent, the South Atlantic States 3, the Gulf States 10, and the West 12. NEBRASKA.
Emigration—Village and Health—Schools and Churches—The Pioneer.
COLUMBUS, Neb., July 2, 1875.
EMIGRATION TO NEBRASKA is increasing rapidly. The trains bring out great numbers daily, and the prairie schooners are on the roads. I don't wonder at it; for certainly Nebraska offers wonderful inducements to the emigrant. It is the most pleasant and equable climate of any of the Western States, and its soil cannot be excelled. Then its position is very favorable. It is midway between the Atlantic and the Pacific, and the great thoroughfare from East to West passes over it. Its farmers find a profitable market west of them among the miners of the Territories, and as good a market east as any of the States have. It is a fertile soil, and a profitable market east, west and north, with very short haul to his consumer. The distance between the producer and consumer does not run to the grain.

There is no better soil in the United States than Nebraska, nor one more easily worked. The land drains itself. The whole State is a system of valleys and uplands, with beautiful streams running through the valleys. The soil is rich, and the uplands are from five to twenty feet deep, without stones or stumps. The prairie may be broken up in the spring and a crop produced in the fall, enough to pay for the land and seed, and the surplus has been done in thousands of instances.

There is no healthier country in the world. The whole State is drained perfectly—indeed there is not a marsh or bog in Nebraska. The air is pure and bracing, and the water excellent. All the conditions of health and long life exist in Nebraska.

There is no country on this continent so good a variety of crops profitably produced. The western part of the State is a magnificent grazing country, while the eastern and central are adapted to wheat, corn, and other crops. The soil is rich, and the water excellent. All the conditions of health and long life exist in Nebraska.

ROULETTE CENTENNIAL.
The Lebanon (Pa.) News says: On the top of South Mountain, in Lancaster county, lives an old man by the name of Frederick Moyer, who is fast approaching his one hundredth year. On Saturday morning he walked all the way from his home to Womelsburg, a distance of over five miles, over rough, rocky, and hilly roads, and attended to financial business, after which he went to the liquor store of Sell & Schouner and purchased a quart of Old Glenlivet whiskey. He is saying that the stuff that kept him so long, and expects, if he can get it, to keep it always in his house. He intends to visit Philadelphia next year and see the Centennial. Mr. Moyer is hale and hearty, and works hard every day out in the fields. He says if he does not take the field it would not go.

A MID-SUMMER IN PARIS advertises that he will teach parrots to talk sensibly, and an effort is to be made to secure his services in some one of the American colleges before commencement day comes around again.

WILSON'S TONIC—UNPAID!—UNPAID!—UNPAID!—This great Chiropractic Tonic cures all ailments without the intervention of doctors and their bills. No consulting visits—no prescriptions to be filled—no large bills, entailing pecuniary embarrassments. It is a friend of the poor man, because it enables him to earn a living, and of the rich, because it prepares him for his wealth. This great tonic to mankind is cheap, safe and prompt. WILSON'S TONIC, CHICAGO, ILL., PROPRIETORS, NEW ORLEANS.

PARASITES AND STOCK RAISERS have frequently told us that they have seen very good results from giving Sherman's Castor Oil to their cattle and sheep, and after they drop their young. The powder put them in good condition, and give them strength to care and provide for the sucklings.

WHAT WE KNOW ABOUT IT.
GLEN FLORA SPRING WATER, at Waukegan, Ill., cures all kidney diseases.

How to get a home. See advertisement.

NEW BOOK—"Gleanings of a Yearly Harvest" by LOUIS LEVY & CO., Chicago.
