turret

viewfinder

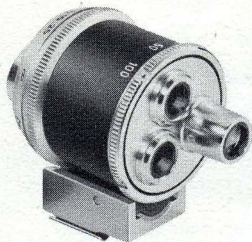

Your Argus Turret Viewfinder features a precision, selective optical system to show *exactly* what you are photographing with the 35mm Wide Angle, 50mm Normal, or 100mm Telephoto Lens. Your view will always be magnified to the full proportions of the viewfinder, *not* reduced in size. An efficient adjustment compensates for parallax—the difference which would otherwise occur between the views covered by the lens and the viewfinder. You see precisely what the lens sees—at all distances.

The Argus Turret Viewfinder can be used on any Argus camera equipped with an accessory shoe. To mount, slide the viewfinder into the camera's accessory shoe as far as it will go. The end with the ARGUS name and single lens goes toward the rear of the camera.

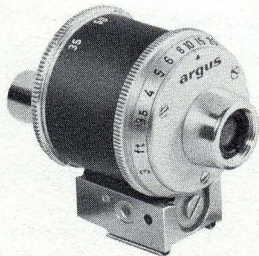

Special outlets on the side of the viewfinder allow the use of flash with the Argus C44 and Argus Flash Extension Bracket. Mount the Flash Extension Bracket on your C44 with the case safety screw, then plug the cord into the viewfinder's outlets. Mount the C44 Flash Unit on the Flash Extension Bracket as you would on the camera.

With the viewfinder in place on the camera, set the turret on the front of the finder for the lens you are using. Rotate the turret until an index dot falls into the click-stop opposite the focal length of your lens (35-50-100). There are three index dots, with click-stops for each. *The illustration shows the setting for the 100mm Telephoto Lens.*

It is necessary to rotate the turret through approximately one-third of a turn when changing settings from one lens to the next. Turret can be rotated either way.

On the rear of the viewfinder is the parallax correction dial with the index mark on top. Rotate this dial in either direction until the distance from the camera to the subject is opposite the index mark. *The illustration shows the parallax adjustment set at 10 feet.* Either side of the double scale can be used.

FOR SERVICE OR REPLACEMENT PARTS FOR YOUR TURRET VIEWFINDER OR OTHER ARGUS EQUIPMENT, CONSULT YOUR LOCAL ARGUS DEALER OR WRITE TO: Product Service Department, Argus Cameras, Ann Arbor, Michigan or Toronto, Ontario.

Lifetime guarantee

Your Argus Viewfinder was manufactured, inspected, and tested by skilled craftsmen. It is guaranteed to be free of defects in workmanship or material during its lifetime. If any servicing is necessary because of imperfections in materials or workmanship, your viewfinder will be factory serviced without charge.

Argus equipment which has been damaged, mishandled, or worn from extended use will be factory serviced at established rates. Used or rebuilt equipment is not covered by this guarantee.
