Ald. Hamilton moved that the salary for March for the City Assessor, be paid to the Patrick O'Hearn Estate.

Adopted as follows:

Yeas — Ald. Hamilton, Richards, Koch, Dieterle, Sweet, Vandawarker, Weeks, Coon, Howell, Cady, Stevens, Pres. Luick—12.  
Nays—None.

Ann Arbor, Mich, March 1. 1899.

To Hon. Mayor and Members of the Common Council:

Your Board of Health begs leave to report the health of the city for the month of February.

There have been 18 deaths with the exception of an epedemic of influenza which is not very severe, the health of the city is very good.

There has been 14 inspections made and all such nusiances abated.

The Board have had three regular

meetings at which all members have been present.

Yours respectfully,  
 Eli W. Moore,  
 President.  
 Henry B. Dodsley,  
 Inspector.  
 Ernest A. Clark,  
 Health Officer.

Received and placed on file.

To the Common Council of the City of Ann Arbor:

Gentlemen—An increase in professional duties makes it necessary that I be relieved of the city work. I do not wish to be a candidate for the position of City Physician in May. I take this opportunity to make this public, as a number of the aldermen have the impression that my name will appear. I wish to thank the Council for the interest they have shown and the aid they have given the office during the past two years. Kindly accept this as my resignation.

Very respectfully,  
 D. M. Cowie,  
 City Physician.

Ann Arbor, Mich., April 3, 1899.

Received and placed on file.

### ANNUAL REPORT

OF THE

### BOARD OF PUBLIC WORKS, 1898.

To the Common Council:

The Board of Public Works transmits to your honorable body the detailed report of work done during the year 1898.

Respectfully submitted,  
 Glen V. Mills,

Clerk of the Board of Public Works.

### ANNUAL REPORT OF THE CITY ENGINEER FOR THE YEAR 1898.

To the Board of Public Works:

Gentlemen—I herewith submit my annual report, giving in more or less complete detail the work conducted by the Engineering Department.

#### STREET WORK,

The most important work of the past season was the paving of Main street, from the north line of Catherine street to the south line of William street. The total contract price of this improvement exclusive of the necessary storm sewers in this connection, was \$26,902.40, the specified details of this work have been given with the vari-

ous estimates which have been previously rendered.

In addition to the above work there has been the usual work of making the surveys for the necessary plats, profiles, sketches and estimates for proposed work and for work in progress and completed.

#### SEWER WORK.

The most important sewer work completed during the past season was the construction of a system of storm water sewers in connection with the pavement districts, these sewers extending from Allen's Creek to the east side of Main street on Catherine street, Ann street, Huron street, Washington street, Liberty street, William street, and on Washington street from Main street to the east side of Fifth avenue, the cost of the work being \$5,671.10, it being done by contract.

In addition to the above the city built about 600 feet on Detroit street, about 350 feet on W. Jefferson street, about 200 feet on S. First street, about 250 feet on Second street, and about 200 feet on S. Main street, the cost of this latter work has been given in detail in the report of the Street Commissioner.

A thorough inspection of all the flush-tanks, manholes, etc., of the entire sewer system has recently been completed and everything is now in working order. The inspection showed little that was not in good working condition, the chief element giving trouble is sediment in the supply water pipes in the flush-tanks, this, however, only occurred in four tanks. The inspector has made special note of all the places where any trouble is apt to arise, and more frequent visits to those places will rectify any possible trouble.

#### PLUMBING.

This department has had in charge the inspection of the plumbing done during the past season. The number of inspections made was between 400 and 500, and the number of connections that was made with sanitary sewers was 198, each connection requiring two and sometimes three inspections. The total number of sewer connections in the sanitary lateral sewer system is 2,873, of this number there are 715 that have been made use of so that now 25 per cent. of the sewer connections are in use.

## OFFICE WORK.

This work includes the making of all estimates for proposed and completed work, the making of all sketches, plats and profiles, the recording of all inspections, the classifying and indexing of all dates obtained from time to time.

## INVENTORY.

The following is an addition of the previous data that has been compiled during the past season.

## REMARKS.

It is with pleasure that your attention is called to the efficiency of that portion of the Storm Sewer System which has been built from Allen's Creek to the east side of Main street.

The inlets on the east side of the street have been severely tested and have practically taken care of all the storm water that has come down the cross streets from State street, thereby saving the hill west of Main street from the damage which has usually occurred previous to the construction of these sewers. This should be an excellent argument for the continuance of the construction of these sewers on each of the intersecting streets as far as State street this coming season, also to extend the system on State street as far as N. University avenue, to permanently improve the streets at the northwest corner of the Campus. The condition of the street in front of the School of Music at every shower demands that something permanent should be done to effectually drain the street.

Attention is again called to the wretched condition of the streets on Washtenaw avenue, and S. University avenue, also to the same conditions at

the east end of Monroe street. These mentioned localities are seriously inconvenienced during every rain storm and the damage done to public and private property is increasing with each year that the matter is allowed to remain in an undrained condition. It is next to impossible to maintain good or even passable streets unless the matter of efficient drainage is first provided for.

Respectfully submitted,

Geo. F. Key,

City Engineer.
