It is probable higher prices were paid for wool last week than will be again paid this season. Reports from the East confirm symptoms of a depression arising from large receipts. Those that handled wool last season made money. That stimulated a large number of buyers than usual to enter the market this season, resulting in sharp competition, which of course has favored the producer. Buyers in Manchester were offered to cease purchasing on Saturday. A similar report comes from other markets. Buyers in this city are not so anxious, although they continue purchasing at prices ranging from 30 to 35 cents, the latter figure paid only for extra combing. Messrs. Mack & Schmid purchased up to yesterday 20,000, and Bach & Abel 15,000 lbs.

THE LATEST.

The latest scientific story is told thus: The Saturday Review once declared that the greatest benefactor of the human race would be he who could enable man to drink an unlimited quantity of wine without getting drunk.

Such a man has been found. Dr. Bell invented the telegraph, but his wonders pale before the telegraphist. This is an electric machine by which the palate can be tickled, or pleased, by any flavor, and for any length of time, without any fear of indigestion or indelicacy.

By putting soap or fish or wine into a receptacle connected with a powerful battery, the taste of the drink is broken, the evil effects pass off, and nothing remains but a "delightful exhilaration." The inventor, however, keeps the modus operandi a perfect secret, and wishes to perfect his discovery before he discloses it to the world.

Women Physicians Abroad.

The Journal de Geneve lately announced that among the 261 students in the University of Berne there are twenty women pursuing the regular course for the degree of Doctor of Medicine.

This university has just conferred the degree of Ph. D. upon Mlle. L. H. Heusinger, of Geneva, the daughter of Baden, who passed an exceedingly brilliant examination. Two other ladies, one an American the other an Austrian, took the degree of M. D. at the same time.

But even in places where we least expect it are the women slowly gaining in honor and respect. The University of Helsinki, in Finland, for example, has conferred the degree of M. D. after a very rigid examination, upon Mlle. Heykel. This is the first Finnish woman so honored, and the occasion was duly noted. A grand ovation occurred in the city, and by her fellow students, who at the same time opened a subscription among the people of Helsinki for a fund to establish a scholarship in the university for young Finnish women who desire to study medicine as surgeons.

The "Rosine Heykel Fund," thus far, is a flourishing condition.
