Total warrants drawn Nov. 4...\$5,205.78
Grand total for October.....\$7,251.92
Ann Arbor, Nov. 4th, 1912.
To the Honorable Common Council: Gentlemen—Your Finance committee have reviewed the foregoing reports of the City and then only once a day until the

Labor acct. pav. No. 27, fund total

Clerk. Warrants for the salaries were drawn November 1st, 1912. We recommend that same be approved and that warrants be ordered drawn for the foregoing accounts.

George Lutz, Erwin Schmid, Finance Com-

eorge Lutz, Erwin Schmid, Finance Committee.

Ald. Lutz moved adoption of report. Adopted as follows: Yes, Ald. Koernke, Man-Schmid, Hochrein, Ramsay, Linden-Flynn, waring. schmitt, Schr Sherk, Rash, Schultz, Prochnow, President Lutz and Mills, 14. Nays, none.

Special Water Committee

Ald. Lutz presented a report from the Engineer on the test of the wells at the Steere farm which was ordered on file:

City Engineer's Office, Ann Arbor, Mich., Nov. 4th, 1912.

To the Special Water Committee of the Common Council, Alderman Geo. Lutz, Chairman, Ann Arbor, Mich.: Sirs—I submit herewith the following report of the test of the wells at the Steere farm, to date:

On Sept. 19th, 1912, we started building concrete basins, flumes and weirs at each of the five wells. A concrete basin was constructed about each well casing, and emptying into a flume 32 feet long. At the other end of each flume was placed a weir and a gauge for measuring the flow of water in the flume, and from the well. The flumes were calked and with the basins were made as water tight as possible, and everything was arranged to make the measurements accurate and reliable. On Oct. 19th, 1912, p. m., the five wells were opened and allowed to flow until Oct. 26th, p. m., except for about three hours on Oct. 21st, p. m., when they were closed down while we were working in the county ditch. On Oct. 26th, p. m., the four west wells were closed, and the east well (Well No. 1) was allowed to flow alone until Oct. 29th, a. m., except on Oct. 28th, when the well was closed during the night by some unknown person and opened again the next morning at the time of reading the gauge. On Oct. 29th, a. m., the next well west (Well No. 2) was uncapped and the two allowed to flow until Oct. 31st, a. m., when No. 3 was opened. On Nov. 2d, a. m., the fourth well was opened and on Nov. 4th, a. m., the fifth well was opened. This plan was adopted to see what effect one well would have upon the others. It is planned now to let these wells flow free for about thirty days continuously, reading the gauges night and morning for about another week,

thirty days are over. The results to State street road is the township ditch date are as follows:

Insert of facts drawn from table showing flow of wells at Steere Farm.

At the time of opening on Oct. 19th, p. m., the flow of the five wells combined was at the rate of 822,200 gal. per twenty-four hours. This decreased during the first night to 707,600 gals. per day. From then until Oct. 26th, p. m., at the time when four wells were capped, the rate of flow varied between 685,600 and 732,700 gal., the average rate of flow per twenty-four hours varying between 697,800 and 715,650 gal. For the last three days before shutting down the four west wells, the mean rate of daily flow was 715,250 gal., 715,650 gal., and 715,650 gal., respectively, the rate of flow being lower in the morning and higher in the evening.

When wells No. 2, 3, 4 and 5 were closed on Oct. 26th, p. m., the rate of flow of well No. 1 increased from 131,600 gal. to 151,800 gal When well No. 2 was opened the flow of well No. 1 decreased from 154,800 gal. per day to 149,500 gal. per day; and when well No. 3 was opened in addition, the flow of well No. 1 decreased from 149,500 gal. to 140,200 gal. per day. The opening of wells No. 4 and No. 5 did not seem to have marked effect

upon the flow of well No. 1.

The relative strength of flow of the

several wells is as follows:

Well No. 1..130,000 gals. per 24 hours Well No. 2..138,000 gals. per 24 hours Well No. 3..149,000 gals. per 24 hours Well No. 4.. 97,000 gals. per 24 hours Well No. 5..197,000 gals. per 24 hours

The cost of this work, to Oct. 30th, has been \$288.52, distributed as fol-

																					\$ 71.18
																					7.36
																					36.50
																					22.00
no	f		S	u	p	p	1	ie	S												22.46

		 nd	 nd	nd s	 nd su	ad sup	ad supp	ad suppli	ad supplie	ad supplies	ad supplies	ad supplies .	ad supplies	nd supplies ring and labor							

Total \$288.52 This should, perhaps, be reduced a little, for all of the tools used and charged here are in good condition and on hand for what further use the Department may find for them. The flumes were made large enough so that they may be used for the pumping test which you plan for the future.

Ditch gauges were set in both county and township ditches. The ditch running through Mr. Steere's property is a county ditch and the one running from the south along the

to which I refer. Six gauges were set the township ditch, one in the in county ditch, and one in both ditches at the point where the township ditch flows into the county ditch. These gauges show that the five wells flowing raise the water in the county ditch just four inches. On Oct. 21st. 1912, p. m., we cleaned enough cress and weeds out of the county ditch to lower the water level just 2 1-4 inches, making the present raise in the county ditch for which the flow of these wells is responsible just 1 3-4 inches. This is not sufficient to harm anybody.

Very respectfully submitted, MANLY OSGOOD, City Engineer. Officers' Reports.

Street Commissioner's report September received, and ordered printed and filed. Office of Street Commissioner, Ann Arbor.

Mich., Oct. 10, 1912.

Hon. Board of Public Works: Cornwell, Esq., President: Gentlemen-The following is a report of the work done by the Street Department during the month

of September, 1912: Aug. 29-Sept. 11; Sept. 12-Oct. 2—Cleaning Grading, graveling and patching streets,
